Construction of the golf course and reclamation plant is held not inconsistent with park purposes, and it is the attorney's opinion that both could be built by the park board. If money used for water purchases must be raised by taxation, the amount must be included in the tax levy for maintenance of the park. There is, however, no legal objection to the donation to the park board funds of money the city might earn in any of its proprietary capacity.

Plans and specifications to the contract are not passed on by the attorney, and his opinion is submitted subject to approval by the engineering department and the state board of health. The plant suggested would have a maximum capacity of 3,000,000 gallons a day and a reservoir capable of holding 5,000,000 gallons.

May 18, 1930, San Diego Union, Vacation Section, 11:1. Summer music program at Organ Pavilion.

May 18, 1930, San Diego Union, II, 1:3. 7:1. Park reduction plant opposed by Grand Jury; members, acting in "unofficial" capacity, site health factor in letter to Council.

Opposition to the proposed water reclamation plant in Balboa Park was expressed yesterday by members of the county grand jury in a letter to the city council on the ground that the plant might prove a menace to public health.

In giving out the letter for publication the grand jurors emphasized that they had not considered the matter in an official capacity, but as a group of representative citizens and that their communication should be viewed only in that light.

The letter, filed with the city clerk, pointed out that the state health department, in approving the project, did so only on condition that the city assure itself that the private parties who are to finance the reduction plant have ample funds to insure against danger of contagion. It said:

From evidence duly acquired by it in the course of its investigation into the sanitary and economic phases of a certain contract, authorized by city ordinance 12780, approved April 10, 1930, by the terms of which contract it is proposed to permit the construction in Balboa Park, by private parties, of a sewage-reduction plant and other projects, the grand jury finds the following objections to said contract and to the ordinance authorizing the same, appear to be substantiated:

1. A dual water system in Balboa Park might become a menace to public health.
2. A letter from the state health department appears to be construed by the proponents of this project as an approval of the plans for said plant. This is not a correct interpretation, however, as said letter specifically warns against entering such an enterprise unless the finances are such as to insure adequate precautions against the ever-existing danger of contagion, and that this danger has not yet been eliminated from any sewage-reduction plant yet found in California.
3. In the aforesaid contract it is stated as fact that the cost to the city of water now used for Balboa Park irrigation is in excess of \$120,000 per annum, and it is indicated that this money would be available for other purposes if water from the proposed sewage reduction plant was used for such irrigation. This appears to be a false construction of costs, for according to evidence as to the estimated cost, if the city could actually save \$120,000 per annum by merely quitting the use of city water for park irrigation, it could by the application

of this money for a period of about four years pay the entire estimated cost of construction of all the projects provided for in said contract, reclaim all the water necessary for irrigation of all parts of the park and, in addition, effect a very substantial saving.

4. The aforesaid contract obligates the city to pay a minimum of \$97,000 per annum for a period of 15 years which, with the proposed green fees added, appears to make the venture highly profitable to the payee.
5. The aforesaid contract specifies that "the benefits to be received by the city from this contract are in excess of the obligation assumed." There is nothing in the said contract, however, to warrant such a conclusion.
6. According to the terms of said contract the part of the second part thereto agrees to assume certain specified responsibilities, yet no provision is made for a bond to insure the performance of his obligations.
7. The ordinance here-in-before referred to provides for the creation of a fund from which to meet the financial obligation assumed by the city in accordance with the terms of said contract. The evidence at hand indicates that the creation of such a fund would mean an additional tax burden of no small proportions.
8. There is lack of authoritative approval of this enterprise as such, the city attorney's approval being as to the legal form of this contract only.

It is requested that this communication be considered as a protest against any action by your honorable body that would result in installing in Balboa Park an irrigation system that might prove to be a menace to public health.

It is not intended that this communication should be construed as embodying opposition to a suitable golf course as an added park attraction.

Respectfully submitted.
SAN DIEGO COUNTY GRANT JURY.
By William Kettner, foreman.

June 28, 1930, San Diego Union, 9:1. Citizens assert park water plant not needed now; 43 sign petition against Seifert golf course project; offer alternative plan.

A protest against construction of a water reclamation plant by Frank Seifert and his associates was filed yesterday with the city clerk by Jerauld Ingle and 42 other citizens or taxpayers of San Diego.

The petition asserts that water reclamation from sewage is not now necessary and maintains that there is plenty of water for the city at present. All other sources of water should be developed before the sewer lines are tapped, the protest says.

The proposed contract by which the promoters would install a reclamation plant and golf course in the park is for the benefit of private interests, the petition recites, and adds the project has not been recommended nor advised by the health or water departments or any other city department.

The petitioners assert they are in favor of a golf course in the park and recommend that one be installed, to be financed by council appropriations of \$75,000 annually for two years. They add that if it becomes necessary to reclaim sewage, the golf course will provide the interest and the sinking fund for the plant.

The proposed Seifert contract will necessitate an expenditure of \$97,500 a year, with an aggregate minimum of about \$1,500,00, the petitioners assert and maintain that the expenditure is unnecessary. They also say the projected cost to the city of the reclaimed water is much greater than the cost of pumping water from the San Diego river.

The following names are appended to the petition:

Wayne Compton, Jerauld Ingle, Armand Jessop, J. A. Hemstick, Warren T. Chadwick, John F. Forward, Jr., R. J. Blair, C. H. English, F. H. Thatcher, Frank G. Forward, Chester H. Whalen, C. S. Holzwasser, L. G. Bradley, R. J. Gwinn, E. O. Hodge, Paul Jennings, J. G. Driscoll, Jr., C. S. Holliday, J. M. Whitley, M. T. Gilmore, George L. Barney, Heber J. Ingle, F. D. Carper, John E. Boal, G. A. Davidson, C. O. Tanner, Melville Klauber, A. J. Thornton, Roy M. Ledford, M. D., H. W. Wheaton, H. C. Gardiner, Wilbur F. Wilson, Chester N. Munson, Chester Munson, Frank F. Faust, Charles O. July, 1930, California Garden, Vol. 22, No. 1. Parks As I Know Them by C. I. Jerabek

"Where is Balboa Park?" usually the first question asked by the tourists. And why is this? Largely because here there have been planted trees, shrubs and plants from all over the world. Mr. J. G. Morley, Superintendent of Parks, has kept them in groups, and a rotation of bloom continues the year round. In some parts the vegetation is as dense as any jungle and in others there are beautiful flower beds or spacious lawns with trees or palms scattered about. Balboa Park is a veritable paradise for the botanist and the horticulturist.

It would be impossible for lack of space to tell about the thousands of plants that are grown here, so I will mention a few by families. The shrubs in this article are in the *Myrtaceae* family and are commonly called bottle brushes from the cylindrical shape of the flower clusters.

Melaleuca Huegelii (sometimes called *imbricata*) has leaves resembling fish scales, light green, flowers white, a thick, compact shrub when young.

M. ericifolia has leaves linear, like the heather, flowers yellowish, white, bark soft.

M. armillaris is a graceful shrub with pendulous branches, soft needle-like foliage and in the spring spikes of white flowers about three inches long. A group of them can be found southeast of the Sixth Street Aviary. In this same planting are some fine *Huegelii*, *ericifolia*, and *styhelioides*.

M. hypericifolia with oval, flat leaves, opposite and slender, dull green in color resembling St. John's Wort, but the flowers are orange scarlet, usually inside of the bush. Some good shrubs may be seen along the Prado east of the California Building.

M. nesophila (sea loving) has small, oblong, glossy leaves of a bright green. The flowers are about an inch long, of a deep lavender shade. A group of these are on the east side of the driveway leading to the Girl Scouts' Building.

M. leucadendron (silver or punk tree) has leaves oblong, about two inches in length, silvery, flowers creamy white, bark thick and spongy. This can be separated in thin sheets like tissue paper; reminds one of Birch bark. There are some of these trees here and there among the shrubbery along the west side of Twelfth Street, also a fine grove of them near Pershing Drive and Arizona Street. Another tree with similar

bard is *M. styhelioides*, a small-leaved variety. Leaves about one-quarter inch, slightly twisted, with a very sharp point, creamy white flowers. A large group of these fine trees are along the bank south of the Natural History Museum.

And then there are the *Callistemon lanceolate* hybrids (sometimes called *melaleuca*) which come in cream, salmon, yellow, and all shades of red. After these shrubs bloom they should be pruned heavily as the new growth is as pretty as the flowers, coming in delicate shades of pink and bronze. There is a fine planting along the west approach to Cabrillo Bridge; also on the rim of the canyon south of the Montezuma Gardens.

Callistemon rigidus is a stiff-branched shrub with narrow leathery leaves, flowers deep red, about five inches long. There are about twenty fine shrubs along Twenty-eighth Street near Ash.

Metrosideros tomentosa, called the New Zealand Christmas tree because it generally blooms around the Yuletide. Its oval leaves are gray and downy underneath (often mistaken for *Pittosporum crassifolium*), a very ornamental tree. There is one at the side of the walk near Seventh and Juniper Streets.

Along Quince Street hill, east of Sixth Street, you will see some shrubs that at a first glance might be taken for *Melaleuca*. They are *Calothamus quadrifidus*. The foliage is deep green, needle-like, about three-quarters of an inch long, flowers a deep red, cylindrical, very imperfect, only part way round.

July 1, 1930, San Diego Union, 10:1. Council decides not to inquire into Park cost; Alexander and McMullen defeated in move for acceptance of Presidio.

July 2, 1930, San Diego Union, II, 12:4. Councilman Alexander wants people to know upkeep of parks; starts inquiry into costs of maintaining lands given by Marstons.

July 4, 1930, San Diego Union, II, 1:2-3. \$203,000 lopped off city budget in fast round; operating and park departments suffer; salary increase probable.

July 5, 1930, San Diego Union, 1:3-4, 2:4. Spanish ambassador here to unveil statue of El Cid.

July 8, 1930, San Diego Union, 5:5. Council accepts Presidio Park in stormy session; cost of upkeep causes heated discussion; Alexander opens attack on gift.

July 9, 1930, San Diego Union, 1:7. Financial help for park units to be chopped; budget cut of \$72,160 to be levied against Art Gallery and Museums.

July 10, 1930, San Diego Union, 11:5-6. Frank Y. Van Vrelin, president of Grant School, arranges for children to have free summer trips through park institutions.

July 11, 1930, San Diego Union, 1:6-7, 3:4. Council slashes funds to Balboa Park attractions; Park Board declares Fine Arts Gallery and two museums will have to be closed unless deduction of \$72,000 is reconsidered; Lester F. Olmstead, Park Board Chairman, says cuts "make San Diego sideshow to border activities."

Doors of the San Diego Museum, the Fine Arts Gallery and the Natural History Museum will have to be closed to the public unless the City Council reconsiders its recent action in slashing \$72,000 from the Park Commission's budget request for \$252,000, it developed at a meeting of the Park Board yesterday afternoon.

The three park commissioners turned sympathetic ears to requests of representatives from the three institutions for financial aid, but declared they were powerless to do anything unless the Council gives them money.

Representatives from the museums and gallery seemed to recognize the Park Board's stand, and decided unofficially to recruit about 25 persons to go before the Council in a determined effort to get a larger appropriation for the Park Department.

During the fiscal year just ended, the San Diego Museum, from Park Department funds, got \$12,000, the Fine Arts Gallery, \$20,000, and the Natural History Museum \$2,200.

"When the Council blue-penciled \$72,000 from the budget request," Lester T. Olmstead, chairman of the Park Board, said, "it made the statement that we were not to cut our force of employees." The only way the Commission can abide by that, the commissioner said, is to cut off the museums and gallery.

Earlier in the day the Council refused to listen to Frank J. Belcher, Jr. and Julius Wangenheim when they appeared to urge more appropriations for the three park institutions.

A note from the two was read to the Council by Louis Maire, presiding in the temporary absence of Mayor Clark, called away to a port officials' convention.

"Do you want to hear these two gentlemen?" asked Maire.

His colleagues, declaring the council already had taken a stand for lower taxes, agreed they didn't care to hear Wangenheim or Belcher. Notwithstanding, Wangenheim rose to address the Council.

"I just wanted to ask a question," he said. "I want to know if you realize the different museums will have to close."

Councilmen said this appeared to be an unfortunate contingency, and the two representatives from the park institutions left. Later, when the budget for the park was discussed, several councilmen said it was their understanding that the museums and gallery would get what is left of the \$180,000 after the normal park requirements are met. This normal, they indicated, was the amount spent on parks last year, exclusive of the institutions. Councilmen appeared to feel that \$180,000 was not spent in the park exclusive of the museums last year, when an allowance of \$204,000 was granted the parks.

After some discussion, the Council agreed to find out exactly what was spent last year on parks outside the money spent on museums and again to notify the Park Board that the amount above the park expense should be allowed the museums.

That the City Council seems to lose sight of the fact that the City Charter forces the Park Board to give the Zoological Gardens yearly two cents out of the tax rate, was the opinion expressed by park commissioners.

Last year, the Park Board said, they received 13-1/2 cents on the dollar of assessed valuation. This year, they say, they are to get a fraction more than 11 cents, leaving them a net of nine cents after the Zoo gets its money. Rate for the park is a 10-cent minimum and 16-cent maximum.

John W. Snyder, who appeared before the Park Board, said it "was a shame to close the museums and gallery. The community is aroused to the necessity of entertaining tourists," he continued, "and with the city's best step forward in this direction, it would be unwise to close the park institutions."

W. J. Bailey, vice president of the San Diego Museum, who appeared before the commissioners, said that what revenue his institution gets from outside of city funds goes into research.

George W. Marston, a park commissioner, said “that money should be used for operation. We can’t go into scientific research when we can’t keep the doors open and floors swept.”

Closing of the three institutions would put about 17 persons out of work, it was said.

Wangenheim also appeared before the Board. The only other solution, he said he saw in the matter, was a “relaxation on the part of the Council in its order to the Park Board not to cut its forces.” He suggested that the museums receive a smaller amount than last year, and that the Park Board do a little more pinching.

“If you have to stick to the recommendation of the Council to keep your force, you can’t help leaving us out,” he said. “The fault lies with the Council and they won’t listen to us.”

W. S. Wright, of the Natural History Museum, also addressed the Board. He referred to the program of the San Diegans to entertain tourists and intimated that closing of the museums would be a direct slap in the face to the Chamber group.

“Close the doors of the museums,” Snyder added, “and you will make San Diego more of a sideshow than ever to activities below the border. Our civic assets must be protected.”

July 12, 1930, San Diego Union, 1:6-7, 3:4. Citizens assert City must keep park museums, art gallery open; proposed closing for lack of funds would be economic and cultural loss to City.

Closing the Fine Arts Gallery and the two Balboa Park museums which the Park Board says will be necessary unless the City Council reconsiders its action in slashing \$72,000 from the Park Commissioner’s budget request, would be a serious loss to the community, prominent citizens said yesterday in expressions made to **The San Diego Union**.

Mayor Harry C. Clark said the closing of these institutions would be “unthinkable.” “Closing the Fine Arts Gallery and the San Diego and Natural History Museums,” he said, “would be extremely unfortunate for the community. It may be necessary to curtail expenses, but the institutions should not be closed. If they are, it would be a serious loss to San Diego.”

The park budget request was high, Mayor Clark said, and “is being re-figured, making allowance for individual institutions. It will be submitted to the City Council Tuesday.

Dr. E. L. Hardy, president of San Diego State College, made the following statement: “The Fine Arts Gallery and the Balboa Park museums are cultural and educational assets to individuals of this community and have great publicity value to the city. I believe that this matter can and should be adjusted without closing the institutions, which would be most unfortunate.”

“The idea that our Fine Arts Gallery and museums should be closed for lack of funds is incredible,” said Mrs. Frank Grandler, retiring president of the Wednesday Club. “To possess these institutions is such good fortune for a city that their closing would be a calamity. I cannot believe that we shall be guilty of such short-sightedness. The cultural institutions of this city offer an attraction to just the sort of tourists and new residents we want. From a utilitarian point of view, we need our art gallery and museums, aside from the fact that they are a job and inspiration to the people now here.”

Mrs. Homer Oatman said: “The Fine Arts Gallery and museums are San Diego’s finest possessions. To lose them would be a great detriment to the city, since they are our major attractions. It seems unfortunate that such a thing should even be considered, especially now that the Chamber of Commerce is doing such excellent work and San Diego women are working so earnestly for the advancement of the city.”

“Citizens should know just why such a reduction is necessary,” said Miss Josephine Seaman, first vice president of the California State Federation of Women’s Clubs, “and just what are the city needs which would be met by the sum that is curtailed from the budget requested for maintaining Balboa park, the Fine Arts Gallery and museums. Taxes are high and should be adequate to provide for proper maintenance of the

city's finest assets. Such a reduction may be necessary --- I do not know exactly why it is necessary. Undoubtedly, closing of the park gallery and museums would be a great loss to the entire community."

July 12, 1930, San Diego Union, 4:1. EDITORIAL: The Budget and the Park.

San Diego cannot close the San Diego Museum, the Fine Arts Gallery or the Natural History Museum in Balboa Park, even for one year or part of a year.

All efforts to adjust the new budget to suit the city's requirements for the coming year, must be governed by that inescapable fact. These institutions and their activities are profoundly important to the city --- far more important to San Diego than the work of similar institutions is to the life of other cities which maintain them. They are definitely a part of the civic life of our city, and they cannot be closed without irreparable injury. The city council must take that into consideration. The park board must realize that fact.

We frankly recognize that current conditions call for retrenchment; but if times are to become better, rather than worse, that retrenchment must be wisely managed. Any injury to Balboa Park, or to the nationally known institutions that serve thousands of visitors every year, would constitute the wildest kind of extravagance.

We are inclined at this time to discount the drastic claims of both the immediate parties to the argument. We doubt the wisdom of a cut so drastic as the \$72,000 reduction which the common council has ordered against the park board's budget estimate. We doubt the accuracy of the statement made by the chairman of the park board to the effect that closing of these three institutions is the only alternative. There must be an adjustment here. No matter which party has to give in and make concessions, these institutions must be kept open and their normal activities maintained.

Nothing tends to aggravate hard times so much as the extravagant timidity which leads business men and public officials to curtail essential activities at the moment when depression appears. The attendance records, the national publicity, the opinions of our leading citizens, all go to prove beyond any doubt that the institutions in question here are among San Diego's essential assets. To impair them is to serve notice to every citizen and to untold thousands of visitors that San Diego is in desperate circumstances. That is not true. It can be made true, however, by impairing our greatest assets at a season when we most need them.

If the difference of opinion between the council and the park board cannot be ironed out in any other way, we suggest the mayor appoint a committee of dependable and disinterested business men to study the park board budget and the needs of the institutions under the board's administration. We should be assured that these business men are aware of the importance of the park activities. And when their decision is made, there should be a general demand that the city meeting the resulting budget proposal.

It can be done. The city is not bankrupt. It can afford to maintain its most important assets unimpaired by false economy.

July 13, 1930, San Diego Union, 17:4. Free park trips are offered to local children; second week of visits to various institutions will start next Tuesday.

July 13, 1930, San Diego Union, II, 1:1, 8:3. Councilmen Maire and McMullen claim park buildings need not be closed; budget provides ample funds; tentative provision is only \$26,000 less than last year.

July 13, 1930, San Diego Union, II, 7:1. Movement started to erect carillon in Balboa Park, idea presented by English bell foundry, by Wallace Moody.

July 15, 1930, San Diego Union, 1:6, 3:3-4. Council raises park's fund by \$10,000; bitter argument staged; total fixed at \$190,000 by three to one vote; Commissioners say amount will do "with skimping."

Responding to appeals for more funds, the council by a three to one vote, added \$10,000 to the park budget yesterday, and precipitated one of the bitterest discussions of the entire budget hearing.

The vote to add the money, making the park total \$190,000, was followed by a motion to permit the park board to spend the money in the manner it deems best for the city and the park.

Councilmen McMullen then announced he would seek to allow various city departments the same increase as given the park board, as changed. He was joined by Councilman Alexander, who also voted against the \$10,000 increase to the parks.

McMullen also said he would seek advice on whether the parks could be allowed more money than would be raised by a tax of 16 cents on each \$100 assessed valuation, contending that the \$190,000 allowance, with water costs, exceeds the 16-cent rate.

The addition to the budget was made after George W. Marston and W. C. Crandall, park commissioners, had stated their belief that the park could skimp along on \$190,000. This would mean, Mr. Marston said, after the \$10,000 was allowed, that there would have to be reductions in allotments to institutions. He estimated that the \$190,000 allowance would suffice, with a 40 percent cut in museum appropriations, a 10 percent payroll cut and an indefinite percentage from the supply account.

Discussion preceding the vote was long and, at times, rather involved. Deciding to meet in the afternoon, when they found the council docket completed at noon, councilmen summoned the park board without the 25 prominent citizens who has been expected to appear before the council today at a budget session.

Crandall told the council he had gained the impression that it wanted all park budget cuts borne by the institutions, stating this had been transmitted through the secretary from the city auditor's office, but councilmen denied that was their idea.

Crandall said there was little likelihood that the Natural History Museum would close even if the city aid was completely eliminated and added that city assistance to that institution amounts only to the salary of one man, about \$2,000.

Mayor Clark said he had expected the Fine Arts Gallery to do a little trimming in its budget, asserting he was surprised no cutting had been done. The mayor said that private funds supply at least half of the Fine Arts galleries finances.

"If the council allowed every department to operate like the Fine Arts Gallery, the city would go broke," Alexander said. He found fault with the fact that the institution has a director, assistant director, superintendent, secretary, assistant secretary, stenographer, guards and watchmen, and held there was too much help around the place.

Commissioner Marston pointed out that \$31,000 of the park appropriation must be turned over to the zoo by vote of the people, and the park board has control over only the rest. Marston agreed with Crandall there was no intention to get the council in a "jackpot" over budget appropriations.

The park board's statement to the institutions on the budget cuts was based on the assumption that the council wanted all the cuts borne by the institutions, and if such is not the case the board withdraws what it has said on the matter, Marston added.

Commissioners and councilmen went into a mass of figures to try to find out how much would be available for the institutions under the proposed \$180,000 park budget. There was talk of cutting the park payroll, and Dowell took the floor.

“If for the sake of keeping open the art gallery, we’re going to take food out of the mouths of wives of workmen, it is a shortsighted policy,” he said. “If we take out the cut in salaries and wages we’re going to hear a protest that we can’t resist. The museums won’t close in spite of all that has been said.”

Discussion on the relative matter of the organ and the other park institutions took a little time. No agreement was reached. Commissioner Marston pointed out that for less than \$50,000 San Diego gets an organ, the Fine Arts Gallery, San Diego Museum, California Building and similar institutions, a record not equaled by other cities, he added.

Discussion of private financing of institutions followed. Marston expressed the belief that without some municipal funding it would be difficult for some of the institution to continue.

Councilman Alexander asserted that he had conferred with Frank J. Belcher, Jr., last week, after the council had refused to listen to Belcher’s park plea.

“He took me into his office,” Alexander said. “He said, ‘You boys are perfectly right. The park is getting enough. You’re right about the institutions in the park, but I can’t come out and say it.’ That’s just the way. The slap the institutions on the back and then they slap us on the back.”

Mayor Clark created a diversion by wondering what should be done with the buildings in the park. It was agreed that some of them should come down, but no decision was reached on which one would be wrecked. It was agreed that money spent on repairs to the old exposition structures would be wasted..

Then talk switched to salaries, and Alexander asserted that if lower taxes were wanted the city would have to cut off some men and reduce salaries. The mayor expressed the thought that instead of discharging men the city would let them work four days a week in the park department.

Irey then suggested that this be done in all departments. Dowell objected that a municipality’s business was almost all labor, as it brought no great supplies to manufacture, as do industrial corporations with which Alexander was comparing the city.

Then the amount to be allowed the park came up again.

Allow use \$140,000 for payrolls and expenses,” said Commissioner Marston. “Say we cut the museums from \$30,000 to \$19,000, making a total allowance of \$190,000 and we get by on a skimpy basis.” He added that the zoo’s \$31,000, over which the park board has no control, would be included in the \$190,000 total.

“If you raise this, I will come in and work for increases in every department, not saying the park isn’t necessary,” said McMullen.

“Why not reduce the zoo?” someone asked.

“I’m in favor of it,” McMullen said. “They’re charging the children admission now.”

It developed that the zoo rate is fixed by charter amendment voted by the people and no reduction is possible unless by another vote.

Then the vote was taken on increasing the park budget to \$190,000, which is \$14,000 less than the amount allowed last year. Maire, Irey and Dowell voted for it, and Alexander and McMullen against it.

“You’re not going to get away with it,” warned McMullen. “I knew they would high pressure some of you and make you change your vote.”

“You may have to go to court over this,” Mayor Clark warned Commissioner Marston.

Proceedings were interrupted briefly by a discourse between Irely and Alexander on the amount of talking each one does. Irely said that he would talk if he wished, and Alexander say he would like to hear him talk more. Irely said he could talk as much as he wanted to and Alexander also asserted his ability to talk.

“No one questions that you talk all the time,” flared Irely.

“Well, I can talk if I want to,” returned Alexander.

After the talking matter has been settled to the satisfaction of neither participant, McMullen said he believed the people in voting a 16-cent limit on park appropriations believed that the money would cover all expenses. He said that with the water cost added to the \$190,000 the total was more than would be raised by a levy of 16 cents on each \$100 valuation.

An opinion of this matter was requested by Councilman Alexander. In a preliminary ruling, Judge Conkling said that on the surface it appeared that the 16-cent limit was in addition to any other taxes the city might raise for parks. He is now supposed to be working on a more formal opinion on this matter, as McMullen announced he intends to have a showdown on the matter.

With this out of the way, the council discussed the water development budget briefly and adjourned without setting another meeting date.

July 17, 1930, San Diego Union, II, 1:1. Water charge discussed.

July 18, 1930, San Diego Union. 1:7. Budget increased.

July 27, 1930. Park Commission favors widening Park Boulevard, north of Yorick Theater Building, realigning Cabrillo Canyon Road; is projecting road through Powder House Canyon.

August 8, 1930, San Diego Union, 10:5 John Doane played organ to raise funds for Christmas day pageant.

August 10, 1930, San Diego Union, 11:1. San Diego Zoo wants City to return \$3,452 in Reserve fund; Mrs. Benchley says that auditor's transfer from Zoo fund to Reserve fund does not allow Charter levy.

August 10, 1930, San Diego Union, II, 1:1. San Diego entertaining 12,000 visitors here today; lodging places are jammed by tourist throngs at season peak.

August 11, 1930, San Diego Union, II, 4:3. Boy Scout Merit Badge exhibits will occupy the entire assembly hall at Indian Village; model troop headquarters also will be installed with patrol corners, lockers, totems, charts and all things that go to make up a local troop quarters; more details of the museum will be given at the scoutmasters' legion meeting soon.

August 12, 1930, San Diego Union, II, 1:6. Council refuses return of San Diego Zoo funds.

August 14, 1930, San Diego Union, 11:1. Marcelli brothers greeted at park concert, by Wallace Moody.

August 16, 1930, San Diego Union, II, 1:1-2. City Manager hopes to complete Pershing Drive widening; estimated cost of \$15,000 calls for construction of a five-foot shoulder on each side of present pavement over entire length of drive; shoulders will be of same material as existing road and will increase width of pavement to 30 feet.

August 23, 1930, San Diego Union, II, 1:1-2. San Diego play "Heart's Desire" will open tonight at High School Stadium for one week; more than 200 in cast dealing with early history.

August 25, 1930, San Diego Union, 6:4. W. S. Hebbard, Los Angeles architect, stricken with heart attack while visiting his daughter in Coronado.

August 26, 1930, San Diego Union, 1:5-6. Julius Wangenheim reports \$2,500 book stolen from Fine Arts Gallery; 15th century Italian "Book of Hours."

August 26, 1930, San Diego Union, 4:1. EDITORIAL: "Heart's Desire" . . . This is San Diego's own outdoor play.

August 26, 1930, San Diego Union, 5:5. San Diego Museum Fine Arts Gallery to retain funds; Council permits two park institutions to have use of unexpended balances.

August 28, 1930, San Diego Union, 9:1-2. Civic Orchestra delights audience, by Wallace Moody.

August 29, 1930, San Diego Union, 1:3. Park officials approve Torrey Pines road plan.

August 29, 1930, San Diego Union, 11:3. Bonds for state parks in San Diego County defeated by a small vote at Tuesday primary election; may become an issue at general election in November.

August 31, 1930, San Diego Union, 3:1. Lockwood opposed Seifert plan to build park golf links; says city can handle work cheaper, disapproves signing of contract.

Pointing out that the city could do the work at considerably less cost, City Manager Fred Lockwood yesterday recommended against signing a contract with Frank W. Seifert, former councilman, for a golf course in Balboa Park and a sewage reclamation plan near the 32nd Street outfall.

Under the proposed contract, which probably will be considered by the city council on Tuesday, Seifert and his associates would construct both units of the project and operate them until they had paid for themselves, with interest at 8 percent. Both golf course and a reclamation plant then would become the property of the city.

Lockwood, in disapproving the contract said the city should not operate with 8 percent money when money can be had for less than 5 percent. He also ruled against the projected purchase of reclaimed irrigation water at 21.4 cents per 1,000 gallons, saying that the water should be delivered for a little more than half that rate. Other objections made by Lockwood were as follows:

Plans for the development are very incomplete, while the contract should be based on submitted plans with full specifications.

Bids, awarding of contracts, construction work and bonds should be subject to the approval of city officials.

The contract should provide that the installations be maintained and operated at "full efficiency." Expenditures, payrolls and salaries should be approved by city officials.

It should also provide for accurate accounts of expenditures and revenues, while agreements for the sale of water, sludge and other income-producers also should come under the eye of city officials.

"I am very much in favor of reclaiming water from sewage and putting it to beneficial uses," Lockwood's report said. "But the city should make use of the most advantageous methods of accomplishing this reclamation.

"In my opinion the city should program these installations. The golf course should be the first installation and the amount of money which should be set up in the budget each year to pay for the 1,250,000 gallons of water, as proposed in the form of the contract submitted, in two years time will pay for the golf course and in another three years will pay for the reclamation plant."

The time that would elapse before the city, by purchase of water, paid for the two units under the proposed contract has been estimated at from 10 to 15 years.

August 31, 1930, San Diego Union, World-Wide Features, 7:1. Plans underway to enlarge cast in Stadium play; "Heart's Desire" success opens way to unite many civic units in feature, by Myron Lustig.

September, 1930. Synder Continuation School opened.

September 1, 1930, San Diego Union, II, 1:3-4. San Diego Zoo's exhibits increase in variety; python lays three eggs and regards them with disdain (illus.).

September 4, 1930, San Diego Union, II, 1:3. Dahlia section to be feature of Floral Show next Saturday and Sunday.

September 4, 1930, San Diego Union, II, 8:4. Council to consider park golf course today.

September 4, 1930, San Diego Union, 3:1-2. Council approves reclamation project; instructs City Attorney to get contract ready; Seifert defend project.

September 7, 1930, San Diego Union, 4:5. City Manager will argue against park golf and water reclamation.

September 7, 1930, San Diego Union, 14:4. Flower growers vie for honors at annual show; quality marks 24th fall display at Balboa Park.

September 7, 1930, San Diego Union, 15:1. Superintendent John Morley says \$10,000 unemployment relief appropriation set aside by City and County has benefited park; road, 6000 feet long realigned and graded through Cabrillo Canyon; one wooden bridge widened; new road 3600 feet long constructed connecting Cabrillo Canyon with park drive south of Organ Pavilion; two and one-half miles of bridle paths constructed; dead brush cleaned up.

September 7, 1930, San Diego Union, II, 1:8. County Fair to feature industrial exhibits; "golden anniversary" exposition, October 7 to 11, promises to surpass all previous efforts in magnitude.

September 8, 1930, San Diego Union, II, 1:1. Officials named for County Fair here.

September 8, 1930, San Diego Union, II, 4:3. Boy Scouts received 350 awards at Court of Honor in Indian Village.

September 8, 1930, San Diego Union, II, 8:4. Children enjoy San Diego Zoo trips.

September 10, 1930, San Diego Union, 8:3-5. Mme. Klosterman, pianist, scores at Organ Pavilion symphony, by Wallace Moody.

September 11, 1930, San Diego Union, 5:6. Frank F. Gander, naturalist, added to Natural History Museum staff.

September 11, 1930, San Diego Union, 12:2-3. Pershing Drive widening sure by end of year; improvement advancing rapidly; finished roadway to be 30 feet across according to City Manager Lockwood.

September 14, 1930, San Diego Union, 7:1. Mexican Independence Day celebration in park tomorrow; two-day observance.

September 15, 1930, San Diego Union, 5:4. "See Mexico Now" excursion, October 12 - November 1, headed by Richard S. Requa.

September 21, 1930, San Diego Union, 5:6. Extra symphony concert for benefit organ rehabilitation fund.

September 21, 1930, San Diego Union. II, 7:1. Schools closed when Fair held in National City back in 1880; buggies and saddle horses were at premium then for entire county attended, by Thornton Boulter

Next month in Balboa Park, another county fair will be held. It will occupy several large buildings and will offer as premiums nearly \$5,000 in cash, merchandise and ribbon awards. The showing, arranged as the most ambitious one ever held here, will be the golden anniversary of a fair held from September 22 to 24, 1880.

September 22, 1930, San Diego Union, 7:4-5. San Diego Zoo telephone busy with off calls.

September 23, 1930, San Diego Union, 6:4. Action delayed on Seifert plan; Councilmen set Monday for conference.

September 24, 1930, San Diego Union, 5:2. Civic Orchestra season closes, by Wallace Moody.

October 1, 1930, San Diego Museum Bulletin, No. 13.

An important source of income to the San Diego Museum is derived from rentals in the New Mexico Building, which is owned by the Museum. . . . The San Diego Museum Association purchased it several years ago when some of the unoccupied Exposition buildings were being demolished, and since that time has placed it in thorough repair and made it available to the public for the many purposes to which it is fitted. It contains a number of studios, suitable for artists and sculptors, an auditorium suitable for lectures and similar gatherings, a card room for card parties, dances, etc., and the delightful Spanish patio lends an added charm to any use made of the other facilities. The building has recently been made doubly accessible through the opening of a new road from the south, which also offers an approach during concerts at the Organ Pavilion.

October 2, 1930, San Diego Union, 10:4. Refusing to ban trucks again from Bancroft, 32nd and 6th Streets, the City Council yesterday ordered City Manager Lockwood to furnish cost estimates of truck arteries in Switzer and Power House Canyons.

October 13, 1930, San Diego Union, 8:5. 35,000 persons attend Fair in 6-day exhibit; Sunday opening adds 5,000 to total; 3,000 in excess of last year's record.

October 13, 1930, San Diego Union, 6:1. Expect decision on park sewage plant tomorrow; action on long delayed water reclamation project on Councilman's program.

Fate of the Seifert water reclamation and golf course plan may be decided tomorrow by the city council, which has set that date for a final decision on the project.

Under the plan advanced by Seifert, he would contract for the erection of a sewage disposal plant tapping the sewer outfalls on 32nd and 28th Streets. The effluent from the plant would be pumped to a reservoir in a canyon adjoining Pershing Drive in the park and metered to the city for use in irrigating the park. The cost of this reclaimed water to the city would be between 15 and 20 cents a thousand gallons under tentative plans. Proceeds of the sale of water would be used to amortize the investment of building both the disposal plant and an 18-hole grassed golf course which would be built by the project promoters. Upon amortization of the investment, with interest, the plant would revert to the city.

The council months ago passed a measure authorizing a majority of its members to contract for the reclamation plant and golf course. Since then numerous contracts have been drawn but signing has been postponed from time to time for one reason or another.

Several months ago the plan appeared to have been "buried" by common consent, but Seifert and his attorney appeared before the council and revived it. Manager Lockwood was asked for a recommendation and he recommended against the plan, declaring the interest rate provided in tentative contracts is much too high. He added that the city, by setting aside for several years sums equal to the payments that would have to be made on the reclamation project, could easily build a golf course, which was declared by some to be the biggest talking point of the whole plan. Payments by the city for water would run between \$90,000 and \$100,000 a year, it was estimated.

Because of negotiations over the disposal plant, the city's plans for moving the 32nd Street outfall, as desired by the navy, have been held in abeyance. The council promised to remedy the situation caused at the destroyer base by the outfall and made tentative provision for moving the outfall in the last budget.

Since that time the navy has again complained and there have been three more postponements of action on the reclamation plant. Councilman explained delay in moving the outfall on the grounds it would be unnecessary to move it if the disposal plant was installed and utilized the sewer's flow.

The council is reported sharply divided on the reclamation project. At a recent council meeting, Councilmen Dowell and McMullen spoke favorably on the project, while Irely urged more consideration and Maire was non-committal. Councilman Alexander, who is out flat-footedly against the project, was absent at that meeting. Since that time the council members, with the exception of Alexander, have made no public announcement of their stand on the project.

As the matter stands, three members could by signing the contract put it into effect.

Since the plan was first considered the city has joined with the county to put in a sewage reclamation plant at the new State College. Results of the operation of that plant probably will go far to determine the city's policy on sewage disposal. The disposal problem is being acute as the city grows and more outfalls pour sewage into the bay.

In the background of the whole disposal matter is a rumor that Hollywood film interests were planning to acquire large interests of the Otay mesa region, plant it in citrus or avocado, install a gigantic disposal plant in San Diego and uses reclaimed water for irrigating the groves. Plans for this project were reported to have been fairly well advanced before the stock market crash of last year rattled the back teeth of the film men.

Ten to 15 million gallons of reclaimed water a day was reported to be the goal of the plan.

October 15, 1930, San Diego Union, 5:4. No action taken on Seifert's reclamation plan yesterday; Seifert now wants to divert all bay sewage.

October 19, 1930, San Diego Union, 2:1-2. William Templeton Johnson, architect, defends harbor site for civic building; denies piling, noises, dampness present obstacles.

October 19, 1930, San Diego Union, 12:4. Two grizzly bears and chimpanzee join San Diego Zoo family.

October 20, 1930, San Diego Union, 10:1. Loris, strangest of animals, are "at home" in San Diego Zoo (illus.).

October 21, 1930, San Diego Union, 1:5. Definitely rejecting the Seifert water reclamation-golf course project yesterday, the Council agreed to consider a much large water reclamation proposition whereby an irrigation supply would be developed sufficient to irrigate thousands of acres of land lying on the coastal plain and foothills south and east of the city.

October 21, 1930, San Diego Union, 5:3. The Council yesterday adopted a resolution transferring thousands of dollars from the Reserve fund to the Zoo fund after Dr. Harry Wegeforth and Mrs. Belle Benchley told the Council that the fund represented Zoo savings of last year which went into the Reserve fund last June 30.

October 22, 1930, San Diego Union, 4:1. EDITORIAL: Good Bye Golf Course

That grassed golf course, situated in Balboa Park and irrigated with water from a sewage-reclamation plant, apparently has turned out to be another mirage. The objection to it, according to the public prints, was the reclamation plant. Now, however, in its place we are to have a bigger and better sewage-reclamation plant without the golf course attached. The latest reclamation project reported under consideration at the city hall is quite a project as projects go.

Promoters of the latest golf-course proposition wanted permission to establish a grassed course in Balboa Park with a reclamation plant in conjunction to supply irrigation. They proposed to develop the course at their own expense, paying rental and a share of the profit and turning the course over to the city after a term of years. The opposition has knocked that plan very cleverly --- but the substitute project, announced yesterday, would appear to be just a bit extravagant.

The substitute is a reclamation plant far bigger than the one proposed by the golf-course promoters -- one which eventually would dispose of all the city's sewage. The water developed would be used to irrigate, not a golf course, but "many thousands of acres: of agricultural land south and east of the city.

Many San Diegans have felt the need of a playable municipal golf course. The yearning to irrigate the many thousand of acres aforesaid would appear to have been confined to the owners of the acres. And if a sewage disposal plant of the proposed type would be objectionable in connection with the needed golf course, it would be objectionable anywhere else.

We have no decent municipal golf course, and are not likely to have one, but we have been taken for some nice buggy rides.

October 22, 1930, San Diego Union, 4:1. EDITORIAL: Eighty Years

Mr. George W. Marston celebrates his 80th birthday today, and some thousands of his fellow-townsmen will observe the day by expressing their surprise that he has attained an age that some call "old." Mr. Marston came to San Diego as a youngster, some 60 years ago. For all those three-score years, he has devoted himself to his business, his civic ideals, his friends, with an ardor and an energy that have remained youthful. He is known as a civic benefactor, but his generosity has always been active, purposeful, self-starting. He has never been "old." He is not "old." It will take more than an 80th birthday to make him so.

Our birthday wish is that Mr. Marston's youthful enthusiasms may long continue to postpone his ripe old age.

October 24, 1930, San Diego Union, 2:2. San Diego Zoo asks money transfer; City Clerk requested to prepare ordinance shifting sum from General Fund.

November 2, 1930, San Diego Union, 7:5-6. San Diego Zoo's preparation for winter involves simple, sometimes odd protection for "rigors."

November 3, 1930, San Diego Union, 7:2-5. Sketch prepared by San Diego Architects' Association of proposed Civic Center building.

November 4, 1930. Proposition 2: Shall the City of San Diego abandon and discontinue the use of portions of Balboa Park as a park and dedicate the portions so abandoned to the municipal use as public streets and highways?

Yes	22,833
No	12,854

November 5, 1930, San Diego Union, 1:5-6. Civic Center site beaten on basis of early returns.

November 6, 1930, Resolution of the Board of Park Commissioners changing the name of Arroyo Drive to a "Park Drive." (City of San Diego Public Library).

BE IT RESOLVED, by the Board of Park Commissioners of the City of San Diego, that the projected road through Balboa Park from point of intersection with Pershing Drive near cobblestone bridge running approximately in a northerly direction to the north boundary of Balboa Park to connect with Florida Street, shown and described on Nolen Map on file in office of Board of Park Commissioners as ARROYO DRIVE be, and the same is hereby designated as a PARK DRIVE, to be developed for use such in accordance with the general lines of the said Nolen Map.

I hereby certify that the foregoing is a true and correct copy of Resolution passed and adopted by the Board of Park Commissioners, November 6, 1930

(Signed) A. S. Hill
Executive Secretary,
Board of Park Commissioners,
City of San Diego, Calif.

NOTE: Above resolution appears to be a preparatory toward step toward deterring the use of Powder House Canyon as a truck road. RWA.

November 6, 1930, San Diego Union, II, 2:5. City Commissions face abolition in new City Charter; may be discarded with special taxes according to freeholders' sentiment.

November 9, 1930, San Diego Union, II, 1:5. 2:7. Truck road plan in Balboa Park blocked by Park Board ruling to keep trucks out of Balboa Park; unemployment relief balked; City to act soon on Pershing Drive work.

City administration plans for cross-town truck roads through the park have been dealt a severe blow by the recent decision of the Park Board to keep trucks out of Balboa Park.

In a resolution adopted at the last meeting the board designated the projected Powder House canyon truck road as a park drive to be developed and used as such. This bars trucks from the road, which runs from a junction with Pershing Drive near the cobble bridge to the southern end of Florida Street..

The Board also rejected plans to permit operation of trucks on Pershing Drive but went on record in favor of widening the drive.

Two commissioners were present at the meeting in which the truck question was discussed. Commissioners W. C. Crandall and Lester T. Olmstead joined in adopting the resolution. Commissioner Marston was not present.

The Powder House Canyon road has been urged by truck men who want a shorter route across town. The city and county have set up a \$10,000 fund for unemployment relief and it was planned to spend the money on the Powder House Canyon Road. This, councilmen agreed, would give the city and county a useful road in return for the money.

Mayor Clark had advanced a plan for widening and thickening Pershing Drive to a point where trucks might be operated over it without damaging the road. This also was turned down by the Park Board.

Whether the Park Board's action in declaring that Power House Road a park drive will affect the plans for expending unemployment relief money there had not been determined yesterday. The park board's action is to be brought before the council tomorrow, and at that time the council probably will decide whether to go ahead and improve the road as a drive or to find some other place to expend the fund.

Manager Lockwood is to lay before the council tomorrow his plans for widening Pershing Drive. These provide for an additional 10 feet to the road on straightways and greater widening on curves, with cutting back of the curve banks to provide more visibility. In addition, the drive bridge would be widened from its present 25 feet width to a width of 50 feet.

The bridge widening and additional work on the turns bring the cost estimate of the job up to \$17,000, Lockwood said. The council has \$15,000 set aside for the work. If the additional safety of wider turns and wider bridge is not deemed advisable at this time, they may be left off and the work done with the \$15,000.

Addition of 10 feet to the width of Pershing Drive will give the drive a width of 30 feet.

November 11, 1930, San Diego Union, 1:7. Unpaved section of 6th Street to stay in park; canvass reveals removal defeated at recent election; Torrey Pines plan wins.

November 13, 1930, San Diego Union, II, 1:1. Colonel D. C. Collier predicts great development for San Diego in near future.

November 22, 1930, San Diego Union, 6:1. Mayor Clark recommends city emergency unemployment relief funds be used to work on a golf course and bowling green in park.

November 23, 1930, San Diego Union, 3:2-3. Big snakes at San Diego Zoo get lunches whether they want them or not; to be served today.

November 25, 1930, San Diego Union, 5:5. The Council adopted Mayor Clark's recommendations for expenditure of unemployment funds on the park bowling green and golf course yesterday; fund totals \$5,000; plan to open up a road through Power House Canyon from Pershing Drive to Florida Street abandoned because of opposition of Park Board to operation of trucks on road.

December 3, 1930, San Diego Union, 1:4. San Diego County will vote late January or early in February on the issuance of \$435,000 in bonds to match a like amount offered by the State Commission for four park sites in San Diego County.

December 7, 1930, San Diego Union, II, 1:7. Mayor Clark announced yesterday that placement of men under the city's unemployment relief plan will start next Thursday when men begin making a bowling green layout in the park; the green is to be constructed in the old rose garden north of the west end of Cabrillo Bridge; the old garden was doomed by a parasite and is to be duplicated in another section.

December 7, 1930, San Diego Union, II, 3:1. O'Rourke Library given valuable book collections.

December 7, 1930, San Diego Union, II, 16:2-3. Arthur H. Hill sets forth advantages of Civic Center in park along Date Street from 6th Street to 9th Street.

December 8, 1930, San Diego Union, 5:3-4. Maurice Allen objects to posterior view of "that spirited nag ridden by El Cid."

December 13, 1930, San Diego Union, 3:6. City Planning Commission approved yesterday maps and plans showing projected development of Mission Bay Park as a state park.

December 14, 1930, San Diego Union, II, 1:3-4, 2:5-6. Santa's branch factory in War Memorial Building, Balboa Park, going full blast getting toys ready for children of needy veterans.

December 16, 1930, San Diego Union, 1:7-8. Council signs contract on widening Pershing Drive.

December 17, 1930, San Diego Union, 9:4-5. Birds and beasts at San Diego Zoo write letter to **San Diego Union** telling their Christmas wants.

December 18, 1930, San Diego Union, 1:5. James Milburn, who constructed Cabrillo Bridge and was Superintendent of Construction of the 1915 Panama-California Exposition here, dies last night in Los Angeles.

December 18, 1930, San Diego Union, 6:1. Organists' Guild to give 15 recitals at Balboa Park during winter season; starts today.

December 21, 1930, San Diego Union, World-Wide Features, 9:3-5. Christmas program at Organ Pavilion; living pictures of Nativity to be given after lapse of one year on Christmas night.

December 23, 1930, San Diego Union, 11:4. Christmas program at Organ Pavilion; joint chorus of 50 voices from Morning Choral and Cadman Clubs will sing antiphonally.

December 25, 1930, San Diego Union, 11:2. Christmas program at Organ Pavilion; John Doane, New York organist, gave concert here last summer to raise money for Christmas observance..

December 26, 1930, San Diego Union, 9:2-3. Nativity pictures, concert at Organ Pavilion.

December 31, 1930, San Diego Union, 5:2. Big San Diego Zoo python will get large New Year meal; public invited to see reptile "put on nose bag" tomorrow afternoon; arrived at Zoo early in October.

1931

Summary of Events in 1931

(Note: Dates of events are approximate only.)

Albert Einstein Visits (January 1, 1931)
New Shuffleboard Courts at 6th and Redwood (January 10, 1931)
Council Allots \$30,000 to Build Golf Links (January 22, 1931)
Bear Dens at Zoo (February 15, 1931)
Park Bonds Rejected (March 11, 1931)
Natural History Museum Offered New Site (May 1, 1931)
Indian Day (May 31, 1931)
Children's Fair in Indian Arts Building (June 7, 1931)
Community Theater in Park Promised (June 13, 1931)
Plans for Civic Center in Park (June 28, 1931)
Council Wants to Dictate Organ Programs (July 19, 1931)
Mission San Diego Dedication Fiesta
in Balboa Park (September 12, 1931)
Exposition Proposal (October 18, 1931)
Nine-hole Golf Course Opened (October 31, 1931)
San Diego Museum Relinquished Control
of Indian Arts Building (November 19, 1931)

January 1, 1931, San Diego Union, 10:4 Eight thousand greet Albert Einstein at Organ Pavilion.

January 1, 1931, San Diego Union, Special Section, 3:1-2. San Diego Zoo ranks with best in United States, by Belle J. Benchley, Manager.

January 1, 1931, San Diego Union, Special Section, 3:7-8. Daily recitals at Spreckels Organ, by Dr. Humphrey J. Stewart.

January 1, 1931, San Diego Union, Special Section, 4:7-8. Works of famous artists displayed by institution in park, by Reginald Poland, Director, Fine Arts Gallery.

January 1, 1931, San Diego Union, Special Section, 8:1-2. Natural History Museum magnet for visitors, by Clinton G. Abbott, Director.

January 1, 1931, San Diego Union, Special Section, 9:6-7. Scientific collection in San Diego Museum shows history of man's early existence.

January 1, 1931, San Diego Union, Special Section, 10:6. W. W. Whitney library offers wide variety of scientific data.

January 1, 1931, San Diego Union, Special Section, 10:1-2. Natural History Museum carries message to 82 rural schools.

January 1, 1931, San Diego Union, Special Section, 10:7-8. Balboa Park famed throughout world for its scenic beauty.

January 6, 1931, San Diego Union, 1:3, 2:4-5. City Council may use surplus Otay pipe funds for building park golf links; ordinance to appropriate \$100,000 authorized; other projects planned for unemployment relief.

January 8, 1931, San Diego Union, 5:2-5. Timkens present two paintings to Fine Arts Gallery; masterpieces by Dierick Bouts and Jean Chardin on display, by Reginald Poland (illus.).

January 8, 1931, San Diego Union, Classified, 8:5. Council to act on golf project next Monday; Councilman Dowell sees benefit to San Diegans in proposed expenditure of \$100,000.

January 10, 1931, San Diego Union, 10:3. New shuffleboard courts in Balboa Park at 6th and Redwood to be dedicated today.

January 11, 1931, San Diego Union, 14:5. \$100,000 lacking for golf course; Otay Pipe Line Reserve unavailable; probably \$25,000 will be appropriated on unemployment relief plan; \$151,000 in City Reserve Fund at present.

January 13, 1931, San Diego Union, 1:2, 3:1. Council fails to vote funds for golf course; members to meet Park Board tomorrow; relief of jobless urged.

January 13, 1931, San Diego Union, 8:4. Mayor Clark appointed Samuel I. Fox member of Park Commission yesterday.

January 15, 1931, San Diego Union, 1:3, 3:5. Council agrees to develop park golf course as job aid; nine-hole grassed course long desired, favored for unemployment relief.

January 20, 1931, San Diego Union, 5:5. Action on Golf Course Delayed; problem of later enlargement to 18-hole project engages Council.

Action on the projected new nine-hole golf course in the park was delayed by the council yesterday pending information on whether it would be possible to later put in a standard 18-hole golf course without extending it across Pershing Drive. The projected nine-hole course is what is termed standard size and might not hook in later with a standard course without material changes which the council feared would mean throwing away money.

Park Superintendent Morley estimated that the nine-hole course could be put in from \$30,000, of which \$16,127 would go for labor and the rest for materials. The labor figure proved a disappointment to Councilman Maire. Questioned by Maire, Manager Lockwood told the council that on new road projects in the park probably 78 percent of the cost would be labor charges. The council will hear more on the golf course matter tomorrow afternoon at a special meeting.

January 22, 1931, San Diego Union, II, 1:3. Council allots \$30,000 to build park golf course; project will provide work for 40 men three days a week; may be enlarged.

January 22, 1931, San Diego Union, II, 10:1. Marston thanks city officials for resolution voicing appreciation for park services; he recently resigned from Park Commission.

January 25, 1931, San Diego Union, 1:5, 3:2. \$730,000 causeway across Mission Bay opened at formal ceremony.

San Diego Sun, January 26, 1931. WHO'S WHO IN SAN DIEGO: Builder of Exposition, Col. D. C. Collier, by W. G. Bray (photo)

That glorified circus of progress --- the exposition --- which thrilled San Diego in 1915, is not a thing of the past but remains a great asset to the development of our city and state.

This opinion coming from David C. Collier, whom Who's Who for 1931 lists as one of San Diego's most distinguished citizens, carries weight of an authority. Collier possibly is the nation's foremost expert on the operation of world expositions. He has been identified with nearly every great fair held in the past twenty

years. The exposition is his avocation and hobby. He is thoroughly acquainted with the objects sought by displays of progress, their management and the profit obtained in the area which sponsors one.

Reaching his 60th year, Collier has lost none of the dynamic personality or desire for business adventure which has gained him an international reputation. Though he has spent months and years directing expositions through his ability in politics, the law and real estate development.

In the early part of the twentieth century the lawyer came to San Diego. He visioned great programs for the small city at that time. This vision of development eventually led him into shaping the famous Panama-California Exposition of 1915 which made San Diego known throughout the world. His achievement in launching this municipal enterprise has brought him executive positions in other exhibitions.

His ability was enlisted in the operation of Brazil's great fair in Rio de Janeiro, when President Harding appointed him commissioner general to represent the United States. Following this appointment Philadelphia called on him to be director general of the Sesqui-centennial international exposition in 1926. This vast undertaking was started and well organized when Collier decided to resign because of political interference.

He has since assisted in launching the contemplated Chicago World's Fair of 1933, the next display of United State's achievements in the world.

"This talk of the eclipse of the world's fair through modern facilities of transportation and information is nonsense," Collier declared. "The halcyon day of the exposition has just arrived. Industry and culture must advertise its accomplishments more than ever.

"Evert well-managed state fair and national exposition in North America is growing every year in importance of exhibits and attendance. A fine example of this is the annual Canadian National exposition held in Toronto. Last year the fair had more than 1,000,000 paid attendance in 16 days."

Asked whether San Diego had profited from its successful display in 1915 and '16, Collier called the event "the greatest development in the history of San Diego."

"Here is an illustration of the Balboa park's fair value to the community. I was asked to become director general in 1909. I received no remuneration for my services during the five years of the formation and I spent a considerable sum in doing the work. However, despite this time and expense, I profited from the resulting development of San Diego as a realtor." Collier developed the territory east of Balboa park into the University Heights residential section.

"The permanent construction of the exhibition buildings have become valuable public property instead of the white elephants which the jerry-built structures of the Sesqui-Centennial have proven to Philadelphia. The California building is the most beautiful structure developed by any exposition in the nation."

. debacle of the Philadelphia Sesqui-Centennial as the result of bad management, greediness and political middling.

"The possibilities of this exposition would have been tremendous had the politicians been willing to bide their time affording leading industries exhibitions and merchants an opportunity to build impressive displays. With an entire year's leeway, Henry Ford alone would have erected a million-dollar display to show the advancement of the automobile industry.

"However bartering of concessions, a determination to open the exposition before it was thoroughly prepared to impress the world and sloppy construction of its buildings and works doomed it to be an expensive failure. Political opposition to my objection on these grounds resulted in my resigning.

“The success of the world exposition depends on two factors,” he pointed out, “industrial exhibits, adequate amusement facilities.”

He predicts great success for Chicago’s fair in 1933 and, supporting this belief, added the prophecy that “Chicago has the faculty of making a success of everything it has undertaken.”

January 27, 1931, San Diego Union, 1:6, 3:3-6. Timkens present works of Rubens, Murillo and Ribera to Fine Arts Gallery, by Reginald Poland.

February 1, 1931, San Diego Union, Sports, 1:3-7. Work of grassing San Diego’s first all-grass municipal golf course will start tomorrow (drawing).

February 15, 1931, San Diego Union, II, 3:5. New bear’s den at Zoo clever in imitations; bruins feel at liberty in modern double grotto for polars and grizzlies.

When you catch your first glimpse of the new double bear grotto at the San Diego Zoo, you feel for a second as if a bit of the Painted Desert or the Grand Canyon of the Colorado had shifted its position, bringing some of the colorful red sandstone cliffs with their caves and washes into the heart of Balboa Park. So cleverly indeed is the stage concealed that even the bears themselves still believe they are at liberty and continue to explore the hidden recesses of the caverns and the depths of the pools perfectly happy in the complete freedom of their pretentious new home.

This is the home of the polar bears and the grizzly bears, long contemplated and just completed. For six long years the great polar bears have been forced to share the only open bear grotto in rotation with the “happy family” of bears from all over the world. They have not been unhappy; in fact, they have been very comfortable in their downstairs quarters, where they have had plenty of running water, plenty of light and room, and plenty of food. But the public was disappointed in not seeing them, and the only things the bears truly lacked was a bathing pool.

In the new grotto there is a pool built well out into the center so that it can be seen from every angle. It is deep and long and wide, built with a high diving wall across the back, and in the big pool the bears spend most of their time. One of them plays with an old casing just as a small boy uses an inflated tube in the plunge. The other two splash and duck each other and have a wonderful time. But they can always be coaxed out for a bit of food tossed by a visitor.

Shipped to the Southland from their home when they were very young cubs, these polar bears know nothing of ice and snow, of cold weather or the terrible struggle for existence that goes on among their kind in the arctic regions. Here they are fed fruit and vegetables in the summer; bread and cooked meat and mash in the winter to thicken their blood. This balanced feed keeps them physically fit for every sort of weather.

In the northern section of the grotto, the grizzly bear cubs are just as much at home as their distant cousins on the other side of the high dividing wall. They were three years old at least when they left their home in Yellowstone National Park to live in San Diego and they know all about red clay and sandstone caves and canyon walls. They know all about tourists who leave bacon rinds, sandwiches and wonderfully smelling tips around campfires and they know that when man appears there is sure to be food, so they stand erect on the very edge of their deep dry moat and motion the people to throw them a sugar lump, looking like a catcher signaling to his pitcher.

February 20, 1931, San Diego Union, 7:5-6. William Von Mueller defends Park Superintendent in Plaza palm death case.

April 8, 1931, San Diego Union, II, 1. Iris big feature of spring Flower Show in park this weekend.

April 11, 1931, San Diego Union, 1:3. San Diego Zoo python will get first square meal since January 1; public invited.

April 12, 1931, San Diego Union, 14:1. Floral Society offers display (illus.).

April 13, 1931, San Diego Union, 1:4-5. Python at San Diego Zoo eats with aid of 18 men and sausage machine.

April 15, 1931, San Diego Union, II, 1:4. San Diego Museum, organized 1911, by Dr. Edgar L. Hewett; Clinton G. Abbott, director; Miss Alice Lee, president.

April 25, 1931, San Diego Union, 5:3. Park Department asked yesterday for fund transfer aggregating \$3,004.72.

The Board seeks to transfer \$3,004.72 to the golf course account. Transfer needed because of diminished revenues of the links. The public prefers grassed courses elsewhere.

May 1, 1931, San Diego Union, 1:2. 2:3-4. Natural History Museum offered new park site; will build \$200,000 unit of fireproof structure by popular subscription.

Official designation of a new Natural History museum site in Balboa Park was made by the board of park commissioners at its meeting yesterday afternoon when Joseph W. Sefton, Jr., president, and Clinton G. Abbott, director, representing the San Diego Society of Natural History. Appeared before the board with preliminary plans for a proposed new building.

The area selected is the site of the former civic auditorium, which lies diagonally across the street from the building at present occupied by the museum. The decision announced yesterday was the result of a thorough survey of available park territory which previously has been made by members of the park board, officers of the Society of Natural History, and William Templeton Johnson, who has been retained by the society as architect.

It was brought out at the meeting that in attempting to look as far as possible into the future, consideration in selecting the site was given to accessibility, both for the public and for service purposes, ample space for the parking of automobiles, room for future growth, and preservation of park areas which are now horticulturally developed.

The matter of providing fireproof protection for the continually growing collections in the Natural History museum has been a foremost objective of the San Diego Society of Natural History, according to its representatives at the meeting yesterday, ever since the civic auditorium burned down in 1925 when the present museum building narrowly escaped destruction in the same conflagration.

Since then the building (designed for temporary purposes as an exposition structure, has been disintegrating until a move to a permanent home has become imperative. It was announced that Miss Ellen B. Scripps, though whose generosity the present Natural History museum was established and who has shown much interest in its progress, has offered to meet the expense of a comprehensive architectural plan for a new museum, units of which might be built as money became available. In this way haphazard construction, which later might prove to have been a mistake, would be avoided.

Such an ultimate plan would include ample exhibition halls with room for the anticipated increase of the exhibits, research laboratories, children's museum, library, auditorium, etc.

Designs submitted by Mr. Johnson contemplate the eventual use of an area west of the civic auditorium site, the intervening roadway being bridged by connecting arches. The park board agreed to tentative reservation of this area for the museum's expansion, if needed. Such area would be definitely required should the proposed consolidation of the San Diego Museum and the Natural History Museum be effected in future years.

"The fact that we are asking the park board to designate an area and having plans for a fireproof museum prepared," said director Abbott, in commenting upon the situation, "does not mean that we are in a position to start immediate construction. The matter is so urgent, however, that we are at least taking these first necessary steps. It really lies with the citizens of San Diego whether they care enough about the Natural History Museum to see its possessions properly protected.

"Miss Scripps indicated that she will contribute to the building fund, but she will not meet the entire expense alone, and even her tentative offer is contingent upon substantial contributions by others. We are, therefore, earnestly appealing to San Diegans to make possible construction of the first essential unit, costing about \$200,000, soon.

"The collections, number hundreds of thousands of specimens now contained in the tinder-like Natural History Museum are beyond value, because they are irreplaceable. The San Diego Society of Natural History, which operated the museum, is the oldest scientific organization in southern California, having been established in 1874 and some of its possessions are animals which are now totally extinct. Definite counts show that an average of 1,000 persons daily enter the museum for recreation and education. We have before us the example of the California Academy of Sciences in San Francisco, which was completely destroyed by fire in 1906. Losses to science, as a result of that fire, can never be overcome.

May 4, 1931, San Diego Union, 1:1-5, 7:1-5. Hazel Bradshaw, 20, found stabbed to death in Indian Village.

May 8, 1931, San Diego Union, 5:6. Chamber of Commerce votes against 1935 fair plan; leaders say banks and industry will not support such an undertaking now.

May 17, 1931, San Diego Union, 4:1. Army Reserves plan horse show in part May 31; proceeds will be donated to equipment fund of City Child Hygiene Bureau

Jumping will play a big part in the events of the second annual Army Reserve Officers' Charity Horse Show, according to announcement yesterday by the general manager of arrangements, Captain Fenton S. Jacobs, commanding officer of the 11th Cavalry Detachment at Fort Rosecrans.

The horse show will be held Sunday afternoon, May 31, at the county fair grounds in Balboa Park and the net proceeds will be donated to the equipment fund of the Child Hygiene Bureau of the Department of Health of San Diego.

May 17, 1931, San Diego Union, 5:1. Students to exhibit work in building at southwest corner of Plaza de Panama, June 5, 6 and 7.

May 25, 1931, San Diego Union, 6:2-4. Memorial Day ceremonies in Balboa Park next Sunday.

May 25, 1931, San Diego Union, 6:2-4. Mountain Indians of San Diego County reservations will be guests at Indian Day celebration in Balboa Park next Sunday, sponsored by County Federation of Women's Clubs.

May 26, 1931, San Diego Union, 1:1-2. The City Council and Board of Supervisors made a new move yesterday to build city county building in Balboa Park.

May 31, 1931, San Diego Union, Classified, 6:1. Memorial Day ceremonies; Admiral Senn reviews line at Organ Pavilion; music, oratory feature program.

June 1, 1931, San Diego Union, 5:1. La Jolla Beach Children's Pool dedicated; citizens attend ceremony at which \$65,000 gift of Miss Scripps is accepted.

June 5, 1931, San Diego Union, 10:1. Shuffleboard park tournament gets underway.

June 7, 1931, San Diego Union, 6:1. Children's Fair opened last Thursday in Visual Education Room of old Indian Arts Building at southwest corner of Plaza de Panama.

June 13, 1931, San Diego Sun, II, 1:2. Plan drawn for \$50,000 Civic Theater; Community Play proceeds will go for building; Governors named; structure will be located on Park Boulevard just north of the old Yorick Theater, which is soon to be razed; Spanish-type theater designed by Wayne F. McAllister, architect of Agua Caliente; will seat between 400 and 500.

June 14, 1931, San Diego Union, II, 1:7, 3:1-2. Community Theater in park expected early next spring.

June 15, 1931, San Diego Union, 4:1. EDITORIAL: A Theater Promised . . . As a sign of civic growth, this new theater is immeasurably bigger than its building permit would indicate.

June 16, 1931, San Diego Union, 7:5. Park Board asks for development of small parks for San Diego; wants \$1,000 for Mountain View area; would sidetrack Balboa Park.

June 28, 1931, San Diego Union, II, 1:1-7, 3:5-6. Plans made for Civic Center in Balboa Park. W. P. Lodge, local architect, advances Laurel Street entrance as best location; will present specifications for City and County buildings to Committee; bridge is feature.

June 28, 1931, San Diego Union, II, 6:1. Frank Kimball backs Warburton on park program; criticizes Dr. Stewart's choice of organ music.

Editor: I think Mr. Warburton's stand in favor of the development of small neighborhood parks is well taken. The northeast section of San Diego certainly is in great need of small parks, its distance from

Balboa Park and from the beaches, combined with the rapid development and increased population of this section, calls for some serious consideration on this subject by members of Park Board.

Captain Crandall says that "it has never been the policy of the Board to discourage small parks," but it is evident also that it has not been the policy of the Board to encourage small parks. I am glad to see that Mr. Warburton is interested in this matter, which is of the utmost importance to the approximately 50,000 people who live northeast of Balboa Park, and this number is constantly increasing.

In regards to a newspaper poll on the curtailment of the organ recitals, as suggested by Mr. Fox, I am of the opinion that a poll on a change of selections used in the programs would be better received. There are a great many thousands of San Diegans, including myself, whose musical education has been neglected to such an extent that it is impossible for them to enjoy the present programs; nevertheless, we are music lovers also and we should be considered. A glance at the organ recital programs published in **The Union** conveys nothing to most of use. "Scherzo by Capocci" or "Il Barbiere di Siriglia" might mean a new brand of macaroni or some new kind of facial cream as far as most of us are concerned.

Surely it should be possible to arrange a program once in a while that we ordinary people could enjoy, some real American music, both old and new numbers, some popular music, even a little jazz once in a while would help some.

Seventy-five percent of the people of San Diego would enjoy that kind of music. I have often wondered what percent enjoys the other kind. If the organ is just to be used for a chosen few I suppose that we will just have to "grin and bear it," but, in all seriousness, I firmly believe that the great majority would welcome a change in the selections played by the present official organist, whose aversion to anything that could be likened to popular music is so well known.

FRANK KIMBALL.

Nothing could be more illogical than the demand that the council cut expenses on the public park features already developed in order to have money to spend on the development of public park projects not yet begun. It is a demand that the city reduce upkeep in order to undertake expansion. The development of a park system cannot begin simultaneously all over the city. It has to begin somewhere. No intelligent citizen or visitor will deny that the beginning --- the western area of Balboa Park --- has been well made. It would be the height of folly to curtail its usefulness and beauty now, in order to make half-hearted beginnings elsewhere.

There is no economy in any proposal to impair one of the city's most widely noted assets.

July 16, 1931, San Diego Union, 4:1. EDITORIAL: The Park Organ

Despite the criticism that arises from time to time against Dr. Humphrey J. Stewart, official organist at the Spreckels outdoor organ in Balboa Park, one incontrovertible fact remains. Dr. Stewart's programs are not cheap. They may be "too heavy," as the critics allege, but they embody always the judgment of a distinguished and thoroughly musicianly organist. We believe that they often fail to please many listeners who are sincere, intelligent and reasonably well educated musically. That is to be regretted --- but it is perhaps unavoidable where any one musician is compelled to arrange daily programs over a long period of time. But it is a fact --- and we believe it to be tremendously important --- that there is no cheap, shoddy or vulgar strain in Dr. Stewart's musical taste.

The great organ should not cater, we believe, to the tastes of those whose musical needs could be better satisfied by dropping a coin into a nickelodeon.

August 9, 1931, San Diego Union, II, 1:1-8. Natural History fireproof plant to be started within 90 days; Miss Ellen B. Scripps gives \$100,000 toward first unit; sponsors ask public to help raise funds; ultimate plant estimated to cost about \$1,000,000; will create a total frontage of 520 feet facing the Prado and separated from it by broad lawns 110 feet wide (drawing).

The eastern, or right-hand frontage, designed to stand upon the civic auditorium site, represents the south facade of what eventually will be a building 384 feet deep, totally devoted to public exhibits and displays. West of this building and connected with it by an archway is the frontage of a building designed to house the scientific library, laboratories, work shops, children's museum, school department and similar activities other than exhibits. Still further to the west is the entrance to an auditorium accommodating about 750 persons. The arrangement of the buildings is such that north of the archway will be created a large new plaza with ample parking facilities for many cars.

Start of building operations at this time is made possible through the generous offer of Miss Ellen B. Scripps of La Jolla to contribute \$100,000 toward erection of a first unit or \$125,000 toward a first unit and wing. Builders' estimate of the total cost of these projects are \$137,000 for the first unit and \$182,000 for the first unit and wing.

It has been decided by the museum officials that the first construction will be the front part of the eastern building, the area now containing the foundations of the old civic auditorium. Here, at least for the next few years, accommodations will be provided both for exhibits and laboratories, the side of the project whether merely the first unit or the first unit and wing, being dependent upon the amount of public subscriptions to supplement Miss Scripps' munificent offer.

. . . The terms of Miss Scripps' offer are that contracts be signed within 90 days.

"San Diegans," said Sefton, "have many times demonstrated the place which Balboa Park, its institutions and its buildings, occupies in their affections, when they have subscribed for the rehabilitation of the old buildings and have taken a stand against the many park encroachments of various kinds. Many of the exposition buildings are now beyond repair and the idea solution is their gradual replacement with permanent structures."

August 27, 1931, San Diego Union, II, 2:1. Half-Minute Interviews.

P. M. Andrews, Attorney: I suggest that the Park Board use a couple of sacks of plaster and have those eyesore places at Balboa Park entrance fixed. Visitors to the park and street car passengers say everyday that the city keeps the front door of the wonderful park --- that is loved by countless thousands --- looking like the side of a barn after a kicking mule has knocked holes in its side.

August 28, 1931, San Diego Union, 4:1. EDITORIAL: ""Shabby Portals"

We commend the suggestion made by Mr. P. M. Andrews yesterday in the "Half-Minute Interview" column anent the sorry condition of the eastern portals of Balboa Park. One of the defects of temporary construction, like that in the park's arcades, is that it does not wear the antique air at all graciously. Stucco, unlike stone or concrete, loses dignity with age. It becomes cracked and querulous and run down at the heels. The advantage, however, is that when repairs are needed, they can be made inexpensively. It would cost comparatively little to make the arcade as good as new, and it ought to be done. The approach to the park is important.

Everyday several hundred visitors get a first impression of Balboa Park from a gateway that fails to do it justice.

October 14, 1931, San Diego Union, 7:3. Sees Harbor Tax for Exposition; asks amendment to new charter to pay interest on \$2,250,000 in 1935.

A request that the council put on the ballot a proposition to amend the new city charter by making the \$150,000 a year harbor tax available for bond interest on an exposition bond issue of \$2,250,000 was made to the council yesterday by Carl Heilbron, Ed L. Head and D. C. Collier. They are directors of the proposed centennial exposition here in 1935.

The exposition bond issue would be asked for then, the councilmen were given to understand. The buildings of such an exposition would be on the waterfront.

The \$150,000 harbor tax provided in the new charter is for capital expenditure only under the present charter setup. It will run for a limited time, far less than the length of an ordinary bond issue.

The council submitted the request to the legal department for an opinion on whether the new charter could be amended before it went into effect.

October 15, 1931, Minutes of the Board of Park Commissioners.

Present: Commissioners Fox and Warburton. Absent: Crandall.

Plan for rehabilitation of Plaza Fountain accepted, work to be done under supervision of John Morley and Wm. P. Benson, park electrician.

City Ministerial Association to hold Thanksgiving service at the Organ Pavilion; instructed to make arrangements for use of the organ with Royal A. Brown, acting as organist during the absence of Dr. Stewart.

The opening of the golf course was talked over again. It was the decision of the Board that the official opening should be on Saturday, October 31. Mr. Crandall, as president of the Board, to meet with the mayor to plan the program.

October 17, 1931, San Diego Union, II, 10:1. Urge recreation center in northeast part of Balboa Park to aid jobless.

October 18, 1931, San Diego Union, Classified, 5:6-7. Letter, Harry Warburton, city park commissioner, regarding exposition proposal.

Editor: The proposition made to the city council by D. C. Collier, Carl H. Heilbron and Ed Head last Monday, "that the council put on the ballot at the coming special election a proposition that \$150,000 set aside in the new city charter for harbor work, be diverted to an interest and sinking fund for \$2,250,000 bonds to be issued in behalf of Collier's proposed exposition on the tide lands in 1934" is too preposterous for us any longer to treat it as a joke, which is the attitude of most people toward the proposed exposition.

Every department of the city administration recently worked long hours together with the city council, sitting as a budget committee, to cut to the bone the 1931-32 budgets. They were forced in many instances to eliminate absolute essentials and necessities, such as additional fire halls, arc-lights, electric traffic signals, police radio system, prowler cars and even small items, costing but a few hundred dollars. All this was done with determination on the part of the present city administration to cut the city tax rate as low as possible and yet permit the departments to function.

The result was a cut in the tax rate from \$2.19 to \$2.17, this lower rate on this year's low assessed valuation is the equivalent of \$1.89, as compared with last year's \$2.19. The many essentials that were cut from the city budget of this year will be needed more next year and each succeeding year as the city grows, and if the city is to issue bonds for \$2,250,000 then let us use the money for these essentials necessary for public service and utility and of permanent benefit.

The special election will ask the taxpayers to authorize the expenditure of a sum of money for the much-needed development of water at the El Capitan site. It also will ask for the issuance of \$300,000 bonds to create an unemployment fund, also to be spent on essentials. This will be enough to ask of the taxpayers at this time. Should any such proposition as this exposition bond be put on the ballot, there would be a great danger of the taxpayers turning everything down.

When this proposition of an exposition in 1934 was brought up by Collier some time ago before the Chamber of Commerce it was turned down by a vote of about 40 to 4. If the citizens of San Diego decided in the future that they want another exposition, then let us place it in Balboa Park, where it was before. We have there at the present time a number of units, such as the Zoo, the Fine Arts Gallery, The Museum and other exhibitions, also the organ and the Geographic Building (which is to be built in the near future), together with its exhibits. There are many paved streets and many acres of well developed trees, shrubs and gardens, several of the buildings are permanent structures. There is your exposition site already two-thirds complete. It is possible that by reinforcing and strengthening, some of the old exposition buildings can be made permanent, but should a survey show this remodeling not practical owing to the condition of the buildings, then they could be razed and the salvaged materials used in the construction of permanent buildings in the same locations.

We are all proud of Balboa Park as developed at present, and if we follow this plan and complete these permanent buildings we could stage expositions and conventions in these buildings for many years to come, and not have to raze them at a later date to make way for warehouses or factories.

This letter and opinion is purely personal, and I do not know how the other two park commissioners feel about my plan, but I sincerely hope that the city council will not permit this impractical proposition to be placed on the coming special election ballot and cause embarrassment to the taxpayers and other bond issues.

HARRY Warburton,
City Park Commissioner.

October 22, 1931, San Diego Union, 7:3-4. D. L. Roscoe favors putting post office in Balboa Park Civic Center.

October 23, 1931, San Diego Union, 10:1. Harold Taylor, member of Coronado Rotary Club, showed San Diego Rotarians colored stereopticon slides of 1915-1916 Exposition yesterday.

October 31, 1931, San Diego Union, 7:1. Park links to be dedicated today; Austin to speak; civic leaders will play' public opening set for 1 p.m.

Announcement that all arrangements have been completed for the formal opening of the new nine-hole golf course in Balboa Park at 10 o'clock this morning was made yesterday by David n. Millan, president of the San Diegans hospitality and recreational bureau of the chamber of commerce.

S. I. Fox of the park board will be chairman of the dedication program. Speakers will include Mayor Walter Austin, Sam Fox, George W. Marston, Councilman Louis Maire and Joseph Russo, Supervisor Hastings, John Morley, and Millan.

The course was constructed at a cost of \$35,000 from unemployment funds. The project was conceived by the San Diegans as part of its comprehensive program for creating additional facilities for the tourist and visitor and for citizens of San Diego.

An invitation for citizens and visitors to attend the dedication ceremonies is extended by Millan. The course will be open to the public at 1 p.m. today.

November 1, 1931, San Diego Union. Captor of Zoo Gorillas to Lecture in San Diego

When Martin Johnson, famous big game hunter and photographer, who will speak here November 9, brought the two African gorillas, Congo and Ingagi, to this country two months ago, he determined to find the most ideal climate and surroundings before deciding where their future home would be.

Though many zoos and several circuses were eager to buy them Johnson finally sold them to the San Diego Zoo, selecting that as the most idea spot for the home of the five-year old gorillas. Congo and Ingagi arrived here less than a month ago. They are feeling very much at home in their cage at the zoo and are looking forward to a visit with Johnson when he comes to San Diego.

When Johnson and his wife started on their greatest safari into the wilds of the Belgian Congo two years ago, one of their main objectives was to capture gorillas alive and bring them to this country. There were at that time only seven gorillas in the United States.

After many weeks of tracking, Johnson later wrote "through jungle and across mountain ridges, our chance to make a capture came one day when two young gorillas, each weighing 100 pounds, climbed a tree while we were trailing them.

Working frantically, the 40 natives, porters of the expedition, cleared the space around the tree while Johnson tried to keep the young gorillas in the limbs by meeting the advances of a huge old gorillas who seemed bent on saving the two young ones. Finally, after hours of preparation, the tree was chopped down and the gorillas caught and covered with cloths and tarpaulins. "Every boy," Johnson said, describing his great event, "closed in with his heavy cloths, shouting and yelling in a whirling frenzy of gorillas and men."

Congo and Ingagi were taken care of in their trip to this country by two natives whom Johnson brought for that purpose. Arriving in New York in fine condition, they traveled to San Diego by railway express, accompanied by R. J. Virden, foreman of the San Diego Zoo. Virden, who stayed in the car with them day and night not removing his clothes during the entire trip, states they are the oldest gorillas in the United States and that they may live to be 40 or 50 years old

The lecture will be given at Russ Auditorium.

November 1, 1931, San Diego Union, II, 1:3, 8:6. Grassed course opened with ceremony; Mayor Austin drives first ball off tee in City's new recreational project.

With Mayor Walter Austin driving the first ball off No. 1 tee, San Diego's nine-hole golf course in Balboa Park was thrown open to public play yesterday afternoon. Special dedicatory ceremonies were held in the morning. Besides the mayor, members of the city council, park commission, other city and county officials and citizens participated in the opening program. Genial Dave Smith will be in charge of the course as pro.

San Diego has had a municipal golf course in the park for several years, but it was not grassed. Several months ago the council voted funds to rebuild it into an all grass links as part of a move to relieve unemployment.

F. W. Gordon purchased the first greens fee ticket and Ernie Parrott and Jim Borders, San Diego golfers, turned in two 34's, two stroke over par. Chet Keller got a 35.

In a brief talk, Mayor Austin said he looked back eight or ten years to the time when he tried to have a city-owned grassed golf course. "Although conditions were excellent, nothing ever was done," the mayor said. "It took the depression to bring about the improvement." Mayor Austin was warm in his praise of former Mayor Harry Clark, under whose administration the work was started.

Sam Fox, chairman of the park commission, said: "The Park Board is extremely proud of the new improvement to the park, through the building of this course. It is an ill wind that blows no good. Through the depression the city gained a recreational asset at a time when least expected." Fox then introduced the mayor.

Former Mayor Clark reviewed the numerous attempts before money for the work was finally voted. He also said much credit was due the San Diegans for making the course possible. Louis Maire, councilman, said the council was glad to have constructed the course and that an effort is being made to make the park one of the outstanding recreational areas in the country.

What is called "the outside nine" of the full 18-hole course also may be grassed soon, it was intimated by Edgar Hastings, supervisor.

"Through the county welfare commission the county had an opportunity to help build this course," Hastings said. "We were glad of the chance and are ready to provide both men and machinery for continuing the work."

David N. Millan, president of the San Diegans, said his organization played only a small part in making the course possible, and thanked the mayor and the council for their efforts. John Morley, park superintendent, said he hoped the people of San Diego would enjoy the course. George W. Marston, former park commissioner, expressed confidence the course would be popular and worth the effort and money invested in it.

Some of the problems encountered in building the course were recited by William Bell, golf architect. Bell, however, said he was satisfied with the results. The course, he said, would be an interesting one and should provide much enjoyment for the player.

The first foursome to play the course was composed of Mayor Austin, with Tommy Getz substituting; Sam Fox, George Marston and David Millan. Their respective scores were 47, 61, 44 and 46. In the second foursome were Louis Maire, 48; J. Morley, 46; Harry Warburton, 16; and W. A. Kearns, 49.

November 1, 1931, San Diego Union, II, 15:1-5. New Carmelite monastery on rim of Mission Valley at end of Hawley Boulevard to be finished in six months; Frank J. Hope, Jr., architect (drawing).

November 8, 1931, San Diego Union. "Ingagi" and "Congo" from Alumbongo happy they quit Africa for San Diego; but Zoo pair may get even with captors.

Editors Note: The two newest and most famous members of the San Diego Zoo family are "Ingagi" and "Congo," a pair of mountain gorillas and the only ones of their kind in captivity. Through a system of careful eavesdropping and with the aid of Mrs. Belle Benchley, the 8-year old couple talked yesterday for publication and their conversation was followed pictorially by Frank _____ of **The Union**. The remarks of "Ingagi" and "Congo" were translated as follows by Myron Lustig (illus.):

"Indeed, this is a regrettable predicament in which to find ourselves, is it not? It is extremely difficult for me to comprehend this turn of events. I have been lolling about here for a month now, trying to figure it out."

"Say, kid, are you dumb or sompin? It's simple as a banana peel. Don't know but what I like it here better than back home in Africa. What don't you savvy, kid?"

"Lissen, sap, I'll tell you once again. We were a couple of fools for climbing that tree. This mug Martin Johnson and his mate comes along, spots us, starts their safari cutting down all the trees around us. We can't jump to no other tree because there ain't no tree near enough pretty soon. Then our tree is the only one left. They cut that down and we fell with it. We battle, but there's too many of 'em. They tie us up to poles and we swing out of the jungle. They ship us across the big water hole to N'Yawk, simple isn't it?"

"Oh, Congo, your gorilla language is just as uncouth as ever. I wish you wouldn't be so crude in speech."

"Lissen, baby, it ain't how ya say it, it's what ya say. Take my tip, Ingagi, and stop worryin'. Everything will be hoke."

"Please, Congo, please stop calling me Ingagi. Just because Mr. Johnson named me Ingagi and just because the word happens to be the African way of referring to us gorillas, is no reason for you to continue using it. Anyway, I heard Mrs. Benchley say that in this part of the world the word Ingagi has gathered about it an odious meaning. So I would just as soon be called something else."

"Congo, Congo, did you hear what they must told us. Mr. Johnson --- Martin Johnson --- will be here tomorrow. Oh, joy! Won't it be fine to see somebody from home?"

"Hey, hey, he'd love that one. Well, anyway he'll be tickled pink to see how well we're fixed here. He won't have cause to regret that he chose to send us out here to San Diego. They sure are treating up with a gorillavish hospitality."

"Yes, and he'll be here to see us go into our new home --- they call it a "cage" --- tomorrow. Say, he'll think we're a couple of swelled heads, as you say. Just why is he coming here, did they say?"

"Sure, it seems they took some moving pitchers of us when they was catchin' us. And a lot of other pitchers, too. Well, the Johnsons are goin' to tell all about us and our kind tomorrow night at the Russian editorial."

"Russ auditorium, Congo."

"Yeah, at the Russ auditorium, an' show the pitchers and everything. An' I guess he'll come up to watch and help us move into our new cage Monday. Hot stuff --- that'll be great stuff. We'll be the whole show."

“Oh, Congo, Mr. Johnson was the one that named me before. Do you think he’ll consider renaming me? You know, give me a more dignified title?”

“Dignity be damned. You don’t hear me squawking about a moniker like Congo do ya? But, gee, wouldn’t it be the nuts if . . .

“Not nuts, Congo, nertz. I heard them say that in New York those few months we were there.”

“Awright, awright, but wouldn’t it be the nertz if we could get outta here Monday night and go down and make a personal appearance with the pitcher?”

“Oh, Congo, they wouldn’t let us. You know that. But everybody in San Diego knows that we can be seen here any day, and that our picture will be shown tomorrow night, and that Mr. Johnson will tell all about us then>”

“Come on, kid, let’s scramble up to the high chair and see if we can’t spot Johnson and his safari coming? . . . There, do you see him? Neither do I. Maybe he won’t come around until tomorrow. I wonder if we’ll know him. Let’s go over and sit down up here where we can keep a lookout for him.”

November 8, 1931, San Diego Union, 11:5. Tribute to war dead today at Organ Pavilion.

November 16, 1931, San Diego Union, 5:1. New York State Society to hold Exposition rally tomorrow night in Chamber of Commerce building; Colonel D. C. Collier and Carl Heilbron speakers.

November 19, 1931, Minutes of Board of Park Commissioners.

Present: Commissioners Crandall, Fox and Warburton.

San Diego Museum relinquishes use and control of Indian Arts Building; exhibits moves to fireproof protection of California Quadrangle.

Matter of reducing rates for playing at tennis courts referred to Superintendent of Parks for report.

Matter of putting park employee who handle money under bond referred to Park Superintendent and Executive Secretary for recommendation.

Mr. Fox moved that the department build 6 additional shuffle board courts at Horse Shoe Pitch and 6 additional shuffle board courts and toilet at Rogue Courts as soon as funds are available; approximate amount \$3,000; motion seconded and carried.

Copy of letter to Common Council relative to making road through Switzer Canyon when design of new 18-hole golf course is being considered was received.

Mr. Morley submitted plan of proposed course, showing location of boulevard through Switzer Canyon which will not interfere with construction of golf course. Upon motion, seconded and carried, the plan was adopted, subject to the approval of the Manager of Operations.

Upon motion of Mr. Fix, seconded by Mr. Warburton, the secretary was instructed to send letter to the Common Council stating that provision has been made in design of new 18-hole golf course for location of a boulevard through Switzer Canyon which will adequately serve the northeast section of the city and not interfere with the construction of golf course, plan being on file in office of City Manager.

The Park Superintendent was authorized to provide shelter for ticket checker stationed at No. 4 hole on the golf course.

November 21, 1932, San Diego Union, 7:2. Six exposition trustees added.

November 22, 1931, II, 1:1. Repair downtown fountain and entrance to park.

The entire entrance to the park has been re-plastered. The street railway company will be asked to spread a little paint on the old wooden fence that now presents a dingy and unattractive appearance.

November 22, 1931, San Diego Union, II, 1, 2. Class for seals opened at San Diego Zoo with eight pupils enrolled; Jerry Smart, Charlie Stubborn, Harry Genius, Belle Bright, but Crank earns his fish by mere whisker, by Myron Lustig (illus.).

This story is an accident. The news in it was supposed to remain a secret until the act was ready for formal presentation to San Diego audiences, but well --- here goes, with no apologies. Eight young seals are being trained at the San Diego Zoo for an entertainment routine, including ball and stick-balancing, flipper-clapping and rolling over.

There are scores of interesting feature stories in the zoo, and in ferreting some of them out the writer learned that in a certain obscure building within the zoo grounds, S. C. Charles, famous lion, tiger and seal trainer, was at work daily, playing patient teacher to an octet of two-and-a-half-year old seals brought here from the Cerros and Coronado Islands last August.

With the aid of the accompanying photographs taken by Harry T. Bishop, **Union** photographer, who is my zoo-wandering companion on this intriguing weekly assignment, I'll try to explain how Charles trains his seals for public performance, but first it must be explained that the public won't see the act until it is perfected --- which may be six months or a year from now. And, as absolute privacy and concentration is the secret of seal-training, visitors to the zoo will have no opportunity to see the act in preparation.

There are eight seals working with Charles, and each has an entirely distinctive personality, he says. And he proved it to us.

Jerry is a very smart seal --- in less than four months he has learned his routine, is very quick to understand what is wanted of him, and he never complains.

Charlie, on the other hand, is a stubborn little fellow. He has learned his tricks well, but he's inclined to want things his own way. When he misses a trick, he talks crossly and puts the blame on Charles; when he is ordered to roll over several times in succession, he insists upon walking six circles around Charles and choosing his own rolling space between rolls.

Sunny Boy is also a smart seal --- too smart for Charles, sometimes. In the ball-balancing act the seal is asked to please thrust the ball from the tip of his nose into Charles' hands. But Sunny Boy refuses to thrust. He balances the ball beautifully, but when he is told that the trick is "all right," instead of pushing the ball to Charles, Sunny Boy just lets the ball roll lazily off his nose, and takes his scolding quietly.

Harry is the most attractive of the troupe. No move of his teacher escapes his alert eye, and from his attention he has absorbed much knowledge quickly. Everything Harry does is erect and accurate.

Crank, however, is a blusterer. He fights and talks and misbehaves continually. Bosco is a fighter, too, but one of those quiet, brooding sort of pugnacious fellows. Belle, one of the youngest of the group, is a most anxious student, and will learn easily and quickly, Charles predicts. The eighth is Baby, only one and a half years old, who has proved herself a smart one by already learning to clap her flippers.

These seals are "almost human," they react to stimuli much in the same way that humans do, and seem to express themselves more like humans do than other animals. They show their delight, disgust or indifference in ways that humans can comprehend and, likewise, they understand the human who is patient enough to win their confidence.

Trainer Charles is such a one. He had that infinite store of tolerance and patience necessary to win their confidence. He is careful not to make one false move with them; he treats them kindly, even when scolding them; he works with nothing to protect him or to harass the seals; he talks to them continually and praises them profusely.

As a result, the seals like him, they obey him and do their best. Every time Charles requests something of the seal, the seal's reward for the trick or the attempt, is a piece of fish. He never missed giving them this reward, so naturally they never miss trying to please him.

The first job on a seal to be trained is to gain his confidence and respect. This is done by constant companionship, feeding and "doing favors" for them. Then comes the job of teaching the tricks themselves. And in describing this job briefly, the photographs accompanying the beginning of this story will aid.

Charles gets the seal onto the training stand, and, by a process of careful exercises, loosens each fore flipper by working it from side to side. He is loosening one of the flippers in Photo 1. Soon both flippers are pliable and he works them together, slowly bringing them together in the front. Soon, the seal gets the idea by bringing them together on signal from Charles. In rapid succession several times he produces the effect of "clapping hands." The trick once learned, the seal uses it on his own volition to express his joy.

Next, the seal is shown a ball, as in Photo 2. He is given to understand that the ball is something to be acquainted with. Then, as in Photo 3, Charles rests the ball on the seal's upturned nose. The seal at first turns his nose upwards not to hold the ball, but to keep it in view. But constant "feel" of the ball on the nose teaches the seal that he is holding it.

The bristles of a seal's "mustache" are stiff and strong. The seal learns that he can ease the weight of the ball on his nose by drawing his mustache up and clipping the bristles underneath the ball. I really can't understand how it is done, but soon the seal gets the idea of balancing the ball himself, and then to catch the ball on his nose when it is thrown at him. The seal is thus balancing the ball himself in Photo 4.

The next trick is the stick-and-ball balancing trick. A stick is placed perpendicularly on the seal's nose, and a ball is placed atop the stick. The "tower" is then balanced by the seal, as Charles is explaining to one of his pupils in Photo 5. The completion of the trick is this: When the tower is balanced, the stick is knocked away and the seal catches the falling ball on his nose and balances it.

These tricks take months to teach --- each separate step, each infinitesimal motion required of the performer is explained and taught separately. The first ball the seal works with is two feet in diameter, as seen in Photo 3. When he can balance that, the seal is then taught to balance a ball half as big, as shown in Photo 4, and finally he learns to balance a small ball of the size seen in Photos 2 and 5.

The final trick is that by which the seal, on orders, rolls over, a stunt which is not natural to seals. And, after all the tricks are done, the troupe is rewarded with a plunge and the coveted fish. Fittingly, Photo 6 shows this happy ending much more graphically than I could tell.

And as soon as all of them --- Jerry, Charlie, Sunny Boy, Harry, Crank, Bosco, Belle and Baby --- have learned their tricks perfectly, then San Diego will be able to see this splendid seal act, trained in their own zoo, thanks to Mr. Charles, his patience and ability, and to Mrs. Belle Benchley, manager of the zoo, who got the trainer to come here and do the work.

November 25, 1931, San Diego Union, 11:1. Thanksgiving services at Organ Pavilion

November 27, 1931, San Diego Union, 2:6. "Being thoughtful" topic of sermon in Organ Pavilion; all denominations participate; Dr. Fagan speaker.

November 28, 1931, San Diego Union, 2:2-3. Citizens' Committee to urge voting of \$300,000 employment issue; Mayor Austin outlines construction program, main feature of which is \$100,000 regulation 18-hole golf course in park; election to be held December 15.

December 3, 1931. Minutes of the Board of Park Commissioners.

Present: Commissioners Crandall, Fox and Warburton.

Request was received from Recreation Committee of Parent Teachers Association and Schools and Museum Committee for permission to continue use of Indian Arts Building, recently relinquished by San Diego Museum.

Upon motion by Mr. Fox, seconded by Mr. Warburton, use of the Indian Arts Building by the above committee was granted, with the understanding that the Park Commission shall not be called upon for repairs or other expenses, as the Board has no funds for the purpose.

Mr. Forrest Hieatt and committee, interesting in having a new Rose Garden in Balboa Park appeared before the Board.

Mr. Hieatt stated that four plans of the proposed garden has been received; he submitted plan prepared by Mr. Walter Merrill, which was the unanimous choice of the committee, and recommended its adoption by the Park Commission.

Mr. Warburton moved that the plan recommended by the committee be adopted, subject to approval of the Park Superintendent and with reservation of 10 feet or so for double parking along the west front of the garden. The motion was seconded by Mr. Fox and carried.

In the absence of the Park Superintendent, the secretary reported that his, the Park Superintendent's recommendation in the matter of fees at Municipal Tennis Courts would be as follows:

Saturdays, Sundays and holidays	25 cents per person per day
All other days	10 cents per person per day

Upon motion, seconded and carried, report of the Park Superintendent's was approved

The chairman reported the recommendation of the Park Superintendent and himself, as committee on green fees for 9-hole Municipal Golf Course was as follows:

1 st round of 9-holes	50 cents - blue ticket
2 nd round of 9-holes	25 cents - blue ticket to be exchanged for yellow ticket
Full round of 18-holes	75 cents - blue and yellow tickets

Upon motion by Mr. Fox, seconded by Mr. Warburton, recommendation of the Committee was approved.

December 4, 1931, San Diego Union, II, 1:4. Ernest W. Dort, secretary, said last night that three U. S. Senators have joined number of prominent men who have pledged support to San Diego's Centennial Exposition.

December 6, 1931, San Diego Union, 22:5. 18-hole golf course urged as money maker to city; eleven items on \$300,000 unemployment bond issue expected to be paid by revenues; cost of nine-hole golf course opened

last month was around \$40,000 and revenue has averaged \$58.60 a day, netting about \$30 a day above operating costs; bond issue to be voted on December 15.

December 7, 1931, San Diego Union, 3:4-5. John Connell, South African organist, gave recital yesterday afternoon at Organ Pavilion.

December 7, 1931, San Diego Union, 7:3. Park trees safe in recreational areas projected; Committee says there is plenty of room for play courts on barren acres.

There is no intention of the part of the city government to root out beautiful trees in the immediate northeast corner of Balboa Park when constructing a recreational area in that section of the park with unemployment bond funds, it was emphasized to the San Diego \$300,000 unemployment bond committee by the city manager's office in response to query.

Several persons have asked the committee if item seven of the proposed 11 municipal improvements meant that the game courts and fields would come right up to 28th and Upas Streets. The answer is "no," that there are 45 acres to work on which are in the area bounded by projections of Alabama and Palm Streets that the improvements will be principally in that port formerly used as a cavalry camp.

This project applies particularly to the mesa lying westward from the dirt road that wings from Pershing Drive around to Arizona Street, according to the City Hall statement. The plantings bordering Pershing Drive are not to be disturbed and there is no intention to crowd any play courts into the narrow strip between 28th Street and Pershing Drive when there are so many open and barren areas to be improved on the mesa south of the eucalyptus grove along Upas Street.

Mayor Austin has been called upon to tell where is the Alameda near which item 11 in the proposed improvements is to create an automobile parking area.

"For your information," says a statement from the mayor, "it is the area in front of the zoo, it now being the custom to park along the narrow street in front of the zoo office building, thereby creating a serious hazard."

December 8, 1931, San Diego Union, 5:3. Park recreation courts thronged; play scenes give strong argument for bond item increasing facilities.

If any argument is required in support of Item No. 7 in the public improvements to be made with the \$300,000 unemployment bond issue on the ballot, December 15, a visit to the Roque, shuffleboard, horseshoe pitching and other recreational grounds on the western border of Balboa Park ought to be sufficient, it was declared at the unemployment bond headquarters.

Many thousands of players use these facilities, crowded conditions are the rule rather than the exception; and inquiries disclosed that a large percentage of the players are tourists who have been made sojourners and, in many cases, permanent residents by reason of these recreations that are open to all. Old and young enjoy them alike, apparently; and wealthy people are mingled with those of small income in a spirit of comradeship and play.

The proposed creation of similar additional facilities on the barren lands near the northeast corner of the park will be equally as popular and as useful to home population and to the development of San Diego as a year-around playground for travelers and vacationists, it is declared. The area for such improvements under Item 7 is 45 acres, mostly barren mesa land which in exposition days was used as a cavalry camp.

As a park improvement the work will border onto the plantings in the uneven ground adjacent to 28th Street. The parking there along Pershing Drive will not be disturbed. On the Upas Street, or northern side, the recreational area, likewise, will be screened from residences by the long, narrow eucalyptus grove along the edge of the park. The expanse of area for use in locating and correlating the varied play courts,

swimming pool, field houses and baseball grounds constitutes 21 city blocks. The southern and western boundaries, as specified in the ballot, are as of Palm Street extended and Alabama Street extended.

December 8, 1931, San Diego Union, 7:1. D. C. Collier and Carl H. Heilbron, president and director-general, respectively of the exposition, presented plans for San Diego Centennial Exposition to 100 members of the Executives' Association at its meeting yesterday afternoon at the U. S. Grant Hotel.

December 11, 1931, San Diego Union, 4:1. EDITORIAL: "Prosperity Bonds"

It is very possible --- it is even very likely --- that a clear-cut and enthusiastic vote for progress will return San Diego to its old place as the whitest white spot on the business chart of the Pacific coast.

December 13, 1931, San Diego Union, 16:2-4. Drawing of Our Lady of Guadalupe, new Catholic church, designed by Frank L. Hope, Jr.

December 13, 1931, San Diego Union, II, 2:6-7. How recreational facilities on unemployment bond issue help the city.

December 14, 1931, San Diego Union, 4:1. EDITORIAL: Tomorrow's Prosperity Ballot. . . . This is one of the city's great moments of opportunity.

December 14, 1931, San Diego Union, 5:2-6. Work to start on new Natural History Museum; \$185,000 to be spent on first units in park; \$150,000 pledged.

The San Diego Society of Natural History and the Jarboe Construction Company will start immediately on the construction of the new Natural History Museum on the site of the old Civic Auditorium.

December 14, 1931, San Diego Union, 8:6-7. Boy Scouts hold final 1931 meeting at Indian Village.

Scout leaders of San Diego County will hold their last monthly meeting of the year Wednesday evening in the Indian Village mess hall. A special Christmas program has been prepared aside from the regular training program. A dinner prepared and served by the mothers' auxiliary of troop 32, National City, will open the evening activities.

. . . Saturday will see a large group of scouts busily engaged in the making of Christmas wreaths in the Indian Village. This is just one of the many good turns the scouts perform each year for their community, this one being directed toward the patients at the naval hospital.

December 16, 1931, San Diego Union, 1:1, 2:3-4. All election issues carry; El Capitan assured by big margin; \$300,000 employment bonds command smallest majority; voters retain referendum power over San Diego Consolidated Gas & Electric Company; park projects given.

December 17, 1931, San Diego Union, 8:6. Carl H. Heilbron talked on San Diego Centennial Exposition at luncheon in Oceanside.

December 24, 1931, San Diego Union, 1:5-7. Photograph of postal workers at Balboa Park emergency station routing Christmas packages.

December 30, 1931, San Diego Union, 10:1. Belle J. Benchley, Manager Zoological Society, writes explaining distribution of carcass of bull elk by Community Chest to needy families.

December 31, 1931, San Diego Union, 7:4. B. R. McLean, County Agricultural Commissioner, announced yesterday that cherry trees, presented to the City last month by the Japanese Association of San Diego, will be allowed to remain in Balboa Park; no danger of Oriental fruit moth as trees originated in Seattle.

1932

Summary of Events in 1932.

(Note: Dates of events are approximate only.)

Morley Warns Exposition Buildings Unsafe (January 9, 1932)
Playground Requested at Northeast Corner of Park (February 24, 1932)
Zoo Requests More Ground (March 3, 1932)
Play Field Area Construction Begins on Northeast Side of Park (April 2, 1932)
Unemployment relief projects (April 2, 1932)
San Diego Museum Fights Veterans' Move to Obtain Building (May 11, 1932)
Children's Fair in Indian Arts Building (May 13, 1932)
Kitchen Show in American Legion Building (June 3, 1932)
American Legion Voitures Open New Headquarters in County Fair Building (June 11, 1932)
Lawn Bowling Greens Opened (June 12, 1932)
Jessop Archery Collection at San Diego Museum (July 4, 1932)
Zoo to Appeal County Tax Assessment (July 7, 1932)
Pedestrian Tunnel at Park Boulevard (July 5, 1932)
Grass Golf Courses (July 5, 1932)
East-West Road (July 5, 1932)
Symphony Concerts (July 17, 1932)
City Withdraws Support of Balboa Park Institutions (August 17, 1932)
Flower Show (August 21, 1932)
Jamboree in Indian Village (August 22, 1932)
Two-hundred Pound Bear Killed After Escape From Grotto (August 23, 1932)
Organ Concerts to be Curtailed (August 26, 1932)
Kate Sessions Writes Letter Supporting Horticulture in Balboa Park (August 29, 1932)
Assessor James Hervey Johnson Tries to Sell Zoo Animals (August 31, 1932)
Dr. Stewart Agrees to Salary Compromise (September 4, 1932)
Yorick Players Offer "Midsummer Nights' Dream" in
Court of Honor, East of Lily Pond (September 19, 1932)
Navajo Show in New Mexico Building (November 25, 1932)
Yuletide Pageant (December 14, 1932)
Swimming Pool Dedicated (December 25, 1932)
Dr. Stewart Dies (December 29, 1932)

January 1, 1932, San Diego Union, II, 2:1-4. Nine-hole municipal golf course opened; grass layout completed in Balboa Park; well constructed links and low green fees attract hundreds to play weekly; 18-hole under construction.

January 1, 1932, San Diego Union, II, 4:1. New Natural History Museum Building started; fireproof structure will house exhibits, display halls, research laboratories, lecture room to be included in project, by Clinton G. Abbott, Director.

The start, within the last few weeks, of a modern fireproof building to house the valuable collection of the San Diego Natural History Museum is the most important event in the 58 years' history of the San Diego Society of Natural History, oldest scientific organization in southern California.

Since 1920 the Natural History Museum has occupied one of the former exposition buildings and, therefore, has been constantly facing a fire hazard.

During these years the collections have been rapidly growing in importance and value, and the need for their permanent protection is more urgent than ever.

Erection of the new building has been made possible through the generosity of a large number of contributors, and especially of Miss Ellen B. Scripps of La Jolla, who, for many years, has been an interested patron of the museum's work.

The area on the northeast corner of Park Boulevard and the Prado in Balboa Park, which was formerly occupied by the Civic Auditorium, has been assigned by the Board of Park Commissioners as the position of the new museum.

The building will be in the Spanish type of architecture, conforming with other buildings in the famous park group. William Templeton Johnson of San Diego is the architect.

The part of the building which is underway at present is the first unit of what it is hoped will be a large and comprehensive museum group. The first structure will consist of the southern frontage, 220 feet long and 60 feet deep, from which a wing will extend in a northerly direction for 100 feet.

The structure will be three stories high and is designed to contain exhibition halls on all three floors, also junior activities, lecture hall, research laboratories, offices and workrooms.

January 1, 1932, San Diego Union, II, 4:1. Natural History Museum assists various schools; provides city and county children with materials for study in class room, by Clinton G. Abbott, Director.

Both the city and county schools have a supervisor of nature study, each of whom is also a member of the Natural History Museum staff.

Not only do these supervisors give personal instruction in nature study in the schools, but, in addition, over 20,000 natural history specimens, made available through the Natural History Museum, have been prepared for deposit in the schools as study material.

Besides these facilities for class-room instruction in nature study, the Natural History Museum itself is a much used laboratory, constantly visited by school classes for special work or general instruction.

Here are exhibits prepared with particular reference to the local field, displaying the mammals, birds, birds' nests and eggs, butterflies, shells, minerals, reptiles, plants of San Diego County.

Finally, but not least important, are the junior activities carried on in a wing of the museum devoted to that purpose.

Here, under a competent nature instructor, children's groups of all ages meet to pursue the natural history interests which are innate in practically every normal child.

Here youngsters' clubs, devoted to butterflies and moths, taxidermy, minerals and kindred subjects, have their headquarters.

January 1, 1932, San Diego Union, II, 4:2-3. San Diego rich in bird life; many species found.

Members of the staff of the San Diego Natural History Museum, for the last nine years, have made a "Christmas bird census," and in that time have reported more kinds of birds than any competitor on five occasions.

January 1, 1932, San Diego Union, II, 4:2-3. Nature walks conducted as winter feature here.

Every Saturday from October to May inclusive, the Museum of Natural History scheduled either a nature walk on foot in regions easily accessible, or an excursion in special parlor carriages to the more remote parts of San Diego County.

January 1, 1932, San Diego Union, I, 5:1. Progress of man depicted in unique museum in Balboa Park.

January 1, 1932, San Diego Union, 6:2-3. Girl Scouts carry out fine character-building program; San Diego County headquarters at entrance to Pepper Grove; Girl Scouts have occupied the buildings for eight years through the courtesy of the Park Board; headquarters has been remodeled, redecorated and refurnished; long hall widened into a reception room; living, dining, powder, hospital and handicraft rooms; about 500 Girl Scouts, 100 Brownies and 40 leaders enjoying main building.

In this ideal home atmosphere, these girls are preparing to be the homemakers of the future. Here they are passing their tests for merit badges in such subjects as homemaking, hostess, needle woman, home and child nurse and economist.

January 1, 1932, San Diego Union, III, 8:1-2. Recreational Center in park attracts visitors, by Forrest Warren.

At 7th Avenue and Date Street in Balboa Park is one of the finest recreational centers extant --- where visitors and home folks indulge in numerous outdoor sports 365 days in the year.

One of the latest acquisitions is the game called shuffleboard and seldom a day passes that the lanes are not taxed to their capacity.

The sum of \$1 per year at the Balboa Club entitles members of privileges of shuffleboard, horseshoe, cards, chess, checkers and other games.

January 1, 1932, San Diego Union, I, 8:1-2. Rare masterpieces house in park unit; reader is taken on tabloid tour of institution; verbal journey through fine building shows many acquisitions made, by Reginald Poland (illus.).

. . . here {John Doe and his friend Tom Smith of San Francisco} are standing in the Plaza de Panama, with the great El Cid equestrian statue recently given to San Diego by the Fine Arts Society.

“Is this the gallery?” says the San Franciscan as he turns about.

“Yes. It is called in the Plateresque style because the carving looks like jewelry done by silversmiths in the 17th century.

The two friends have gone inside now, and are looking about the impressive rotunda with its carved stonework and coffered ceiling.

The San Franciscan can't help saying, “That's a beautiful stairway; its blue tile handrail certainly gives it snap. And the architect knew what he was doing when he set that big window on the landing up there. Those eucalyptus trees swaying back and forth, framed by the window, make a marvelous living picture.

Our enthusiastic fellow San Diegan heads him into the long gallery at the right of the entrance.

“Let's start over here with this glass exhibition. It's all lent by local owners --- some collection, isn't it? If we ever imagined at first we couldn't get enough for a show we changed our mind quickly enough! We took only the best; that is, the most beautiful.”

The next room is all Spanish. The gallery director was saying that he visited Ramon de Zubiarre in Spain a year ago. Here's one of his pictures, “The Basque Fishermen.” The artist had modern paintings in his home, but his furniture was fine old Spanish work. We've tried the same combination in this room. See how primitive, masculine and colorful Spanish things look. That's Spain.”

“Yes, that’s the way it looked to me when I was there. There isn’t as much bright color as I’d expected, but the people have positive feelings all right.”

“I see you have eastern things as well as western. Are most of these from China? Thanks to you people, I won’t have to go to China with things as they are now to see its art.”

“Yes, some are Chinese. There are Buddhas lent by the Erskine Campbells and come from China, Japan, Burma, Cambodia and Siam. This superb bronze Burmese Buddha, the Campbells gave to the gallery. One of the finest groups in our Oriental art is that of the Korean-glazed pottery. Dr. Horace N. Allen of Ohio brought it over. You see he was a medical missionary, and he helped them so much by introducing modern surgery into Korea that the people couldn’t do enough for him.”

“Across the rotunda there is a special group of Fries’ paintings. Charles Fries is the dean of San Diego painters, of course. When in that next room beyond, you’d vow you are in the old country, way to Friesland, Holland. The people there make all their own furniture in red lacquer, peppered with flowers and the like.

“That little corner room is saved for the children. Just now it is arranged for the holidays. “The Nativity” is illustrated by a group of figurines in bright colors and gold, carved at Oberammergau, where they have the Passion Play.

“Maybe you saw this very Nativity group. It was exhibited at the time you said you were there.

“I wish we had time to see the collection of progressive pictures lent by the two Chula Vista painters, Margot and Marius Rocle. And near it are the paintings by Foujita. He’s the “cats,” as it were. Excuse it please, but he’s the Jap who loves to do cats. You’ll see a self-portrait with his two pet cats.”

“Now, let’s go upstairs to see the Guild show.”

“What’s the Guild show?”

“The Guild is composed of the artists of the Fine Arts Society. The annual of their art work is just about ending now. For the first time this year a number of prizes were given and by different kinds of juries. The choices were quite varied.”

“I heard that San Diego owns some fine Old Masters ---- heard it in London. What’s the idea of getting so famous? Are you trying to back San Francisco off the map?”

“They do know about us abroad. For our inaugural show here, less than six years ago, we imported things even from London, Paris and Stockholm. And we were able to keep some of the things. Here they are --- mostly Old Masters, in this room.”

“Say, that’s some Gobelin tapestry.”

“Yes, that’s as fine as they come. And here is the marvelous ‘Holy Family’ by Rubens, which the Harry Timkens gave us less than a year ago. People who have been all over the world tell us they have never seen a more attractive Rubens.”

And “San Francisco” chimes in with, “I agree.”

“The Harry Timkens gave us this attractively-ugly “Soothsayer” by the old Spaniard Ribera and this ‘Repentant Magdalen’ by Murillo. I suppose it is the most popular picture in the gallery.

“We’re collecting a splendid Spanish department. We, ourselves, recently bought that “Young Soldier” picture, which some even say is by Velazquez himself. And the Erskine Campbells gave us a

delightful modern Spanish picture, 'The Almond Tree and the White Street.' It's of a little town in Galicia, Spain."

"Oh, I went into Spain through that same northwest section. The peasant costumes and customs are not spoiled yet. I wonder what the Republic will do to them. They stood out for the monarchy, you know."

"Well, we must tear ourselves away. Man cannot live by art alone. If you think these things are fine now on an empty stomach, they ought to look wonderful to you after you have had your lunch."

January 1, 1932, San Diego Union, I, 8:5. Rapid progress made in adding to collections; superb canvases of old masters donated to enhance permanent exhibit's value, by Reginald Poland.

The Fine Arts Society's year started off with a bang, January 17, the Henry H. Timkens of Canton, Ohio, announced their gift to San Diego's permanent art collections of their Old Master paintings. One of them, "The Holy Family" by Rubens, takes rank as one of his most representative and attractive works and so important that it is San Diego's finest single work of art. The donors were particularly interested because Mr. Timken is a brother of Mrs. Appleton S. Bridges, who, with her late husband, gave us the Fine Arts Gallery. This picture is a spiritual "Holy Family," the while presenting a group of portraits suggestive of the artist himself, of his family and second painting teacher. The other gifts are: "The Repentant Magdalen," a reasonably colorful Murillo and a most dramatically realistic "Sibyl," by another Spaniard, Ribera.

Other additions to the Spanish department on which we are concentrating, kept up the momentum of these great gifts. Mr. and Mrs. Erskine Campbell bought a simultaneous canvas, "The Almond Tree and the Street of White" by Jose Frau, from the exposition of contemporary Spanish art imported for exhibition throughout the United States. This picture is truly Spanish, progressive and a joy to the eye.

The society bought a painting, "Countrywomen of Galicia" by Carlos Maside, a famous illustration in Spain's radical publication, "Nueva Espana." Mrs. Henry A. Everett has just given "The Golden Wedding." This canvas is the masterpiece of Valentin de Zubiaurre, whose "Grandparents" is also so popular in our collection.

We are acquiring American art, no less than Spanish art; here, too, we have been most fortunate. California art is really progressive and can give us satisfaction. General and Mrs. M. O. Terry gave the "\$500 Purchase Prize," which secured for use "Young Maize," personifying growing corn, by Donal Hord, our rapidly rising San Diegan. Mrs. Ivor N. Lawson made possible "Little Navajo" by Ruth Peabody of Laguna Beach, as a watercolor purchase prize.

It is fortunate that paintings by our San Diegans, Elizabeth Sherman and Anni Baldaugh, have become ours permanently through the generosity of Mrs. Ella Bishop and Mrs. H. T. Horton.

Mrs. Robert Smart's gift of a fresh, green landscape by Theodore Robinson, pioneer impressionist, and "The Cod" by our beloved Emil Carlsen are most telling American acquisitions.

We hope that these American and Spanish offerings may prove an appetizer for the enjoyment of others from any lands. For we have an art banquet spread out for you at the Art Gallery. As you see what has come to us within the last 12 months, your realization will exceed your expectations.

January 1, 1932, San Diego Union, I, 8:3-4. Fine Specimens of Art shown at exhibitions.

We have been able to squeeze into our appropriations another annual exhibition by the artist members of the Fine Arts Society of San Diego. It comprises some 225 paintings, sculptures, graphic arts and handicraft. One of the most interesting aspects of the show are the four kinds of prizes that were given.

The jury of selection for the entire show gave nine awards, four of them money prizes; the entire Guild membership voted on the Appleton S. Bridges Memorial Award. A laymen's jury of over 40 non-artist

persons gave two more awards. The public as a whole was invited to make its own choice. The comparison of tastes in art and the increased popular interest in this collection were what made such awards worthwhile.

In the Southern California Art Annual we gave \$775 in prizes, including two purchase prizes. Thus we are the richer in our permanent collection by outstanding art; the winners themselves were helped in various ways.

We have had many other temporary exhibitions of which we can include only these here: European "Old Masters"; Contemporary Spanish paintings and sketches, which we imported from Spain; Contemporary Creative California Architecture; Whistler Lithographs; the Fifty Prints of the Year; Pictures by the Japanese Foujita; and a colorful Dutch Period room installed by Peter Smoor.

In addition to the lectures, which are ordinarily given free to the public every Sunday, the Fine Arts Society offered its members a series by great authorities.

The social committee arranged beautiful functions. The Art Guild has ordinarily held a meeting each month. Anyone has been able to come to the Art Gallery in special classes and at nominal fees.

(Names of individual exhibiting artists and lecturers are also included in the article.)

January 1, 1932, San Diego Union, I, 8:5. Society believes in cooperation.

The Fine Arts Society believes in working with other organizations as far as possible. Sometimes San Diego might have gone farther if certain of the groups had worked for instead of against still other groups.

Within the year, the Art Gallery has concerned itself with such institutions as the Inter-racial council (exhibiting the all-Negro art exhibition from the Harmon Foundation); the County Federation of Women's Clubs; the Junior League; the Indian Arts League (which arranged a most important Indian art show during the season); the Chamber of Commerce, the Wednesday Club; the P. T. A.; the University Women's Club; the Associated Arts; the San Diego Academy of Fine Arts; of course the State College and the public schools of San Diego City and County, as well as certain private schools; the Camera Enthusiasts; the San Diego Stamp Club; certain local theaters; the public library; the American Legion; the Visual Education Department.

January 1, 1932, San Diego Union, III, 10:1-4. Zoological Garden is popular; new additions to fine exhibits create interest; institution has outstanding collection of anthropoid apes in entire world, by Belle Benchley, Manager.

The San Diego Zoological Garden is considered one of the finest in America. It has the highest flying cage in the world and provides cageless type quarters for lions, tigers and other wild beasts.

Attractive and useful compounds for elephants and camels, a series of lakes and dams for wading birds, a splendid reptile house, and a large tank for seals and sea lions are a few of the many features of this excellent institution.

It became famous first as the zoo built entirely out of doors, then as the zoo with the barless grottos.

The next step in its development made it known as the zoo of the happy families, but now it might well be called "The Zoo of the Anthropoid Apes," as it now contains the outstanding collection of these animals in the world.

For years now it has tried with little or no success to keep the many forms of anthropoids one exhibit, because, of all living creatures, they are the most manlike; thus the most interesting to man; then because of all living creatures the least was known about these apes, study of them being almost impossible by the very manlike intelligence they display in avoiding human beings.

But recently chimpanzees, orangutans and gibbons are being exhibited with fair success and, in some of the older zoos, chimpanzees and orangs have been born and raised successfully in captivity. There remains, however, some of the gibbon family and the one genera of the gorilla which have not been successfully exhibited even up to the present date.

There are now in our collection in San Diego two of the rarest of all such apes: one in the gibbon family and one in the gorilla.

This rare gibbon is the Siamang, or pouched gibbon, a tiny pair of which we received in San Diego in 1929, just babies clinging to each other like veritable babes in the woods.

These animals are difficult to transport, have a reputation for being gloomy and morose, of sulking and pouting and refusing to become interested in anything in captivity.

While this may be true of single specimens, the pair in the San Diego Zoo do anything but verify this accusation. Not only are they happy with each other, but they live amicably with a White-handed gibbon and a Mueller's gibbon.

They have never had a cold or a sick day in the two and a half years they have spent in our outdoor cage.

Their characteristic cry is never heard when they are alone, but when instigated by the Mueller's gibbons or a class of children, they extend their under-skin pouch to the size of an indoor baseball and their high shrill cry with its booming accompaniment, which seems to come from the air in the pouch, can be heard as far as the downtown district of the city.

Gorillas have never been especially sought by the San Diego Zoo because never before has anything but single specimens of baby gorillas been offered. When Mr. and Mrs. Martin Johnson, well known explorers, brought in a pair, every effort was made to raise the money to buy them. These are mountain gorillas, most likely to live in a climate such as ours. As there are two of them their chances of living and maturing are greatly enhanced. This naturally makes them doubly valuable for scientific study and a hundred times more interesting as a zoological exhibit.

They are always wrestling, boxing, chasing each other around the stump, beating their chests or swinging from the ropes in the top of the cage, as one would expect gorillas to do in the jungle.

All the other anthropoids have taken a back seat with the public. Maggie and Jiggs, the orangutans, are scarcely noticed since the coming of the mountaineers.

The chimpanzees have given up trying to attract the crowd, either by their antics or spiteful reprisals, and have retired in dignity to ignore the gorillas and the general public until the first burst of popularity is over.

The gorillas pay as little attention to their neighbors, with the exception of Timmy, a young chimpanzee, as they do the crowds of people who are constantly in front of their cage, watching them.

They go about their own business, gaining steadily in health and weight and seeming to accept happily and intelligently the fact that they have been transferred into a new world where everything is being done for their comfort and happiness, where danger and hunger and cold rains and fogs are no longer to be endured; where their old enemies the spotted leopard and the armed man can no longer molest them.

The echo of the old feeling of fear and hatred is clearly apparent. Whenever they hear a truck or bus go by, they stop whatever they are doing and, if possible, retire quickly to their houses as though that sound stirred up in their memories reflections of that first unpleasant journey and those days of terror through the wilds of Africa on their way to their new home.

January 1, 1932, San Diego Union, III, 11:1-3. O'Rourke Zoological Institute gives children free instruction in study of nature.

The O'Rourke Zoological Institute of San Diego in Balboa Park was founded by Mr. and Mrs. P. F. O'Rourke. It is an educational institution wholly supported by its founders and friends without asking or receiving financial aid from the taxpayers.

It is incorporated under the laws of California and the incorporators state that "The purpose of this institution shall be the inculcation into the children of San Diego a love of nature and a desire to acquire knowledge of the fauna and flora both indigenous and exotic."

In 1921 Dr. W. H. Raymenton, director of the institute, outlined a plan for the study of nature lore which received the indorsement of the leading educators of the country.

The work of the O'Rourke Institute is thought to be unique in confining its activities to popularizing the study of natural history and brining children and their parents into familiar association with nature. All instruction is free.

A special feature is that nature stories are told in the home by members of the staff.

Lectures are given to groups of children from the public schools in coordination with their nature work in the school room.

In summer vacation a free graded course in nature study for children of all ages is conducted.

Troop 41 Boy Scouts is sponsored by the Institute under Scoutmaster Edward G. Dickinson.

The research department is equipped with over \$20,000 worth of instruments of precision. Several leading educational institutions and specialists have consulted this department.

The children's art class is conducted by a member of the Institute staff. Pupils and parents are enthusiastic over the results.

A kindergarten department for children from four to six years old is under the direction of Miss Genevieve Crabb. The children are delighted with their play in nature work.

Many letters of appreciation come to Mr. and Mrs. O'Rourke for what the Institute has done for their children.

An open forum for adults for the discussion of biological subjects is held the first and third Wednesday of each month.

Curriculum: Geology, Arthur E. Skeats; mineralogy, Herbert Lang; botany and ornithology, Betty Tuttle; general nature study, Genevieve Crabb; nature lore stories, Jeannette van den Akker; nature leaflets, preparatory, Edna Moore; entertainer, Captain Hugh Voorhies; Boy Scouts Scoutmaster, Edward G. Dickinson; biology Open Forum, kindergarten, Genevieve Crabb.

January 1, 1932, San Diego Union, III, 12:1. Fine programs offered on outdoor organ, by Royal A. Brown.

January 1, 1932, San Diego Union, I, 14:1-4. Rare beauty enshrined in 1400-acre area; tract is noted for diversity of its attractions; recreational features combine with cultural units to increase life's joys here.

San Diego's park system comprises an area of approximately 2800 acres in 28 parcels of land.

Other buildings of the group are in use by the Academy of Fine Arts; Visual Education Department of the City Schools; art classes at the former New Mexico Building; San Diego Floral Association; Central Reference Library of the City School Department; Girls Scouts near the Pepper Grove and Boy Scouts at the Indian Village.

Roque, horseshoe, tennis, croquet and shuffleboard courts are provided, the most popular being the 12 shuffleboard courts. Two bowling greens have just been completed.

January 5, 1932, San Diego Union, 6:3. Grand Army of the Republic Veterans will gather at park Thursday.

January 8, 1932, San Diego Union, 6:1-2. Grand Army of the Republic Veterans rally round the flag once more; nearly 100 boys of 1861 gather at Organ Pavilion (illus.)

January 9, 1932, San Diego Union, 3:3. Park head warns old Exposition buildings unsafe; says catastrophe to be expected unless measures for repair taken soon.

A catastrophe may be expected soon unless comprehensive steps are taken toward repair of old exposition buildings in Balboa Park, John G. Morley, Park Superintendent, warns in the Park Department's annual report to the mayor filed yesterday.

Nine years ago repairs on the buildings were effected at a cost of \$120,000, Morley said, and it was figured the repairs would save the buildings for 10 years. A survey made two years ago estimated the repair cost at \$48,000. Recent inspections have shown foundations of most of the arcades to be in poor shape and plaster is falling from walls and ceilings of the buildings.

The buildings are part of a group built for the 1915-16 exposition here. The architecture typifies the best work of the late Bertram Grosvenor Goodhue, who was an authority on Spanish Colonial architecture and the park group enjoys world-wide fame.

Continuing the report Morley suggests park development to serve fast-growing districts, suggesting 10- to 20-acre parks. East San Diego, Logan Heights and Ocean Beach are mentioned as needing park developments. He adds that Collier park at Ocean Beach, Mountain View park at Boundary and Ocean View avenues and Park de la Cruz in East San Diego would be susceptible to this district development.

Use of unemployed men sent out by the county welfare commission made possible a general park cleanup that otherwise would have been impossible with funds allowed, the report states.

Removal of the entire grassed area of the downtown plaza, installation of a sprinkling system, new topsoil and a reseeding of the lawn is advised. A total of 60,072 trees, plants, shrubs and miscellaneous plants were set out during the year. A check of the California Building showed that 27,000 persons climbed the stairs to the tower which offers a marvelous view of the city.

January 14, 1932, Minutes of the Board of Park Commissioners.

Present: Commissioners Crandall, Fox and Warburton.

Letter was received from Zoological Society of San Diego asking for additional land for zoological purposes.

The plan contemplates the assignment by the Park Commission of the land now occupied by the Model Farm and buildings; construction of a new entrance gate near the old fire station and erection of a small entrance building.

The society advocates construction of a new road from 6th and Nutmeg Streets, passing in front of the Zoological Hospital to Alameda Drive and a road from Cabrillo Canyon along the northern

boundary of the Zoo Gardens to Alameda Drive. For this latter project, the society tenders offer of such land at the north line of the Zoo as may be required.

After discussion of the matter with Dr. Harry N. Wegeforth, president of the Zoological Society, upon motion of Mr. Fox, seconded and carried, the chairman appointed Mr. R. N. Gregory, City Manager, Mr. George W. Marston, Park Commissioners Fox and Warburton and Mr. Morley, park superintendent, a committee to study the plan with Dr. Wegeforth.

Mr. Morley reported that the new Golf Course had been cleared off sufficiently to begin construction of the course.

February 11, 1932, Minutes of the Board of Park Commissioners.

Mr. P. F. O'Rourke protested granting further ground to Zoological Society; demanded that all moneys taken in at the zoo gate be deposited with the City within 24 hours.

February 11, 1932, 8:3, San Diego Union, 8:3 and February 12, 1932, 10:1. Dr. Richard D. Hollington, Garrett Biblical Institution of Northwestern University will give talk on "New World Architecture" at Fine Arts Gallery tomorrow night.

February 13, 1932, San Diego Union, 6:4. Wednesday Club hears Zoo head in clever talk.

Members of the Wednesday Club listened to a comprehensive talk by Mrs. Belle Benchley, executive secretary of the San Diego Zoo, on the extent and resources of that interesting asset to our civic life.

Speaking from the authority of her six years' association in this work, she held her audience fascinated attention and left them with a desire to make a visit either some day at 1 o'clock when the elephants bathe or any time to join the crowd at the large aviary where the greatest general interest centers.

Mrs. Benchley told interesting stories about the various animals, explained phases of the management of the zoo, making clear the business of collection and maintenance; the research were a practical contribution to the world at large is made and a zoological hospital with a chance to study as well as cure animals is carried on, the contact with the children and the collection of animals. The state has recognized this valuable work to the extent that they have donated a man on full time to conduct the study of chicken diseases, the speaker said.

Nature lovers and an occasional scientist results from the opportunity for observation and study afforded the school children in their monthly trips by the bus load from the city and county schools, Mrs. Benchley explained. Five adults enter the zoo, however, to every child and their are three paid admissions to every one free.

The 48 employees are kept busy caring for the vast collection of animals, of which Mrs. Benchley admitted a real fondness for the snakes. She explained that in the family group of hoofed animals, five is the ideal number, the deer group eventually turns into a harem, but in the primates, the children stay with the parents until grown. She explained the care used in feeding to furnish a diet like that of the animal's native habitat.

Of all the large collection, Mrs. Benchley declared that the gorillas recently captured and delivered by the Martin Johnsons are the most interesting. They will probably be the last ever brought out of Africa and are declared by scientists to be about one-third grown or seven years old. At maturity they will acquire a weight of 800 pounds. They are shy, intelligent, incurious and shrewd, fond of each other, even tempered, gentle and good sports.

February 14, 1932, San Diego Union, 6:3-4. Miss Fidella Woodcock, botanist at Natural History Museum, explains varieties of acacias in walk from Date Street to Laurel Street.

February 14, 1932, San Diego Union, Classified, 5:1-2. Collection of turtles at San Diego Zoo holds interest for students of biology and food connoisseurs.

February 17, 1932, San Diego Union, 9:1-2. Lewis Wayne Walker praises Wegeforth's work in creating San Diego Zoo.

February 21, 1932, San Diego Union, 8:3. Public invited to George Washington Day ceremonies at Organ Pavilion this afternoon; Dr. Frank Linder, pastor of First Methodist Episcopal Church, is speaker.

February 24, 1932, San Diego Union, 8:2. Letter from Julius Wangenheim, president Fine Arts Society, commending **San Diego Union's** editorial stand; points out benefits in provision of space for local work.

February 24, 1932, San Diego Union, II, 2:2. North Park businessmen in vicinity of project favor \$120,000 park playground in northeast corner of Balboa Park; hear city officials; \$65,000 available from recent park bond issue.

February 24, 1932, San Diego Union, II, 2:5. Town sees day P. O'Rourke has nothing to say; declines to testify that Dr. Wegeforth threatened to "knock his block off."

Because Patrick F. O'Rourke declined to testify as complaining witness his simple assault charge against Dr. Harry Wegeforth was dismissed when the case was called for trial before Judge Philip Smith yesterday afternoon.

February 10, during a meeting of the Park Commission, O'Rourke had alleged that the physician "threatened to knock his block off." The asserted threat was said to have followed an exchange of warm words between Dr. Wegeforth and O'Rourke. Immediately O'Rourke swore out a complaint.

When the case was called yesterday for trial, Dr. Wegeforth, accompanied by his attorney, Wayne Compton, appeared and said he was ready for trial. But O'Rourke was not to be found. Victor Winnek of the district attorney's office said O'Rourke had not contacted his office and he knew nothing of the facts in the case.

Judge Smith then issued a subpoena for O'Rourke, who was found a few moments later in the Cuyamaca Club and brought into court by an officer. Upon arriving at the court, O'Rourke held an hurried and whispered conference with the judge. A moment later Judge Smith announced dismissal of the case, explaining O'Rourke had declined to testify.

The county was also out more than \$17 for the trial which never took place. The \$17 was paid jurors for mileage.

March 3, 1932, Minutes of the Board of Park Commissioners.

Present: Commissioners Crandall, Fox and Warburton.

The Committee on Extension of Zoological Gardens submitted Map No. 4799-L, furnished by the City Engineers' Office, showing changes in existing lines; motion to accept changes carried.

Beginning at the intersection of the westerly curb line of Calle Cristobal with the northerly curb line of Calle Colon, said point being 560.79 feet northerly, measured along said westerly curb line of Calle Cristobal, from the northerly line of Laurel Street; thence westerly and northwesterly along the arc of a curve, concave to the northeast, the radius of which curve is 110.00 feet and lied on the northerly production of the westerly curb line of Calle Cristobal, a distance on said arc of 122.87 feet to a point of reverse curve; thence northwesterly, westerly and southwesterly along the arc of a reverse curve, concave to the southwest, the radius of which curve is 112.90 feet, a distance of said arc of 177.54 feet to a point; thence southwesterly along a line tangent to the last described

curve, a distance of 104.86 feet to a point; thence westerly along a line, making an angle of 27.27' to the right with the last described line, a distance of 219.16 feet to a point; thence southwesterly along a line, making an angle of 63 37' 30" to the left with the last described line, a distance of 158.53 feet to a point; thence westerly along a line, making an angle of 52 32' to the right with the last described line, a distance of 174.76 feet to a point; thence northwesterly along a line, making an angle of 23 38' to the right with the last described line, a distance of 227.58 feet to a point; thence southwesterly along a line, making an angle of 58 28" to the left with the last described line, a distance of 195.58 feet to a point.

That all changes, including removal of planting and trees, be done only with the approval and under the supervision of the Superintendent of Parks.

Resolution No. 58099 of the Common Council placing all improvements included in the \$300,000 bond issue under charge of the Manager of Operations was received and ordered filed.

Upon motion of Mr. Warburton, seconded and carried, the Park Superintendent, after conference with the City Manager, was authorized to create a parking area for the Zoo by widening Alameda Drive.

Upon motion of Mr. Warburton, seconded by Mr. Fox, the Board concurred in Mr. Morley's acceptance of his appointment by the Governor as a member of the Board of Directors of the State Agricultural Society.

The secretary reported that letter had been sent to the Common Council asking for \$4,500 from the Reserve Fund to the Park Department Salary Fund to cover shortage caused by transfer of daily pay to a monthly basis of pay. The chairman requested Mr. Fox to represent the Board at the Council meeting, March 7.

In a discussion of request of Voiture 732, 40 and Eight organization for a room for holding meetings, it was suggested that they examine the Yorick Theater Building and also the balcony in Building No. 10, the County Fair Building.

Upon motion of Mr. Warburton, seconded and carried, letter was ordered sent to the City Planning Commission and City Attorney recommending that where transfer of City Lands to Park Lands is made, the City reserve the right to change alignment of existing roads, relocate present roads or locate new roads; also to grant easements to public utilities

Letter of thanks for work done on anthropology hall by Park Department was received from Mr. C. G. Abbott, director of San Diego Museum, and ordered filed.

Upon motion, seconded and carried, the Pepper Grove was reserved for use of the Chamber of Commerce for breakfast to visiting editors and publishers, July 28; also short organ program preceding the breakfast was authorized.

March 4, 1932, San Diego Union, II, 4:1. William Templeton Johnson to draw plans for San Diego post office.

March 7, 1932, San Diego Union, 3:1 and March 8, 1932, 8:3-4. Burbank Week opens today at Organ Pavilion; speakers to help start program for City Beautiful planning here.

March 13, 1932, San Diego Union, 12:1. Gigantic iguanas of Galapagos in San Diego Zoo Reptile House.

March 14, 1932, San Diego Union, II, 1:1. Robert C. Bancroft tells how Date Palm went to Chicago for 1893 Fair, by Winifred Davidson.

March 17, 1932, San Diego Union, 5:1-5. John Forward, Jr. gives views on city problems.

March 20, 1932, San Diego Union, II, 8:2-3. San Diego Zoo receives two rare toads from Dutch Guiana.

March 22, 1932, San Diego Union, 3:7. Council refuses to indorse request for Exposition; agrees to await explanation from Councilman Stahel why the plans should have city backing after sharp declaration from Councilman Russo.

Failure of the city council to adopt a resolution indorsing the exposition was characterized as "unfortunate" by Rufus Choate, president of the Board of Harbor Commissioners, last night.

March 23, 1932, San Diego Union, 1:1. Forward elected mayor by 9,000 votes.

March 24, 1932, San Diego Union, II, 8:5. Easter egg hunt planned for Pepper Grove; De Witt Mitchell Post, KGB, to sponsor event Sunday.

March 27, 1932, San Diego Union, II, 1:5, 2:3-5. Garden to honor Kate O. Sessions, San Diego pioneer beautifier.

March 29, 1932, San Diego Union, 3:4-5. Council indorses Centennial Exposition; bond issue to be requested.

A resolution indorsing the proposed Centennial Exposition and pledging support to the project was adopted by the City Council yesterday.

Harbor Commissioner Rufus Choate and D. C. Collier said the planned later to ask submission of a charter amendment permitting use of the \$150,000 annual harbor levy for retirement and interest on a bond issue for harbor development to facilitate the exposition plan.

The exposition would use tidelands from Broadway to the Naval Training Station, the Council was told. The bond issue projected would not be used for exposition buildings, Collier said, adding that such work would be financed otherwise.

The harbor levy expires with the year 1938 under the terms of the charter. Thus, the money would finance a bond issue of around \$800,000 over the period expiring in 1938.

March 29, 1932, San Diego Union, 5:2. Colonel D. C. Collier told Hammer Club yesterday that exposition plan is meeting approval.

March 30, 1932, San Diego Union, 3:1. Plans presented for Balboa Park swimming pool at meeting of North Park businessmen.

April, 1932. San Diego's \$300,000 bond issue aids recreation expansion program. D. W. Campbell, illus., Am City 46:99.

April 2, 1932, San Diego Union, II, 10:6. Play field work to begin Monday; 10-acres area in northeast section of Balboa Park to include plunge, baseball fields; 25 get jobs; financed from proceeds from \$300,000 unemployment relief bond issue.

April 4, 1932, San Diego Union, 8:1. Scouts prepare for Merit Badge display in May; many troops already busy on project for 4th annual Indian Village show, May 11, 12 and 13.

Each of the 64 troops of the county is expected to display the work of one merit badge. Troops will be limited to one big exhibit, and there will be no duplication.

April 4, 1932, San Diego Union, 8:3-4. Boy Scouts open spring program with April Honor Court, Council leader Charles Rinehart attends; troop 51 of La Mesa heights awarded laurels.

April 5, 1932, San Diego Union, II, 10:3. Shuffleboard contests open at park today; record entry list 98 in city tournament on club courts at 6th Avenue and Redwood Street.

April 5, 1932, San Diego Union, II, 10:5. Show of roses will open next Saturday; 25th annual exhibition at Plaza de Panama, Balboa Park.

April 7, 1932, San Diego Union, 3:5. Upsets scored in shuffleboard tourney in park; last year's mixed doubles champions shoved back.

April 7, 1932, San Diego Union, II, 1:1. Many entries for Saturday, Sunday, Monday garden exhibit in Balboa Park.

April 10, 1932, San Diego Union, II, 1:3. "Sons of Pacific" Exposition body to be organized; group will produce colorful pageants reenacting historic California events; Albert V. Mayrhofer has accepted presidency; similar in plan and purpose of the Order of Panama, organized prior to San Diego's first exposition.

April 10, 1932, San Diego Union, II, 3:1. Shuffleboard deserts high seas and becomes city sport; nominal charge of \$6 a year is made for Roque players and \$3 a year for shuffleboard players; tourists and non-members can play for about two cents a day.

April 15, 1932, San Diego Union, 5:2. Colonel D. C. Collier told Missouri State Society that exposition is prosperity vehicle.

April 15, 1932, San Diego Union, 10:2. Mayor Austin yesterday appointed James L. Bush to Park Board to fill vacancy caused by resignation of Harry Warburton, 4th district candidate for Council.

April 17, 1932, San Diego Union, 7:1. First Cavalry of Exposition days recalled; Baja California "insurrection" kept troops on edge at San Ysidro headquarters, by Wallace F. Hamilton, former Captain, U. S. Cavalry.

"Forward, guide right. Gallop" --- the command to which the First United States Cavalry will thrill no more! For combat tanks can't gallop and that's what the famous First is using to go about in these mechanized days. Though at times they are said to buck when the terrain is rough. But the horse is out.

It was a provisional squadron of the First Cavalry that San Diego entertained within her fair borders in the years of the exposition, troops A, B, D and M. The officers and men arrived on the old army transport *Bufford*, having been lightered aboard at Monterey, California, regimental headquarters. Civilian pack train No. 12, reminiscent of the old Indian fighting days and the troop horses came by train.

The outfits rode to San Ysidro, then but a quaint village in the Tijuana River bottom, and made camp. Uneventful border patrol duty followed with only one break in the golden sunshine. Aviles launched his ill-fated insurrection against Cantu the night of December 8, 1914. Followed a week of menace to the tranquillity prevailing. The Cavalry bristled at the line, warning the combatants not to throw any careless lead into the American greasewood. Pop venders and hot dog stands flourished on the American side to feed the great crowds of curious motorists congregating to see a snappy war; there were colored balloons for the children. The insurrectos lined up often and willingly to be photographed by stills and movies. There was excitement but no blood. Arthur Guellow was on the city desk for **The Union** and Tom Armstrong drew a "war correspondent" assignment and slept in the telephone booth at the U. S. Customs House so as to be on deck when Cantu's forces, marching over the mountains from Mexicali, took the insurrectos in the rear and ended the war, as was the case.

Before the Exposition opened, the Cavalry Squadron marched to San Diego to occupy a model camp, built on the western slope of Switzer Canyon east of the "Isthmus" gate. The gardened area in the vicinity of headquarters tent, troop streets and the mounded and tamped earth of the stables may be seen even

today as one drives along Park Boulevard in the vicinity of the erstwhile Indian Village and now Boy Scout headquarters. Now mushrooms pop through the hard earth where the feet of fleet cavalry thundered and golden poppies blow where the alert sentry kept an eye peeled for the officer of the day and rehearsed his general and special orders.

Many will remember the parades, reviews and escorts of 1915. That one for Admiral Howard when the Cavalry galloped up Sixth Street from Laurel to Upas while the mounted First Cavalry band sat their quiet steeds opposite the distinguished reviewers seated in cars. G. Aubrey Davidson in a high hat stood beside the admiral. The amusing part was General George Van Horn Mosley, the captain of M troop, felt the review should be rehearsed. The cavalrymen were ordered to put on their best clothes. The rehearsal was not so hot. Horses ran away and got out of hand to break formations. Rain had fallen during the night and there was mud. The galloping horses in front plastered the succeeding ranks with slime. It was a wrathful bunch of cavalrymen that pounded past the reviewing party in the afternoon, their clothes dirty, but in as sweet an alignment as was ever maintained at a gallop and despite that the citizens of San Diego assembled in rows beneath gently swaying *Cocos plumosa* palms fringing the lip of the park, waved umbrellas, handkerchiefs and what not, shouted lustily within inches of the flanking mounts of the column-of-platoon formation.

Theodore Roosevelt, though no longer president, was the only man for whom the Cavalry ever turned out in full dress uniform during the Exposition years. It was "blues" that day and willingly for "Teddy." While an admiring crowd cheered, the Cavalry presented sabers as Roosevelt entered the portals of the U. S. Grant Hotel, then owned by the Grant family.

Even the great can err, as, for example, when Captain James O. Harboard, destined to win fame as one of the most distinguished generals of the American Expeditionary Forces, decided to turn his troop horses loose to grass under the supervision of a herd guard at San Ysidro. The captains of the other outfits declined to participate, army regulations, etc. allowing them much latitude in such matters. The horses stampeded, knocking down camp tents in their mad rush for freedom. Cavalry horses were scattered all over the lower bay region. L troop, over which Captain Harboard presided, was rounding up mounts for a week thereafter. Two of them were found later at the farm of an Otay rancher, pulling a plow as faithfully as they had responded to the commanding officer's whistle.

There are many First Cavalrymen in San Diego, lured by the climate and the charm of the San Diego manner --- retired soldiers who, having tasted the delights of this happy locality while in the service, returned to it to spend their declining days. They liked it then, they like it now.

April 23, 1932, San Diego Union, 10:1. City Planning Commission advises against anymore pueblo lands for parks or bird refuges; cites difficulties in getting a right-of-way through Torrey Pines Park.

April 28, 1932, Minutes of the Board of Park Commissioners.

Present: Commissioners Crandall and Buck. Absent: Commissioner Fox.

The matter of remuneration of park employees for services rendered in connection with broadcasting from Spreckels Organ was held over.

The secretary presented the following report of the Building Inspector on American Legion Building:

Recommending that:

Exit be cut at east end of building; that trusses be gone over and bolts tightened; that rubbish be cleared off of stage as fire prevention; that 1-inch wire mesh be put under skylights as protection from falling glass; that plaster on ceiling of arcade be repaired.

The report was accepted and copy ordered sent to Post No. 6 of the American Legion.

The chairman stated that under the new charter the Park Commission automatically ceased to exist on May 2, and offered the following resolution, which, being duly seconded, was adopted:

“BE IT RESOLVED, by the Board of Park Commissioners of the City of San Diego, as follows:

That we, W. C. Crandall, Samuel I. Fox and James L. Buck, members of the said Board, do hereby go on record as expressing our appreciation of the assistance rendered to us by the retiring Mayor and members of the Common Council in carrying out past policies of park development; and

That, during the period of reorganization, we offer to the incoming administration such services as they may see fit to ask of us.”

The chairmen then on the Park Commission expressed appreciation of the Board of the assistance and cooperation rendered by the Superintendent of Parks and office force in carrying out park development; and thanked them and the entire working force for having made the work of the Commission a pleasant duty.

The chairman then declared the meeting adjourned, sine die.

(Signed) A. D. Hill,
Executive Secretary.

April 28, 1932, San Diego Union, 5:2-5. President Hoover wires tribute to George W. Marston at 50th anniversary luncheon in local Y. M. C. A. (illus.).

May 11, 1932, San Diego Union, 6:1. San Diego Museum fights move of Council of Veterans and Patriotic Organizations to obtain building; Marston and others join in opposition to plan; Council holds conference today.

When the City Council confers today with the Park Board and veterans’ representatives to consider a request for dedication of the California Building as a war memorial structure, opposition to the plan will be voiced by officials and others interested in the San Diego Museum, now occupying the building, it was indicated yesterday.

George W. Marston, pioneer San Diegan and former head of the Museum, was quoted as stating it is “unthinkable that priceless art treasures,” many of them donated to the Museum as permanent memorials, face destruction by being literally cast into the street.” He added:

“While a war memorial building in Balboa park, of course, would be decidedly worthwhile as a permanent headquarters for veterans, it is unfortunate that the sponsors of such a building in their efforts to secure the California Building apparently were inadequately acquainted or grossly misinformed about the status, contents and dedication of the Museum. Those of us who have the interests of the city at heart, and I

am sure the veterans belong to this group, feel that the sponsors of the war memorial should reconsider their demands for the California Building immediately and seek another and more sustainable site.”

Miss Alice Lee, who succeeded Mr. Marston as president of the Museum, was quoted as saying: “I cannot over emphasize the urgency of the need for united action in opposing this unfortunate movement of the veterans by vigorously supporting Mr. Marston in his fight to save the Museum from oblivion.”

In its letter to the City Council, the Museum stated that the Museum attracts an average of 1,000 persons a day; that exhibits valued at \$100,000 or more are gathered there and that a scientific library with more than 150,000 titles is housed in the building. The Museum added that it was granted the use of the building in 1917 by the Park Board for use as long as the building was devoted to museum purposes.

The request for dedication of the building as a war memorial came from the Council of Veteran and Patriotic Organizations. In its communication the Council pointed out that in many cities war memorial buildings have been erected at considerable expense under provisions of an act permitting a tax levy for such purposes.

The veterans stated they did not wish at this time to ask the people to bear large taxes for a memorial but felt that the California Building could easily be adapted to serve as such a memorial, with facilities for conventions and meeting places for veteran organizations. Veterans yesterday added that the building would be kept open to the public, especially the scenic tower, which now attracts many visitors.

One of the park’s temporary buildings has been used for a number of years as a quasi-memorial building, with war exhibits and veteran meeting places. It is open to the public and is visited by many persons, according to custodians.

The San Diego Museum is financed by tax levies and by subscriptions. Last year the city appropriated \$11,700 for the support of building and museum.

May 11, 1932, San Diego Union, 6:3. Boy Scouts arrange nightly exhibit; public is invited to 4th annual Merit Badge Exposition emphasizing importance of vocational training at Indian Village; merit badge subjects covered include camping, first aid, forestry, signaling, stalking, carpentry, first aid to animals, craftsmanship, interpreting, life saving and safety.

May 12, 1932, San Diego Union, 5:1. Council passes Memorial issue to Park Board; action postponed on veterans’ request for transfer of Museum building.

The City Council yesterday asked for a report from the park commission on the application of the Council of Veterans and Patriotic Organizations for dedication of the California Building as a War Memorial Building.

The request came after representatives of the veterans, several from the San Diego Museum, which now occupies this building, and one member of the Park Board had spoken.

Captain W. C. Crandall, president of the Park Board, said his views were largely personal, as it was not definitely known if the old Park Board retained office and powers under the new charter. He said the museum more than any other institution in the park connects the city with the exposition of 1915-16. He expressed the view that the building was being used in conformity with a permit issued by the Park Board and felt that any move to override the Board would have to be taken with a two-thirds vote of the people.

Attorney Gilmore Tillman informed the Council that he believed the Park Board was a functioning body at present.

Mrs. Chester A. Smith told the Council that San Diego is the only city that has neglected to provide a meeting place for its war veterans under terms of an act permitting construction of memorials. She said it

was not the idea to use the building exclusively for veterans but that it would be open to the public and for convention uses.

Ralph S. Roberts, member of veteran organizations and who signed the application for use of the building, said there had been no desire to oust any organization from any building. He said the veterans felt the city would be glad to turn over the building to the veterans because it was believed the structure was not being used to capacity or in a manner commensurate with its cost. He said the museum register does not confirm museum estimates that an average of 1,000 persons daily visit the structure.

Dr. H. B. Bard said he wished to remind the Council that the museum was not a private organization but belonged to the city and that it contained valuable exhibits and books which could not be replaced. These exhibits, he said, were placed in the California Building as the only fireproof structure available in the park for such purposes and added that many gifts of valuable exhibits and books have been made to the museum because it is housed in a fireproof structure.

“Thirty-five years from now the Veterans of Foreign Wars, American Legion and other veteran organizations will be represented by a few thousand aging men and women who will have no interest in any buildings except the ones which house their chimney corners,” he said.

Councilmen expressed the hope that a method could be found to accommodate both the veterans and museum and asked the Park Board to attempt to work out some such plan. The veterans’ representatives said they had no objection to having the matter referred to the Park Board, and this was done.

July 18, 1932, San Diego Union, II, 1:1. Sacred lotus blooms in park pond beneath Cabrillo Bridge, by Hal Johnson (illus.).

Those who have driven up the Eleventh avenue canyon in Balboa park in the last few days have been impressed by the large pond of lotus plants in blossom near the Cabrillo bridge.

The lagoon literally is covered with the stately flowers, the stems of which are more than six feet tall. The blossoms measure more than six inches across in many specimens.

Roots of the lotus plant under Cabrillo bridge were obtained in 1919 from W. F. Deer of Philadelphia, according to Dr. W. H. Raymenton, director of O'Rourke Zoological institute in Balboa park.

Some of the roots from the 1919 planting were given by the San Diego park department to the Los Angeles park department, Dr. Raymenton said. They were placed in Echo park about six years ago.

And that is where this story should have begun, because attention to the beautiful lotus plants in Balboa park might have passed had not a Los Angeles newspaper said last week in effect that Echo park's lonely lotus plant is the only one in southern California, "so far as the park department is informed."

But attention was called to the matter and an investigation made.

July 18, 1932, San Diego Union, II, 3:2-3. Boy Scouts' swimming pool popular; open twice daily, forenoon and afternoon.

In answering a frequent question on why the pool is not available to all San Diego boys, scout officials say every boy from 12 to 18 years old may have all the wonderful privileges of the Indian Village by simply becoming a member of the scout troop nearest his home, or some other troop of his preference.

July 20, 1932, San Diego Union, 4:1. Park symphony enjoyed by John Citizen, by Myron Lustig.

August 16, 1932, San Diego Union, 1:8. Council orders 20 percent cut in salaries, reductions will begin with Mayor; Police and Fire Departments included on taxpayers' demand that this year's rate be held at \$2.15.

As a final resort to reduce the city budget to a level where it will permit a \$2.15 tax rate and answering a strong demand by local business men the city council yesterday afternoon by a vote of four to three passed a resolution effecting a wage slash of 20 percent of all city employees.

The wage reduction, which will bring a \$302,000 saving from the tentative budget submitted by A. V. Goeddel, city manager, also will be applied to the salaries of Mayor J. Forward, members of the council, city manager and others whose salaries legally are set up by the city charter. These latter reductions were made when the council, after passing the wage slash in clock-like precision, passed a series of resolutions requesting persons receiving law-fixed salaries to voluntarily accept a similar reduction. They all agreed to do so.

After passing the wage reduction measure, the council delved into the task of going through the budget estimates, item by item. But after setting up a special \$3,000 (?) emergency fund in the budget of the water department, and then passing that motion in its entirety, adjournment was taken until 10 a.m. today.

It is expected that after today's session, the budget will be returned to Manager Goeddel for revision and, after he returns it Thursday with the wage and other corrections, it probably will pass.

The four voting for the wage reduction were Mayor Forward and Councilman Dan Rossi, Charles Anderson and Al Bennett. Voting "no" were Councilman J.J. Russo, J.B. Blakiston and LeRoy Goodbody. Bennett introduced the measure, which will affect, among others, members of the police and fire departments.

Introduction of the wage-reducing measure was made by Bennett as soon as the council convened for its afternoon session, but it was not passed until there had been several ____ tilts between those opposing and favoring the resolution. During the mornings session of the council, which proved a stormy affair, as soon as the budget subject was brought in the open and before a throng which filled the council chamber to overflowing, a delegation of businessmen appeared and demanded the budget be lowered, even if it meant a drastic wage cut, to permit a \$2.15 tax rate.

The 20 percent wage cut, according to Goeddel, will make a saving of \$302,000 net to the city. Figured on the basis of last year's wage scale, the saving would have been \$478,000; Goeddel, however, said that in his tentative budget he already has effected a wage saving totaling \$131,000 (?). Thus, this figure, coupled with the salary reduction, means the city's tax bill for this year is reduced \$488,000, as compared with last year's, Goeddel pointed out.

In offering his motion to cut wages, Bennett said that if this did not reduce the budget enough to effect a \$2.15 tax rate the balance should be taken from the various city departments.

Having disposed of the manner in which the budget was to be reduced, the council then turned to the various items in the budget with the view of reducing some of them if possible. The only item considered yesterday was one for the water department, headed by H. N. Savage, hydraulic engineer.

Lane D. Webber, an officer of the First National Bank and spokesman for the businessmen, suggested that as a means of reducing the budget no second police court be established at this time and that in all probability it would become necessary to resort to reducing salaries of all city employees. As an alternative, if such becomes necessary, he suggested curtailing the activities or even closing some city departments, including the library, playgrounds, museums in the park, and others.

“The only way we can reduce salaries is to reduce the wage scale,” Goodbody put in. “The city manager can’t go ahead and do something in opposition to a city ordinance and the wage scale is set by ordinance.”

As the council adjourned yesterday, it seemed that with the salary cut having been taken care of most of the needed reduction, the way had been cleared for passage of a budget which will permit a much lower tax rate than the present tentative one of \$2.59 (?), as called for in Goeddel’s original estimate.

August 17, 1932, San Diego Sun, 1:6, 7:1. Council waits for protests in park cuts.

August 17, 1932, San Diego Union, 1:8. Council slashes park items out of City’s budget; library, other departments also cut; total saving is increased to \$482,186; Funds for Natural History, Serra, San Diego Museum, Fine Arts Gallery, Zoo and California Tower are eliminated.

Striking hard at many of the city’s cultural institutions in Balboa Park, the city council, in a move to reduce materially the city budget, yesterday withdrew its financial support from the Organ Pavilion, California Building, Zoological Garden, Fine Arts Gallery, Natural History Museum, San Diego Museum and Serra Museum

Besides voting not further to support these institutions, which for years have attracted thousands of visitors to San Diego, the council slashed operating estimates of many other city departments, including the library. When the day’s session ended, tabulations showed that yesterday alone the budget was cut \$94,186.

Monday the council voted a 20 percent wage reduction for all city employees, which meant a saving of \$302,000. This, when coupled yesterday’s reduction and previous savings made by A. V. Goeddel, city manager brings the total budget reduction to date to \$482,186. To effect a \$2.15 tax rate, the council must continue making reductions until the total slash is \$807,000 (?). This it is expected to do by taking the required amount from various city departments which have not been considered so far in going through the budget item by item.

In withdrawing its support from park institutions, the council’s action means these places, long dear to many San Diegans, will be closed unless a plan can be devised whereby they will be supported by private subscriptions. The councilmen expressed themselves as personally opposed to the closing of park buildings, but maintained they had no alternative if the budget is to be lowered to a point permitting a \$2.15 tax rate.

In each instance where the council withdrew financial support from institutions in Balboa Park it voted to maintain watchmen, both day and night, and to continue paying insurance on valuable articles now on display. No watchman was voted for Serra Museum.

Though the council denied an item of \$_____ as the salary for Dr. Humphrey J. Stewart, city organist of many years, it did vote the salary for an organ caretaker-watchman and another expenditure of \$_____ for an organ tuner, the money in the latter item to be spent “when needed.”

Action in denying aid to the park institutions came as soon as the council started considering budget estimates of the park department.

“I move that funds asked for the operation of the organ pavilion in Balboa Park be stricken,” said Councilman J. J. Russo.

“I hate to see it, but I am afraid we shall have to do away with the organist,” answered Mayor Forward.

“The same also will have to apply to many of the other park places, which in the past we have kept open for the public.”

There was some minor discussion concerning the organ, the need of a watchman and the need for keeping the instrument in tune although it would not be used. At last the measure passed.

Then, in quick order, the council went through the other items concerning the park institutions, and one by one ordered them stricken out of the budget.

Here are the individual figures on what the city will save by closing the park attractions:

Organ Pavilion	\$4,523.00
California Building	8,717.00
Zoological Gardens	9,605.00
San Diego Museum	2,645.00
Fine Arts Gallery	6,270.00
Serra Museum	2,725.00
Natural History Museum	802.50
Minor maintenance	410.00

It was also voted to reduce by \$188 the fund for maintaining the shoreline in La Jolla Torrey Pines Park.

Elimination of these items from the city budget also means that 26 persons will be thrown out of employment unless City Manager Goeddel can find use for their services elsewhere within the city government.

While considering the park department items of the budget, the council also took up the manner in which the municipal golf course is operated. Practically every councilman expressed himself as believing the cost is too high. Acting on this item was deferred at the request of Councilman Goodbody, who said he would make a personal investigation and report back to the council. The estimate for operating the golf course, was given as \$16,750. Before leaving the park items it was voted to eliminate the annual salary of \$800, paid to a tennis professional at Golden Hill playgrounds. It is not believed this action will mean closing the tennis courts.

When the council returned from its noon recess members were in the mood for additional reductions and started off the afternoon by practically eliminating what has been known as the street and trees division. This item was estimated at \$11,278.50, but when the council finished its reductions the item stood at \$2,500. Only a skeleton organization was left and the \$2,500 will be used as needed by the city manager. Since there are no plans to plant additional trees this year, Councilman Russo wanted the entire item removed, but he was voted down.

Another saving of \$981 (?) was made when telephone, telegraph was ordered reduced 20 percent after set ups for some of the institutions, already denied financial help, were voted out. Another park item to get the ax was one for insurance costing \$2,285. This was reduced to \$500 by doing away with compensation insurance, which would have been necessary if the park pavilion and other buildings were kept open. A matter of \$400 for fuel for the park buildings also was eliminated.

The only increase yesterday was \$900 for building repairs and other incidentals.

The next question discussed was that of food for the animals in the zoo,

“I’m not in favor of feeding dumb animals in the zoo when there are people going hungry,” shouted Russo. “Maybe we had better kill the animals and feed them to the hungry people, or kill the hungry people and feed them to the animals.”

With Russo answering a loud “no,” the original estimate of \$10,720 was sliced to \$5,000.

“Well we had to do something about those animals,” said the mayor after the action had been taken. “We could not let them loose on the streets.”

In finishing their pruning of estimates for the park division, council members saved \$100 from an item listed for nursery stock and seeds.

Estimates for the cemetery division, listed at \$22952.50, were accepted after \$500 had been cut for the advertising fund and \$408 eliminated for insurance, making another saving of \$908.

Library instructed to cut 20 percent to effect a saving of approximately \$12,000.

No reductions were made for the health department and planning commission.

Goeddel says day laborers will not receive a double cut.

Civil Service Commission instructed to make the minimum in all wage brackets lower by 20 percent than at present

The first thing to be considered at the next session will be the department of public works.

August 21, 1932, San Diego Union, II, 11:1. President Wegeforth criticizes action in elimination of finances for Zoo; care of animals problem even if funds withheld.

Dr. Harry N. Wegeforth, president of the Zoological Society, made strenuous objection to action of the city council in eliminating the municipal appropriation toward upkeep of the San Diego Zoo.

The Zoo is faced with closing if the appropriation is withheld, he said, yet closing the zoo would not solve the problem. The animals still would have to be cared for since they could not immediately be sold and all of them hardly could be shipped for temporary care at other zoos.

The Zoo is one of the city’s greatest advertising assets, Dr. Wegeforth asserts, and he adds that it would not be good business to force it to close. His statement is as follows:

“Action of the city council Tuesday in cutting off support of all institutions in Balboa Park has, so far as the Zoological Garden, come down to the question whether the people of San Diego wish to keep their famous zoo or have it destroyed by political maneuvers. From the number of telephone and personal calls asking what it will mean to the zoo, the management cannot feel that the people approve of the latter course. In the first place, the people have expressed on their separate occasions their intention of supporting the zoo and taking it out of politics by a special tax appropriation. It was only on being assured that the general provision in the charter for all the institutions active in the park included the Zoo that they were willing to

vote for the last charter as presented. And it clearly was not the purpose of the charter committee to cut off these institutions entirely from public support.

“The Zoo is unlike other institutions of scientific and educational nature and the closing of the zoo does not even decrease the actual expense of operation, for with all of the others, no matter how deplorable such action would be from the standpoint of community service and public interest, they could be closed and the work stopped. It could at best be only a small part of the activity at the Zoo that could be stopped. The greatest expense at the Zoo is that of caring for the animals. Even if they were all offered for sale, consummation could not be completed for a period of two years or more, and then only at great sacrifice of actual value, for all the zoos are curtailing their work and buying only the rarest specimens at great bargains.

“Some of the animals might be sent east to some of the large zoos to be cared for and exhibited until such time as the Zoo again could be in a position to care for them. This would be a great risk, especially at this time of year, as housing and weather conditions are so different and many of the eastern zoos each year lose their choicest specimens through colds and pneumonia. There is no western zoo equipped to handle them as shown by the death by pneumonia last year of the great orang’ at San Francisco. Yet this is one of the alternatives the Zoo is facing if this action passes in the final adoption of the budget.

“The research laboratory, being supported largely by the county and state, can be kept open for the work of the poultry interests and cattlemen, but the educational program will be omitted entirely. This work of bringing children from all of the public schools to the Zoo was made possible by the donation of buses for the work by Miss Anne Zimmerman, who could not bear to know that many poor children of San Diego did not have carfare to come to the Zoo, either alone or with their classes. The buses made it possible for all, not only the children from the schools, but from the children’s home, neighborhood house and all of the public institutions for unfortunate children.

“This cutting off of the tax appropriation also means that between 10,000 and 15,000 young trees, planted in the Zoo in the last five years, are jeopardized. Most of the older one of drought-resisting varieties probably will stand the lack of care, but the younger ones, and all of the rarer ones recently planted, many of them the gift of the Los Angeles Department of Parks, will go. But this, like the closing of class work, is not an irreparable loss, although it is to be lamented.

“Possibly one of the outstanding facts that the city council did not take into consideration is the fact that this drastic action means laying off 15 employees, or nearly half of the people employed at the Zoo. Some of them may not be able to carry on, or even get employment, but the majority, [who] have received little more than sufficient to live upon, will, if employment does not offer, soon be forced to appeal for public support to live, and most of them have dependents.

“The register shows that more than 200,000 persons visit the Zoological Garden of San Diego, more than half of whom pay admission, leaving at the Zoo alone \$25,000, every cent of which is spent here in the community for to this many _____ operating costs of the Zoo. In addition to this, many of these people, who come only to see Balboa Park, spend money at hotels and eating places. Constantly we have people stop and ask questions about the Zoo who tell us they would go straight from Agua Caliente to Los Angeles except that they stopped to see the Zoo. The visitors’ register is filled with names of persons from all over the world, and while everyone does not register, a fair percentage do of those who visit the Zoo. Page after page will show that more than 80 percent are out of town people. There are more out of town cars parked in front of the zoo than any other place of amusement in San Diego county. Actual counts made through both summer and winter months have proven this many times.

“In advertising the community to the world, in entertaining out of town visitors, and in supplying interest, pleasure and culture to our own citizens, the greatest single factor is Balboa Park and the institutions it contains. Every convention programs two things, a visit to the Zoo and to Agua Caliente. Some of our citizens have found out when away what the Zoo means to the community. Spectacular instances of this fact are the reputation Mr. Abbott found it enjoyed in London, and the surprise of former Mayor Austin when he heard it praised extravagantly at a dinner in Cincinnati.”

August 26, 1932, San Diego Union, 10:3. Organ concerts to be curtailed, but not dropped; will be heard three days weekly; other institutions stay open, says City Manager Goeddel.

Following a conference with park officials, A. V. Goeddel city manager, announced yesterday that only the daily free organ recitals in Balboa Park will be affected materially by the council's recent slashing of budget estimates for the city's cultural institutions. In the future, Goeddel said, the organ recitals will be heard only three days weekly instead of daily. So evenly has Goeddel distributed funds for the park institutions that all now can remain open for the entire year.

In some instances the park attractions have been reduced, it was said. Workers in some of the institutions have been reduced to half time and a few dropped from the payroll. One saving of \$2,000 was made for the Zoological Society when the council agreed to cancel the city's share of taxes due by this

organization. The county, it is understood, will remit \$4,000 in taxes, or a total saving of \$6,000 in taxes alone.

The California Building, San Diego Museum and Fine Arts Gallery also will remain open under the new arrangement of financing, it was agreed between Goeddel, John G. Morley, park director, and Arthur R. Hill, executive secretary, though there may be a curtailment of hours in which they will be open to the public. Provision also will be made for keeping open the Serra Museum at Old Town, Goeddel said.

The next session of the council is scheduled for 10 a.m. tomorrow when it will hear the first reading of the new appropriation ordinance. It is expected to be passed then by a four to three vote and a similar vote when it comes up for final reading Monday morning.

August 28, 1932, Los Angeles Times, IV, 10:1-2. San Diego Zoo inmates to be sold for taxes; collector will conduct auction to avoid having to pay \$6,354 bill himself.

San Diego, August 27. County Tax Collector James H. Johnson today served notice of seizure of the San Diego Zoo and set Tuesday as the date for sale by auction of all birds, animals and reptiles at the institution. The sale was ordered by Johnson in default of \$6,354 in delinquent taxes, the Tax Collector revealed.

Johnson this year, for the first time in the zoo's history, assessed the inmates as personal property. The County Board of Supervisors voted to donate the county's share of the tax bill, but complete payment was later blocked by refusal of the City Council to appropriate the balance.

"I don't know what we can do," Mrs. Belle Benchley, manger of the zoo, said today. "Mr. Johnson says he has to have the money, but we haven't got it. That's all there is to it."

Johnson explained his actions by stating that "political enemies" might be plotting to make him personally pay the zoo tax in the event it is not collected.

"I'm going to conduct the auction myself," Johnson stated. "I'll sell 'em right in the cages until I have enough money to pay the tax bill. I'll let the buyer worry about coming and taking his purchase away with him."

Johnson, when asked if he will postpone the sale until the tax money can be raised, stated that he will do that only in the event that the District Attorney will give him a letter exonerating him from personal liability in the event payment is defaulted.

August 29, 1932, San Diego Union, 7:1. Horticulture Called Chief Charm of Park

Editor: I concede that the organ, the art gallery, the museum and the birds of the zoo are valuable assets for our park --- first for our citizens and secondly for visitors.

All these features are obtainable in many other cities of the United States and they are not the real feature of our park. The trees and shrubbery in general, its central location in the city, and our mild climate to be enjoyed every day of the year make the park that our citizens and our visitors enjoy and appreciate the most. It is an asset that other cities do not duplicate, though many have very beautiful parks.

The development of the park horticulturally is the real necessity. It is possible to produce what cannot be duplicated in the United States or in Great Britain and Europe. Our park could be a school in horticulture. Many of the workmen should be young men interested and ambitious in horticulture. There is one such now on the force.

Kew gardens and many of the European and English parks have such opportunities for working students. Our university courses in horticulture give a very limited time for practical work. The best trained men horticulturally are those who have had practical working experience and, in general, our best gardeners are those who have been trained abroad.

Our park should have a large allowance for its development horticulturally and if necessary to economize do so on those features that are not so individually a San Diego product.

There have been very few donations for its horticultural development. There should be many more and it is to be hoped that the necessity for such endowments will be realized by our citizens and every taxpayer. I think there was \$20,000 for a lion's cage and den and \$10,000 for a bear's cage and den.

Think of the perpetual floral beauty such sums would have created. The small bear that was able to climb out for this freedom this past week was shot.

August 30, 1932, Los Angeles Times. San Diego city budget adopted after threat.

San Diego, August 29. The threat of a bankrupt city and charges of malfeasance in office were held responsible today for the final passage and adoption of a budget calling for a tax rate of \$2.49 after the City Council bolted its final budget session.

For nearly thirty minutes the possibility of a failure to pass the annual appropriation and tax-rate ordinance loomed as Councilmen bitterly reviewed their dissatisfaction with each other and the "comprise" city budget.

The resulting deadlock was broken by the dramatic declaration of assistant City Attorney Daniel that "if by an overt act the Council let the last day for adopting these measures go by, it will amount to malfeasance in officer and ground for prompt court action for removal from office."

The deadlock resulted when Councilman Anderson, angered by an announcement from Councilmen Russo and Blakiston that they would not vote for the measure, declared he was "just about in the frame of mind to let the appropriation ordinance go and not have any taxes." The Council decided on a recess and went into corners in an effort to settle the matter.

When they reconvened, Daniel made his announcement.

A vote was forced and the appropriation measure passed. The tax rate ordinance received the single negative vote of Mayor Forward.

August 30, 1932, Los Angeles Times. Battle looms on Zoo auction; San Diego City Council acts to block sale; assessor to face police if he carries out threat; action on unpaid tax still remains in doubt.

San Diego, August 29. Policemen and a barrage of court writs were ordered to the rescue of the animals of the San Diego Zoo by the City Council late today.

Alarmed over the announcement of County Assessor James H. Johnson that he will sell the animals tomorrow unless the zoo officials pay a personal property tax bill on them, the Councilmen took vigorous action.

At the suggestion of Councilmen Anderson and Russo, the Council voted to instruct City Manager Goeddel to have policemen on guard at the zoo tomorrow to "toss" Johnson out of the zoo if he attempts the sale.

The City Attorney also was instructed "to take whatever action is necessary" to prevent Johnson from molesting the animals. Goeddel recommended to the Council earlier in the day that they appropriate from the reserve fund the \$2,000 necessary to pay the city's share of the tax bill. Deputy City Attorney Daniel, however, warned the Council it would be inadvisable to "recognize Johnson's very doubtful right to tax the animals," on the theory that the zoo inmates might belong to the city and, as a result, be un-taxable.

Councilmen Anderson was the first to suggest the presence of policemen at the zoo tomorrow as a protection against Johnson's threat personally to conduct an auction sale of the animals.

Johnson, meanwhile, refused to make any further statement regarding the situation which came to the attention of startled San Diegans Saturday when the Tax Assessor posted a notice of the sale by auction of the zoo animals as forfeit for an unpaid tax bill of \$6,435 [sic]

Johnson declared he was forced into the sale because "political enemies" might try to make him personally responsible for the bill if it were not collected.

August 30, 1932, San Diego Union, 1:4-5, 2:3-4. If assessor James Hervey Johnson thinks he is going to sell the zoo animals at auction this afternoon, he is due for the surprise of his life.

August 31, 1932, Los Angeles Times. San Diego Zoo auction failed to find buyer; assessor, unable to sell either animals or property, gives them to State for tax.

San Diego, August 30. The world-famous San Diego Zoo was sold subject to redemption to the State for \$6,354 in delinquent taxes by Tax Assessor James H. Johnson, at public auction, this afternoon. Johnson declared the zoo State property after he had pleaded vainly for half an hour in an effort to get someone in a crowd of 200 curious persons to purchase the \$200,000 institution for the amount of the tax bill.

Contrary to preliminary fireworks, the auction sale was carried out without interruption on the part of city police ordered to the scene by the City Council yesterday to "toss" Johnson from the zoo grounds should he attempt to hold the sale.

Police, instead, were under orders to allow Johnson to proceed but to stop any probable buyer from taking his purchase from the grounds. Johnson, in company with two deputy sheriffs, arrived at the zoo at 2 o'clock and set up a small table in front of the administration building.

Taking a small gavel from his pocket, he pounded the table and started a preliminary "sales talk."

“This is the world-famous zoo,” Johnson told the gathering. “It contains some of the finest animal specimens in the world. You can’t make any mistake if you buy one of these fine animals this afternoon.”

The crowd maintained a perfect silence.

“Anyone want an animal?” Johnson urged. No one offered to buy any of the zoo’s items.

“All right,” Johnson announced, “if no one wants an animal than I now offer this stock and all its stock and equipment for sale for the amount of \$6,354.52 plus a \$2 seizure fee and a 75-cent mileage fee for my car.”

Unimpressed by the bargain, the crowd still remained silent. “Don’t you want this fine zoo?” Johnson asked, pointing his finger at a man nearby.

“No, sir,” the man answered. “I just stopped by to see that all the noise was about. I don’t think I need a zoo.”

Johnson then delivered a short political address which, likewise, failed to dispose of the zoo property.

At the end of a half-hour of vain endeavor, he struck a final blow with his gavel and announced the zoo State property and redeemable for the amount of taxes.

It is considered probable by city officials that the tax bill will soon be met by the City Council which so far has failed to appropriate the city’s share of the tax. The County Board of Supervisors voted \$4,000 toward the sum last week, leaving the remainder of the obligation up to the city.

Meanwhile, the City Attorney’s office is endeavoring to obtain a ruling on the matter, announcing its dissatisfaction with Johnson’s classification of the zoo inmates as personal property.

Johnson declared the zoo up for auction last Saturday, stating that he was forced to collect the tax immediately rather than run the risk of having personally to assume responsibility for the amount of the bill.

Webb declared that the State would gain final title after five years and only then if the zoo tax was still unpaid. The tax claim of the State is considered merely a lien on the property, Webb said.

Meanwhile, the city has three possible channels of action to follow in its efforts to bring formal title back to the incorporated institution. It can vote its share of the tax bill; it can claim the auction illegal because it was held on an election day, a legal holiday; or it can claim the animals at the zoo are exempt from personal property taxation. The City Attorney’s office declared itself busy today uncovering the best line of action.

August 31, 1932, San Diego Union, 3:3-4. Dr. Humphrey J. Stewart, city organist for 17 years, will play his last official recital in Balboa Park today, by Myron Lustig.

September 1, 1932, Los Angeles Times, 10:5-6. San Diego to continue operation of city Zoo.

San Diego, August 31. The status of the San Diego Zoo will remain entirely unaffected by its new position as a theoretical State property, it was declared today by Attorney General U. S. Webb in advice received here from San Francisco. His statement that the zoo will continue operation under the same management and the State could not gain legal title until five years had passed, came as cheering news to many San Diegans who, since Tax Assessor James H. Johnson's action of yesterday 'giving the zoo to the State' had expressed concern over the institution's fate.

District Attorney Whalen declared the sale of the zoo to the State was illegal, because Johnson waited too long.

Johnson declared the zoo State property after he made an unsuccessful attempt to auction the \$2,000,000 institution off to any bargain-hunting passer-by who had the \$6,358.52 necessary to pay the personal property tax levied for the first time this year.

September 1, 1932, Los Angeles Times, 10:3-4. Organist closes long career; Dr. Humphrey J. Stewart plans farewell concert at San Diego; after more than seventeen years ending work of seven decades.

San Diego, August 31. Dr. Humphrey J. Stewart, who for the past seventeen and one-half years has presided almost daily at the great outdoor organ in Balboa Park, terminated a musical career of seven decades when he played a farewell program at the park organ and quietly entrained for San Francisco where, with his daughter, he plans to spend the last days of his life.

Dr. Stewart, whose ability at the organ has gained him the rating of a master, and who has been decorated by the church for his contributions to sacred music, was forced to abandon his recitals after the city, as an economy move, limited the organ budget to the bare necessities of upkeep and tuning.

Dr. Stewart came to San Diego as official organist during the Panama-California Exposition in 1915 and has remained since that time. His compositions encompass almost every department of music. A collection of his published works fills sixteen volumes at the local library. He was decorated commander of the Order of the Holy Sepulcher by Pope Pius XI in 19__ in recognition of his sacred compositions.

September 1, 1932, San Diego Union, 4:1. EDITORIAL: Hervey Johnson's Auction

THE SAN DIEGO ZOO, finest in the west, is sold to the state of California for delinquent taxes, subject to redemption. The sale was accomplished by an elected official of San Diego county, presumably acting for the benefit of the electorate which gave him office.

Now that the boasts, threats, ridicule and recriminations stimulated by the episode have somewhat decided, it might be well to inquire what benefit to the taxpayer has been wrought by this spectacular action of the taxpayer's elected official.

Assessor Johnson invoked laws designed to permit the state and county to enforce collection of taxes. In this particular case, the device may work or it may not. Whether it works or whether it fails to

work, we cannot see where a dime of profit accrues to the treasury of San Diego county or the city of San Diego. And as to the people of San Diego --- the people, their tourist visitors, and the thousands of San Diego children who have been taught to regard the zoo as peculiarly their own --- certainly nothing but harm results.

If the county collects taxes from the Zoological Society, it merely collects taxes from itself. If it fails to collect taxes from the society, and by invoking legal technicalities clouds the society's title to property administered always for the public benefit, it succeeds only in complicating the zoo administration with a tangle of legalistic red tape. In neither case does the treasury profit.

The money cost of Mr. Johnson's escapade --- the cost of the time, energy and confusion expended upon this enterprise --- the taxpayer must bear. The taxpayer gets no nourishment --- quite the reverse. Whether it will profit Assessor James Hervey Johnson, time alone will tell.

September 10, 1932, San Diego Union, 4:1. EDITORIAL: "Save the Park"

"RESOLVED: That we want Balboa Park and its civic institutions maintained efficiently, adequately and liberally for all time to come."

Such a resolution, if submitted to the people of San Diego at a legal election, would be passed by an overwhelming affirmative. That is certainly true today. We have never known of a time when it was not true. And a formal vote to that effect might have some influence in protecting the park institutions from sporadic political raids.

As long as the park institutions remain a convenient "goat" for official publicity hunters and short-sighted political "economy drives," we are going to have politics rampant in the administration of one of the city's outstanding assets, and we are going to have the park institutions forced into politics to fight for their lives.

At the present time, it would be a civic benefit if the zoo, the museums, the art gallery, and every related interest could form a strong political machine. The chorus of protest against rampant budget-cutting shows that the people do not want the great and many-sided asset ruined. A machine representing the park institutions would serve the obvious popular demand. But it is obvious we do not want a "Balboa Park machine: as a permanent feature of our municipal policies.

It is a civic duty, and a duty of all the people, to declare as directly and vigorously as possible that they want the park freed from politics. That declaration ought to be made and repeated until it sinks deep into the consciousness of every man who hold office, or is ever likely to hold office, in San Diego. Until this

declaration is made, and made to stick, the real cost of the park will not be in taxes, but in recurrent squabbles.

September 10, 1932, San Diego Union, 5:3-4. Zoo will sell 600 specimens as forced economy ax falls.

More than 600 animals, birds and reptiles in the collections of the San Diego Zoo will be disposed of beginning November 1 in an effort to pay for the feed of the 1600 remaining species, it was announced last night by Dr. Harry Wegeforth.

Plans for maintaining the zoo on the reduced appropriation resulting from withdrawal of support of the city are well under way, said Wegeforth, president of the Zoological Society.

"We will start on our common stock when it becomes necessary to begin the disposal. Deer, seals and monkeys will go first. We are planning to release our herd of elk in the mountains if we can obtain permission of the state."

Aviaries will be reduced and the snake house, renowned for its large collection of reptiles, will be closed because of the expense of heating, Wegeforth said.

It is hoped by zoo officials that by making the cuts in the common stock, the valuable animals of the zoo, which cannot be replaced, will be maintained at the \$8,000 appropriation made by the county.

Fourteen employees of the zoo, including three "animal men," a gardener, truck man and cleanup men and two teachers who were kept at the zoo to instruct school children, were laid off September 1, Wegeforth said.

"These layoffs will mean that the work of the zoo practically will cease," he said. "All repairs will be stopped, and we will have barely enough men left to care for the 1500 specimens that we hope to retain.

"In other years we have brought 11,000 school children to the zoo in buses annually. They have been children who, for the most part, were unable to pay their own way. They were taken around by the two teachers and given valuable instruction on the lives of animals. That work already has been stopped entirely.

"Under the present setup we have only 12 employees left. Eight of them care for the animals. It is manifestly impossible for those eight men to tend the large number of animals that we now have. It is also manifestly impossible for use to feed the large number of animals that we have now on the present appropriation. We would need at least \$12,000 more to keep the zoo intact.

"We are taking care of all the animals now, our keepers working days, nights and Sundays and taking the feed money from appropriations previously made to pay bills to local merchants. We began economizing last year by exchanging animals that were expensive to feed for birds and other specimens that cost less to maintain. Now it looks as though the 16 years' work the Zoological Society has devoted to making San Diego's zoo one of the largest and best in the world, will be wiped out in a few months. When the disposal plan is put into operation, it will reduce the zoo into the ranks of many other smaller ones over the country."

September 11, 1932, San Diego Union, 3:1. County Attorney will sue San Diego Zoo if City doesn't pay county taxes on personal property of the San Diego Zoo.

September 11, 1932, San Diego Union, II, 1:8. Russo demands Wegeforth explanation; says \$1,000 a week enough to run San Diego Zoo; seeks reason for announced plan by Society head to sell 600 specimens; sets "hearing" for tomorrow.

September 13, 1932, San Diego Union, 1:7, 1:2-3. Council votes block special Zoo tax; four members refuse order for election to authorize two-cent assessment.

Although the city council yesterday refused to call a special election November __ to vote on a two-cent tax levy for the zoo, members individually announced that the zoo's usefulness is not destroyed and would see that appropriations adequate to maintain a satisfactory exhibit are provided.

In line with these announcements, the council directed that an audit be made of the zoo's books to determine its requirements, than an inventory of its animals be made and a budget setup for its needs be prepared. Work on these orders to start this morning.

Dr. Harry Wegeforth, head of the zoological society, said it was his belief that the zoo animals and properties belong to the city of San Diego and that the society is merely acting as an administrative trustee. He said if it is necessary to go through an legal process to further secure the city's title to the zoo he felt the society was more than willing to assist.

Wegeforth urged the council to submit the two-cent special tax levy at the November 8 general election. The council was told that it would cost \$700 for printing ballots and the like even if the county clerk mailed sample ballots along with the general election literature. In addition, Clerk Wright said it probably would be necessary to pay the election officers \$1 a day each, which would bring the cost of the special election to about \$2,000.

Wegeforth held that the zoo's security could better be served by the special tax levy than by any other means, stating that the institution has world-wide fame and attracts the best efforts of eminent scientists and explorers, who have brought specimens to the zoo, would be much exercised if these animals had to be sold, Wegeforth said.

He presented a financial statement indicating that the zoo would have to practice the most rigid economies and curtail educational and other services under the \$10,400 the council has allowed. He hat first estimated the council allowance at \$8,300, but Manager Goeddel said the higher figure was correct. The city, Wegeforth said, has in the past paid only a fraction of the zoo's actual operation cost, the remainder being defrayed by membership dues in the zoological society and admission charges. He estimated that last year more than \$60,000 was spent to run the zoo while the city at that time allowed \$26,000. The present allowance from city and county, together with other income, will give the zoo about \$43,000 on which to operate, Wegeforth said.

Fourteen employees were laid off September 1 for economy reasons, the zoo head added.

Councilman Russo said he saw no reason why the zoo shouldn't take a budget cut the same as other city departments had to, while Councilman Goodbody said the cut from \$26,000 last year to \$10,000 this year seemed out of proportion to other slashes made.

There was some discussion on the will of the people in regard to the two-cent special tax. Wegeforth held that the people by past voting had favored the idea. Russo and Councilman Bennett argued that the people in voting the new charter which eliminated the levy, might have changed their minds. Wegeforth said the best way to determine this would be to hold an election.

The zoo can operate on \$1,000 a week, Wegeforth said, which would mean that another \$7,000 would be needed to run this year.

Councilman Russo objected to calling the election for the two-cent levy on the grounds that it would create the impression that the zoo could not get money from the council. At this juncture, P. F. O'Rourke, local attorney, asked that Manager Goeddel take over the zoo, challenging the right of the city to allow the zoological society to act as trustees. Gilmore Tillman, deputy city attorney, upheld the society's right to so operate if the council desired.

Wayne Compton, another local attorney, urged the council to submit the special tax proposition to a vote to determined the will of the people.

Councilman Bennett said he would like an audit of the zoo expenses and income to determine how much it needed to operate and how much is available. Councilman Rossi amended the motion to include a check on the animals, holding that too many of one kind of animal might be superfluous.

Councilman Anderson suggested that any legal steps necessary to clear the zoo be taken and Dr. Wegeforth agreed. Bennett's motion then was unanimously adopted.

Referring to a signed statement that the Zoological society owns the animals, Dr. Wegeforth said this had been looked on by society officials merely as a designation that the animals and property mentioned were in the zoo. It is on this document that Assessor James Hervey Johnson has based his case for personal property taxes on the zoo, it was said.

The assessor's auditors came up and looked over the zoo and Mrs. Benchley, secretary, signed the list, Wegeforth said.

Councilman Goodbody moved that the special tax levy be submitted to the people to find out the desires of the citizens, he said. Councilman Blakiston seconded, on the same grounds. Bennett announced opposition, but said he was willing to make appropriations necessary to maintain a satisfactory zoo exhibit.

Rossi expressed fear that other city departments next would ask special tax levies if the zoo got one, and Russo urged that the election be postponed to the spring primary next year to save the \$2,000 expense. He said the amendment, if adopted at that time, would become effective as soon as if adopted in November. He felt the council would be severely criticized if it appropriated money for the election now and promised to vote for the submission of the proposition next year. Russo said he was willing to see that the zoo got enough to operate without material curtailments.

The move for the election November 8 was voted down, Russo, Bennett and Rossi overwhelming Blakiston and Goodbody.

The zoo also came under attention of the board of supervisors yesterday. First there was a communication from H. C. Steinmetz, member of the State College faculty, protesting against reduction of budget allowances for the zoo. He said the research work had untold value to all branches of animal husbandry.

Another communication from R. A. Whitney, veterinary and former member of the zoo staff, protested against the very activities that Steinmetz lauded.

Whitney said the zoo is doing work that veterinarians should be paid to do. This is done, he charged, for a certain clientele, and is of benefit only to persons getting the service and is of a sort that could not be classified as educational or a research type.

September 16, 1932, San Diego Union, 1:7-8. \$12,000 judgment upheld for Plaza tree victim.

September 18, 1932, San Diego Union, 4:5. City Charter League opposes special zoo tax levy.

September 19, 1932, San Diego Union, 8:8. Yorick Players offer "Midsummer Night's Dream" at two outdoor performances next Friday and Saturday nights in Court of Honor, east of lily pond in Balboa Park.

September 24, 1932, San Diego Union, II, 3:7. Yorick Players in park triumph.

September 25, 1932, San Diego Union, 6:5. Auditors show San Diego Zoo costs exceed income.

September 25, 1932, San Diego Union, II, 1:2. Sciots' concert in park today at organ to aid needy pupils.

October 2, 1932, San Diego Union, 9:3. Club will build new shuffleboard court adjoining the six courts operated by the club in Balboa Park; members will pay for the courts.

October 9, 1932, San Diego Union, 1, 2. San Diego gets \$70,000 play center; plunge nears completion in big San Diego park project; other recreation facilities rapidly being installed; program under \$300,000 bond issue fulfills dream.

The oft-berated depression has accomplished one new step in carrying to conclusion the intricate Nolen plan of city development that a decade of prosperous years was unable to bring about --- the building of a swimming pool and recreation center at the foot of Texas Street in Balboa Park.

Construction of the \$70,000 project is nearing completion.

The swimming pool, one of the largest on the Pacific coast, is expected to be finished this month. But baseball diamonds, tennis courts, Roque and shuffleboard facilities and landscaping probably will not be completed until about Christmas, construction officials estimated yesterday.

City councilmen expressed the opinion that, although the pool will be completed soon, it will not be opened until spring

For years, plans for the recreation center have been under discussion. Funds, however, were not available until last year, when the city voted a \$300,000 bond issue for relief of the unemployed. An appropriation of \$70,000 was included for the recreation center and \$100,000 to turf the municipal golf course.

The barren "hogs-back," on which the recreation center is located, had, up to that time, remained in practically the same condition as it was when Cabrillo sailed into San Diego bay. When Balboa Park was created, the northeast section was left for "future development."

The "hogs-back" was covered with short, ugly brush. Scores of workers were started on the job with shovels and axes and the brush was uprooted and the uneven soil leveled.

The main entrance to the recreation center will be from Texas Street, south from University Avenue. Directly across the end of Texas Street, a landscape entrance to the swimming pool will be arranged. Parking space will be provided along a short roadway, which is now being constructed.

The swimming pool, which is built of white tile, is out of doors and is enclosed by an eight-foot iron-wire fence. The pool is 131 feet long and 85 feet wide, nearly as large as the Olympic Games pool in Los Angeles. It ranges in depth from two and one-half to nine feet.

Just west of the pool, there is a large building which will house dressing rooms, a lunch stand and offices of the recreation center. It is in what is known as Spanish-type architecture, a low cement building topped with red tile decorated with colored tiles laid in the floor and walls. The floor of the building and walks around the pool are made of artificial tile blocks.

Across a path to the west of the building is cleared space where five tennis courts are to be constructed soon. Southward, about 100 yards, more cleaning and leveling is being done where indoor baseball and baseball diamonds are to be placed.

More than 60 acres of land are available for eventual development, as it is laid out on the Nolen plan. When more funds become available, a clubhouse and indoor recreation center are to be erected in the corner of the plot, nearest Texas Street.

Authority over the new facilities will be divided. The swimming pool will be under the jurisdiction of the recreation department, or city playground department, headed by W. A. Kearns. A charge, sufficient to pay upkeep expenses of the pool, will be made, but the amount has not been decided upon yet.

The other facilities will be handled by the park department, under the direction of John Morley, superintendent of parks. Plans for dedication ceremonies are being made by members of the North Park Business Association, headed by William Miller, president. A detailed program will be announced later.

Dressing room facilities for a daily crowd of 1,000 persons have been provided. A modern filtration plant, including three large filters, will circulate the 380,000 gallons of water, the capacity of the pool, in eight hours. A wading pool and sand area have been constructed beside the swimming pool, and they will be open to children free.

It is believed that the revenue from the users of the pool and golf course will create a fund large enough to retire the parts of the bond used in the construction work before they reach maturity.

October 9, 1932, San Diego Union, II, 2:3. Natural History Museum Building Officially Completed.

The new building of the Natural History Museum in Balboa Park officially is completed, A. V. Goeddel, city manager, informed the Council yesterday.

He asked the Council to authorize the filing of the certificate of completion with the county recorder, showing the date of completion as October 5.

October 18, 1932, San Diego Union, II, 10:3-4. Council votes additional \$5,000 for operation of Zoo this year.

The City Council yesterday appropriated \$5,000 additional for the zoo operation this year after turning down a move to give \$8,546.40, an amount held by the Park Board and Zoo to be the minimum with which the Zoo could function properly.

This brings the total city appropriation for the Zoo this year to \$15,432, compared with \$26,800 last year.

Suggestion that a move be placed on foot to cut down the zoo "to a size commensurate with the size of the city" was made by most of the Councilmen.

W. C. Crandall, of the Park Board, told the Council that to cut down zoo animals at present probably would mean destroying the animals as there is virtually no market for them at this time of the year.

Councilman Russo moved for the \$5,000 additional to come from the Unappropriated balance fund which now totals \$98,000. Goodbody amended the motion to make the appropriation \$8,546.40 and the mayor seconded the motion. On the vote the mayor, Goodbody and Blakiston voted for the appropriation with the others opposed. Russo's motion for \$5,000 was then voted on, with Mayor Forward, Blakiston, Russo and Goodbody voting for it.

"I believe the Park Board should be informed what we are likely to do next year with the zoo," said Councilman Goodbody after the vote was taken.

"If they don't know what to expect then they have to have houses fall on them to take a hint," observed the mayor.

October 19, 1932, San Diego Union, 5:1. Museum of Natural History moving dinosaur exhibit to new building (illus.).

October 23, 1932, San Diego Union, II, 1, 2. San Diegans close great year on varied recreation program.

Construction of a new recreation center in the northeast corner of Balboa Park was probably the outstanding project completed by the San Diegans in the year just closed. Upon the recommendation of the Chamber of Commerce hospitality and tourist recreational bureau the City Council approved the project

outlined and in furtherance of a plan to relieve unemployment appropriated \$300,000 for the following projects, all of which are nearing completion:

Outdoor swimming pool, tennis courts, shuffleboard courts, horseshoe pitching lanes, baseball diamonds, both regulation and indoor, wading pool and children's play area, basketball and volleyball courts.

Completion of the championship length, all-grass 18-hole golf course was another project sponsored by the San Diegans and approved by the City Council as an unemployment relief measure

Among other activities of the San Diegans were:

Rehabilitation of the Wilde fountain in the plaza.

Construction of two fine lawn bowling greens at the west end of Cabrillo Bridge.

October 24, 1932, San Diego Union, 1:5. City Hall has \$98,000 surplus that nobody knew was there; less than \$20,000 now remains in unemployment fund.

October 27, 1932, San Diego Union, 3:2. Woman plunges to death from Cabrillo Bridge.

November 8, 1932, San Diego Union, 1:1-2. G. O. P. leaders concede Franklin D. Roosevelt victory in California presidential contest.

November 9, 1932, San Diego Union, 1:1-2. Franklin D. Roosevelt wins presidency by landslide.

November 12, 1932, San Diego Union, 1:2-3. Thousands witness march and spectacle at Stadium in Armistice Day observance.

November 12, 1932, San Diego Union, 8:1. Belle Benchley, San Diego Zoo director, tells Altrusa Club of work.

November 15, 1932, San Diego Union, II, 1:1. Martin Johnson, in letter to Belle Benchley, director, says San Diego Zoo is most humane.

November 20, 1932, San Diego Union, II, 1:1, 2:2. San Diego High School graduation of June, 1882 to be staged at auditorium; 50 years' history to be depicted.

November 23, 1932, San Diego Union, II, 3:1. Annual Thanksgiving Day service will be conducted at Organ Pavilion, Balboa Park.

November 24, 1932, San Diego Union, II, 1:1. San Diego High School celebrates 50th anniversary.

November 25, 1932, San Diego Union, 6:1. Navajos show crafts in New Mexico Building today under auspices of San Diego Museum and Fine Arts Gallery.

November 29, 1932, San Diego Union, 4:7. N. Muller, Supervisor, wins in fight to pave Sixth Avenue adjoining Balboa Park.

December 1, 1932, San Diego Union. B. W. Sinclair, resident, praises park development; urges naming promotional manager.

In a letter to Goeddel, Sinclair said the appointment of W. A. Kearns as head of the advisory committee to recommend coordinated recreational activities was a fortunate selection.

December 14, 1932, San Diego Union, 3:5-6. Old Yuletide Pageant committee gives way for annual production at Organ Pavilion.

This year Mrs. Gazlay, Mrs. Henking and Miss Gilbert are voluntarily passing on the responsibility of this interesting work to a new committee, consisting of Mr. and Mrs. B. A. Buker and Mr. and Mrs. Sydney Frantz, who will carry on the tradition of the Christmas pageant in the same spirit of unselfish devotion which has characterized the efforts of the last 17 years.

December 17, 1932, San Diego Union, 7:1. City firms help equip park area.

Assistance of a number of San Diego individuals and firms in completing the recreational area in the northeast part of Balboa Park has been acknowledged by City Manager Goeddel in letters of appreciation.

These letters were sent to the San Diego Consolidated Gas & Electric Company, which donated conduit, electric cable, gas mains and technical advice; Southern California Telephone Company, which gave conduit and cable for the telephone system; G. G. Carroll, who donated use of a tractor; Daley Corporation, for use of a steam shovel and compressor; Joseph Jessop Jewelry Company, which donated an electric clock and Linda and Little, who gave a fountain for the children's wading pool. These donations saved the city hundreds of dollars which the municipality was able thus to divert to payrolls for unemployed relief, Goeddel said. He commended Engineer Hans W. Jorgensen for calling the matter to his attention.

December 19, 1932, San Diego Union, 10:4. Morley honored by park leaders.

John G. Morley, director of parks, recently was elected to the board of directors of the American Institute of Park Executives for a three-year term.

Morley is one of the "old timers" of the institution, having served as vice president of the organization in 1909 and 1910. He is well known nationally for his fine achievements in the development and management of Balboa Park.

The esteem in which he is held by associates in the institute was expressed in the latest issue of the group's magazine, "Parks and Recreation," when it printed the following: "Institute members delight in honoring Mr. Morley at every available opportunity."

December 25, 1932, San Diego Union, 15:1. Many features on program for Swimming Pool dedication.

When the new outdoor municipal swimming pool is dedicated a week from today, San Diegans will be introduced to one of the most modern natatoriums of its kind in southern California.

Dedication ceremonies will be conducted by the North Park business club, with John Miljan, motion picture actor, master of ceremonies. From Hollywood he will bring a number of film players, who will assist in the interesting program.

The program will include a bathing beauty contest, in which San Diego girls will participate. Four prizes will be given to winners of the contest. Other events will be a diving contest between expert divers, tennis exhibitions, volleyball games, swimming races, a nightgown race, underwater swimming contests, relay races, a tadpole scramble and many other features.

It is expected that the dedication ceremony will attract many out-of-city visitors. Judges of the bathing contest will be Miljan, David Millan, president of the San Diego Chamber of Commerce, and Joseph J. Russ, city councilman.

The dedicatory program has been planned by the business men's club, of which William Miller is president. W. D. Browne is chairman of the entertainment committee. The Chamber of Commerce and the City Council are cooperating with the North Park business club to make the event one of the winter season.

The new swimming pool was designed as a recreation place for swimmers and students and to accommodate official swimming contests. Thus, its depth at the shallow end is only two feet, five inches.

The bottom slopes to a depth of nine feet. The length of the pool is 131 feet, five inches. It is 65 feet nine inches wide. Walks around the pool have non-skid surfaces. Curbing is of a material that will not get slippery, according to information from the city engineer's office.

The pool holds 365,000 gallons of fresh water. After the water is filtered, it is heated to 80 degrees and then chlorinated and returned to the pool. The water enters the north end of the pool and is circulated through the pool and is drawn off at the south of the pool and at the bottom of the deep part. This insures a perfect circulation of all water in the pool and no dead water spaces.

The water that enters the scum gutter goes to the sewer and is wasted. Along the sides of the pool vacuum cleaner outlets are located so that an underwater vacuum cleaner can be used to clean the sides and floor of the pool.

A complete laundry for washing and drying towels, suits and coat bags is installed on the roof of the building. The bath house is a complete unit, combing service with beauty. The building is 151 feet by 36. The north end has public comfort stations and an electric transformer and switch board room. The south end of the building has the boiler and filter room in the basement and the laundry on top.

December 28, 1932, San Diego Union, Classified, 1:1. Spreckels has film recalling Exposition days.

The glories of San Diego's great exposition, the pride of the Southland in 1915-1916, are shown in motion pictures taken at that time and to be presented on the Spreckels screen for one week starting tomorrow. Two reels will be shown this week and more will follow later.

G. Aubrey Davidson, prominent San Diego citizen, was president of the exposition. He is seen many times during the reels, sometimes distinguished by the wearing of a snow white hat and sometimes a silk top hat. Other well known citizens include Mr. and Mrs. George Marston, Lyman J. Gage, George Burnham, Charles F. O'Neal, Carl Heilbron, Fire Chief Almgren, the late O. J. Stough, famous San Diego centenarian, and Ellen Beach Yaw, called "Lark Ellen" for her beautiful singing voice.

At a private screening of the reels at the Spreckels last week, Mr. and Mrs. Davidson expressed their delight at revival of the film. As the wife of the president of the exposition, Mrs. Davidson welcomed and arranged for the comfort of all prominent visitors.

"Those were two of the happiest years of my life," said Mrs. Davidson. "The days were crammed with events and we met many delightful and distinguished persons. Not only the official reception committee but every citizen of San Diego joined in making the visitors welcome. These reels are valuable not only to the older generation who enjoyed the exposition themselves, but also their children who should be introduced to one of the greatest events which ever took place in our city."

Among famous visitors to the exposition were the late Theodore Roosevelt and Mr. and Mrs. Charles Evans Hughes.

The progress made by San Diego is emphasized by comparison of downtown scenes shown in the reels with the present day. During parade scenes, which were taken on Preparedness Day, the old buildings which lined Broadway are shown. In others unpaved streets around lower Broadway are shown with dust ankles deep.

Features of entertainment shown include the well-remembered Tommasino and his band, who filled a long engagement at Coronado Tent City; Ellen Beach Yaw singing at the park organ; Myrtle Steadman, old-time cinema favorite, singing at the organ; the famous dancers from Seville, who entertained in the shaded walks of the gardens; dances by the Pueblo Indians who inhabited Indian Village, now used by the Boy Scouts and others.

Crowds of people in pre-war styles of dress, which now seem bunglesome and quaint, throng the streets in the film. Many babies, now grown young men and women, are shown in the famous Pied Piper parade when the kiddies were led around the buildings and through the fun zone called the Isthmus.

The reels will be shown one week on the program with "Three on a Match," starring Joan Blondel, Bette Davis, Ann Dvorak and Warren William.

December 29, 1932, San Diego Union, 4:1. EDITORIAL: Dr. Stewart

THE DEATH OF Dr. Humphrey J. Stewart, official city organist for San Diego for 17 years past, closes a career notable in its contribution to music. As composer and recitalist, Dr. Stewart attained high rank, but his outstanding achievement must be verified by the testimony of thousands --- possibly hundreds of thousands --- who have been San Diego's guests at the Spreckels organ pavilion.

Dr. Stewart was the intermediary through whom the late John D. Spreckels and the city of San Diego gave a lavish gift, and one rare in the record of public giving in the United States.

It was due to Dr. Stewart that this gift of music was always a worthy one --- worthy of the great art the musician serves and worthy of the profession Dr. Stewart had mastered. It was a principle with Dr. Stewart to give his audience, whether it numbered a score of casual visitors or a congregation of several thousand auditors, the experience of music that he himself loved and respected. He held on traffic with music "good enough" for the crowd. All his pride in the splendid outdoor organ, all his respect for his profession and all his love for his art, went into those daily programs in the park.

He had been 50 years a professional musician when he came to San Diego. In the 17 years of his service here, he played thousands of recitals. Hearers from all over the world sat before the organ pavilion -- letters came in, thousands of them, in which a sunny hour at the organ pavilion, flooded by the tones of the great organ, was described as the great experience of extended travel.

Faithfully, skillfully, with endless devotion and a quiet, humor-touched enjoyment of the day's events, Dr. Stewart served here. He served the city, and he served music. He served them well.

December 29, 1932, San Diego Union, Classified, 1:1. Death silences park organ for Dr. H. J. Stewart.

December 29, 1932, San Diego Union, Classified, 1:1. Statement of Mayor John F. Forward, Jr. paying tribute to Dr. Humphrey J. Stewart.

December 30, 1932, San Diego Union, 7:1. Dr. Stewart's own mass to be sung at rites today in St. Joseph's Church.

December 30, 1932, San Diego Union, 7:2. Royal A. Brown becomes the city's official park organist.

December 30, 1932, San Diego Union, 7:2. Dwight E. Sampson, budget control officer, suggested to City Manager Goeddel yesterday a program of improvement for Balboa Park when funds become available.

Dwight suggested that the program include:

Formation of a definite policy for the future of the old exposition buildings, many of which need repair badly.

Plans for ultimate surfacing of park roads to prevent excessive repair costs on the present dirt roads.

Plans be completed for the new clubhouse for the park golf courses.

A method of handling floodwaters that pour into the park from paved streets around it.

Repairs be planned for the organ pavilion to prevent erosion.

1933

Summary of Events in 1933.

(Note: Dates of events are approximate only.)

Open-air Swimming Pool Not Big Enough (January 9, 1933)
Natural History Museum Dedicated (January 14, 1933)
Royal A. Brown, Park Organist, Under Revised Contract (January 14, 1933)
63rd Coast Artillery in Park (March 5, 1933)
William Templeton Johnson's Plan to Replace Exposition Buildings (April 20, 1933)
City Manager Defends Recreation Fees (April 23, 1933)
18-hole Golf Course Opened (April 27, 1933)
Park Board Opposes Repairing Old Exposition Buildings (April 27, 1933)
Richard Requa's Plan to Repair Exposition Buildings (May 19, 1933)
Horse Show (June 2, 1933)
Colonel D. C. Collier's Plan for a Second Exposition (June 5, 1933)
Park Buildings' Fund Campaign (July 6, 1933)
Mid-summer Night Symphonies (July 24, 1933)
Fall Flower Show in Indian Arts Building (August 26, 1933)
Horses Burn in Balboa Park Academy (August 30, 1933)
City Condemns Buildings (December 4, 1933)
Voters Turn Down Civic Center in Park (December 19, 1933)

January 1, 1933, San Diego Union, II, 5:8. San Diego's new plunge will be dedicated today.

January 2, 1933, San Diego Union, 1:8, 2:1. Thousands see dedication of park swimming pool; city officials, president of Chamber of Commerce speak; parade, bathing beauties feature day (illus.).

January 2, 1933, San Diego Union, II, 6:5. Edwin H. Lemare, composer, pays tribute to Dr. Stewart.

January 3, 1933, San Diego Union, 5:1. Balboa Park horseshoe, chess and checker club outgrows name, play room.

January 4, 1933, San Diego Union, 6:1. An appropriation of \$3,000 for completing recreational developments in the northeast corner of Balboa Park failed of final passage yesterday when opposed by Mayor Forward and Councilman Bennett but gained enough support to indicate it would pass in its second reading next week.

January 5, 1933, San Diego Union, 8:3. Musicale to honor memory of Dr. Stewart.

January 9, 1933, San Diego Union, 1:3. San Diego's open-air swimming pool not big enough; at close of day yesterday number of swimmers almost reached 1,000; three times during day dressing room facilities were overtaxed and admissions has to be halted; 761 paid admissions Saturday; Sunday attendance estimated at more than 800.

January 9, 1933, San Diego Union, 3:3. Park Superintendent Morley reports Exposition buildings unsafe.

January 9, 1933, San Diego Union, 8:1. Opening of Natural History Museum set for Saturday afternoon; members to have preview; public to be admitted Sunday.

January 10, 1933, San Diego Union, 5:1. City Council votes \$3,000 work on new playground in northeast corner of Balboa Park; Bennett and Forward opposed.

January 11, 1933, San Diego Union, 1:3. State purchase Cuyamaca rancho for park.

January 13, 1933, San Diego Union, 10:1. Natural History Society to open new museum in park tomorrow.

January 14, 1933, San Diego Union, 5:5. Balboa Park's organ will continue to peal forth until end of fiscal year as a result of fiscal arrangements worked out yesterday by City Manager Goeddel; Royal A. Brown will be able to continue on the job at his pay of \$200 a month until the end of the fiscal year, July 1, provided he can arrange for giving four concerts a week; this is one more concert than he had been giving for the same pay.

January 14, 1933, San Diego Union, 6:1. Museum of Natural History will be dedicated today (illus.).

January 15, 1933, San Diego Union, 1:4, 4:2. \$175,000 Natural History Museum home dedicated.

January 16, 1933, San Diego Union, 1:7-8. Buildings in Balboa Park falling apart.

January 19, 1933, San Diego Union, 3:5. Alice M. Keys, La Jolla, pleads to safe park buildings.

January 20, 1933, San Diego Union, 4:1. EDITORIAL: An Award.

Every San Diegan will approve the second annual "most useful citizen award" of the San Diego Reality Board --- the award of this fine title to George W. Marston.

January 22, 1933, San Diego Union, 1:3-4, 10:1. Schoolchildren crowd pier as "Old Ironsides" is docked (illus.).

January 28, 1933, San Diego Union, 2:4. Laurence Burdick urges rehabilitation of park buildings.

February 7, 1933, San Diego Union, 5:3. Swimming pool in park will close until May 1; City Council yesterday declined to provide funds for operation; cost is \$1,000 a month.

February 18, 1933, San Diego Union, 1:6. Park Board asks that former Exposition buildings be repaired or razed.

March 10, 1933, San Diego Union, 9:1. City Manager Goeddel said should the Reconstruction Finance Corporation decide to distribute funds for recreation improvements in the larger cities, San Diego will be able to use about \$200,000.

March 11, 1933, San Diego Union. Quake rips Los Angeles area; 123 dead, 4,150 injured.

March 14, 1933, Minutes of the Board of Park Commissioners.

Present: Commissioners Buck, Swain and Otto. The City Manager was also present.

Letter from president of Chamber of Commerce enclosing copy of communication from Mrs. Mary B. Style relative to naming east-west road in Balboa Park "Austin Road" or "Austin Drive," in honor of former mayor Walter W. Austin was taken up from the last meeting. Since the name "The Vallecito," had been given the road in the Nolen Plan adopted by the Board in 1927, Mr. Otto moved that the suggestion be not approved, the secretary to so notify Mr. Millan, stating then when other roads are opened in Balboa Park, the honor could then be conferred.

Communication was received from the City Attorney giving his opinion that to permit a target range in Balboa Park would not be legal. The secretary was instructed to so advise the Chief of Police.

Letter was received from the City Manager relative to condition of "West Rock" in Indian Village and directing a conference of city and Boy Scout officials for the purpose of agreeing upon a recommendation to the City Manager as to the best procedure in the premises.

The park director, chairman of the conference, reported that the Fire Chief, Mr. Barley of the Boy Scouts, a representative from the Building Inspector's office and he had met, and upon investigation recommended that the structure be destroyed by fire. The recommendation was concurred in; the City Manager to be so advised.

Letter was received from Mr. P. Nickelsburg asking permission to erect a small stand near the playground at the shuffleboard courts in Balboa Park. Following the policy heretofore established against commercialization of the park, upon motion of Mr. Swain, seconded by Mr. Otto, the request was denied.

Communication was received from Mr. Geo. W. Braden, Western representative of National Recreation Association, relative to emergency survey to ascertain amount of money cities may desire for recreational purposes as part of a program to be presented to the Reconstruction Finance Corporation. The City Manager explained that he had called upon Mr. Morley and Mr. Kearns for an estimate to cover parks and playgrounds; that the estimate submitted by them of \$200,000.00 has been forwarded to Dr. Braden; that a conference between City and County officials was held to arrive at distribution of \$292,000.00, reported to have been secured from R. F. C. funds. City officials had presented two major propositions: Repair of Hodges Dam and Restoration of Park Buildings. With the Park Department in mind, he had called upon Mr. Morley and Mr. Hill from Park Department, Mr. Jorgensen and Mr. Haler of the City Engineer's Office, to meet with Mr. Rhodes, director of Public Works, to make estimate and recommendation relative to park buildings. Mr. Morley recommended that the conference has recommended razing the San Joaquin and Kern County Buildings and restoration of the other buildings, within the amount of funds which may be available; that request had been made of the Engineer's Department for estimate of amount needed to restore the buildings to be left and that same was promised as soon as possible.

Mr. Morley presented finished plans of golf course club house. Upon motion of Mr. Swain, seconded by Mr. Otto, the plans were approved and adopted.

March 17, 1933, San Diego Union, 1:5, 2:2-3. Louis J. Gill, architect, says quake exposes public schools as sepulchers.

March 19, 1933, San Diego Union, II, 4:1. Richard Requa urges quake-resisting buildings here.

March 20, 1933, San Diego Union, 5:6-7. Marston praises honesty, courage, friendliness of Charles S. Hamilton in tribute to memory of pioneer.

March 22/23, 1933, City of San Diego Inter-departmental communication; from Oscar G. Knecht, Assistant Chief Inspector, to A. V. Goeddel, City Manager; Subject: Balboa Park Building Survey.

(Page 1 dated March 23, 1933 and pages 4 through 5 dated March 22, 1933)

BUREAU OF SAFETY-INSPECTION DEPARTMENT

Our survey of the Exposition Buildings in Balboa park is now complete, and we herewith submit our report on same. The procedure of this survey was as follows:

- (a.) Inspection of exterior walls, openings, plaster and ornamentation.
- (b.) Exterior walls beneath floor level, including mud sills, underpinning, girders and joists.
- (c.) General framing, floors, trusses, rafters and roof joists
- (d.) Roof, parapets, skylights, drainage, towers, etc.

At present the original six main buildings, known as Nos. 4, 5, 7, 8, 9 and 10 and their arcades, etc. are a menace to public safety. The staff ornamentation and decoration is loose, broken, deteriorated and in danger of falling. All metal that beneath has rusted away, and patches of plaster fall quite frequently. The interior supporting members of the piers and arches are about gone, having been destroyed by fungus, leaving little save the outer plaster for support. These pilasters and arches are depended upon to support part of the roof and, of course, may fail at any time. Speaking more in detail, the general conditions can be summed up as follows:

Exterior metal lath all rusted away.
Plaster cracked, broken off in patches and a total loss.
All staff ornaments loose and weathered beyond repair.
Exterior walls below main floor level decayed beyond repair.
Floors settled from 2 inches to 4 inches on exterior edges.
Many girders destroyed by fungus.
Many posts destroyed by fungus.
Roofs of all but No. 4 mostly gone. All plaster tile gone.
Most of molds loose and beyond repair from weathering.
Many skylight panes broken and cracked and all need re-glazing.
Downspouts clogged and broken
No drainage beneath buildings.
Many wooden footing under water.
Considerable wood and refuse has accumulated beneath floors.

Excepting as above stated, the interior footings, underpinning, flooring and the interior main framing in general appears to be in fair condition.

There is a great deal of sentiment against the wrecking of these buildings, purely from an aesthetic standpoint. The cost of removal and cost of parking the space left is an important item to be considered.

The buildings are a menace to the public welfare at present, and it will cost a huge sum to rehabilitate them. If they are repaired, the question arises, would they be of any great value? They are impossible to heat, no revenue could be derived from them and a large sum would be tied up in the investment.

It then comes to one of two things --- they should either be restored or wrecked.

- (a.) At any rate the menace of the loose staff ornaments demands the removal of that feature as soon as possible.
- (b.) The tower on No. 5 should be removed.
- (c.) The tall projections above the parapet walls on all the buildings should be cut off at the level of the parapet.
- (d.) The pilasters of the arcades should be repaired at once to take the load off the roof.
- (e.) A concrete foundation should be placed under each building.
- (f.) The old plaster removed and replaced by good cement plaster.
- (g.) The old roofing removed and replaced by tar and gravel compo roofing.
- (h.) The skylights should be repaired, panes replaced and re-glazed.
- (i.) The trusses should all be tightened up.

This work will cost in rough figures as show in the following table:

RECAPITULATION OF REHABILITATION COST

<u>BUILDING</u>	#4	#5	#7	#8	#9	#10
Foundation	5,300	3,700	3,800	5,700	9,200	8,900
Plaster	10,800	9,700	7,600	12,200	12,200	14,500
Roof	2,000	2,100	2,000	3,300	3,900	4,700
Skylight	900	800	900	1,900	2,300	2,500
Arcades	7,600	8,600	5,200	6,800	5,200	4,600
<u>Misc.</u>	<u>500</u>	<u>700</u>	<u>700</u>	<u>800</u>	<u>700</u>	<u>900</u>
TOTAL	27,100	25,600	20,200	30,700	33,500	36,100

GRAND TOTAL --- \$173,200 plus Staff \$83,000 equals \$256,200

While all of these buildings can be repaired at approximately the cost shown above, it does not seem fitting at this time and under the present circumstances that such a huge sum should be spend for purely aesthetic reasons. The buildings have no practical value other than to grace the vision of visitors, and with one or two exceptions have never been of any practical purpose since the Exposition, except t house a few studios, and for general storage purposes.

Again, this sum might much better be spent for permanent earthquake resistant buildings which might be of practical use as well as being ornamental. The recent Long Beach disaster has fully demonstrated the fallacy of "JUNK" buildings, and it does not seen logical to maintain the present type of structure for public use.

In view of these conditions, we are of the opinion that:

Building No. 4 - Science & Education Building
 Building No. 5 - Russia & Brazil
 Building No. 7 - Pan-Pacific, "American Legion"
 Building No. 8 - Foreign Arts
 Building No. 9 - Canadian
 Building No. 10 - Industries
 Building No. 16 - San Joaquin

should all be wrecked forthwith.

A shake, such as experienced by Long Beach, may prove disastrous to these buildings. Therefore, we believe no time should be lost in taking some definite action regarding these buildings.

Our detailed findings of the rest of the buildings in the Park to which the public has access show that:

- No. 1 - Administration Building - Good condition.
All dirt in contact with wood should be removed so that there will be at least 6 inch clearance.
- No. 11 - Botanical Building - Fair condition.
Window frames in greenhouse total loss from fungus.
All steel trusses should be sand blasted and painted and window frames replaced.
- No. 15a - Girl Scout Headquarters - Good condition.
Much junk under building. Dirt should be cleared away from underpins and junk removed.
- No. 15b - Girl Scout Recreation Hall - Good condition.
Porch should be strengthened. Dirt cleaned way from underpins and wood block footings replaced by concrete blocks.
- No. 16 - San Joaquin Building - Total loss.
Underpins, foundation walls all rotted and settled. Roofing gone. Truss columns 6 inches out of plumb. Skylight panes all gone. Plaster and staff work all loose and broken.
Should be wrecked forthwith.
- No. 17 - Central School Library - Fair condition.
Should have concrete wall all around. Underpins cleared of dirt. Arcade foundations replaced with concrete. South and east sides re-plastered.
- No. 20 - Organ Pavilion - 6 inch tile curtain wall in transformer room settled 4 inches. Floor settled. Plaster broken in many places.
Should be repaired for looks only.
- No. 22 - New Mexico Building - Pretty fair condition.
Plaster broken in spots. 6 to 8 foot dirt fill against wood bulkhead has caused wood rot in many spots.
- No. 25 - Floral Association Building - Good condition.
Plaster broken in spots. Roofing cracked on ridge. Tower roof no good.
- No. 26 - Canadian Legion Building - Good condition.
Old fish pond should be filled in and concrete floor put in. All plaster tile should be removed to prevent accidents from falling tile.
Should not be allowed for public assembly.
- No. 31 - Zoo Reptile House
Plaster broken and cracked. Staff ornaments loose, Many skylight panes broken.
All panes need re-glazing.
- No. 33 - Zoo Administration Building
Should be put on concrete foundation. Staff ornaments loose. Several posts and girders

destroyed by fungus. West pilasters infected with fungus.
Damage should be repaired at once.

No. 44 - O'Rourke Institute

Main barracks has several spots of fungus showing which should be removed. Exterior pilaster cracked and broken in places and holes punched through. Rock walls on top should be removed or supports strengthened and all broken plaster replaced.

South Pueblo should have a concrete floor and a few infected timbers replaced.

All rest of buildings are mere in fair condition.

West Rock should be destroyed as per previous report.

Japanese Tea House - Good condition.

Zoo Laboratory - Good condition.

Zoo South Office - Good condition.

Golden Hill Golf House - Good condition.

Golden Hill Recreation Center - Good Condition.

Yours truly,

(Signed) Oscar G. Knecht,
Assistant Chief Inspector

March 22, 1933, City of San Diego Inter-Departmental Communication, from A. E. Johnstone, City Electrician, to Oscar G. Knecht, Assistant Chief Inspector; Subject: Inspection of Exposition Buildings, 3 pages.

BUREAU OF SAFETY - INSPECTION DEPARTMENT

At your request I have made inspections of the electrical wiring and equipment in the old Exposition Buildings in Balboa Park and submit the following report:

The electrical wiring was installed in 1914 and was of a temporary nature for the Exposition, which was intended for only one year. This wiring was installed, as I recall, under a blanket resolution exempting the Exposition from complying with any City electrical ordinances and from inspection by the City Electrical Department, nor were they asked to comply with the Rules of the National Board of Fire Underwriters. The Electrical Safety Orders of the Industrial Accident Commission of the State of California were not in effect until 1917.

The original wiring in these buildings never did comply with the City Electrical Ordinance of 1912, or later ordinances. These buildings were used for the Exposition for two years and have since been used by various organizations for various purposes, with the result that the original wiring has had extensions, changes and alterations and has been abused, overloaded and left in a worse condition than the original, which was never a safe installation, but the cheapest type that could be installed.

Most of these buildings were wired in open wiring inside the building as well as underneath. Open weatherproof wires carrying 2300 volts (known as high voltage) run under the floor of several buildings on insulators in a wooded box. This dangerous type of wiring is not permitted by the State or National Board of Fire Underwriters.

Cartridge fuses of 2300 volts are installed in a wooden box under a building without a switch at this location, which may cost the life of anyone renewing a blown fuse. This is a violation of the State Electrical Safety Orders.

Exposed open-knife switches, exposed live parts on buss bars, panel boards, switch boards, brass sockets operated or controlled around or over grounded surfaces are some of the dangerous conditions found throughout these old buildings.

Old twisted lamp cord and open receptacles and cord wiring installed and used as extensions are a fire hazard and are used in most of the buildings..

Transformer vaults built in and under buildings and outside against the buildings, are built of wood metal lined and have dirt floors, open knife switches, open fuse blocks. These transformer vaults are very dangerous and a violation of all electrical laws.

A few of the buildings have new wiring installed in conduit, but for the most part the wiring is of the open type.

The service comes into the sub-station in each entrance to the Park at the street car station. The service, a 4000-volt primary line, is brought in from a pole line to transformers and then distributed by two 2300-volt primary lines. One feeder is brought out underground and runs under streets and buildings to transformer vaults and one feeder runs on poles to buildings. Conduits, switch boxes, neutral conductors and non-current-carrying metal parts are not all grounded as required.

The following buildings are all wired in conduit:

No. 2 - Fine Arts
No. 3 - California State
No. 6 - San Diego Art Gallery
No. 7 - American Legion
No. 17 - School Library
No. 20 - Organ

Zoological Hospital

Some of these buildings need repairs, such as changing panel boards to dead front type and bringing transformer vaults up to State Electric Safety Orders. Vaults should have proper ventilation and all secondary wires, fuses and switches should be removed.

I found the electric wiring and equipment very dangerous to life and property and not complying with the City Electrical Ordinances, State Electrical Safety Orders or Rules of the National Board of Fire Underwriters. I, therefore, recommend the following changes in the electric wiring of all the buildings in Balboa Park:

1. That all wires be installed in conduit.
2. All switches to be externally operated, enclosed in metal boxes.
3. All cartridge fuses to be installed in metal boxes, with externally operated switches ahead of each set of fuses
4. All fuse panels to be changed to dead front type, enclosed in approved metal boxes.
5. All conduits, switches, fuse boxes and all neutral conductors to be effectively grounded to a water pipe.
6. All 2300 volt wires to be installed in conduit, with lead-covered conductors.
7. All drop cords to be changed to reinforced type, with sockets of an insulated type over and around grounded surfaces.
8. All wiring to be brought up to City Ordinances and State Electric Wiring Safety Orders. All transformer vaults to comply with City Ordinances and Rules of Board of Fire Underwriters.

Respectfully,

(Signed) A. E. Johnstone,

City Electrician.

March 26, 1933, San Diego Union, 4:1. Sciots' conference at Organ Pavilion this afternoon to aid Parent Teachers Association shoe fund; regular Sunday organ recital by Royal A. Brown will not be given.

March 26, 1933, San Diego Union, 10:5. William Templeton Johnson, local architect, given AIA award for the Mabel Shaw Bridges Music Auditorium at Claremont College.

March 26, 1933, San Diego Union, II, 1:2-3, 7:3-4. George W. Marston tells of huge profits in local real estate; expresses confidence in future.

March 26, 1933, San Diego Union, II, 1:8. Famous Scripps' paintings to remain in city; all may view Valentien art on California wild flowers; Natural History Museum is new home of collection.

April 8, 1933, San Diego Union, 5:2. Park Director John Morley estimates park, cemetery income; receipts from parks and cemeteries in the 1933-34 fiscal year were estimated at \$52,500; \$35,000 estimated receipts from golf; \$10,000 from refreshment stands; rentals and concessions, \$2,000; tennis courts, \$750.

April 11, 1933, Minutes of the Board of Park Commissioners.

Present: Commissioners Buck, Swain and Otto.

Matter of rotating position of organist, as recommended by the Civil Service Commission, was carried over.

Letter was received from City Manager appointing Mr. Vincent LeVesque unofficial Park Guide and Special Policeman; and ordered filed.

Letter was received from City Manager enclosing report, with estimate of cost, on restoration of Buildings; definite report and recommendation of Park Commission and Park Director to be submitted as to which buildings are to be razed and estimate of cost resurfacing the area after buildings are torn down.

After careful consideration of the report of the City Engineer, it was the sense of the Commission that the cost of restoring the buildings, placed in the report at \$270,000.00 would be prohibitive at the present time. In view of the urgency of the situation from the standpoint of hazard, and with the statement of the City Engineer that the buildings, when restored, might be expected to stand for another ten to twenty years only, on motion of Mr. Otto, seconded by Mr. Swain, the Commission went on record as recommending that the following buildings be razed and the vacated areas utilized for landscaping and planting:

- Building No. 4 - Occupied by Visual Education Department and Arts School
- Building No. 5 - Occupied in part by Park Department Refreshment Stand (Russia & Brazil)
- Building No. 7 - Occupied by American Legion
- Building No. 8 - Vacant (Foreign Arts)
- Building No. 9 - Vacant (Canadian Building)
- Building No. 10 - Vacant (County Fair Building)
- Building No. 16 - Vacant (San Joaquin Building)
- Building No. 17 - Occupied by City Schools Library.

It was advised by the Commission that perspective drawings be made, outlining the possibilities for beautifying the grounds after the buildings are torn down and suggesting a future building program of permanent construction. Estimate of the cost of resurfacing the vacated areas was left with the Director of Parks.

Copy of letter to City Council from the Manager relative to appropriation for golf club house was received and ordered filed.

Request of committee on National Music Week for cooperation of the Department during Music Week, May 7th to May 14th, as may relate to use of park and park accommodations was approved, subject to supervision of Park Director.

Schedule of green fees for 18-hole golf course, approved by the Manager for 60-day tryout, was ordered filed.

Verbal application for permit for Pony Ride in Balboa Park was, upon motion of Mr. Swain, seconded and carried, denied.

April 12, 1933, San Diego Union, 8:4. Spring Flower Show in park, April 22.

April 15, 1933, City of San Diego Inter-departmental communication, From Director of Parks to City Manager, Subject; Disposition of Park Buildings.

PARK DEPARTMENT

With reference to your letter of March 30, 1933, enclosing City Engineer's Report on Balboa Park Exposition Buildings, I laid the matter before the Park Commission at its meeting of April 11, as directed, and quote from the minutes of that meeting as follows"

"After careful consideration of the report of the City Engineer, it was the sense of the Board that the cost of restoration of the buildings, placed in the report at \$270,730.00, would be prohibitive at the present time. In view of the urgency of the situation from the standpoint of hazard, and with the statement of the City Engineer that the buildings when restored might be expected to stand for another ten to twenty years only, on motion of Mr. Otto, seconded by Mr. Swain, the Commission went on record as recommending that the following buildings be razed and the vacated areas utilized for landscaping and planting:

"Building No. 4 - occupied by Visual Education Department and Art Academy;
Building No. 5 - occupied in part by Park Department Refreshment Stand;
Building No. 7 - occupied by American Legion;
Building No. 8 - vacant;
Building No. 9 - vacant;
Building No. 10 - vacant;
Building No. 16 - vacant;
Building No. 17 - occupied by City Schools Library.

"It was advised by the Commission that perspective [sic] drawings be made outlining the possibilities for beautifying the grounds after the buildings are down, and suggesting a future building program of permanent construction. Estimate of the cost of resurfacing the vacated areas was left with the Director of Parks."

It seems that the position taken by the Park Commission is the only possible one in the circumstances and I concur in its recommendation. For your information, I am having perspective drawings made and will submit them to you when ready; and, in the meantime, I would recommend that the City Planning Commission be requested to assign Mr. Allen Perry of that department to assist this office in the work.

Should it be decided to take the buildings down, I would recommend commencing with the San Joaquin Valley Building (No. 16) and Kern and Tulare Counties Building (No. 17) first.

An estimate of the cost of resurfacing and landscaping the entire area to be vacated is roughly placed at \$60,000.00; and I recommend that \$20,000.00 be placed in the 1933-1934 budget with which to make a beginning.

Report of the City Engineer is returned herewith.

(Signed) J. G. Morley,
Park Director.

April 20, 1933, San Diego Union, 3:4-6. Letter from William Templeton Johnson suggesting each building be removed; ground landscaped with retention arcade; plan greater buildings in future; present permanent buildings to become nucleus.

Editor: As a former member of the Park Board for five years and a lover of Balboa Park, I take this opportunity of commenting on Mr. George F. Otto's letter to **The Union**, April 15, 1933.

The San Diego Exposition was a beautiful picture created for a day --- a year. Bertram Goodhue, designer of the California Building and consulting architect for the Exposition, expressed his desire many times that at the close of the Exposition all the temporary buildings should be razed at once, and the space occupied by them given a parklike treatment.

The grace and beauty of the picture architecture endeared themselves immediately to all the people of San Diego and thousands of visitors. When the post Exposition came to a close in December, 1916, no one wished to have the buildings destroyed, and ever since most of them have been in constant use for cultural purposes of various sorts.

About 10 years ago the temporary structures showed signs of needing extensive repairs if they were to last longer and about \$150,000 was spent on underpinning, roofing, re-plastering, to tide them over for a few more years.

Another 10 years have passed. These buildings of the cheapest construction, with no foundations but wooden mud sills, have borne, thanks to the mild climate, a charmed and charming life. But now their end is near. Roofs leak, piers have rotted, walls are out of plumb, plaster ornaments are in danger of falling. Most of the buildings and arcades have been pronounced unsafe.

It is estimated that to repair the six largest temporary buildings would cost as much as to build two permanent buildings of the size of the new Natural History Museum, and even then they would have but a few more years of usefulness. It really seems that to spend any more money on repairs is poor investment.

What of the future of the exposition group which has been one of our chief assets? The California Building and the buildings about the small square in front of it are permanent structures. The Spreckels Organ is a fixture. Two other buildings are the Fine Arts Gallery, the gift of Mr. and Mrs. A. S. Bridges, and the new Natural History Museum, built by public subscription and by generous donation of Miss Ellen B. Scripps.

These structures form a nucleus of what may be in time a group which will rival in beauty the picturesque architecture of 1915, but built of steel and concrete to last for many years.

The 25-year building program of the Natural History Society contemplates two additional buildings stretching along the north side of the Prado almost to the lily pond, tentative plans for which have already been drawn. The Art Gallery in seven years has increased its collections to such an extent that it is full. Inevitably it will grow with flanking wings extending south on either side of the Plaza de Panama.

From its very form and size, as the center of a composition, the Plaza demands an architectural treatment. Through the generosity of citizens or by public subscription, the day will come when this great square will be flanked by handsome structures of which we shall all be proud.

For the present, if unemployed labor and a little money is available, it might be well to repair the arcades, which would preserve a certain degree of harmony and partly mask the scars left by the demolition of the buildings. Also, a fringe of judicious planting about the areas occupied by former buildings would help materially. The site of the County Fair Building, east of the lily pond, could be set aside as an area for emergency parking.

We have a beautiful picture before us, but it has been evanescent. Let us now look forward toward planning in Balboa Park a group of buildings devoted to the higher things of life in which beauty, durability and utility will go hand in hand.

April 20, 1933, San Diego Union, 3:4-6. Letter from C. F. Disbrow says the one solution offered is to remove park buildings.

Editor: George F. Otto, park commissioner in yesterday's morning **Union** asked for opinions as to disposal of the exposition buildings. I believe there is only one solution and that is to wreck them before they wreck themselves and possibly cause disaster. They are becoming an eyesore where once they were objects of beauty. Remove the buildings and park the areas.

We will be a long time getting used to the change but we all know it must come sooner or later. Much credit is due the buildings for the remarkable way in which these buildings have stood the ravages of time. They have stood longer and given more satisfaction than any other exposition buildings I have ever seen.

April 20, 1933, San Diego Union, 3:4-6. Letter from Will H. Cameron urging a new city, county center in the park buildings.

Editor: Opportunities of the right kind will present themselves at the proper time.

The fact that legal authorities have appointed a joint fact-find committee to study civic center plans for the city and county of San Diego, and the fact that the long expected condemning of the old exposition buildings finally has come, together with the fact that Commissioner George F. Otto has started through the press an appeal to the citizens of the community as to what to do about our beautiful park gives me reason for presently publicly an idea I have before expressed privately.

I have always felt that when the old exposition buildings were condemned the citizens would be reluctant to see them destroyed without some plan for replacement with permanent buildings of the same architectural design. I believe now that some move will be made to do this, but under present conditions it will not be possible to raise the necessary money either from public funds or by private subscription.

My plan will take care of both the civic center idea and that of making permanent buildings in the park. It is to raise the necessary funds in the most advisable way to rebuild the park structures and make them serve requirements for a civic center. The same architectural design should be retained, which would mean none would be more than two stories, entailing no expense for elevator installation or operation. They could be built in the form of hollow squares, with a large skylight over the center portion of the second floor, which would mean that the buildings would be 100 percent daylight.

The location is idea; the setting would be more beautiful than any other suggested, and, as to being central, no other site so far proposed is more so. As there is plenty of parking space and as all business these days is on wheels it would be just as accessible as anywhere.

We in San Diego must cut our cloth, and I feel that everyone will agree we cannot afford the funds necessary for both a civic center and restoration of the buildings in the park. I know that if it becomes necessary to raze the park buildings, from San Diego and from the United States will be eliminated one of our most beautiful possessions and nothing could be done in landscaping or otherwise that would cause the people to forget the former beauty, which is know the world over.

April 20, 1933, San Diego Union, 3:4-6. Letters from **San Diego Union** readers regarding park buildings.

Miles S. Edgerton
Nelson V. Tripp
Donald MacArthur

April 21, 1933, San Diego Union, 4:1. EDITORIAL: The Last Service.

We indorse the suggestion put forward by Mr. William Templeton Johnson as the program of reconstruction in Balboa Park --- yet we indorse it with keenest regret.

We believe that Mr. Johnson's letter to **The Union** yesterday described the maximum that can be effected in preserving the present aspect of the exposition city in the park. We regret profoundly that this maximum of preservation still entails the destruction of most of those crumbling landmarks. In the opinion of this distinguished architect, only a little of the present beauty can be salvaged.

Necessity seems to demand that most of the buildings must be razed --- we cannot but agree with that. Mr. Johnson's suggestion in detail is that unemployed labor and a little money be devoted to repairing the arcades bordering the roadway and plaza, that the temporary structures be razed, and that the final rebuilding of a city in the park be regarded as an eventual development, to be accomplished over a long course of years.

It is possible, we believe, that the swift new developments in government financing, both national and local, may bring this eventual rebuilding earlier than any present expectation. But we believe the city must reconcile itself to the loss of the present buildings.

We trust that public opinion will stress the work that is immediately possible --- the reconstruction of the arcades ---, preserving the one practical vestige of the exposition city's beauty. Along with that, as Mr. Johnson suggests, we should plan for eventual developments.

The most that can be done is little enough, and we regret it. But that should be faithfully and immediately done --- our last service to a dream city which now, after many years, must go.

April 25, 1933, San Diego Union, II, 3:1-2. Letter from Octavie G. Page pleading for conservation of park's personality.

Editor: This is a plea to save the unique personality of our park and to save it for strictly recreational and cultural purposes. With the permission of the **San Diego Evening Tribune**, I am lifting part of my Saturday evening column for this purpose.

The request of George F. Otto, of the Park Board, for expression of opinion regarding the park buildings has not brought the response it should have, mainly for two reasons: one being that the general public is rather in the dark concerning the possible financing of park buildings, and the other is the discouraging hesitancy of so many people to express publicly opinions they nevertheless feel strongly. This I have gathered from talking with them.

In the first place most of them do not know that of the \$150,000 spent on repairs 11 years ago, no less than \$100,000 was given in private subscription by people who cared that much. Many more are unaware, despite publicity, that the new Natural History Museum was a gift of Miss Ellen B. Scripps.

Very few have given thought to the possibilities of the Woolwine-Maloney racing bill, now awaiting the governor's signature, which promises a million or more dollars a year to be used for state and county fairs. This may not become a law but, again, may we not look with hope toward the \$500,000,000 just appropriated for distribution through the R. F. C.? Especially considering the statement by one of its members (See Friday's **Union**) that the corporation "does not make rules governing the administration of funds made available . . . "

Bertram Goodhue regarded those as temporary buildings. With the modesty of geniuses he could not foresee that they would so win the affection of the San Diego people that they would remain, nor that for 18 years after he planned them they would draw admiring visitors from all over the world. He could not foresee to what extent these buildings were to serve in useful activities in future years when he would no longer be with us, nor that as their replacing fell into other hands than those than planned the exposition, the newer, permanent buildings should consistently decrease in individuality and romantic appeal. Many cities have art galleries, many have museums, but not another city on

the face of the earth has such a bewitching jewel of a community conceived by Bertram Goodhue, with that baffling quality of romance that apparently only he could give it.

All the talk of doing away with the older buildings to make way for greater ones is very well, but is that what we have done so far? As originally planned, the whole layout --- grounds, shrubbery, buildings --- was apprehended as a unit. Every inch of the territory was planned to complement the rest. The planners knew that patios, shaded colonnades and sparkling colored towers are suitable to our landscape and climate. Thus they gave us the vistas of architectural passage and landscaped garden; the broken structural outlines against our unbroken sky; the show-broken surfaces to face our sunlight; the fanciful towers against swaying eucalyptus trees.

Have we, in fact, improved on this? Look for yourself. Look at the new Natural History Museum then look at pictures of the old Southern Counties Building, with its cloistered front patio and tiled towers. Look at the Fine Arts Gallery and compare a picture or your memory of the Sacramento Valley Building that once stood there, with its overhanging eaves and wide-flung, inviting entrance. Then ask yourself if we have indeed replaced the old with greater ones, or if we have, instead, sacrificed their friendly and colorful charm for stiff formality.

The point is that if such generosity as that of Miss Ellen Scripps in providing the museum or that of the Bridges in financing the gallery, is procurable, why cannot permanent buildings be carried out after the patterns of those pricelessly appealing ones of Mr. Goodhue's? The buildings have been worth millions in advertising to San Diego. It was not their permanence or just what they contained: it was their appearance, and that is what we now stand in danger of losing. Can we not preserve those shells a little longer, at least to save their beautiful outlines until we know more definitely what the immediate future holds for us.

April 25, 1933, San Diego Union, 3:2. Letter from Laurence Burdick, president Executive Committee of La Jolla Conservation Society, advocating preservation of old park buildings.

Editor: Letters so far published in reference to the future of the exposition buildings in Balboa Park have already served to clarify the situation. We know certainly that restoration is impossible. We know with equal certainty there is an indefinable something in the spirit of these buildings which sets them apart from similar groups in any part of the world.

Could not the varying opinions expressed by the sincere contributors to your columns be collated until a broad general plan can be worked out, the accomplishment of which would be reached only after a period of years? As the experts tell us, the present buildings must be razed; let us plan to replace them, unit by unit, according to Mr. Goodhue's original plans.

As it seems impossible that we can ever hope to duplicate all the structures, we offer the following suggestions:

That four permanent buildings be erected on the corners of the Plaza de Panama, duplicating the present structures; that, in the meanwhile, colonnades on the Prado and leading toward the Organ Pavilion be repaired until such time as they can be replaced with permanent construction.

Even this program may seem difficult of accomplishment in view of the present finances of the city, but can we not carry this thought in mind and as the need arises provide even one building at a time until a part, at least, of the former beauty is restored to us? With such beautiful models at hand, why should we take the chance that individual contributions to a master plan, no matter how architecturally successful they might be, would fail to harmonize so completely as the original conception of Mr. Goodhue?

April 25, 1933, San Diego Union, 3:2. Letter from R. W. Snyder asking if the spirit will be the same if the buildings are razed.

Editor: Our medieval dream city --- Balboa Park --- we all love it. It casts a spell over us, but nearly all its buildings must go. We are reluctant to face the question, "Will it ever be the same again?"

The danger lies in creating the new. Can we create with equal success when the vision of the old is gone? Can the spirit of the old city be preserved?

If some genii could transform instantly the present frail buildings to others, permanent and structurally strong, the lovely spirit would be the same. For many different reasons, however, the exact reproduction of the buildings probably will be considered undesirable and impractical, thus bringing on the inevitable exterior changes.

The serious difficulty, it seems to me, is to go about the replacement in years to come, by means of a definite program, so as to reproduce just as far as possible, the lovely spirit that now lies in the entire group of buildings.

Messrs. Goodhue, Winslow and their associates (professional and laymen) put something in there that must not be lost. The practical questions will be solved because they are comparative easy. But the spirit?

April 29, 1933, San Diego Union, 1:6, 2:6. City Manager Goeddel reports that seven Park buildings should be razed.

Razing of seven of the prominent buildings in the old Exposition group in Balboa Park, repair of three others at city expense and authorization of plans to repair 10 others by public subscription were recommended by City Manager Goeddel in a comprehensive report yesterday.

Findings of engineers and building inspectors were transmitted to the council with the manager's recommendations.

The buildings recommended for destruction as menaces are the American Legion War Memorial Building, County Fair Building, San Joaquin Building, Visual Education Building adjoining the California Building, the refreshment stand building, the old Natural History Building and a building now used as a paint shop, across the street from the Legion Building.

Falling cornices, fire hazards and inability to resist earthquakes doom the structures in the manager's opinion, which is supported by technical reports.

Landscaping the areas from which buildings were removed is suggested by the manager. Several of the buildings recommended for destruction front the Plaza de Panama, the principal plaza of the old exposition grounds.

The buildings recommended for survey and repair by the city are the park administration building, Botanical Building and New Mexico Building, reported either in fair or good condition.

The 10 structures which the manager would have the council authorize public subscriptions to repair are the Girl Scout Headquarters, Girl Scout Recreation Hall, Central School Library, Organ Pavilion. Floral

Association Building, Canadian Legion Building, Zoo Reptile House, Zoo Administration Building, O'Rourke Institute and Boy Scout Indian Village. These are in good or fair condition, the manager says.

The famed California Quadrangle, the Fine Arts Museum and the new Natural History Museum are of permanent construction, differing from others of the exposition group.

Goeddel asked that the council call a conference with the city officials who submitted reports on the buildings for purposes of discussion and that specifications be ordered at once for razing of the seven buildings deemed dangerous. He asked that estimates be sought for re-landscaping the grounds on which the seven buildings stand and that a plan be prepared for eventual replacement of any razed buildings with structures of permanent construction.

"I am aware of the necessity for economy," said the manager in transmitting his report, "but your honorable body and the public are entitled to know these conditions and realize that financial responsibility accrues to council and the city in the event of death and injuries caused by the condition of these buildings.

"With these thoughts in mind, and not with an idea of being an alarmist, this report is submitted."

San Diego Union, May 4, 1933, 5:2-4. LETTERS: APPEALS TO SAN DIEGO ORGANIZATIONS FOR PARK

Editor San Diego Union. In answer to requests for suggestions as to our exposition buildings of 1915, the following is offered. The experts inform us that they are no longer safe, therefore they must be demolished. The question then facing citizens is how shall new permanent buildings of the same artistic character be financed? The only way that appears feasible is for those of use who have specifically and financially benefited by this splendid adornment to our city, to return to our common pocketbook a small percentage of the values we have received.

I refer to our land value. Granted that site owners of San Diego can demand an increased rental for their sites on account of the park, why should they not consider it a privilege as well as a paying investment to accept an assessment upon their land value, say of one-tenth of 1 percent per annum, until every exposition

building has been replaced by permanent artistic structures? Thus, we may not only add artistic splendor to our city, but at the same time develop an attractive magnet that will appeal to lovers of beauty the world over.

S. S. TABER

2451 A street.

Editor San Diego Union, As you invite correspondence on the exposition buildings, I should like to offer one or two suggestions for what they are worth.

It will be deplorable if those graceful buildings have to be razed to the ground. But where did the funds for their construction come from, when San Diego was a smaller and much poorer city? Could we not expect to raise money from similar sources for the coming exposition, sufficient to restore or rebuild those beautiful monuments of the old one? San Diego has almost doubled in size and the country seems to be on the up-rise from the big depression. There is no need for haste, anyhow.

If I am over sanguine in this suggestion, I would submit another proposition, the execution of which would partly compensate for the loss of the old exposition buildings, provided the arcades are retained.

I see it is proposed to borrow from the R. F. C. for construction of the civic center, also that three sites are suggested --- tidelands, old courthouse block and Balboa park. Why not adopt the site last mentioned and erect the city and county buildings at some easily accessible place on the outskirts of the park? Those buildings might follow the Goodhue style of architecture and there would be ample space for beautiful grounds.

W. P. REYNOLDS

2572 Third avenue.

Editor San Diego Union. The people of San Diego should consider seriously what the loss of the buildings in the park will mean to the city before they allow these architectural gems to be destroyed and the city deprived of its one real asset of physical beauty.

We must make a desperate effort to retain these buildings, which have become so dear to the hearts of our own citizens, given our visitors their most lasting impressions and most delightful memories of San Diego, which have more than any one thing given San Diego unique prestige among cities of the world.

An article in one of our papers recently made the assertion that the most sensible things would be to tear down the buildings and fill in the spaces with trees and flowers and fountains just as all other cities in the country have planned for their parks.

To Preserve Distinction

To my mind this is the strongest argument we could possibly have in favor of keeping, at all costs, the one outstanding feature which makes our park different from all others. No other city has or ever will have a group of buildings such as these, set in the midst of a public park --- buildings conceded to be the most beautiful group architecturally in this country or any other.

Shall we give these up and see our park deteriorate to the common level of every other park in Christendom?

Once the buildings are destroyed they are lost forever and can never be replaced. Long as they remain standing, even in a state of temporary preservation, there is always a chance eventually of their permanent rehabilitation.

Much is being written about preserving the park buildings, but until some organization or group of individuals takes a definite stand in the matter and starts a "Save the buildings in the park" campaign in earnest, no progress will be made beyond the writing of articles.

To Start Ball Rolling

If only the chamber of commerce, San Diegans, Rotarians, Kiwanis, Lions, or some other civic minded club --- one or all of them together --- would start the ball rolling and give those who are sympathetic to the movement a rallying point, I am sure there must be thousands of people in San Diego who, like myself, would be glad to subscribe toward the temporary preservation of the buildings and cooperate in saving to the city its most beautiful asset.

To save these buildings, fill in the ground and re-park the whole would surely cost the city a goodly sum, besides the perpetual expense of maintenance. Instead of using this money for destruction of the buildings, why not devote it, with the addition of private subscriptions, to strengthening weak places, repairing cornices and arcades and to preserving the buildings as they stand, at least temporarily, hoping that as times improve and money becomes freer, institutions or individuals of the city itself will eventually finance their permanent construction.

GERTRUDE GILBERT

May 5, 1933, San Diego Union, II, 1:1. Sam I. Fox suggests replacing an exposition building with convention hall; tells Chamber Board San Joaquin Building location ideal for plan.

San Diego Union, May 6, 1933, 10:1-2. LETTERS: DUPLICATION OF PARK BUILDINGS SEEN AS ASSET

Editor San Diego Union. It is fortunate that in the columns of this paper and elsewhere there is so much constructive and otherwise wholesome discussion of the problem of the Exposition buildings in Balboa park. It is much better to know how people feel, to have as many constructive ideas and plans as possible, so that whatever we do eventually, we will do with our eyes open.

Everyone seems agreed that the buildings, their setting and the combination of this architecture with the landscaping are unique, an artistic masterpiece, with an attractive and friendly atmosphere which endears itself to all who are fortunate enough to visit us. The character of the present discussion is clear evidence of the importance of Balboa park as it has been since the Exposition.

We humbly add our personal opinion, our suggestions to the many others which have "appeared on the tapis" thus far. As we could scarcely expect to recreate this perfect atmosphere which Goodhue and Winslow have given us in the Balboa park of the Exposition, because it has been due to their outstanding individuality and genius, we should indeed cherish what is still left to us of their masterpiece. For safety's sake, some of the buildings which are being used more or less, or which are so placed that people naturally come into contact with them continually may have to go first, and before long. Others, which no longer are used, or which are isolated sufficiently so that they scarcely endanger lives might well remain longer with us.

New Duplicates Useful

As a second suggestion, is it too expensive to think of copying one or more of the structures in material of permanence? It is true that we already have as permanent buildings the California state building, and the others surrounding the Plaza de Panama. But they are insufficient to adequately express the enchanting Balboa park of these last few years. And the other Exposition buildings are so fine that we should like to see some of them also kept for posterity. There are plenty of organizations using Balboa park in their present occupancy of Exposition buildings to make good use of such new duplicates. However, even if it seems wiser to have in the duplication no more than a shell, not a utilitarian building, we still feel that such would indeed be worth while. Later on the interior might be remodeled to suit the desires of that day.

The Prado, that is the extension of Laurel street, which passes through the park and toward the east entrance, is too narrow for present traffic demands. The chances are that it may be even more inadequate tomorrow. We fear that it will be necessary to cut back the ground on either side of the present roadway. If so, the arcades then would be too close to the street to appear either well designed or attractive to the eye. Unfortunately, it does look as if the arcades must go. But certainly they should be rebuilt in some permanent form, and as a duplicate of the present ones. They should be set back sufficiently so as to be in proper relation to new landscaping and a widened roadway.

If certain buildings have to disappear --- and this seems inevitable --- buildings someday should be erected in Balboa park to replace more or less what we have. But such buildings should only rise when needed. Unless they can be exact duplicates from measured drawings and from moulds taken from the originals themselves, etc, they should be something quite different. Naturally, however, they should be in harmony with other Balboa park structures and an integral part of a permanent scheme. This is quite possible.

Suggests Big Model

Furthermore, any buildings that are to be needed in the future should be passed upon by an officially representative body of the local chapter of the American Institute of Architects. Also they should have the approval of the park authorities and of the public institutions which are situated permanently in the park.

Last, but perhaps not least, certainly a large-scale model of Balboa park and its buildings, was that work was designed for the Exposition by Goodhue and Winslow, should be constructed in permanent form. Obviously this would be of the greatest value to students in many fields and the greatest satisfaction and joy to all who are interested in the beautiful creations of man.

There is only one Balboa park in the world. Let us do everything necessary to retain what we can and for the maximum of years, and to create the best that is possible in place of whatever it may prove unsafe to maintain for long. And let us to do this now before it is too late.

May 10, 1933, San Diego Union, 8:2-3. Bernard R. La Berge of New York says organ recitals are world-famous and should continue.

May 12, 1933, San Diego Union, 1:7-8, 2:6. Commerce Chamber acts to save park buildings.

Definite action toward restoring the buildings lining the Prado of Balboa Park was taken yesterday by a special committee appointed by R. N. Millan, president of the Chamber of Commerce, and composed of W. Templeton Johnson, Richard Requa, Miss Bess Gilbert, George Otto. F. L. Annable and Wheeler J. Bailey, with Wynne L. Van Schaick as chairman.

Johnson said architects of the exposition buildings, Bertram Goodhue and Frank Allen, did not design the structures to last more than a few years. "No one every dreamed the buildings would last as long as they did," said Johnson. He suggested that the building used for several years to house the county fair

could be torn down and the area used for auto parking. He expressed the belief that the arcades should be retained as a shield to the buildings even if some of the structures were demolished.

It was the consensus, however, of the entire committee that measures should be taken to retain the present perspective of the park. In furtherance of this decision, Van Schaick appointed a special committee composed of Johnson, Requa and Bailey and a building constructor to make an investigation to ascertain the probable cost of rehabilitating the buildings lining the Prado and Plaza by cutting down the size of the structures, leaving the front intact. This special committee will report its findings to the Chamber of Commerce Thursday afternoon.

Destruction of any of the present park buildings, even though they constitute in their present condition a serious menace to park patrons, would tend to destroy the uniformity of the park and, therefore, much of its tourist appeal and charm, according to Miss Gilbert. She frowned on the suggestion that the San Joaquin Building be razed and an auditorium erected in its place. "The park plaza is no place for a convention hall," she said.

It was divulged at the meeting yesterday there is a possibility that two wings may be added to the Art Gallery and that these wings eventually would replace the two buildings on each side of the plaza.

May 12, 1933, San Diego Union, II, 3:1. Questions asked by San Diego Soroptimist Club about park structures.

Seeking enlightenment on the condition of the condemned Balboa Park exposition buildings, the San Diego Soroptimist Club yesterday sent the following questions to **The Union**:

Are several of the old buildings built over canyons, some even 30 feet deep? If so, how costly will dirt refills be before landscaping can be effected?

Will the word of one or two city engineers and architects be final as to the condition and final decision of the buildings to be razed, or should we not consult others?

Do the people of San Diego realize that many of these condemned buildings are being used for educational purposes and thereby contributing much value to San Diego? This seems to be a poor time to oust any business which keeps money in San Diego.

Wouldn't comparison of the cost of razing the buildings and landscaping the old sites --- with the cost of repairing them --- be helpful in an effort to arrive at a conclusion in the matter?; this especially when we know that if the buildings are ever replaced all the landscaping must again be torn up?

A full report of present occupants and the value of their work to San Diego might clarify out thinking about this.

What about buildings which have had repairs within the last year --- namely the Indian Arts Building and the American Legion?

Why are buildings in much worse condition than the above two slated for repairs? Why the discrimination?

May 13, 1933, San Diego Union, II, 1:2. Park Superintendent Morley and Park Commission secretary Hill have rejected membership on Board of Directors of Park Institutions.

May 18, 1933, San Diego Union, 10:4. Chamber of Commerce committee proposes reducing size and strengthening fronts of exposition buildings.

May 18, 1933, San Diego Union, 10:4. Park Commission to hear report on park problems today.

May 19, 1933, San Diego Union, 1:4, 3:2. Park buildings can be saved for cost of razing; five to ten-year maintenance placed at \$70,490; R. F. C. funds available.

Rehabilitation of seven of the principal buildings in Balboa Park insuring the safety of these structures for at least a decade can be attained for \$70,490, or about \$2,000 more than it actually would cost to landscape the area if the buildings were razed, it was revealed at a meeting of a special Chamber of Commerce committee yesterday afternoon.

Wynne L. Van Schaick, president of the committee, appointed by President D. N. Millan of the Chamber of Commerce to investigate the feasibility of restoring the buildings in the Prado and Plaza received a telegram from Jerome B. Pendleton at Sacramento yesterday announcing that Reconstruction Finance Corporation Funds could be used for putting the buildings in good condition. A final report of the committee will be made next Thursday when it is hoped to ascertain exactly how much federal funds will be available for this purposed.

Richard A. Requa, architect from Walter Trepte, building contractor, made an inspection of the various condemned buildings in the park during the last week. In his report to the special committee yesterday, Requa said that the following buildings can be repaired sufficient to last from five to ten years for the following amounts:

Building No. 4, visual education and art school, \$9,650. The estimate of the city for more permanent reconstruction of this building was \$26,050.

Building No. 5, the former Russia and Brazil building of exposition days, \$9,210. The city estimate was \$24,510.

American Legion Building, \$9,832. City estimate \$18,940. Harry Foster, commander of American Legion Post No. 6, said the American Legion had expended \$24,000 in improving this building since its occupancy.

Building No. 8, directly across from the American Legion Building, \$11,032. City estimate, \$28,620. Requa explained that it is proposed to cut off the rear of this building.

Building No. 9, old [Natural] History Museum, \$14,400. City estimate, \$31,210. It is proposed to eliminate the canyon projections of this structure and to reconstruct the rear high walls.

Buildings Nos. 10 and 11, which include the structure where the county fairs were held, \$16,370. City estimates, \$33,700. Requa explained that the principal damage to these buildings is leakage through roofs and walls.

Wheeler J. Bailey and W. Templeton Johnson expressed belief that Requa's estimates for the reconstruction of the group of seven buildings were conservative and concurred in his recommendations.

George W. Marston said he as "thoroughly in favor of the restoration of the buildings, even for a five-year period." He asserted: "If we tear these buildings down their beauty will be lost to us forever. If believe that if the cost of their reconstruction is within \$100,000 it would be a worthwhile project. The salvation of beauty is of the greatest economic value, especially to a city like San Diego. If these buildings are not worth \$15,000 a year to our community then we don't know anything about values. We now have an opportunity to save one of San Diego's greatest assets."

Miss Gertrude Gilbert said she believed that, if necessary funds could be raised easily to being immediate work on the buildings vitally in need of repair. She reasserted her belief that public opinion was almost unanimous in favor of restoring the buildings.

Frank Swain, president of the Park Board, urged that the restoration project be delayed a year, as the Park Board will need the \$70,000 in fixing up the Zoo, "so the animals wouldn't escape," and in landscaping.

Oscar Knecht, assistant chief building inspector, said he “disliked to see the park lose its architectural beauty,” but he asserted that he was not in favor of a “patch work job.”

Others who spoke were John Morley, park superintendent, who said that “something must be done soon,” to restore the buildings and T. C. Macaulay, executive manager of the Chamber of Commerce, who pointed out the employment factor in connection with the project.

The special committee agreed that the San Joaquin Building cannot be restored without excessive cost but that the other structures are not in so bad condition as previously has been reported. Requa said the razing of the San Joaquin Building will open up a vista of floral and landscape beauty that, heretofore, has been hidden to park visitors.

May 22, 1933, San Diego Union, 7:3. Agricultural Association backs Civic Center plan.

May 23, 1933, San Diego Union, 7:3. William H. Douglas, City Planning Engineer, Sees Park Civic Center

Editor: Have followed the discussion in regard to the buildings in Balboa Park with great interest, as I worked on the final landscape layout of the park. Have also taken time to study the problem at the park from an architectural, landscape and city planning angle.

From an architectural angle, it would be a crime to destroy the beautiful effect that has been created in the group of buildings. From a landscape architect's standpoint, to take the buildings from the picture and landscape the space now occupied by them, would leave a scar that time could not heal. The combination of buildings and plantings is blended together into one beautiful picture that has been associated with the city of San Diego and is giving the city a vast amount of free advertising.

From a city planning view, we have a combination and layout that have taken years to perfect and could be used in such a manner that the present generation could continue to enjoy it in all its beauty by a careful reconstruction of the general architecture and layout.

These buildings could be planned in manner to include the offices of both city and county buildings, giving San Diego one of the most outstanding and beautiful civic centers in the country, with a landscaping that has taken years to bring to the present perfection and harmonizing with the present buildings and architecture as reconstructed.

This work could be done by popular subscription, a small amount from a large number of people. Every person in San Diego would contribute a small share to help keep this beautiful spot intact. You also would get small amounts from all over the country from people who have seen and admired this beautiful park and would not like to see it defaced. This could be done by proper advertising in charge of a man with this problem at heart, or through the chamber of commerce and other civic organizations. The city and county buildings might be built from a government loan, which would put a large number of both professional and tradesmen at work, thus relieving the unemployment situation.

This work would be lasting, and would keep this beautiful combination of architectural and landscape design for future generations, and would combine beauty with utility. These buildings could be arranged to accommodate all parking of cars therein, out of the main streets and not interfering with traffic through the park. A man should be in charge of this work who can appreciate the combination of architecture and landscape design so that the harmony which now exists will not be destroyed.

May 23, 1933, San Diego Union, II, 1:1-2. Photography Salon in Balboa Park extended to May 28; exhibits won world-wide fame, by Richard Requa.

May 25, 1933. RESOLUTION ADOPTED BY THE BOARD OF DIRECTORS OF THE CHAMBER OF COMMERCE.

WHEREAS, the Exposition buildings in Balboa Park have been found to be in a state of disrepair which makes them a menace;

WHEREAS, it is imperative that immediate steps be taken either to tear down these buildings or to restore them to a safe condition; and

WHEREAS, a special committee of the Chamber of Commerce appointed to look into the matter has found the buildings in question to be of great benefit and value to the City of San Diego from a scenic, cultural and practical standpoint and is convinced that the sentiment of the citizens of San Diego is preponderantly in favor of their retention; and

WHEREAS, said committee has evolved a plan whereby the said buildings may be placed in first class condition for a number of years without further expenditure and may thereafter be maintained indefinitely by further reasonable repairs from time to time, by the expenditure of approximately Seventy Thousand Dollars (\$70,000.00), and has further ascertained that the work involved at the time is within the scope of the Federal Government's work relief program through the R. F. C.; and

WHEREAS, said special committee has further ascertained that to tear down said buildings and landscape the grounds will cost within two thousand dollars (\$2,000.00) of the amount necessary to rehabilitate them, and that maintenance of landscaping as proposed over a ten year period would exceed that of the maintenance of buildings as outlined, and

WHEREAS, said special committee has recommended to the Board of Directors that said Board endorse the committee's plan of rehabilitation as part of the local work relief program:

NOW THEREFORE BE IT RESOVED, that the Board of Directors of the San Diego Chamber of Commerce shall and hereby does endorse said plan and recommends it to the Common Council of the City of San Diego, the Park Board and others having jurisdiction in the matter, and strongly urges that it be carried out to all intents and purposes, being thoroughly convinced that such action by the city authorities will have the hearty support of the citizens of San Diego and will be a procedure thoroughly to the good and benefit of the community.

Certified to be a true and correct copy of a resolution adopted by the Board of Directors of the San Diego Chamber of Commerce at its regular meeting held May 25, 1933.

May 25, 1933, San Diego Chapter, The American Institute of Architects, San Diego, California, Letter from Louis J. Gill, Pres., S. D. Chap. A. I. A. to the Hon. Mayor and City Council of San Diego, California.

Gentlemen:

At a joint meeting of the San Diego Chapter of the American Institute of Architects and the San Diego and Imperial Counties Division of the State Association of California Architects held May 23, 1933, the enclosed resolution was unanimously adopted.

Trusting that you will see fit to act on this issue in accordance with this resolution, we are,

Very truly yours,

(Signed) Louis J. Gill, Pres. S. D. Chap., A. I. A.

SAN DIEGO CHAPTER
THE AMERICAN INSTITUTE OF ARCHITECTS
SAN DIEGO, CALIFORNIA

May 23, 1933

We recognize the fact that the existing buildings in Balboa Park are an integral part of a carefully planned and executed whole, which has received world-wide recognition and praise for the beauty and harmony of its architecture, and that to remove or even materially alter them, to say nothing of replacing them with buildings out of harmony with the spirit and traditions of our early history, would be a lamentable and irreparable mistake.

We call attention to a report recently made public by a committee, appointed by the San Diego Chamber of Commerce to survey this group of buildings, in which report it is stated that for an expenditure of less than \$75,000 the major part of this group may be made structurally safe and its appearance preserved intact for at least the next five years.

In view of the above, it is therefore resolved by the San Diego Chapter of the American Institute of Architects and the San Diego and Imperial Counties Division of the State Association of California Architects that the report of said committee should be and the same is hereby endorsed with a recommendation that the proper authorities be requested to carry out the recommendations of said committee at the earliest practicable date.

9:1-2. Klauber-Wangenheim story is history of San Diego.

May 26, 1933, San Diego Union, 1:6, 6:6. Chamber of Commerce backs plan to repair park buildings with R. F. C. aid; architects' organizations also favor preservation of artistic structures as asset to San Diego.

Adopting the report of the special park building committee, directors of the Chamber of Commerce yesterday passed a resolution recommending to the City Council and Park Board that the following plan be put into effect:

Rehabilitation of the Exposition buildings in Balboa Park be included as part of the city's work program through the Reconstruction Finance Corporation.

Razing of the San Joaquin Valley Building and reduction of the size of buildings Nos. 8 and 9 as outlined by the Chamber of Commerce Park Building Restoration Committee.

Acceptance of the offer of the American Legion to furnish labor on the building now occupied by the Legion.

Asking the cooperation of the School Board in the repair of the building now used by the Visual Education Department.

Allocation of the total amount incorporated in the work relief program for this purpose, \$70,494, as follows:

Visual Education Building, \$9,650; Refreshment Building, \$9,210; American Legion Building, \$9,832; old Canadian Building, \$11,032; old Natural History Museum, \$14,400; Buildings Nos. 11 and 11, in which the County Fair was held, \$16,370.

The resolution adopted by the Chamber of Commerce pointed out that the park buildings "are of great benefit and value to the city of San Diego from a scenic, cultural and practical standpoint and is convinced that the sentiment of citizens is preponderantly in favor of their retention."

At a joint meeting of the San Diego Institute of Architects and the San Diego and Imperial Counties division of the State Association of California architects, held May 23, the following resolution was adopted, Louis J. Gill, president, yesterday advised the Chamber of Commerce:

"We recognize the fact that the existing buildings in Balboa Park are an integral part of a carefully planned and executed whole, which has received world-wide recognition and praise for the beauty and harmony of its architecture, and that to remove or even materially alter them, to say nothing of replacing them with buildings out of harmony with the spirit and traditions of our early history, would be a lamentable and irreparable mistake.

"We call attention to a report recently made public by the San Diego Chamber of Commerce to survey this group of buildings, in which report it is stated that for an expenditure of less than \$75,000, the major part of this group may be made structurally safe and its appearance preserved intact for many years.

"In view of the above, it is therefore resolved by the San Diego Chapter of the American Institute of Architects and the San Diego and Imperial Counties Division of the State Association of California Architects that the report of said Committee should be and the same is hereby indorsed with the recommendation that the proper authorities be requested to carry out the recommendations of said Committee at the earliest practicable date."

Members of the Special Park Building Committee, with officers and directors of the Chamber of Commerce, will attend the meeting to be held at the City Hall at 2 p.m. Monday when the park matter will be discussed and definite action taken.

May 27, 1933, San Diego Union, 1:4, 2:2. Chicago's "Century of Progress" World's Fair will open to public today.

May 28, 1933, San Diego Union, II, 1:2, 3:5. Urge citizens interested to unite at City Hall meeting; Chamber Committee reports \$2,000 above razing cost will preserve beauty of structures for years.

Belief that San Diego should make every effort to keep intact the scenic and artistic beauty of Balboa Park by rehabilitating the principal buildings of exposition days is expressed by prominent citizens.

Taking issue with those who assert that the structures have only sentimental value, many civic leaders point out that if it were not for the buildings Balboa Park simply would be a replica of hundreds of other parts throughout the world and, therefore, would lose its unique attractiveness and tourist lure.

By the expenditure of only \$20,000 for material, seven of the buildings flanking the Prado and Plaza may be restored, it is said. This sum probably will have to be raised by public subscription. Through the R.

F. C., the Board of Supervisors, with the sanction of the state, has announced that that \$50,000 expense for labor may be provided from federal sources, supporters of the restoration plan say.

One of the greatest contributing factors for the restoration of the buildings, the special Park Building Committee of the Chamber of Commerce has reported, is that only \$2,000 more will be necessary to keep the structures in good condition for many years that the actual cost of razing them and landscaping the area they now occupy. It is estimated that \$68,000 will be required to tear down the buildings and carry out a limited landscaping plan. The estimate of the Park Building Restoration Committee for the seven buildings was \$80,000.

Outspoken in their advocacy of retention of the park buildings are the following:

G. A. Davidson, president of the 1915-16 Exposition and vice president of the Bank of America: "Ever since their inception the Exposition buildings have been a dominant factor in the civic life of San Diego. There is no other group of buildings in the world like them. This is what has made Balboa Park distinctive and the mecca of thousands of visitors from all parts of the world. San Diegans should make every effort to retain these architectural gems."

F. L. Annable, president San Diego Arizona Eastern Railway: "There is indelibly printed on the minds of untold numbers of San Diego visitors the beauty of Balboa Park, particularly the Prado section. There is no photography showing the scenic splendors of San Diego that has been published to a greater extent than that of the park buildings. This photograph of the Prado has been used for years in heralding the beauties of San Diego through the medium of every form of advertising and publicity, including steamship and railroad line folders, tourist and travel guides, newspapers, magazines and pictorial literature of all kinds. The plan suggested by the Park Buildings Committee of the Chamber of Commerce is practical and should be carried out, thus preserving this most valuable asset for the tourists yet to come."

Donald Burnham, president San Diego Realty Board: "If there is any practical way in which the park buildings can be restored, it should be accomplished, as the buildings constitute a real and definite advantage to the city.

George W. Marston: "If we tear these park buildings down, their beauty will be lost to us forever. Salvation of beauty is one of the greatest economic values, especially in a city like San Diego. If these buildings are not worth \$15,000 a year to our community than we don't know anything about values. We now have an opportunity to save on of San Diego's greatest assets."

Sam Porter, former manager San Diego Hotel: "Much of the charm of San Diego's world-famous Balboa Park centers in the exposition buildings. I know that many visitors purposely have extended their visit to San Diego because of the beauty of the park and its surroundings. To destroy these buildings would mean an irreparable loss to the community and would make Balboa Park commonplace."

A meeting to decide whether the buildings will be razed or restored will be held at the City Hall tomorrow at 2 p.m. The Chamber of Commerce urges all citizens interested in the retention of the park buildings to attend this meeting.

The old Canadian and San Joaquin Valley Buildings in the park can be wrecked without cost to the city, Manager Goeddel was informed yesterday.

Under Council instructions, Goeddel contacted wrecking firms to get figures on the cost. One firm offered to remove the buildings within 60 days at no cost to the taxpayers, taking its pay in salvageable materials.

Most city officials agree that the buildings have a sentimental value, as urged by those who would repair them, but are slow to promise tax money for rehabilitation.

Some city officials feels that rehabilitation money would be better spend by starting a new civic auditorium near the Plaza de Panama. In this area are several structures that it is agreed will have to come down for safety's sake.

Sam Fox, local merchant, has concurred in City Manager Goeddel's suggestion that the auditorium plans be considered in advocating construction of such a building.

The manager feels that the auditorium could be planned along the architectural lines of the old buildings.

May 28, 1933, San Diego Union, II, 1:1-2, 4:5-6. Oscar Cotton writes about Belt Line Railroad through Balboa Park.

May 30, 1933, San Diego Union, 3:2. Albert Stahel, Jr. indorses Chamber of Commerce plan for restoring buildings.

May 30, 1933, San Diego Union, II, 1:2, 6:1. Councilmen grant park buildings 30 days grace; task of raising repair fund to start at once.

Cheered by councilmanic decision to withhold action on removing park buildings for 30 days and by statements from individual councilmen yesterday that the Council "would help out at the proper time," advocates of the move to save the buildings will turn today to the task of raising the major part of \$70,432 estimated as needed to effect temporary repairs on the exposition group.

Of this amount, the entire labor cost, or approximately \$48,000, will be asked from R. F. C. unemployment relief funds. The remainder is to be sought from private subscriptions and city or other public funds.

The councilmanic order tabling the building removal matter for 30 days came after a hearing during which prominent San Diegans pleaded for retention of the park beauty spot.

George W. Marston, former park commissioners and long a park enthusiast, took the floor to present the sentiment of San Diegans on the matter of retaining the buildings. He pointed out how the buildings have become virtually a unit with their surroundings.

"There would be no Balboa Park today without sentiment," he said. "This is no common arrangement of buildings and landscape. We know we have something here of the finest value. The harmony that comes from years belongs to the group."

Mr. Marston pointed out that it will take years and much money even to heal the scares that would be left if the buildings are removed, indicating that the scar left on the hearts of the people would never be removed.

"I am appealing on behalf of thousands who love the place," he said, pointing out that it would cost about as much to re-landscape the old building sites as to effect temporary repairs proposed to keep the buildings in condition for from five to ten years.

Gertrude Gilbert next spoke briefly and Mrs. Batten of the Women's Civic Center said it would be shortsighted economy to lose the buildings now.

Mrs. Satella Jacques Penman suggested that if enough money couldn't be raised to restore all the buildings at one time, the structures should be restored one at a time.

Architect Richard Requa gave figures on preservation costs, estimating a total of \$70,432, of which \$60,000 would be for labor and supervision, the remainder for material. This money would assure the buildings for five to ten years more, he said, adding that work done now would not be wasted at the end of

the five or ten-year period, but would be valuable in further restorations at that time. He said the San Joaquin Valley Building will have to come down, as it is beyond repair, and that parts of two other buildings will have to be removed because of prohibitive restoration expense. He expressed belief that R. F. C. aid could be obtained for the labor costs.

D. N. Millan, president of the Chamber of Commerce, spoke of the value of the park and its buildings as attractions to visitors. He advised against destruction of attractions. He felt if the R. F. C. would provide the labor cost, which he deemed almost certain, his organization and others could undertake raising "a good part" of the additional \$20,000.

To remove the park buildings, Millan concluded, would be to give San Diego "just another park" and not the unique attraction it now is to the world.

Letters from various civic groups and individuals were read. Park Commissioners Otto and Swain voiced approval of restoration plans. They said the first reports of \$270,000 for rehabilitation indicated the cost would be too great for the city to bear. With the estimate trimmed, they indicated favor for the idea.

City Manager Goeddel warned the councilman that they would have to be very careful in promising any large amount of city money for restoration, due to the city's financial condition.

He expressed belief that, with warning notices and other precautions that have been taken in the vicinity of park buildings deemed dangerous, it would be all right to delay decision pending efforts to finance rehabilitation.

Harry Foster, representing Post No. 6, American Legion, custodian of the War Memorial Building in the park, said his organization is ready to aid and, in fact, has spent \$22,000 on the building since the post began its occupancy 10 years ago. He said the Hammer Club, Veterans; Luncheon Club, unanimously indorsed repair of the park buildings yesterday.

The City Manager expressed belief that the rehabilitation plans of the citizen groups would make the buildings safe if the plans are carried out. Then the Council tabled the matter for 30 days to see if funds could be raised.

"We also feel that the Council will help out at the proper time," said Vice Mayor Bennett.

June 5, 1933, San Diego Union, II, 5:3. Let second exposition solve park problem.

Editor: The great majority of San Diegans earnestly desire a new lease of life for the old exposition buildings in Balboa Park. To this end, I suggest that we invoke the aid of the man who was so largely responsible for this beautiful group, Colonel D. C. Collier,

Let us say to Colonel Collier and his associates: You have been planning a second exposition for San Diego on a site along the waterfront. You have had a noble vision. It would indeed be wonderful if San Diego could develop a magnificent waterfront like that of Rio de Janeiro. However, San Diego is a small city, with limited resources, and to attempt at this time to construct a great exposition on the harbor might entail a necessary expenditure beyond our means and possibly interfere with replacement of the park structures. Build your second great exposition on the site of the first; built it in enduring materials and we will back you to the limit.

We would thus achieve a dual purpose at minimum expense. At its close the exposition would leave us a permanent heritage of beauty and utility, including, in all probability, a splendid civic auditorium. In my humble opinion, this plan seems to offer a happy solution for the problems confronting the park board and the exposition directors.

ARTHUR H. HILL

June 6, 1933, San Diego Union, 7:3. L. C. Chatham approves Arthur H. Hill's suggestion.

June 27, 1933, San Diego Union, 3:1. The City Council yesterday asked the City Manager to call for bids for razing the San Joaquin and Canadian Buildings in Balboa Park and extended for 30 days the time for reaching a decision on disposition of other park structures in need of repairs.

June 27, 1933, San Diego Union, 5:1. Start campaign for repair of park buildings.

Arrangements for the campaign to raise money for rehabilitation of buildings in Balboa Park, as a factor in unemployment relief work, were being completed yesterday by the general committee appointed to enlarge the scope of pioneer work accomplished by the Chamber of Commerce.

The women's committee, under chairmanship of Mrs. Celia A. Dunham, held a meeting yesterday to plan its campaign. The general committee, head by W. L. Van Schaick, completed arrangements for its headquarters on Fourth Avenue in the U. S. Grant Hotel building. Harry Foster, Legionnaire of Post No. 6, will be in charge of the general office.

George F. Otto, a member of the Park Commission, yesterday submitted the following resume of the Balboa Park building situation:

"A good business man will do all he can to please his customers in order to keep their good will and add new ones. San Diego is confronted with the same problem in the restoration of the old Exposition buildings. Many visitors who came and were pleased and others who were convinced that San Diego is a charming place call it home today. A short time ago when the first mention was made through the press that these buildings in the park which have added so much to its attractiveness, may have to disappear on account of badly needed repairs, protests and pleas came from all parts, especially from the southwestern states. These gave us an idea of the impression made on the visitor's mind.

"Fortunately, after a careful examination by competent construction men we were assured that a sum of about \$75,000 will restore these buildings to their former beauty and safety. Forty-eight thousand dollars has been pledged by the federal government for labor for this project; the balance, it is hoped, will be subscribed by the good people of San Diego and all those interested in the good work of restoring and preserving the gems in Balboa Park. The subscriptions may be turned in to the Park Building Restoration Committee at the Chamber of Commerce. There is no time to be lost. Work must start soon, as the buildings will not endure another rainy season without the necessary repairs. Therefore, it is of vital importance that funds be available within the next 30 days so the construction work can get underway. Every civic body, every organization and every good citizen, let us hope, will do his part."

June 27, 1933, San Diego Union, 6:5. Presidio Park to be inspected in Council row.

June 28, 1933, San Diego Union, 3:1. Delay bid call on park razing.

Announcement that bids for tearing down the San Joaquin and Canadian Buildings at Balboa Park will not be called until completion of the campaign now underway to raise funds for the restoration of the park exposition buildings was made yesterday by Fred Lockwood, city manager.

A Chamber of Commerce committee, headed by Wynne L. Van Schaick, is seeking to raise \$22,500 to purchase material for rehabilitation of seven of these buildings. About \$48,000 has been pledged by the Reconstruction Finance Corporation for labor involved in restoration plans.

Headquarters of the Park Building Restoration Committee are located at 1036 Fourth Avenue. Subscriptions should be sent there.

June 28, 1933, San Diego Union, II, 1:1. City Council to take ink out of Presidio Hill Park acceptance.

June 29, 1933, George W. Marston, Radio, KFSD, Grant Hotel.

I am asked to speak about the Balboa Park buildings. These buildings were designed by the most capable architect of the Spanish style that the western world has produced, Bertram Goodhue, a man whose genius has adorned many of our cities. But nowhere else did he have the opportunity of letting his art play upon a whole avenue of buildings. This Spanish prado and plaza are radiant with

the gleams of Goodhue's genius. The very exuberance of the style and the profuse ornamentation seem adapted to the place. The architecture has the gay abandon that fitted so well into the joyous scenes of our Garden Fair. And in all the years since 1915 this part of Balboa Park has retained its fiesta character. As time goes by we love it more and more.

It is simply shocking to think of the destruction of this wonderful treasure place. Just imagine the desolation of it. It's like the burning of libraries and the breaking of costly sculptures. The more I think of it the more incredible it seems that the art loving people of San Diego can allow it to be done.

Let me mention a few of the practical values that belong to these buildings. Several of them afford excellent housing to educational and social organizations. It is a great benefit to have our cultural societies grouped in one convenient center. This has made our park a kind of university. The unity of the group, the harmony of landscape and architecture, the singular beauty of the ensemble, have given our city a distinction that is a major attraction for tourists. There is something so unique and fine about it all that it is thought by many to be the most valuable drawing asset of San Diego.

Besides this, there is the great value of a center for festivals, parades, celebrations, etc. Take down these buildings and the dignity of the setting is lost.

Then this whole group of buildings adds immensely to the general character of the park. It gives the park a kind of nobility and contributes a certain human interest, too, in having these habitations in the midst of nature's growth. But for the buildings comparatively few would visit the park.

You may say that the museums, the art gallery and the organ will still remain. That is true, but the destruction of the intervening buildings and arched corridors breaks down the essential unity and beauty of the whole design. It virtually wipes out the fairest treasure that San Diego has had to show to the world. It destroys most wantonly a value that is also of constant service and enjoyment to ourselves.

It is said that all this space now occupied by structures can be beautifully laid out in gardens. Very true. But I venture to say that this will cost nearly as much as the restoration of the buildings. Aside from the irretrievable loss of our incomparable architecture, do we want more park area just now? And, granting that time would bring attractive garden spaces, what about the next five years? As a practical building of parks, I have to say that the first year would be one of chaos, a dismal pile of debris, a waste stretch of raw land. For two or three years more a new planted area of crude and unfinished appearance compared with the older portions of the park. Scarcely in ten years would this new planting be fully satisfactory.

Now the question comes to us, is it at all necessary, is it inevitable that these buildings go down and out? Certainly not. Competent architects, builders and experts have examined the buildings carefully, estimated every cost, and have reported that it is entirely feasible to put the buildings in good condition at a very moderate cost. In round numbers the materials will cost \$23,000 and the labor will be \$47,000, making a total of \$70,000. As the labor cost will be provided by the Federal Government, there is only \$23,000 to be raised by the community. In comparison with the values to be saved this is a slight sum. But it comes at a time when campaigns for money are not welcome. Shall we then let those beautiful buildings be razed and carted off to the dump? The committee says "No, we will ask our citizens to give the money to save this legacy of the Exposition and to afford employment to our artisans." The start has been made already. The committee is organized. Volunteer workers will make a canvass, get up benefit entertainments and devote themselves to this cause.

I beg to appeal to the whole community to support this committee. It would lessen their work if you would voluntarily send a contribution to their office.

Let me say in closing that I do not know of any material object that is just now of such importance to San Diego, considering the relative cost required and the great value to be gained. The matter is so vital to the integrity of Balboa Park and the self respect and dignity of the city that I most earnestly urge all who are hearing me this evening to give it attention, cooperation and assistance.

June 30, 1933, San Diego Union, 4:1. EDITORIAL: The Park Buildings.

We can retain the Balboa Park buildings, intact, useful and beautiful, for only a little more money than it would cost to raze them and landscape the gaps.

June 30, 1933, San Diego Union, 7:2-4. Architects vote San Diego 200 honor awards; Balboa Park structures win highest praise.

July 2, 1933, San Diego Union, II, 1:8, 2:4. Cost increase for material makes delay certain loss; leaders of local movement to raise \$22,500 fund to be accelerated by city meeting Wednesday.

Fear that mounting cost of building material will necessitate raising a sum much larger than originally planned unless the \$22,500 estimated for rehabilitation of the exposition buildings in Balboa Park is pledged this week, is expressed by the special Park Building Restoration Committee of the Chamber of Commerce.

"It is imperative that the money required to purchase material for rehabilitation of the park buildings be raised this week," said Wynne L. Van Schaick, chairman of the committee.

"The federal government has given assurance that \$48,000 has been appropriated for the necessary labor on this project. Speed is urgent. Cost of building material is increasing. The rainy season will be here within a few months. It is of vital importance that no time be lost. Public-spirited citizens who realize the tremendous importance of the civil and cultural value of the Exposition buildings should contribute to the restoration fund without further delay. The money is needed now."

To speed up the park building campaign a mass meeting is to be held in the Chamber of Commerce auditorium at 2 p.m. Wednesday. Among those who will speak at this meeting will be George W. Marston, Colonel Ed Fletcher, chairman of the Advance Gifts Committee, Elwood Bailey and D.N. Millan, president of the Chamber of Commerce.

Women's organizations throughout the community are playing a prominent part in the park building restoration campaign and will be fully represented at Wednesday's meeting.

The first large check to the building fund was contributed by General and Mrs. M. O. Terry of Coronado. The check was for \$1,000. The smallest contribution thus far received at campaign headquarters came from a woman who declared that while she was in financial straits the beauty of the park and its buildings had so enthralled her she could not stand the thought of seeing the structures destroyed. She had grocery bills and rent to pay, but, nevertheless, gave every penny she could spare --- a dime.

At a recent meeting of the San Diego Chapter of the American Institute of Architects and the San Diego and Imperial Counties Division of the State Association of California Architects, the following resolution was unanimously adopted:

(See **San Diego Union**, May 26, 1933, II, 1:2, 3:5.)

The building fund campaign at La Jolla will be under supervision of the La Jolla Conservation Society.

July 5, 1933, San Diego Union, II, 8:3-4. Donald MacArthur asks vote on park site for new civic buildings.

July 6, 1933, San Diego Union, 1:6, 2:5. Park buildings fund campaign speeds up with start of \$4,000; earnest work to raise total of \$23,000 required for government cooperation; plea at civic meeting.

Advance gifts totaling \$4,000 were announced yesterday at a public meeting of the committee campaigning for funds to restore the buildings in Balboa Park. Approximately \$23,000 must be obtained from contributing citizens before government funds of \$47,000 can be utilized for construction, it was reported.

The meeting, held in the Chamber of Commerce Auditorium, was attended by more than 85 civic-minded women who organized themselves as a campaign committee to call on prospects for contributions of \$1 to \$50. W. L. Van Schaick, chairman of the restoration committee, presided, and presented as speakers Dave Millan, president of the Chamber of Commerce, George W. Marston, "father" of Balboa Park; Colonel Ed Fletcher, chairman of the advance gifts committee, and Elwood Bailey, whose stirring talk challenging campaign workers was received with enthusiasm.

After paying tribute to Mr. Marston's half-century of work in behalf of Balboa Park's development, Fletcher reported contributions to the fund as follows: Col. Ira C. Copley, \$1,000, Gen. and Mrs. M. O. Terry, \$1,000; George W. Marston, \$500; the Marston Company, \$500; Robert Scripps, \$500; Mr. and Mrs. P. F. O'Rourke, \$500, on condition remainder of fund quota is raised. Other large advance gifts to the fund are expected shortly, Fletcher said.

All speakers stressed the importance of restoring the Balboa Park Exposition buildings, now in dangerous condition from deterioration, rather than tearing them down and making more park area. Millan spoke of the restoration as "good business."

"These buildings are cash assets," Millan said, "aside from their esthetic and cultural values. We of the Chamber know what great assets those buildings are. Besides that, the restoration is good business policy because it will offer employment for many local men now in need of work."

Marston directed his talk to the several score of women who had answered the call to service in visiting prospective contributors. "There is no skyscraper in the city," Marston said, "which possesses the real value (aside from monetary worth) found in the park buildings.

"These beauties in the center of the park are the gems of San Diego. As the years pass the buildings increase in beauty because of the surrounding foliage; years have brought them more beauty and inspiration than the architects who planned them knew. In those buildings we see our Exposition going on in continuous life, and in them is our priceless university with its galleries, museums, pavilions and meeting places.

“The buildings form the soul of Balboa Park; they are the expression of San Diego life. We can’t let ourselves lose the finest thing we have out of doors in San Diego,” Marston concluded.

Fletcher said if citizens responded well to the campaign the city and county officials would be impressed enough to consider putting in \$10,000 --- \$5,000 each.

Bailey viewed the park buildings, in his talk, as treasures for the youth of the southwest and likened the campaign workers to the artists who would help giving lasting life to the beauties of the present. “We will rebuild these treasures,” he said, “not only for our selfish appreciation but for inspiration of generations to come.”

The campaign for funds will occupy the next few days. The fund committee, under Van Schaick, comprises Geo. Marston, Richard Requa, Gertrude Gilbert, Wheeler Bailey, W. Templeton Johnson, Geo. Otto, F. L. Annable, Harry Foster, Mrs. Kersey Battin, Mrs. E. R. Spade, Mrs. O. E. Tyler and others.

July 13, 1933, San Diego Union, 5:2-3. Emma Lindsay Squier opposes cut at California Building

Editor: It is to be hoped that “the rumor” concerning the plan for closing the California Building mornings and reducing the splendid museum and library therein to a half-time schedule is only “a rumor.”

Surely this is no time for such a downward step, not even under the banner labeled “economy,” especially since the small saving affected (\$2100 for the entire year) comes not from reduced rent, or slashing of excessive overhead expenses but entirely from cutting to half pay the salaries of the curator, his assistant, and the expert librarian. They are each receiving now less than the janitor gets a month!

Twenty-one hundred dollars, spread out over a year, is a saving so infinitesimal to each taxpayer as to resemble a fly-speck in mid-ocean. And against that "saving" --- what?

The conviction that we, who are straining every effort to restore our park buildings should keep open for full time one of the few that does not need restoring and is one of the biggest drawing cards of Balboa Park.

Realization that we possess in the museum a collection of archaeological exhibits that bring visitors from all parts of the country. We have a scientific library there that is one of the finest in the world. Mrs. Blanche Vogdes Kendall was offered \$100 a month for life by an eastern college for the use of the Vogdes geological library, considered the best of its kind in existence. She refused the offer, preferring to place it in the museum at your service.

As for practical workday problems, there is scarcely anything you can mention for which date cannot be obtained in the library of the museum. Here are just a few of the things asked for this week: expert information on avocado growing, geological data for placer mining, navigation charts for a proposed Polar flight, statistics for a milling industry that wishes to come here, information of begonia culture, garbage disposal (good old garbage question!), and collected facts and figures on earthquake-proof building construction.

Our new economic scheme of shorter working hours is going to mean more leisure, more time to go places, to enjoy Balboa Park. By all means let us keep the California Building open all day. Do we want to admit to visitors --- and to ourselves --- that we, who have weathered the depression thus far, are licked at last? This is not the time to give in. Our whole national psychology is onward and upward.

July 18, 1933, San Diego Union, 9:4. Richard Requa: Anson Bailey Cutts praises Bertram Goodhue's buildings as 'an expression of unadulterated taste and charm in civic planning'; quote from an article he wrote in an architectural magazine after visiting Chicago's "Century of Progress" Exposition.

I want to call attention to an article that appeared in the last issue of one of the leading architectural magazines in the country. It was written by Anson Bailey Cutts, who evidently has made a profound study of civic planning enterprises throughout the nation and is well versed in architectural design. He recently visited the Chicago exposition of which he speaks disparagingly in view of the probable influence it may have on development of civic architecture in the United States. The only illustration accompanying the article is a very excellent pen drawing made at our own Balboa Park.

The feature of this picture is the beautiful Spanish tower of one of the buildings on the east side of the main plaza. After briefly reviewing the various city planning projects of the country he has this startling statement to make at the close of his article: "After viewing the angular erections for

Chicago's Worlds Fair, one wonders anew if Bertram G. Goodhue's exposition plazas in San Diego, already 19 years old, are to do down in history as the last coherent expression of unadulterated taste and charm in civic planning."

We of San Diego should answer that challenge in no hesitating nor uncertain terms. We are informing the world that we fully appreciate our beautiful and appropriate architectural heritage; that we will preserve for posterity one of the most perfect developments in civic planning ever conceived and made a reality. In preserving the beauties of our park buildings to posterity, let us insist that these and other civic buildings shall conform in design and spirit to this historical architectural style that has helped to make this city famous.

To do this we need the cooperation and assistance of everyone interested in saving the park buildings. Send in at once your subscription to park buildings restoration headquarters, 1036 Fourth Avenue, or telephone Main 4271.

August 1, 1933, San Diego Union, 5:5. Seven appointed to direct park building repairs.

A committee of seven officials and citizens was named by the city council yesterday to direct the repair of park buildings.

The group, to be known as the Park Buildings Restoration Committee, consists of City Manager Lockwood, John Morley, park director; Councilman Albert W. Bennett, Supervisor Edgar Hastings; and Miss Gertrude Gilbert, Wynne L. Van Schaick, and F. L. Annable.

Councilman were advised that by appointing such a committee commitments for materials could be obtained to save the city several thousand dollars by getting the orders in before expected price boosts.

The city manager and park director were given veto power over the acts of the committee.

The Council has appropriated \$10,000 toward repair of the buildings. It has been estimated the cost of the job will be \$70,500. The labor is to be furnished under federal relief appropriations.

The \$10,000 city appropriation, together with money raised by the citizens' restoration committee, will be used for the purchase of necessary materials. Much material has been donated, councilmen were told.

Contributions for restoration of civic buildings in Balboa Park now total \$25,000, or \$5,000 more than the original sum needed, it was announced yesterday by Col. Ed Fletcher, in charge of campaign.

Subscriptions announced by Col. Fletcher yesterday included \$2,500 from the Civic Auditorium Association and \$250 from the clearing house banks of San Diego.

Commenting on the campaign for the restoration funds, Col. Fletcher said:

"I was very glad to get a real letter from our good citizen, Guilford H. Whitney, from London, England, in answer to my letter, donating \$250, as well as stating with much enthusiasm his interest and wishes of success in the good work.

"We now have more than \$25,000 subscribed, but with increased cost of materials and necessity of painting the exterior of the buildings (not included in the original estimate), we should have \$2,000 or \$3,000 more on hand to fully complete the restoration in a manner that will be a source of credit to the city.

"I want to pay my tribute to the chairman of the committee, W. L. Van Schaick and his associates for their untiring efforts. The citizens of San Diego owe them a debt of gratitude for their public service."

September 7, 1933, San Diego Union, II, 1:1. Park building restoration job pushes ahead; 28 workers find employment at supporting wage.

Restoration of the Balboa Park buildings were well advanced yesterday, three weeks since the work began. It is financed by \$23,500 raised by public contributions and federal relief funds. Workmen are selected by the county welfare commission.

Four of the seven buildings are to be repaired now. These are the Canadian, American Legion, Visual Education and Refreshment Buildings. Wood foundations are to be replaced by concrete, roofs repaired or replaced and plaster decorations on exteriors remodeled.

Twenty-eight men are employed on the work. Speed of completion depends upon the number of men available from the welfare commission. With the present crew it will take six months, it is estimated. The men are unemployed mechanics receiving emergency relief. They are paid three-fourths of their wages in food and one-fourth in cash at the rate of \$4 a day.

In replacing foundations, the buildings are shored up and old timbers cut off four feet above the street level. Concrete is then poured in their stead. It was expected that termites had badly damaged the timbers but this was not so. Deterioration is due to dry rot.

Water behind the ornamental cornices is the cause of their cracking and falling. Defective parts are being removed and new plaster applied. After this the exterior of each of the buildings will be waterproofed by painting with cement paint.

The rear wing of the Canadian building was found to be beyond repair. It originally was built on a 40-foot fill and this has settled, causing the underpinning to give way. This wing is being demolished. It cannot be seen from the roadway so appearance of the building will be unaltered.

In charge of the work are Wynne L. Van Schaick, chairman of the park building restoration committee; M. Trepte, superintendent; Richard S. Requa, architect, and Harry L. Foster.

September 19, 1933, San Diego Union, 9:1. Good progress being made on park buildings.

Splendid progress is being made in the reconstruction of the Balboa Park Exposition buildings, according to members of the Chamber of Commerce Board of Directors, who inspected the work last week. Jerry Sullivan, Jr. declared the rehabilitation work "is a distinct credit to the city and the park buildings restoration committee."

At its meeting yesterday the Hammer Club adopted unanimously a resolution commending the park building restoration committee and efficient manner in which the work on the buildings is being performed.

According to Wynne L. Van Schaick, chairman of the park building committee, sufficient skylight glass was salvaged from the rear wing of building No. 8 to repair all the broken glass in the other park buildings which are to be restored. More than 30,000 board feet of lumber from this wing of building No. 8 is to be used to excellent advantage in the rehabilitation program, Can Schaick reported.

On the visual education building all skylight glass has been replaced and the main roof of this structure and the American Legion building repaired. Imitation tile on the old county fair building has been removed and is being replaced with standard tile roofing.

Van Schaick also reported that virtually all the footings in bad condition under the arcades and main columns of building no. 4 (Visual Education building) have been replaced with concrete cement blocks. Lathers also have started work on this building.

"I am convinced that if the labor such as has been furnished us in recent weeks will continue, we shall not have the trouble or labor problems we encountered when first we started the park building restoration work," said Van Schaick. "Of course, the more skilled labor we get the sooner we can complete the project.

"While the actual bills paid by this committee and the city approximate \$2,800, including labor, supervision and materials, the funds spent for construction total only \$1,200. The balance of \$1,600 is explained by the materials we have stocked on the job now and have not yet used. I feel, as do the other members of the restoration committee, that if we proceed along the plans outlined we can complete the rehabilitation program well within the original estimate of cost."

F. L. Annable, president of the San Diego and Arizona Eastern Railway, declared he has inspected the work on the Exposition buildings and that he was impressed with the efficiency and meticulous care that has characterized the reconstruction program since its inception.

"The workers are doing a splendid job and they, as well as the park building committee, deserve the gratitude and thanks of the community," said Annable.

September 22, 1933, San Diego Union, II, 1:6. City Manager Lockwood inspected building repairs in Balboa Park yesterday; was told that skilled laborers are disinclined to work at their trade when sent from welfare roles to work on reconstruction of buildings.

October 13, 1933, San Diego Union, 5:1 Chamber Board plays hooky on outing to park (illus.)

Halcyon days of their boyhood were recalled to more than two score members of the Board of Directors of the Chamber of Commerce yesterday when they were guests of Mrs. Belle Benchley of the zoo. Later they inspected the art gallery and the work being accomplished to restore the park buildings.

Leaving the usual Thursday consultation of civic problems for another day, the directors first had luncheon with Mrs. Benchley and Maggie, the orangutan, at the zoo. Maggie thoroughly enjoyed the lunch, particularly the apples and the pitcher of cream which the directors failed to use in their coffee.

Both Mrs. Benchley and Charles R. Schroeder, veterinary pathologist, gave a brief description of the zoo and the scientific research work carried on at the zoological laboratory. Maggie listened with attention to Schroeder's talk on various animals but when he mentioned Jiggs, Maggie's orangutan husband, she began pulling out great handfuls of grass. Maggie loves her husband --- at times.

The directors then joined a group of youngsters for an exhibition of Jerry, Sonny Boy and Charlie, the trained seals. Jerry put on a singing act, and Sonny Boy and Charlie balanced rubber balls on their noses, walked a tight rope and ate a couple of pounds of mackerel.

Armed with lumps of sugar given to them by Neil Brown, the directors went to the bear cages. One of the brown bears scored seven hits and no errors by catching in his mouth every lump of sugar thrown at him. President David Millan then posed with Bong, the African cheetah.

The next stop of the directors as at the art gallery, where Reginald Poland explained the various art exhibits.

Accompanied by Wynne L. Van Schaick, chairman of the park building restoration committee, and Richard Requa, architect in charge of the rehabilitation work, the directors then made a tour of inspection of various structures now being restored. They were warm in their praise of the work already accomplished.

The visual education building is virtually completed, as is the work of repairing the roofs of three other buildings. Van Schaick reported that three and a half tons of putty were used in repairing the skylights of the old county fair building and the war memorial. The towers on the county fair building, which were leaning outward nearly a foot, have been pulled back to their normal position by cables. Concrete footings are being used to strengthen the arcades. Although hampered by lack of skilled workers, it is expected that the bulk of the repair work will be completed before the rainy season.

The directors agreed that the afternoon was none of the most enjoyable and instructive they have experienced in some time.

October 22, 1933, San Diego Union, II, 16:1. City Council to call hearing on park land for Civic Center at Sixth Avenue and Date Street.

October 25, 1933, San Diego Union, 10:6. Pacific Beach residents build part on two-acre tract at head of Lamont Street; Kate Sessions donated shrubs, trees and flowers.

November 4, 1933, San Diego Union, 1:3. Five hundred "Gray Castle" alumni join in first homecoming in history of institution.

November 11, 1933, San Diego Union, II, 1:2-3. Major General John T. Myers, commanding department of Pacific Marine Corps, says naval bases in San Diego are result of Marines sent to 1915 Exposition.

November 12, 1933, San Diego Union, II, 1:8. Blind composers featured in program at Organ Pavilion; Royal A. Brown, organist.

November 27, 1933, San Diego Union, II, 1:2. Thanksgiving service planned at Organ Pavilion.

November 30, 1933, San Diego Union, 2:4. George W. Marston urges development of bay center for Civic Center.

December 4, 1933, San Diego Union, II, 1:1. City condemns buildings.

December 4, 1933, San Diego Union, II, 1:1. Dudley Crafts Watson, Art Institute of Chicago, praises Plaza de Panama; more beautiful than plaza in old Seville; San Diego should become art center of western world.

December 5, 1933, San Diego Union, 7:5-6. It was announced at City Hall yesterday that the waterfront and courthouse sites for the proposed Civic Center would require only a majority vote of the county electors, but the park site would require a two-thirds vote to make it available.

December 10, 1933, San Diego Union, II, 2:1. William Templeton Johnson opposes Civic Center in Balboa Park; public already faces heavy loss of Balboa Park spaces.

Central Park, New York has been the target for half a century of a minority group who have sought unsuccessfully to divert its recreational areas to building purposes. A similar authority is endeavoring to utilize the few remaining acres in Balboa Park for a Civic Center, but is meeting

with vigorous opposition from an aroused citizenry that similarly resulted in saving Central park for New York's teeming population.

"We are accustomed," said Johnson, "to think of Balboa Park as an enormous piece of land and 1400 acres does sound like a large area. Few, however, have any conception of what a large part is canyon land unsuitable and impracticable for intensive park development.

"Without looking at the accompanying map, it is difficult to visualize how much of the upland is already developed for one use or another, and how comparatively little is left for new park uses.

"History of most parks in large cities reveals in a striking manner that they have been fair game for spoliation. Through 50 years New York's famed Central Park has been the target for schemes of dismemberment. Only constant watchfulness and aroused public opinion has saved it from disappearing entirely.

"Balboa Park has borne the brunt of similar onslaughts by people who have little idea of the value or recreational facilities for citizens and tourists alike, and who evidently care less. From time to time proposals have been made to sell it outright, to dispose of valuable strips on both east and west sides and to use a portion of the upland for a State College site.

"Most of these proposed inroads have been fought off, but despite the seal of Park Commissioners a steady progress of nibbling has been going on. The Russ High School was built on land sliced from the park. So was the Children's Home. Later another large tract adjoining the high school was preempted for a play area. The Roosevelt High School received a grant at the north end of the park. Another 30 acres, embracing one of the finest views of the entire park, was given to the federal government as a site for a Naval Hospital.

"Look at the accompanying map. It will be seen at a glance that apart from the canyons almost all the mesa land in the park has been disposed of for non-park purposes. The few remaining acres have been decoratively planted or are used for recreational purposes.

"Despite the fact that there is hardly any unimproved park area left, it is not proposed further to despoil the park by building a Civic Center in the 17 acres adjacent to Sixth and Date and, according to Civic Center proponents, closing the Eighth Avenue entrance. This portion of the park is beautifully planted and highly developed with recreational facilities, including Marston Point, the observation plaza, horseshoe and shuffleboard courts.

"Because of the steep topography only a very small part of the 17 acres is suitable for building purposes and future expansion will make still further inroads. Every foot of Balboa Park will be needed for legitimate park purposes. The time has come to save the park from further attacks.

"No sensible person will vote to sacrifice any park lands when they are so vitally needed for the purposes for which Balboa Park originally was dedicated."

The Citizen's Civic Center Committee points out that a two-thirds majority will be necessary at the December 19 election to place the Civic Center in the park. This obviously is impossible to attain. Finally the site must be ratified by the state legislature and in the meantime the \$300,000 gift of the federal government for the construction of a city-county building will have reverted to the treasury, leaving San Diego taxpayers holding the sack.

The Committee urges San Diegans to vote for the Civic Center on the waterfront and for the city-county bond issue.

December 12, 1933, Minutes of the Board of Park Commissioners.

Present: Commissioners Buck, Otto and Naylor.

Mr. Fred J. Hansen and delegation appeared before the Board and requested use of vacant rooms in Administration Building, formerly occupied by City Planning Commission; rooms to be used in connection with activities of San Diego Production Credit Association in extending loans on production crops, livestock and poultry production.

Upon motion of Mr. Otto, seconded and carried, use of double room No. 10 in Administration Building at rental of \$10 per month was authorized, subject to approval of the City Manager.

The secretary reported receipt of telephone message from Mr. W. J. Dady at Riverside recommending against allowing use of a building in Balboa Park for meeting place of Indians. Mr. Naylor then moved that no building in Balboa Park be allowed any group of Indians unless request comes with recommendation of the Indian Agent of this district. The motion was seconded by Mr. Otto and carried.

Mr. Morley reported list of Balboa Park projects to be done with C. W. A. funds, aggregating \$289,210.80; all of these projects have not been approved. Additional projects were reported as follows: La Jolla, \$6,000.00; Torrey Pines, \$10,000.00; Mountain View Park, \$5,873.00; Street Tree Division, \$5,755.00.

Letter to the City Manager from the Board of Education relative to contribution of \$500.00 by that Board to the restoration fund if legal arrangements can be made, was referred to the Commission by the City Manager. The matter was referred to the chairman for his recommendation.

Request was received from Mr. J. W. Rainwater, Secretary of Community Chest, for use of a building in Balboa Park for headquarters of California Conference of Social Work to meet in San Diego May 13 to 17, 1934. Upon motion of Mr. Naylor, seconded and carried, the request was approved.

Mr. Naylor reported a battery of lights at Navy Field, which he understands can be purchased at a bargain and used at the Stadium for night events. The matter was referred to Mr. Naylor for investigation and report.

December 15, 1933, San Diego Union, 4:1. EDITORIAL: Next Tuesday.

Our Civic Center depends directly, we believe, upon a vote for the harbor front site as well as a vote for both city and county civic-center bonds.

We believe the project will be carried at the polls next Tuesday upon one condition --- the condition, namely, that the voters who want it actually get out to the polls and cast their votes.

We can have a civic center at this time if we obtain a government loan and a public-works construction subsidy --- as proposed --- of \$300,000 to complete the work. One iron-clad condition for the lend of public-works funds is that they shall go only to such major projects as can be shown to be part of a consistent planned development for the community in which they are situated. It is doubtful if the government money can be obtained for any project of this character which is not clearly related to such general development.

The harbor front site is an essential part of the civic-center development specified in our city plan, twice approved by the electorate, and upheld again this year in the joint committee report of city and county planning commissions.

Furthermore, the harbor front site is the one site immediately available for this development. Time is of the essence of the opportunity offered by the public works administration. If we cannot submit

an immediate construction project, we cannot obtain the government loan --- to say nothing of the construction subsidy --- under the terms now offered.

The harbor front site consists of 18 acres of level land, owned by the people through grant of the state legislature, dedicated to this particular purpose, and at available at once for civic-center construction.

The harbor front site is the approved site, specified in the program submitted by one of the most eminent city-planners in the world, accepted by the voters and upheld by them in two previous elections. The harbor front site is immediately available. In our opinion, a majority vote for this site next Tuesday is a necessary condition toward our getting any civic center at all, anywhere.

We urge a clean-cut, consistent, decisive vote for the harbor front site --- a vote which will not only reiterate the community's choice of a civic-center site, but which will also make it practicable to begin construction at once to realize this long-delayed civic ambition.

We can have a civic center. We can have an impressive and beautiful development of our harbor front, comparable to the best in the world. We can have the new and necessary public buildings at a cost of less than our present public-office costs in rent. This is all immediate and practical. Its realization depends upon the initiative and energy of the San Diegans who see the opportunity as it is.

Every special interest with an ax to grind will get out its full available vote next Tuesday. But we sincerely believe that if the forward-looking people of San Diego will do the same, they can win this election.

December 15, 1933, San Diego Union, II, 4:1. Gertrude Gilbert writes letter supporting harbor site for Civic Center.

There is only one way to vote on the civic center site, to bring the most good to San Diego, and that is the waterfront.

A civic center on that site not only will serve the general utility purposes of housing our city and county offices, but it will give us the opportunity to house them in a group of beautiful buildings; it will give us the opportunity to create a unique harbor front such as not city in the country on either the Atlantic or Pacific coast possesses, with space for a much-needed auditorium and other necessary civic buildings, with space for planting and parking, and with plenty of room to spread as the city grows and necessity demands; in short, a civic center which will give San Diego distinguished prestige among coastal cities of the country.

The present courthouse site, limited to one city block, probably would result in an ordinary type of modern skyscraper, with no particular value beyond the strictly useful purpose of housing our municipal offices, with no opportunity or space for future growth, or attractive surroundings, except by the purchase by the city of more high priced land in this high priced neighborhood.

As for the park site, it is high time that civic-minded citizens of San Diego rise en masse against further filching of park lands for any purposes. Certainly we should rise in vigorous protest against this proposal to rob the park of its lovely Date Street entrance, one of the few remaining level pieces of land in the park, and already beautified with green lawns and trees and attractive parking.

But even aside from these considerations, why are we asked to vote for this park land for a civic center, when it will require another special election before it can be used for a civic center or any other purpose, and at a time when the delay required for another election will mean that the city will lose forever this wonderful opportunity for aid in building a much-needed civic center which the government is now offering; even to the outright cash gift of more than \$250,000.

The park site does not merit the consideration of voters who have San Diego's best interests at heart.

Besides, do we want our jail, housing the city's criminals, situated in our park, so near the high school, and with the police patrol clanging back and forth through the avenues leading to the park?

Why would anyone hesitate to vote for a bond issue which clearly is both to the advantage of the city's best interests and to the taxpayer, which will be paid off in 30 yearly payments in amounts less than we are paying now for city and county rentals, and with every possibility that these rents will rise drastically as the times grow better?

Why hesitate to vote for a bond issue which assures our taxpayers that at the end of the 30 payments the city will come into complete possession of the civic center property, free of all encumbrance of further obligations, all rentals at an end?

This is a time when a bond issue means a cash gift to the city of \$300,000, government aid on the project on easy and advantageous terms, an annual saving to the taxpayer and the fulfillment of a plan for a practical and beautiful harbor development, unique among harbor cities.

And remember that no civic center can be built on any site unless the bond issue is passed; that if the bonds are not passed it means the possibility of higher and higher rentals in the future for the city and county offices, which the taxpayer must pay; that if the bond issue is passed it means that we know now what this expense of offices will be for the next 30 years, no matter what the conditions or times, payments being made in equal amounts throughout the 30 years, these payments less than the present rentals.

With this great chance of a lifetime to obtain government aid in a great civic project, an opportunity which will never come again, with so much to gain by prompt and united action, and everything to lose by delay and quibbling, let us all pull together for the proposition which will give San Diego the greatest amount of good at the least expense to the taxpayer by voting for the waterfront site and the bonds.

December 15, 1933, San Diego Union, II, 4:1. Horace Bradt writes letter supporting use of present courthouse location for "many new and attractive buildings."

December 15, 1933, San Diego Union, II, 4:2. Katherine Pike Skedden writes letter suggesting that harbor would be "adequate setting" for new county building.

December 17, 1933, San Diego Union, World-Wide Features, 4:1. EDITORIAL: Beauty and A Vote.

How much is beauty worth to San Diego?

That is one of the questions which ought to affect the decision of the voters Tuesday, when they express a choice for one of the two possible civic-center sites named on the ballot.

The question is not mere sentimentalism, albeit no accountant will ever be able to present a dollars-and-cents answer. There is very definite worth in civic beauty --- a worth reflected in the pride of its people, the admiration and respect of those who visit it; the sense of responsibility developed in the officials who serve it. In no other city of the United States is this worth more valuable than in our city --- and in no other city is it more available.

Which will do more for the beauty of San Diego --- a group of public buildings in Balboa park, or a civic-center development on the harbor front site?

We believe the answer to that question is all but self-evident.

The argument for the harbor front site is impressive on every basis. On this particular basis, it seems to us conclusive.

The harbor front site is an essential of the city's accepted plan of civic development. It has been approved twice by a vote of the people. It is recommended unanimously in the joint report of the city and county planning commissions. It has the warm support of the chamber of commerce. Its choice is absolutely free from the legal and financial handicaps connected with a choice of the park site. It --- since it is part of a consistent approved city plan --- is probably the only site for which the public works administration would approve a federal construction loan. But, beyond all this, it is the one site whose development would add greatly to the city's beauty.

A civic center at the harbor's edge, following the fine tradition of the most beautiful cities of the old world and the new, is the one improvement which will add greatly and immediately to the sum total of the beauties our city has to offer.

To build in Balboa Park is to destroy one fine development for the sake of another.

To build in the harbor front is to establish a lasting and beautiful aspect of San Diego in a place where now there is only idle ground, waiting.

In the interest of a beautiful city --- if civic beauty is worth having -- which is the more in need of new development, Balboa Park or the harbor front? The beauty of Balboa Park is already known throughout the world. The beauty of San Diego's harbor front is only potential, as yet, awaiting the civic vision and initiative and energy to make it real and enduring for all time.

Let Balboa park remain splendidly, through all the future, what it is now. Let San Diego's harbor front become what it ought to be.

December 19, 1933. SPECIAL ELECTION: Voters asked to permit Balboa Park lands to be used for city-county building (Civic Center).

Yes	8,537
No	16,748

December 20, 1933, San Diego Union, 1:8, 2:5. Waterfront site wins easily; bond vote not up to 2-1 mark; voters approved waterfront site but neglected to provide financing for project.

December 20, 1933, San Diego Union, 5:1. George H. Field gives insect collection to Natural History Museum, Balboa Park; between 15,000 and 20,000 classified insects.

December 25, 1933, San Diego Union. 5:1. Local Scouts draw varied program for 1934.

The 1934 Boy Scout program for San Diego area council is complete and copies have been given to all scoutmasters. Character building and citizenship training activities will be stressed.

The 1933 program, closing this week, is considered a fine example of what a proper schedule will do to the council, troop and patrol. Through a carefully mapped course the council will close the year with a substantial gain in membership, both scout and adult, and also an increase in the number of troops.

Civic activities this year have been outstanding, the scout uniform having appeared at many public gatherings in the 12 months.

Every troop is urged to program its work for the year, using big council events as a definite part of its activities. The courts of honor at the Indian Village and in the country districts will be a monthly feature of the program, as also will be the monthly district and scouters' training meetings, patrol leaders' powwow and executive board meetings.

1934

San Diego Union, January 3, 1934, 7:6. Park Department to resume control of stadium; school board has been leasing outdoor field; track to be reconditioned and lighting improved.

San Diego Union, January 5, 1934, 1:6. Point Loma reservation selected for copper plaque in honor of Cabrillo.

San Diego Union, January 5, 1934, 4:1. EDITORIAL: Fish, Flesh, Fowl? - We don't see how the educators can prove that the stadium was designed to serve education. But neither do we see how the council can show --- in view of the stadium's physical connection with the school --- that it is wholly suited to a commerce in paid admissions.

Maybe a stadium is neither an educational device, nor a commercial success. Maybe a stadium is just a mistake.

San Diego Union, January 7, 1934, II, 1:2, 2:2. San Diego finds 5,400 jobs for CWA workers; Balboa Park's recreational facilities selected for improvement; six tennis courts, baseball field and grandstand, Roque, squash and croquet courts under construction near swimming pool; club house being built at north edge of 9-hole golf course; paved road being put through **Powder House Canyon** connecting Pershing Avenue with Florida Street.

San Diego Union, January 10, 1934, 1:7. Golfers protest removal of Dave Smith, professional, from employment at city links; part of City Manager Lockwood's reorganization scheme to save money.

San Diego Union, January 10, 1934, 4:1. EDITORIAL: For Fair Play - A public golf course ought to be something more than one item in a political patronage list. There ought to be an atmosphere of friendliness, good sportsmanship and fair play about it. The Smiths have built up that kind of atmosphere around the municipal course --- whatever may be their shortcomings as ticket checkers.

San Diego Union, January 10, 1934, Sports, 10:3. E. P. Fleming protests ouster of Dave Smith.

San Diego Herald, January 11, 1934, 1:1-4. Lockwood offends golfers; manager brings dirty politics to municipal links.

San Diego Herald, January 11, 1934, 4:1. Open letter on Civic Center from P. F. O'Rourke, president Chamber of Commerce.

San Diego Union, January 13, 1934, 4:1. EDITORIAL: Back of the Rumpus - This move did not originate with someone who suddenly became concerned over defects in the ticket sale at the golf course. It is part of a program of job-peddling fully described by the press nearly a year ago. Allen Wright, city clerk, was to go. So were City Manager Goeddel, Police Chief Newson, Playground Director Kearns. Dave and Cecil Smith were included in the list. So was John Morley, park superintendent. Some of the program went through. Some did not. But the scheme still stands.

San Diego Union, January 16, 1934, 7:4. Dave Smith "good enough pro," but Lockwood firm.

San Diego Union, January 17, 1934, 1:7, 2:2. Smith to resign as pro; tired of prolonged fight.

San Diego Union, January 18, 1934, 1:3, 2:5. Prehistoric beasts may "guard" park; move underway to establish a road of about 90 feet with concrete prehistoric monsters in Balboa Park near Zoological Gardens; Joe Sefton and Clinton G. Abbott of **Natural History Museum** are in favor; CWA to finance and build.

San Diego Union, January 18, 1934, 4:1. EDITORIAL: Another "Episode" - Well the boys finally "got" Dave Smith.

San Diego Union, January 19, 1934, 7:5. Thar's gold in them thar sewer pipes! CWA strikes it rich in Balboa Park.

San Diego Union, January 20, 1934, 7:1. Lockwood ousts Smith; requests list of eligibles.

San Diego Union, January 21, 1934, 6:1. San Diego CWA projects cover extensive field.

San Diego Union, January 22, 1934, 5:1-4. Eventful Days of Balboa Auto Camp Recalled:

"I came, I saw, I stayed," would seem to be the saga of hundreds of local residents who were first introduced to the beauties of San Diego by way of life at the old Municipal auto camp in Balboa Park, now abandoned.

Walter Finch, who had charge of the camp during its brief life between the years 1920 and 1924, says he still meets thriving citizens today who remind him of the "happy time" when they camped out in the lovely wooded northeast corner of Balboa Park, compared the beauties and advantages of San Diego with their own home town, decided in favor of San Diego, bought property, invested in business or located. Finch is now section foreman in Balboa Park. He has been in the park employ for the last 23 years.

In the auto camp days, his business was to meet Mr. and Mrs. Tourist on wheels and make them feel at home. Despite that he found meeting the public a great strain, no one regrets the passing of the camp more than Finch. On one of his big days, on Labor Day, 1922, he "met the public" 1600 times, that is in 1600 cars. Next to the President of the United States, he considers himself eligible for some sort of a consolation medal which should be awarded to the shaker of the greatest number of hands in any one day.

10,000 Cars Checked In

For the opening of the camp, on a July day in 1920 a gay, striped-canvas booth that had served in the exposition grounds was moved over to the camp grounds, and Mr. and Mrs. Finch and their pup took up their stand at the entrance. A charge of 50 cents was made for each car in top year 1923, the records in Park Director Morley's office show that 40,000 persons came in 10,000 cars from every state in the Union and five foreign countries and paid in gate receipts totaling over \$12,000.

Next to Tent City in Coronado, the auto camp in Balboa Park displayed the greatest concentration of canvas in this vicinity. The beauties of the park were extolled far and wide. All conveniences for roughing it were there, too --- a community kitchen and dining room as well as outdoor furniture, showers, a steam laundry, and a general recreation and reading room. Rambling through the many canyons in the park and swimming in the city plunge provided many with sport, while dancing was frequently held in the community building, with music supplied by the campers themselves.

Excitement now and then ruffled the quiet camp life, as once when Finch brought in a wild cat he had shot (there is still considerable wild life to be found in the park, according to Finch) and another time when Mr. and Mrs. Frank Gander, bride and bridegroom, consented to have their picture taken with a "Just Married" sign attached to their car. Mrs. Gander is the sister of Hal Christiansen, local business man, who at the time kept the camp grocery store. Gander is an ornithologist at the O'Rourke Institute. As part of his duties, Gander takes park visitors on bird walks over paths he once trod when he camped out with his bride.

Banjo Helped at Dances

Beryl Phelps, who generously helped at the camp dances with the banjo, is one of the many auto campers Finch recalls with pleasure. Phelps came down with his mother from Washington. It was while in camp,

Finch says, that Phelps got started on a correspondence course in engineering, which later led to his present position as a city engineer.

Then, Finch recalls there are the brothers Tom and Jim McCauley, who came from Ohio, bought a five-acre ranch in Chula Vista for \$6,500, received soon afterward an opportunity to sell for \$15,000, refused, and are still on the property running a thriving chicken ranch.

Perhaps one of the most colorful personalities in Fitch's camp album is an octogenarian, Professor Hightower, a full-blooded Indian who drove in from Colorado Springs, stayed a while at Balboa camp, and located in San Diego. Hightower for many years was a physical education instructor, boxing coach and trainer. He lives with Mrs. Hightower on Valle Street.

San Diego Union, January 23, 1934, 8:4. City Manager's plan for golf course passed Council.

San Diego Union, January 23, 1934, 9:1. Tree grown from seed obtained from Andersonville prison grounds planted in park.

San Diego Union, January 24, 1934, 4:1. EDITORIAL: There'll Be More - regarding Lockwood's plans for golf course.

San Diego Union, January 26, 1934, 1:6. Burglar loots Marston home.

San Diego Union, January 27, 1934, 3:6. Switzer Canyon owners demand flood control; favor dams built by CWA money; lakes ruled out.

San Diego Union, January 28, 1934, II, 4:8. John Morley has recently decided to use house at head of lily pond in front of botanical garden in Balboa Park for Fred A. Schwartzfager's plan for housing fuchsia plants in Balboa Park.

Fuchsia fanciers of San Diego are invited to exchange cuttings with Fred A. Schwartzfager, who last fall projected a plan for housing several hundred plants in a lath house in Balboa park. Schwartzfager, who is working with John Morley, superintendent of parks, plans to name the plants after San Diegans, who variously are distinguishing themselves.

Schwartzfager's plan has evolved considerably since last fall. It was planned to build a lath house, but Morley recently decided to use the house at the head of the lily pond in front of the botanical garden for Schwartzfager's plan. This, Schwartzfager said yesterday, will provide an exceptional setting for the memorial and ample room for the 2,000 plants he hopes to raise.

Schwartzfager has 1,600 plants growing in the Balboa park nursery. They represent about 60 varieties of the 150 in the fuchsia family. Persons who raise these plants are, therefore, invited to exchange cuttings that a larger variety may be collected. Naming of the plants will be decided upon after they have been properly assembled, grown and housed.

The following persons and institutions have contributed fuchsias to Schwartzfager and Morley for the garden:

Kate O. Sessions, David Troth, Johnson nursery, A. A. Meadows, F. T. Scripps, F. A. Schwartzfager, W. L. Van Schaick and others. Persons interested in exchanging cuttings are requested to call the administration building, Balboa Park, Main 0695.

San Diego Union, January 28, 1934, II, 10:8. G. Edward Chase in charge of construction work on Exposition buildings in 1911-15; supervised their rehabilitation in 1924.

San Diego Union, January 30, 1934, 5:3-4. Lockwood's city golf deal nearly blocked in Council; finally passed.

San Diego Union, January 31, 1934, 6:6. Lockwood's golf revenue report said excessive.

San Diego Union, February 1, 1934, 7:4. Dr. George C. Shepard attacks plan to place "prehistoric" creations in park.

San Diego Union, February 1, 1934, II, 1:5. Visitors from 39 states and 8 foreign countries registered in California Tower in January.

San Diego Union, February 4, 1934, II, 1:1. Public subscriptions paid for repair work; federal emergency relief funds and CWA aid received in December; details describing decay of buildings and story of restoration; work nearly completed.

San Diego Union, February 4, 1934, II, 1:8. Balboa Park work progressing; will restore glory of Exposition days to noted tourist lure; workmen finishing project made possible by citizens; Council, County and CWA; artisans given jobs.

Spick and span and as good as new.

This briefly describes many of San Diego's famed Exposition buildings in Balboa Park.

Almost 20 years ago the beautiful structures were erected for the Exposition here in 1915 and 1916. The buildings attracted world-wide recognition. They were the setting for motion pictures, targets of tourists' cameras, features of travel brochures --- outstanding attractions of southern California.

But dry rot and the elements began waging a bitter war on the buildings. Several were considered unsafe and for a time it appeared that San Diego was to lose one of its outstanding attractions.

Today, however, the structures gleam again in their original splendor and building wreckers who, perhaps, had their eyes on the halls for years are looking elsewhere.

Public subscriptions, the city, the federal emergency relief and the CWA combined to save the buildings, originally erected as temporary structures but today as good as new.

Work in the park under federal funds has not been completed, but the building exteriors have been repaired and workmen are busy with sewer jobs and other work which, when completed, perhaps, will not be apparent to the park visitor. When work was at its peak 210 men were on the job.

In tracing the history of the park rehabilitation, Roy Mathewson, director of the national re-employment service here, under whose supervision many of the expert artisans that were required to complete the task, declared:

"The first funds were raised by public subscription. The city then added money to the cause. County welfare workers began the job and still additional funds were provided by the federal emergency relief. On December 1 the CWA entered the picture, an additional appropriation was obtained, and the work still is progressing."

So temporary was construction of the buildings that in many places workmen found great heaps of earth and debris beneath the structures, a condition that contributed to the destructive dry rot and an obstacle that had to be removed before reconstruction could begin.

Whole sides of the buildings were lifted on jacks and new footings of concrete were put in place. Roofs were strengthened or rebuilt and ornate facades, cracked and crumbling, were restored. As the work progressed, the original plans of artists and architects were consulted and the intricate rococo ornamentation and lavish decorations were reproduced faithfully in minute detail.

The work went on as a major CWA project and now the famous old buildings once again hold their heads up for attention on the list of "sights to see" of tourists from countries all over the world.

San Diego Union, February 8, 1934, 5:2-3. Balboa Park Recreation Club took in 170 members last month; CWA has approved project to add a second story to club house; five more shuffleboard lanes and two Roque courts.

San Diego Union, February 22, 1934, II, 1:1. In case of major fire, Balboa Park might help as a fire break; Fire Department must have stations on both sides as there is no fast lateral highway.

San Diego Union, February 25, 1934, 4:1. F. B. Naylor, park commissioner, who was instrumental in making recent changes to the municipal golf course management, announced yesterday that under the new regime there has been a steady gain in receipts.

San Diego Union, February 27, 1934, 6:3. City Council yesterday favored spending \$2,000 to fertilize and fence park golf course.

San Diego Union, March 4, 1934, II, 5:1. Fine new homes of Monterey design in Marston Hills, north of Balboa Park.

San Diego Union, March 18, 1934, II, 1:7. Park superintendent John Morley asks Council to permit park concessionaires to sell beer.

San Diego Union, March 18, 1934, II, 1:8. Royal A. Brown, city organist, will feature story of Easter at Organ Pavilion this afternoon.

San Diego Union, March 20, 1934, 1:3. Council by a vote of 4 to 2 decrees city parks to be dry; Anderson and Warburton for sale.

San Diego Union, March 21, 1934, 1:7-8, 2:1. World Exposition planned here for next year; plans outlined at a special meeting of Chamber of Commerce directors yesterday; Ways and Means Committee appointed to report whether financial aid is available; Davidson says exterior of Exposition buildings are in better shape than they were in 1915; Morley says about \$100,000 needed to rehabilitate interiors; H. P. Requa, Bernard Fox, Joseph Dryer, Frank Drugan, Burnham, and Supervisor Ed Hastings in favor; legislative action needed to close park during Exposition.

San Diego Union, March 22, 1934, II, 1:2. Survey reveals outlook bright for Exposition; Joe Dryer named Chairman of Finance Committee; Navy to take part; Los Angeles plans Exposition for 1937 when Boulder Dam is finished.

San Diego Union, March 23, 1934, 1:7-8, 2:1. School Board asks for stadium control lease.

San Diego Union, March 27, 1935, 1:6. Council shelves School Board's request for stadium control' schools do not care for stadium properly.

San Diego Union, March 27, 1934, II, 1:7. Preliminary expense would be \$89,000; Balboa Park building improvements to be accelerated with FERA funds; opening date January 1, 1935.

San Diego Union, April 2, 1934, 5:3. Easter harmony draws many to Organ Pavilion in park.

San Diego Union, April 6, 1934, 1:2, 2:1. Chamber heads back 1935 Fair; \$150,000 quota expected in ten days; Fletcher says event would draw four times as many people as in 1915.

San Diego Union, April 6, 1934, 1:3-5. County asked to help finance \$1 million Mission Bay fair grounds and race track.

San Diego Union, April 6, 1934, 1:6. Plans to raise \$300,000 in subscriptions; nothing to be spent until \$150,000 pledged; \$60,000 already pledged; varied opinions of businessmen concerning Exposition.

San Diego Union, April 6, 1934, 6:1. Belle Benchley tells Rotarians that **Zoo** is a community asset.

San Diego Union, April 8, 1934, 8:1. Plans for raising \$300,000.

San Diego Union, April 10, 1934, 1:5, 6:4-5. Mission Beach operation under city plan is urged; Playgrounds Board control proposed; state park director backs new set up.

San Diego Herald, April 12, 1934, 1:1-8. Stadium belongs to people; move to give control to School Board wrong; Mission Beach deal good for city.

San Diego Union, April 12, 1934, II, 1:5. Baron Long pledges \$50,000; amount pledged to date \$80,000.

San Diego Union, April 13, 1934, 5:1 and April 14, 1934, 1:7, 2:4. Park Commission gives school control of stadium; City Manager Lockwood advocates plan to give high school a larger campus; would reroute traffic to 11th Street and use 12th Street for athletic fields; John Morley, in a report to the City Council, said schools rented the stadium for several years, but the Park Board retained operation control until a few years ago when this was turned over to the schools; under Park Board from 1923-31.

San Diego Union, April 13, 1934, 5:2-4. Drawing of proposed park road plan.

San Diego Union, April 13, 1934, 7:2. Golfers request improved links.

San Diego Union, April 14, 1934, 1:3, 2:5. Lockwood stays as Rossi's move lost in 4 to 3 vote yesterday.

San Diego Union, April 14, 1934, 1:3. 27th annual spring flower show in park for two days.

San Diego Union, April 14, 1934, 1:7, 2:4. City Council yesterday ordered City Manager to settle stadium battle.

San Diego Union, April 15, 1934, II, 1:2. 16:1. Fair project points way to San Diego progress; drawings prepared by Sam Hamill, architect, and Bryl D. Phelps, engineer, for race track in Spanish-style.

San Diego Union, April 16, 1934, 8:1-2. Spring flower show attracts thousands in two-day exhibit.

San Diego Union, April 17, 1934, 11:1. Exposition board seeks accord on stadium upkeep.

San Diego Union, April 17, 1934, 11: 4. S. G. North writes letter favoring Exposition.

San Diego Union, April 18, 1934, 1:4, 2:2. Mayor Forward tendered his resignation effective August 1.

San Diego Union, April 20, 1934, 1:4, 2:6. Stadium control to be unchanged until fields built.

San Diego Union, April 20, 1934, 8:1. Newspaper clippings show widespread interest.

San Diego Union, April 24, 1934, 5:5-5. Chilled Food Institute opens tomorrow in **American Legion Auditorium**, Balboa Park.

San Diego Union, April 24, 1935, 7:1-2. African jungle animals shown in groups in **Natural History Museum**, Balboa Park.

San Diego Union, April 26, 1934, 1:1-2. PWA asked for \$984,500 for Exposition grounds on Mission Bay.

San Diego Union, April 28, 1934, 1:4. Citizens' committee seeks recall of vice mayor, attorney, three councilmen.

San Diego Union, April 30, 1934, II, 1:6. Dr. Humphrey Stewart's memory honored by singing of the Kyrie and Gloria from his Mass in D Minor in choral program at Bradley-Woolman Chapel.

San Diego Union, May 2, 1934, 7:6. Donation to **Natural History Museum** of the Edward Fuller collection of American birds' eggs was announced yesterday; collection comprises 500 sets of eggs.

May 4, 1934. At the request of the local chapter of the American Guild of Organists, Royal Brown, a former student of Marcel Dupre, performed Dupre's magnum opus, "The Stations of the Cross," on the Spreckels Organ. (Kenneth Herman, "The Historic Spreckels Organ in Balboa Park," 8)

San Diego Union, May 4, 1934, 7:1. First SERA work probably will start Monday in Balboa Park with about 200 men employed to complete projects which were started by the CWA; rehabilitation of park buildings will continue; construction of new Roque and tennis courts in North Park section.

San Diego Union, May 5, 1934, 4:1. EDITORIAL: Mission Beach - The offer of Mission Beach as a gift to the city raises the plain question of the public value of some 8,000 ft. of ocean frontage. Balanced against this value, is the approximately \$20,000 a year in taxes which private ownership of the property would be required to pay.

San Diego Union, May 6, 1934, II, 1:1. Music, parks, play outlets not cut here according to report issued by state controller Ray L. Riley; San Diego spent \$13,396 in fiscal year 1933 for general recreation.

San Diego Union, May 6, 1934, II, 1:8. San Diego to open music week celebration today; organ concert in park this afternoon.

San Diego Union, May 7, 1934, 1:5. 250 SERA jobs in park to open here this week.

San Diego Union, May 10, 1934, 1:6. Charles Horrworth, All-Year-Club southern California representative, lists major attractions of coast in 1935; says tourists will be the backbone of the Exposition.

San Diego Union, May 11, 1934, 12:5. Body discovered hanging from pergola in "Lovers' Lane" near Organ Pavilion, Balboa Park.

San Diego Union, May 12, 1934, 4:8. Parent Teachers Association asks City Council for elimination and beer sales and protection of women and children.

San Diego Union, May 12, 1934, 7:1. Organ program feature this afternoon.

San Diego Union, May 13, 1934, II, 1:1, 2:5. 225 students to play Music Week concert at park today.

San Diego Union, May 14, 1934, 1:1-4, 2:7. 200 youthful musicians play inspiring concert for audience of 3,500 at park.

San Diego Union, May 16, 1934, 5:1. The **Zoological Society** yesterday filed a protest with the City Council against the proposed new budget cut of \$2,100 for zoo operation; budgets for 1932 and 1933 had reduced zoo appropriation from \$26,400 to \$13,300; protest signed by F. L. Annable, secretary.

"Appropriations for the fiscal year ending June 30 is inadequate, as the city manager can easily ascertain. As a result the impression has gone forth that exhibits are not worth seeing. Also, publicity has been curtailed, and has led to an enormous decrease in gate receipts.

“Therefore, we respectfully request that you give some consideration to these facts in studying the budget for the zoo. We also ask that money cut from zoo appropriations in the proposed budget be restored for the upkeep of trucks and motor vehicles and for heating the reptile house.

San Diego Union, May 18, 1934, 7:1. Davidson urges city to exhibit at Chicago Fair.

San Diego Union, May 18, 1934, II, 2:3. Second annual memorial program in honor of Dr. Humphrey Stewart at Organ Pavilion Sunday afternoon.

San Diego Union, May 20, 1934, II, 8:1. Naval Hospital passes scrutiny colors flying.

San Diego Union, May 26, 1934, 3:5. Fourth annual play day of women's gymnasium and folk dance classes of Playground and Recreation Department in Balboa Park yesterday.

San Diego Union, May 30, 1934, 1:7, 2:2. Cadman leads move to retain organ concerts; protests against curtailing programs; Lockwood plans band substitute.

San Diego Union, May 30, 1934, II, 1:8 and May 31, 1934, 1:7, 2:8. Civilian, military groups join in Memorial Day parade; line of march ends at Organ Pavilion.

San Diego Union, May 31, 1934, 2:5. Grand Army survivors hail veterans of later wars in joint Memorial Day program at Organ Pavilion; Judge Haines pays tribute to blue and gray alike who live in nation's memory; 3,500 attend service.

San Diego Union, May 31, 1934, 4:1. EDITORIAL: Lockwood on Bands - But let Mr. Lockwood name one municipal band that has brought its town the pleasant renown which the outdoor organ concerts have brought to San Diego.

San Diego Union, June 2, 1934, 1:7-8 and June 3, 1934, 1:4-5, 2:2. Dr. R. E. Townsend, author of pension plan, to talk in park today.

San Diego Union, June 4, 1934, 5:1. Scouts convene at June court in Balboa Park.

San Diego Union, June 6, 1934, 1:6, 2:7. City Council endorses Exposition plans; Mayor Forward authorized to apply to State Board of Equalization for permission to exceed 5 percent expenditure increase limitation; state law limits vote to \$50,000.

San Diego Union, June 8, 1934, II, 1:2. Council by a vote of 6 to 1 approved a \$50,000 appropriation for the Exposition; Councilmen Bennett against.

San Diego Union, June 9, 1934, 4:1. EDITORIAL: For the Future - Praise is due Mayor Forward and Councilmen Anderson, Rossi and Goodbody for salvaging the Balboa Park outdoor organ concerts from the threat of pseudo economy in the new budget.

San Diego Union, June 10, 1934, 6:2-3. Balboa Park institutions are cooperating with State College in offering classes between June 26 and August 4; college credit may be earned in all 15 classes.

San Diego Union, June 10, 1934, II, 5:1. Article by John Nolen on comprehensive city planning.

San Diego Union, June 10, 1934, II, 5:3. Sessions' agave, aloe plot, new park attraction, by Ada Perry.

San Diego Union, June 11, 1934, 2:5-6. O'Rourke Zoological Institute to offer free classes to boys, girls.

San Diego Union, June 11, 1934, 4:8. Backers looking for some attraction that will do for Exposition what Sally Rand did for the Chicago Fair.

San Diego Union, June 11, 1934, 5:5-6. Opening of pool starts summer scout activity at **Indian Village**.

San Diego Union, June 12, 1934, 1:3-7. Three-ring state exposition planned from June 1, 1938 to June 1939 in celebration of completion of Boulder Dam; San Diego joins with Los Angeles, San Francisco.

San Diego Union, June 13, 1934, 1:6-7. San Diego to remember 73rd birthday of Mme. Schumann-Heink Friday.

San Diego Union, June 16, 1934, 3:1. 492 high school pupils were graduated yesterday afternoon at Organ Pavilion.

San Diego Union, June 16, 1934, 8:1. Frank G. Belcher gave prospectus for 1935 Exposition at Junior Chamber of Commerce dinner yesterday.

San Diego Union, June 18, 1934, 5:3-4. Park institutions, State College offer special summer courses.

San Diego Union, June 20, 1934, 12:1. City recreation facilities offer culture change.

San Diego Union, June 20, 1934, 12:1. 1935 Exposition topic at club meeting.

San Diego Union, June 20, 1934, 12:5. Music lovers rally to park symphony.

San Diego Union, June 20, 1934, II, 8:3. D. L. Ault, president, says Bar Association endorses Exposition project.

San Diego Union, June 22, 1934, 1:4. Businessmen approve Exposition plans; Chamber of Commerce passes resolution; organization committee.

San Diego Union, June 22, 1934, 1:4-5, 6:1-2. Exposition plans take form as appeal made for County aid and citizens' support.

San Diego Union, June 22, 1934, 1:6, 2:4. **Zoological Society** to ask return of tax for zoo upkeep; Board has tentative plan to place issue before voters in November.

San Diego Union, June 22, 1934, 4:1. EDITORIAL: Your Exposition - We shall be opening our doors to the world. The affair can only be a success if we examine every feature of San Diego, its streets, its buildings, its facilities, and its management in the light of this coming test.

San Diego Union, June 22, 1934, 6:5-6. Summer playgrounds program planned to attract all ages.

San Diego Union, June 23, 1934, 4:1. EDITORIAL: And Keep It Out - The zoological society's plea for an adequate appropriation from the city stresses a perfectly obvious need. The proposal to restore the two-cent levy suggests a cure which will be both practicable and permanent.

San Diego Union, June 25, 1934, 1:2, 3:3-4. H. N. Savage, city dam builder, dies on duty in San Diego service.

June 28, 1934. Minutes of meeting of Park Commission. Present: Commissioners Buck, Otto and Naylor.

Letter was received from the "San Diegans" recommending that the Recreation Area in Balboa Park be named Morley Field, in recognition of the services of Mr. J. G. Morley. The recommendation was concurred in and the following Resolution was offered by Mr. Naylor, seconded by Mr. Otto and adopted:

WHEREAS, a Resolution adopted by the Board of Directors of "The San Diegans" recommends to the Commission that the excellent services being rendered the City of San Diego by Mr. John G. Morley, Park Director, in building up a wonderful park system, could receive due recognition by naming the Recreation

Area in the northeast corner of Balboa Park "Morley Field"; NOW, THEREFORE, BE IT RESOLVED that the Recreation Area in Balboa Park along Upas Street from Alabama to Arnold Streets be, and it is hereby officially named "Morley Field."

San Diego Union, June 28, 1934, 6:7. Committee chooses "California-Pacific International Exposition" as official name.

San Diego Union, June 29, 1934, 1:6-7, 2:6. Solicitation for exhibits for 1935 Exposition gives impetus to project.

San Diego Union, June 29, 1934, 4:1. EDITORIAL: For Example --- The Zoo.

San Diego Union, June 29, 1934, 7:1. Finance committee has raised over \$300,000; Supervisors may give \$50,000; help asked in raising \$200,000 more.

San Diego Union, June 30, 1934, 1:7-8. County pledges \$50,000 for San Diego Exposition; will require four cents tax rate; Chamber of Commerce present at Board meeting.

San Diego Union, June 30, 1934, 4:1. EDITORIAL: The County Joins - Congratulations are due the county supervisors on yesterdays \$50,000 exposition appropriation for two reasons. They have removed the last official obstacle to completing the exposition plans and they have recognized a dominant community interest. The new enterprise expresses the progressive local spirit which now takes up the challenge of depression. In joining that enterprise on behalf of the county, the supervisors here recognize the determination to realize San Diego's future with positive action.

We congratulate the supervisors for acting. And also we congratulate San Diego in possessing the vision and the will to make such action inevitable.

San Diego Union, June 30, 1934, II, 1:3. \$150,000 more will be raised; 1915 Exposition took in \$700,000 from gate and concessions; beauty to be stressed; Joseph E. Dryer, treasurer; other committee men.

San Diego Union, July 4, 1934, II, 1:5. Czechoslovakian government planning exhibit; Dr. Viverka, ambassador to the United States, approves.

San Diego Union, July 4, 1934, II, 1:8. Mrs. Belle J. Benchley, **zoo** secretary, requests aid of Junior Chamber of Commerce to counteract unfavorable new releases which reported zoo had been sold at auction.

San Diego Union, July 5, 1935,, 4:1. EDITORIAL: Well Begun supporting advertising program for Exposition.

San Diego Union, July 6, 1934, 1:3. Naylor to quit park board for assistant park director job.

San Diego Union, July 6, 1934, 1:6. *St. Louis Globe Democrat* discusses editorially San Diego's exposition plans; text of editorial.

San Diego Union, July 6, 1934, 3:3. SERA funds used to enlarge city recreation work.

San Diego Union, July 8, 1934, II, 1:4. Buck, Park Board head, "resigns" following City Manager's action in naming Naylor.

San Diego Union, July 8, 1934, II, 1:8. Business Development Committee of Chamber of Commerce campaigns for cleaning up and beautifying city.

San Diego Union, July 10, 1934, 3:5. Mayor hammers gavel; ends park appointment row.

San Diego Union, July 11, 1934, 1:7. Henry P. Monahan, Los Angeles general passenger agent for the Southern Pacific Railway Co., says tourists will be brought to San Diego and California by the Exposition.

San Diego Union, July 12, 1934, 4:1. EDITORIAL: Beginning Today - Two photographs produced in Sunday's *Union* revealed where San Diego can begin to put its house in order for next year's exposition.

The business development committee of the chamber of commerce supplies the reasons for getting at the job of renovating and removing unsightly buildings. The pictures provide the proof that the work must be undertaken.

Necessarily this must be voluntary campaign. It is not a matter of the community "jumping on" a few property owners, but a community problem and a community responsibility. And the greatest benefits will go to the owners themselves. They will enjoy a double profit in the direct appreciation of the value of their property and in a general appreciation of all property values in San Diego when we have carried out the excellent general design which already is developing out of the Nolen plan.

The northern entrance obviously is the place to make the first demonstration. It already engages the attention of the city. But to be effective the survey must cover the entire city and its approaches.

This calls for careful organization with representation from each section of the city. And it requires that each neighborhood survey its own buildings in detail, list their defects, and work out means for correcting them.

Other cities have done it. San Diego can do as much but only if each block and each individual begins today at a task that must be carried through consistently until the exposition opens.

After that we hope community housecleaning will become a habit.

San Diego Union, July 12, 1934, 8:3. Los Angeles County pledges aid.

San Diego Union, July 13, 1934, II, 1:2. Chamber of Commerce seeks support of civic organizations throughout state; send s letters; date for opening given as May 29; no definite closing date given.

San Diego Union, July 15, 1934, 4:6. San Diego County Bureau of Mines officially backs Exposition plans.

San Diego Union, July 15, 1934, 8:2. U. S. Grant, Jr. says city must modernize buildings to attract visitors to Exposition.

San Diego Union, July 15, 1934, World-Wide Features, 6:1. EDITORIAL: Midsummer Nights - Somewhere, sometime, many a San Diegan will look back across the miles or the years at these midsummer nights and ask himself whether he caught the sheer magic of those evenings when music lived in Balboa Park's perfect setting.

San Diego Union, July 17, 1934, 4:1. EDITORIAL: Well Done - Tonight in Balboa Park the eighth successive series of midsummer concerts opens. The standard set in past years gives assurance that the occasion will be another triumph for the musicians.

San Diego Union, July 17, 1934, 6:1. Symphony series opens this evening in Balboa Park.

San Diego Union, July 18, 1934, 9:1. Large audience greets park's first symphony, by Wallace Moody.

San Diego Union, July 18, 1934, II, 8:1. Long Beach, Fresno and Riverside will cooperate in Exposition; letters from mayors of cities express interest.

San Diego Union, July 18, 1934, 10:1. Bar Association of San Diego offers to handle legal phases of enterprise gratis; offer accepted.

San Diego Union, July 20, 1934, 1:7, 2:2. Dr. Robert Hegner, John Hopkins University, Baltimore, author of books on zoology, praises **San Diego Zoo**.

San Diego Union, July 20, 1920, 6:5. Playgrounds plan summer school handicraft exhibit.

San Diego Union, July 21, 1934, 1:2, 3:6-7. \$300,000 pledged, \$200,000 more needed; city and county leaders give unanimous support to plans at meeting U. S. Grant Hotel, July 20; chairman Frank G. Belcher.

San Diego Union, July 21, 1934, II, 1:2. Articles of Incorporation filed with Secretary of State, Sacramento, July 20; 32 leading civic workers named as incorporators.

San Diego Union, July 22, 1934. 6:1. O. W. Cotton will direct fund raising; business leaders endorsing.

San Diego Union, July 22, 1934, II, 1:1. State Societies get together for picnic next Sunday near 6th Avenue in Balboa Park.

San Diego Union, July 22, 1934, II, 1:2. Marcel Ventura of Hammer Club, former head of foreign press bureau of the 10th Olympiad, discussed international aspects and proposed benefits of Exposition in developing constructive relationships with Latin America.

San Diego Union, July 23, 1934, II, 1:4. Loan fund campaign outlines; temporary headquarters on second and top floors of U. S. Grant Hotel.

San Diego Union, July 23, 1934, 4:1. EDITORIAL: Unanimously Yes - The enthusiastic endorsement given the proposed California-Pacific International Exposition at last Friday's dinner came from 200 local citizens. It expressed the sentiment of San Diego.

The new project is justified by experience. It seeks to capitalize our first asset, the exceptional facilities of San Diego for entertaining guests, the natural advantages and the equipment, much of it a heritage from the 1915 exposition, which is concentrated in Balboa Park.

The exposition can be justified by these and several other equally weighty arguments. But the project will be welcome by all citizens for still another reason. It offers an opportunity to muster the united strength of San Diego city and county behind a thoroughly constructive enterprise. Conflict of one sort or another has necessarily monopolized our attention during past months. Now while some of these conflicts are still raging, the exposition plan reminds us there is such a thing as unity. It challenges every local citizen to join in a common effort to attack depression with every prospect of success.

The \$200,000 necessary to carry through this plan can and will be raised. But the vigor of Friday's endorsement revealed that more than money is being concentrate behind the project. There was real delight in that reception, the delight of accepting a task which fully lives up to the tradition that has given San Diego its park, its harbor, its city plan and all other permanent assets.

We are building a city. The exposition offers one more major detail in that general undertaking.

San Diego Union, July 23, 1934, 8:1. Work to begin on park home for Red Cross.

San Diego Union, July 24, 1934, 1:4. City Manager Lockwood's move to put F. B. Naylor in as assistant park director will come before the Park Board today.

San Diego Union, July 24, 1934, 5:1. Samuel I Fox, chairman of loan fund campaign; others on committee.

San Diego Union, July 25, 1934, 1:2, 2:3-4. City Manager agrees to hold up Naylor's appointment as assistant park director when opponents jam meeting.

San Diego Union, July 25, 1934, 3:4. Emil Klicka, chairman of Central Committee, formed to work for \$500,000 loan fund.

San Diego faces the same conditions today, economically, that it has confronted --- and conquered --- several times in the relatively recent past, and today, as in other critical periods, the community has only to seize the opportunity if it again would ride the high road to prosperity. This time the vehicle is the proposed California Pacific International Exposition.

So declared O. W. Cotton, realtor and civic worker, at yesterday's meeting of the Realty Board.

Other speakers were G. Aubrey Davidson, banker and president of the Panama California exposition of 1915 and 1916, and Elwood T. Bailey, lecturer. The program was turned over to them and the enthusiasm they generated for the 1935 project was reflected in bursts of applause.

Charts Civic Course

Cotton's subject was "What Pulled Us Out?" He charted San Diego's ups and downs in the last 50 years, starting with the boom days of 1886 and the 20-year depression which followed, and which was broken by John D. Spreckels' historic announcement of the San Diego & Arizona railway project. That upturn, however, he said, lasted less than a year, terminated by the Wall street panic of 1907.

San Diego's next forward stride was taken in 1910 and 1911 when the city, then with a population of less than 40,000, united to hold an exposition to celebrate completion of the Panama canal. To this civic enterprise Cotton traced the prosperous days of 1912. Another setback, he recalled, was recorded in 1913, result of another Wall st. agitation. On top of this came the chaos caused by the World war.

Exposition Made Good

"Those were trying days," Cotton said. "The city was committed to the exposition, had raised \$1,000,000 and had bonded itself for \$2,000,000 more. It looked like a gamble, but it was a good one. The exposition of 1915 and 1916 bridged us through this period. Without it the city would have been in a deplorable condition. That exposition did many things for San Diego, one of the more important of which was to acquaint the world that San Diego was not to be confused with Santiago, Cuba or Santiago, Chile.

"In the post-World war period, San Diego was able to capitalize to the fullest on its climatic attractiveness and its greatest development era. This was due to the world-wide advertising received through the exposition and the stupendous government projects which were traceable directly to the exposition.

"Other factors responsible for that era of progress and prosperity were completion of the San Diego & Arizona railway and advertising activities of the San Diego-California club.

"In each instance of depression which I have cited, there always was something to counter-balance. It is to San Diego's credit that far-sighted leadership knew the answer when faced with a perplexing question.

“Right now San Diego is strictly up against it. So is the rest of the country, but where other cities have little to look forward to in the immediate future, San Diego again has a golden opportunity. Will we seize this opportunity and lift ourselves out of the depths, or will we, for the first time, fail as individuals and as a community? I’ll give you my answer to that. We will not fail.”

Davidson recalled efforts of the then struggling city to undertake the exposition of 1915 and 1916, of its outstanding success and the influence it exerted on establishment of the numerous military and naval units here. He paid a tribute to “Uncle Joe” Pendleton, now major general, marine corps retired, Rep. William Kettner, deceased, and others for their efforts to bring about establishment of these government activities.

San Diego Union, July 29, 1934, II, 1:1, 3:1. G. A. Davidson cites 1915-16 Exposition to illustrate benefits which an Exposition can bring to San Diego; he was president of that enterprise so he speaks with knowledge; Banker Visions Rich Dividends from ’35 Expo; Tells How First Civic Event Won Vast U. S. Bases for San Diego; Stresses Need Of Active Support by All.

Recollections of the Panama-California exposition of 1915 and 1916 and the influence that exposition exerted on the subsequent development of San Diego city and county, were recounted yesterday by G. Aubrey Davidson, vice president of the Bank of America.

Davidson, who was president of the 1915-16 civic enterprise, now actively is siding the proposed California-Pacific International exposition, scheduled for next year. He stressed the dividends which San Diego received from the 1915-16 fair in the form of the present extensive naval establishments and other marked developments which “transformed San Diego from a town to its present metropolitan proportions.”

“Announcement of the proposed California Pacific International exposition here next year unquestionably proved of tremendous interest to San Diegans,” said Davidson. “My reaction was a definite thrill over the prospect of San Diego once again commanding country-wide and world-wide attention by repeating the aggressive action of 1915 and 1916. I am confident that those of our citizens who were residents then are experiencing the same feeling of elation over prospect of emulating that distinguished accomplishment.

Hard Work Necessary

“Objectives of such scope and importance necessarily are attained only after a vast amount of real hard work. I have not doubt that those now engaged in furthering the 1935 project are fully cognizant of the hard task ahead of them. This task, I might add, is one that cannot be performed by a few men, however earnest and self-sacrificing. It must be shared by the community as a whole, as it was in those other years. It was because of the wonderful spirit of cooperation of all our citizens in working for, planning and carrying out that enterprise, that the 1915-16 exposition was such an outstanding success.

“My own feeling is that the 1935 exposition not only will be a notable success, but that, in the progress of attaining that vital objective, we will witness a united San Diego once more working harmoniously, decisively and inspiringly toward a common goal, the rewards of which, as in the years subsequent to 1915, will be shared by every line of business and by every individual.

Ships Followed Expo

“The 1915 exposition, however, is only part of the story. In its wake, and as one direct result, San Diego was chosen as the site of vast federal naval establishments. Until 1915, naval activities here were limited to occasional visits by warships. Many of us will recall how the city swelled with pride when the cruiser *California* was re-christened *San Diego*. Now, except when the fleet is way on maneuvers, the harbor is crowded with war vessels of every type. Our naval population then runs into the thousands, and the annual naval payrolls, and other disbursements total many millions of dollars.

“The government’s program here really started with the exposition. A part of the Fourth regiment of marines, under Colonel Joe Pendleton, now major general retired and resident of Coronado, was stationed at the exposition in 1915. The ideal conditions for training men attracted the attention of ranking naval officers. Colonel Pendleton and others, including the late Rep. William Kettner, conceived the idea of a marine base here, and thus began the government’s extensive program which eventually included the naval training station, naval hospital, aviation activities at North Island, 11th naval district headquarters at the foot of Broadway, and the destroyer base, to mention only the more important units.

100,000 Residents Added

“Those of us who were here during those stirring days know what that exposition and the notable chain of developments it inspired, have meant in the upbuilding of San Diego. However, 20 years have passed since that epochal era. To the more than 100,000 residents who have been added to our population in the interim, the 1915 exposition is something of which they know only by hearsay. These comparative newcomers constitute a fertile field in which to generate the enthusiasm and inspirations of two decades ago.

“As one who had a part in the magnificent success of 1915, who has witnessed the transformations of San Diego from a town to its present metropolitan proportions, and who knows from actual experience which a repetition of the exposition will mean to the community, it will be easily understood why I thrill to the prospect of the contemplated exposition next year.

Must Be No Lagging

“If I read the signs rightly, all forward-looking San Diegans share the spirit of enthusiasm and optimism created by the preliminary announcements. But there must be no let-up, no lagging. I know of nothing that will arouse more effectively San Diego to the opportunity within our grasp and to enlist every citizen in the cause and carry on with the vigor and determination of those other memorable years.

“The 1915-16 exposition yielded rich dividends to San Diego city and county. By capitalizing the present opportunity, the California-Pacific International exposition, to a certain extent, will repeat itself.”

San Diego Union, July 29, 1934, II, 1:8. Chamber maps plan to mass United States, foreign vessels here for Exposition; concentration of U.S. Fleet in San Diego harbor and Coronado Roads desired during opening days of Exposition; committee chosen to work with government officials.

San Diego Union, July 31, 1934, 2:6. Council orders investigation of **Zoo** sea lions.

City council ire was expressed yesterday over a story that the San Diego zoo was "giving away sea lions to the Toledo zoo: and an order for an investigation met with the following response from Mrs. Belle Benchley, zoo director:

"The two young sea lions going to the Toledo zoo were paid for by the chamber of commerce at \$100 each. The money goes into the zoo fund."

Her statement that it has cost the zoo \$14,000 to educate the highly trained sea lions aroused Councilman Warburton yesterday to demand an investigation. This brought the following response:

"These facts are correct but the revenue from renting these seals has paid for their training and the attendant publicity to the San Diego zoo has resulted in the sale of hundreds of these creatures all over the world. These trained seals have made four trips to Los Angeles to be used in pictures. San Diego is the only place in southern California where trained seals may be obtained. It has taken four years to train these seals and the expense and revenue have been distributed over that period."

The council ordered City Manager Lockwood to find out "why zoo animals were being given away." Lockwood also was ordered to find out why the society or its agents circulated what councilman declared to be "misleading information on the attitude of councilmen toward the zoo.

Warburton also said the impression was given in another article by Mrs. Benchley that the council had refused to put on the ballot charter amendment requiring that 2 cents of the tax levy be devoted to the zoo. He charged that "geranium growers give full vent to their hobbies and we pay the bill."

Councilman Anderson joined in to say that the zoo could not give away animals without permission and Warburton flashed back that "we're going to run the city from the city hall and not from the chamber of commerce."

Warburton obtained a council order directing the manager to find out about the seals and Mrs. Benchley's other remarks of which the councilman didn't approve.

So far as the tax levy is concerned, files show that in September, 1932, Dr. Harry Wegforth, president of the zoological society, urged the levy. In council meeting, September 12, 1921, Councilman Goodbody make such a motion and it was seconded by Councilman Blakiston.

The motion was defeated 4 to 2. Councilman Andrews, Russo, Bennett, and Rossi voting against it. Of these four voting against the issue, three, Anderson, Bennett and Rossi are on the present council and are objects of the proposed recall move.

As to the seals, Mrs. Benchley said yesterday that daily shows are given with them and the huge crowds that watch are mostly from outside the city. The shows have resulted in the sale by the zoo of hundreds of seals, prices running up from \$100 each. She said she expected great results from them when the San Diego exposition is held. Sale of such animals, she said, is one method of keeping up maintenance of the zoo, while the council is cutting down on the zoo budget.

San Diego Union, August 14, 1934, 1:7, 2:3. Two councilmen favor city operation of **Zoo**.

If Councilmen Harry Warburton and Charles Anderson have their say, operation of the San Diego zoo will be taken out of the hands of San Diego Zoological society and run under direction of the city manager.

This developed at yesterday's council meeting when Fred Lockwood, city manager, reported that two sea lions had been sold by the zoo here to the Toledo, Ohio , zoo for \$100.

"I'd like to know the exact financial status of the zoo, which after all, belongs to the city, lock, stock and barrel, October 6, 1932, and it is my understanding that it is supposed to be under city management."

G. F. Waterbury, city auditor, then told Warburton that city auditors are now going over the zoo books and that he probably will have a complete report soon,

"I'm in favor of the city's taking over the zoo and operating it ourselves," Councilman Anderson said. "Besides, we don't need the Zoological society."

"The zoo is a great asset to the city, " Warburton said. "There is no denying that. But the way it is being run now we don't know what is done with the money. Admission should be free."

Councilman Cameron broke into the discussion here. "I understand it costs about \$90,000 a year to operate the zoo and of that sum the city contributes something like \$10,000. So, where do they get the other \$80,000. Some of it, I guest, is made up from money taken in at the gate and from contributions."

"Yes, they get most of the money from private donations," Manager Lockwood chimed in.

"Anyway, before I do anything," Cameron continued, "I want to know the exact status of the zoo."

It was agreed that any possible action would hinge on the auditor's report.

San Diego Union, August 21, 1934, 4:1. EDITORIAL: Carp and Councilmen

The report of the auditor appointed by the city council to investigate the local zoo's management will be accepted as a matter of course by all private citizens who are at all familiar with the zoo's work. We suspect that it will not even surprise the councilmen --- if they knew they were appointing a good accountant.

Nevertheless it is disappointing --- from Mr. Warburton's point of view, and only from his point of view. For, judging by the arguments with which he launched the probe, he hoped that by stirring up plenty of mud he might uncover something which could be used to add the zoo to the council's patronage stable.

The audit disclosed that the zoo is ably managed. It revealed that gifts and donations total more than the annual amount contributed by the city. In other words, it revealed that San Diego has every confidence in the present management. The audit disclosed that the zoo is popular. And incidentally it revealed that the man who conducted it refused to be affected by the political background against which the examination was conducted.

As we have said, nobody is surprised at the result. Any adult mind that has compared the cost of the zoo with its service to San Diego has long recognized that it is a bargain.

The result reveals something else. Like other campaigns to install politics in completely non-political activities it suggests that there are better and cheaper ways to check up on semi-public organizations than to simply stir up the mud at the bottom of clear water as a carp stirs it in the hope that he may find a morsel of good in a ton of cloudy water.

San Diego Union, August 21, 1934, 7:4 City Council orders census of **Zoo**.

Before the city council acts on its own suggestion that it take over and manage San Diego's zoo in Balboa Park, it wants to know how many animals are there.

The council meeting yesterday, instructed Fred Waterbury, city auditor, to make a complete inventory of animals in the zoo, October 1932, when the zoo was deeded to the city, and the list of animals added to the zoo since that date.

"I can assign a man to make the inventory," Waterbury said, "but my man will have to have someone to tell him the name of each animal."

Waterbury probably will make inventory and report to the council when it meets next week.

San Diego Union, September 5, 1934, 1:3, 3:4. Council blocks citizens' plan to vote on charter amendment that would give the **Zoo** the proceeds of two cents on the tax levy; four members ignore advice of city attorney; action may cost people \$10,000; zoo enthusiasts submit petition to call election.

Ignoring the advice of the city attorney and disregarding constitutional requirements, the city council, Mayor Irones absent, voted 4 to 2 yesterday against submitting to the people a charter amendment that would give the zoo the proceeds of 2 cents on the tax levy.

The council refusal, if persisted in, may cost the taxpayers 200 times as much as it would cost to put the charter amendment on the November 6 ballot along with three other propositions already ordered on that ballot by the council.

The vote was taken after the city and county clerks had certified that the number of signatures legally required to call an election was on the initiative petition filed by zoo enthusiasts and after the city attorney had ruled the petition was in form and refusal to call an election could not be sustained in court.

Councilmen Charles E. Anderson, Albert W. Bennett, Alva S. Davis and Will H. Cameron refused to obey the constitutional mandate. Councilmen Harry Warburton and Dan Rossi voted for the election steps.

Refusal to take the election steps came after the councilmen tried to get the zoo directors to withdraw the petition, only to be informed by their own legal advisor that the matter was now out of the zoo's hands and no one could withdraw the petition.

Councilmen Bennett and Cameron verbally announced that they would sit by and let someone bring a writ of mandate against them before they would call an election which is clearly specified in the law.

Refusal to call an election to be held with the November 6 general election was excused by the four councilmen on the grounds that it would cost about \$4,500 and that the additional money the zoo would get if the charter amendment was adopted would be only about \$3,000 a year or less than the election cost.

They also stated the belief that the zoo move for a special tax levy might prove the forerunner of similar requests from other branches of the city establishment.

The record indicates that the council on July 23 instructed the city attorney to take steps to put three city propositions on the November 6 general election ballot. These were a proposal for a bond issue for Hodges dam repair, a charter amendment cutting the mayor's salary to \$1,000 a year and a proposal to ratify a contract for participation in All-American canal construction. These instructions still stand. Additional cost of putting the zoo amendment on the ballot, with the other propositions proposed by the council, was estimated in the neighborhood of \$50. The July 23 election instructions were not mentioned by councilmen in yesterday's discussion.

Before rejecting the election move, several councilmen said they would be willing to put the matter up to the people in one of the spring elections. They were advised by Harold B. Daniel, deputy city attorney, that the constitutional provisions on charter amendments seems to require that they be submitted to the people at the general election prior to legislative sessions. Thus it would not be legal to submit the amendment in the spring.

Councilman assured the zoo directors present, Fred Annable, W. C. Crandall and Gordon Gray, that they were friendly to the zoo. Then, after refusing to call the election, the council table an appropriation to pay for materials to be used in an SERA project in the zoo, including work on concrete walls and pools.

Mrs. Belle Benchley, zoo director, was quizzed briefly by Councilman Warburton who said he wanted a zoo but didn't want too many animals of one kind in it.

Warburton said he proposed to submit the zoo inventory to experts he knew who would advise him how many animals of each species should be kept on hand for a well-balance exhibit.

Mrs. Benchley denied knowledge of reports councilmen said they had heard to the effect that zoo magazine salesmen were telling the people that the council and supervisors were not supporting the zoo.

Warburton said they had too many antelope and deer in the zoo and should have only a pair of each. It was suggested to him that one or two deer might not be attractive to the people, whereas a herd would be very interesting. He amended his remarks to state that he would approve of three or four pair but not as many as there are now.

When Bennett said that he would have to be mandamus before he would vote to put the zoo amendment on the ballot he was advised by Daniel that this might have the effect of increasing the cost to taxpayers. Daniel said that if it is necessary for someone to get the mandamus order against which, he added, the city would have no legal defense, it might then be too late to hold the election with the November ballot. A special election, costing \$10,000 or more then would be necessary, he indicated.

When the zoo directors were summoned they were quizzed as to their responsibility for the petition and said they had authorized the circulation of it. They said they did it because they felt the zoo needed assurance of a steady income whether or not a hostile council was in power. A zoo exhibit needs constant attention and a few days' neglect would destroy it, while many museum exhibits could be shut up for a year and be no worse off, they added.

After it developed that no one could withdraw the initiative petition, Daniel was asked for his views on failure to call the election.

He said that the council might refuse to call the election and win its point if no one brought a writ of mandate to compel the call.

"But if you do you have disobeyed the plain mandate of the constitution," he said.

"I'm willing to stand a writ of mandate," said Cameron.

"I'm willing to follow the attorney and put it on the ballot," said Warburton. The vote, taken on an order for the city clerk to start election procedure by advertising the proposed amendment in the official newspaper, failed by the vote of 4 to 2.

San Diego Union, September 13, 1934, 1:6, 2:5. City Council orders **Zoo** amendment on November ballot; action asking two-cent levy follows Grand Jury charges of misconduct.

City councilmen yesterday ordered submission of the zoo amendment to the people at the November 6 general election, along with three water matters, including two bond issues and All-American canal contract ratification.

Action on the amendment which seeks 2 cents on the tax rate to be devoted exclusively to the zoological gardens came after City Attorney Byers advised such a move.

Byers said that the wording of the initiative petition asking submission of the zoo amendment apparently called for the election to be held next spring but that signers apparently wanted it submitted as early as possible. He added that there appeared to be a conflict between the zoo petition wording calling for the election at the general municipal balloting and the constitutional requirement that charter amendments be filed before the general election preceding the legislative session.

If the council waited until next spring and held the election of the zoo amendment with the general city election it might be too late to have the legislature ratify the amendment, if adopted, before the 1937 session, Byers said. Because of the conflict between wording on the zoo petition and the state constitution, the city attorney said that legality of the amendment, if voted on and adopted at the spring municipal election, might be questioned.

In order to avoid further legal complications and also to comply with the desires of more than 10,000 electors who signed the zoo petition, the council should put the amendment on the ballot as a councilmanic act, Byers said. He said the council has legal authority to place charter amendments on the ballot.

Councilmen called for zoo directors to come down and tell whether this plan would be satisfactory. Word came back that three directors were out of town and the one who was in town couldn't come down.

The council then adopted this resolution:

"That the attorney be directed to prepare the necessary documents to enable the council on its own motion to submit to the electors of San Diego the same proposition relative to the zoo which is now contained in the initiative petition now filed in the office of the city clerk, such proposition to be submitted at election to be held on the same date as the November state election."

Legal reasoning used in the Byers report to the council is expected to be urged before the superior court here September 24 when four councilmen appear to answer charges of misconduct in office filed by the grand jury. The charges grew out of refusal last week to act on the zoo petition on the part of Councilmen Anderson, Bennett, Cameron and Davis.

San Diego Union, September 14, 1934, 1:3, 3:1. Fund solicitors hope to attain Exposition goal today.

San Diego Union, September 23, 1934, 1:4. Belated recognition: plaque to be placed in park honoring memory of Bertram Goodhue.

San Diego Union, September 23, 1934, 4:1. EDITORIAL: Bertram Goodhue

The movement to devise a fitting tribute to Bertram Goodhue, the man who created Balboa Park's buildings, merits the wholehearted support here particularly as it has been so long delayed. The means selected to recognize San Diego's debt to the architect for the 1915 Exposition and for some of the local government structures should reflect this community's knowledge that in acclaiming Goodhue we are honoring ourselves, acclaiming the judgment and good taste of the local citizens who 20 years ago refused to consider anything but the best for San Diego's first exposition.

No memorial can do more honor to Mr. Goodhue's memory than the buildings which he created here. A plaque or special day set aside for him during next year's exposition, or both, would be a graceful compliment, however, and a reminder that the second exposition, like the first, must attempt to live up to his standard of taste.

San Diego Union, September 23, 1934, II, 1:3-8, 6:1. **Zoo** head announces play for animal amphitheater; hope to have stage ready for 1935 Exposition; unemployed would be used to erect huge structure; suitable also for public assemblies and pageants.

San Diego Union, October 29, 1934, 4:1. EDITORIAL: Hands Off the Zoo!

San Diego has repeatedly sounded this warning when councilmen and other politicians have attempted to hamper or curtail the zoo's activities. These warnings have been ignored. Now the two-cent tax levy to be voted upon next week translates the warning into a mandate.

The local zoo does not need to be justified in San Diego. Its record is understood and appreciated by all citizens. The community also knows that the society has built up an exceptionally fine collection at a very low cost. It is providing us with a permanent exhibit which is superior to many collections in much larger cities.

No other zoo west of the Mississippi compares with it in the size or quality of exhibits. Yet time after time petty local officials have attempted to interfere with the zoo's management or impose unreasonable handicaps. In sheer self-defense the men and women who have given their time and money to this enterprise now ask that its income be guaranteed by means of the two-cent levy on each hundred dollars of assessed valuation.

As long as it is impossible to achieve businesslike administration at the city hall, it is necessary, unfortunately, to secure the zoo against destructive meddling. Under a sensible, competent administration it would be better to hold the central municipal government responsible for supporting all such activities. But experience has proved that there is no intelligent sense of responsibility in the present administration.

In this situation the zoo must be protected. **The Union** recommends the two-cent levy as the only practical and certain means of guaranteeing this protection to an institution which represents a heavy investment of San Diego funds and effort.

This must be done but, incidentally, we sincerely hope that all voters will remember how this issue was created. For while the special levy will protect the zoo, as long as the city hall attempts to interfere in the administrative details of any municipal activity not one of these activities such as Balboa Park, the public library, and many others will be secure.

The zoo levy is an emergency measure and must be put through as an emergency measure. But the source of the emergency will persist after the zoo has been secured against inference. And as long as this chronic evil will persist it will remain the most urgent single challenge to all citizens who tolerate the current regime.

A vote for the levy for continuing the zoo under the intelligent direction which has won it high rank among all American zoos. It is a rebuke to councilmen who have shirked the task of eliminating the major source of waste in government. And it reminds all citizens that we still lack effective local government.

San Diego Union, October 31, 1934, 3:4. Matson Navigation Co., which operated between California and Antipodes, will help get exhibits in Australia and New Zealand.

San Diego Union, May 4, 1933, 5:2-4. LETTERS: APPEALS TO SAN DIEGO ORGANIZATIONS FOR PARK

Editor San Diego Union. In answer to requests for suggestions as to our exposition buildings of 1915, the following is offered. The experts inform us that they are no longer safe, therefore they must be demolished. The question then facing citizens is how shall new permanent buildings of the same artistic character be financed? The only way that appears feasible is for those of use who have specifically and financially benefited by this splendid adornment to our city, to return to our common pocketbook a small percentage of the values we have received.

I refer to our land value. Granted that site owners of San Diego can demand an increased rental for their sites on account of the park, why should they not consider it a privilege as well as a paying investment to accept an assessment upon their land value, say of one-tenth of 1 percent per annum, until every exposition

building has been replaced by permanent artistic structures? Thus, we may not only add artistic splendor to our city, but at the same time develop an attractive magnet that will appeal to lovers of beauty the world over.

S. S. TABER

2451 A street.

Editor San Diego Union, As you invite correspondence on the exposition buildings, I should like to offer one or two suggestions for what they are worth.

It will be deplorable if those graceful buildings have to be razed to the ground. But where did the funds for their construction come from, when San Diego was a smaller and much poorer city? Could we not expect to raise money from similar sources for the coming exposition, sufficient to restore or rebuild those beautiful monuments of the old one? San Diego has almost doubled in size and the country seems to be on the up-rise from the big depression. There is no need for haste, anyhow.

If I am over sanguine in this suggestion, I would submit another proposition, the execution of which would partly compensate for the loss of the old exposition buildings, provided the arcades are retained.

I see it is proposed to borrow from the R. F. C. for construction of the civic center, also that three sites are suggested --- tidelands, old courthouse block and Balboa park. Why not adopt the site last mentioned and erect the city and county buildings at some easily accessible place on the outskirts of the park? Those buildings might follow the Goodhue style of architecture and there would be ample space for beautiful grounds.

W. P. REYNOLDS

2572 Third avenue.

Editor San Diego Union. The people of San Diego should consider seriously what the loss of the buildings in the park will mean to the city before they allow these architectural gems to be destroyed and the city deprived of its one real asset of physical beauty.

We must make a desperate effort to retain these buildings, which have become so dear to the hearts of our own citizens, given our visitors their most lasting impressions and most delightful memories of San Diego, which have more than any one thing given San Diego unique prestige among cities of the world.

An article in one of our papers recently made the assertion that the most sensible things would be to tear down the buildings and fill in the spaces with trees and flowers and fountains just as all other cities in the country have planned for their parks.

To Preserve Distinction

To my mind this is the strongest argument we could possibly have in favor of keeping, at all costs, the one outstanding feature which makes our park different from all others. No other city has or ever will have a group of buildings such as these, set in the midst of a public park --- buildings conceded to be the most beautiful group architecturally in this country or any other.

Shall we give these up and see our park deteriorate to the common level of every other park in Christendom?

Once the buildings are destroyed they are lost forever and can never be replaced. Long as they remain standing, even in a state of temporary preservation, there is always a chance eventually of their permanent rehabilitation.

Much is being written about preserving the park buildings, but until some organization or group of individuals takes a definite stand in the matter and starts a "Save the buildings in the park" campaign in earnest, no progress will be made beyond the writing of articles.

To Start Ball Rolling

If only the chamber of commerce, San Diegans, Rotarians, Kiwanis, Lions, or some other civic minded club --- one or all of them together --- would start the ball rolling and give those who are sympathetic to the movement a rallying point, I am sure there must be thousands of people in San Diego who, like myself, would be glad to subscribe toward the temporary preservation of the buildings and cooperate in saving to the city its most beautiful asset.

To save these buildings, fill in the ground and re-park the whole would surely cost the city a goodly sum, besides the perpetual expense of maintenance. Instead of using this money for destruction of the buildings, why not devote it, with the addition of private subscriptions, to strengthening weak places, repairing cornices and arcades and to preserving the buildings as they stand, at least temporarily, hoping that as times improve and money becomes freer, institutions or individuals of the city itself will eventually finance their permanent construction.

GERTRUDE GILBERT

139 Fir street

San Diego Union, May 6, 1933, 10:1-2. LETTERS: DUPLICATION OF PARK BUILDINGS SEEN AS ASSET

Editor San Diego Union. It is fortunate that in the columns of this paper and elsewhere there is so much constructive and otherwise wholesome discussion of the problem of the Exposition buildings in Balboa park. It is much better to know how people feel, to have as many constructive ideas and plans as possible, so that whatever we do eventually, we will do with our eyes open.

Everyone seems agreed that the buildings, their setting and the combination of this architecture with the landscaping are unique, an artistic masterpiece, with an attractive and friendly atmosphere which endears itself to all who are fortunate enough to visit us. The character of the present discussion is clear evidence of the importance of Balboa park as it has been since the Exposition.

We humbly add our personal opinion, our suggestions to the many others which have "appeared on the tapis" thus far. As we could scarcely expect to recreate this perfect atmosphere which Goodhue and Winslow have given us in the Balboa park of the Exposition, because it has been due to their outstanding individuality and genius, we should indeed cherish what is still left to us of their masterpiece. For safety' sake, some of the buildings which are being used more or less, or which are so placed that people naturally come into contact with them continually may have to go first, and before long. Others, which no longer are used, or which are isolated sufficiently so that they scarcely endanger lives might well remain longer with us.

New Duplicates Useful

As a second suggestion, is it too expensive to think of copying one or more of the structures in material of permanence? It is true that we already have as permanent buildings the California state building, and the others surrounding the Plaza de Panama. But they are insufficient to adequately express the enchanting Balboa park of these last few years. And the other Exposition buildings are so fine that we should like to see some of them also kept for posterity. There are plenty of organizations using Balboa park in their present occupancy of Exposition buildings to make good use of such new duplicates. However, even if it seems wiser to have in the duplication no more than a shell, not a utilitarian building, we still feel that such would indeed be worth while. Later on the interior might be remodeled to suit the desires of that day.

The Prado, that is the extension of Laurel street, which passes through the park and toward the east entrance, is too narrow for present traffic demands. The chances are that it may be even more inadequate tomorrow. We fear that it will be necessary to cut back the ground on either side of the present roadway. If so, the arcades then would be too close to the street to appear either well designed or attractive to the eye. Unfortunately, it does look as if the arcades must go. But certainly they should be rebuilt in some permanent

form, and as a duplicate of the present ones. They should be set back sufficiently so as to be in proper relation to new landscaping and a widened roadway.

If certain buildings have to disappear --- and this seems inevitable --- buildings someday should be erected in Balboa park to replace more or less what we have. But such buildings should only rise when needed. Unless they can be exact duplicates from measured drawings and from moulds taken from the originals themselves, etc, they should be something quite different. Naturally, however, they should be in harmony with other Balboa park structures and an integral part of a permanent scheme. This is quite possible.

Suggests Big Model

Furthermore, any buildings that are to be needed in the future should be passed upon by an officially representative body of the local chapter of the American Institute of Architects. Also they should have the approval of the park authorities and of the public institutions which are situated permanently in the park.

Last, but perhaps not least, certainly a large-scale model of Balboa park and its buildings, was that work was designed for the Exposition by Goodhue and Winslow, should be constructed in permanent form. Obviously this would be of the greatest value to students in many fields and the greatest satisfaction and joy to all who are interested in the beautiful creations of man.

There is only one Balboa park in the world. Let us do everything necessary to retain what we can and for the maximum of years, and to create the best that is possible in place of whatever it may prove unsafe to maintain for long. And let us to do this now before it is too late.

REGINALD POLAND
Director Fine Arts Gallery

San Diego Union, November 14, 1934, 3:2. Death Calls D. C. Collier Soon After Heart Attack; Was First Head of 1915-16 Exposition, Later Sent to Brazil, and Started Philadelphia's Celebration (photo).

Col. David Charles Collier, 68, died yesterday in Scripps Metabolic clinic at La Jolla following an attack of heart disease Monday afternoon at his ranch near Ramona. Death of Col. Collier, who had lived in San Diego for 50 years and who was active in making possible San Diego's 1915 exposition, came as a shock to his many friends and associates.

Col. Collier's body is at the Bradley Woolman mortuary. Funeral arrangements, which will be announced later, probably will be in charge of the Masonic order, of which he was a member. Col. Collier is survived by his widow, Mrs. Clytie Collier, a son, Ira Clifton Collier, and a daughter, Clytie Lyon Collier, all of San Diego; a brother, Judge Frank Collier, Los Angeles, and a sister, Mrs. Mabel Sharpsteen, Berkeley. The Collier home is at 3418 Park blvd.

Native of Colorado

Col. Collier was born in Central City, Colo., Aug. 14, 1871, and came to California when still a young man. He was admitted to the California bar in 1891 and practiced law in San Diego until 1905.

Col. Collier was married three times. His first marriage was Jan. 1, 1896, to Ella May Copley. They were divorced in 1914. The following year, Col. Collier at Oakland married Ruth E. Emerson, but she died Aug. 28, 1916. On Dec. 13, 1919, Col. Collier was married to Clytie B. Lyon.

In addition to practicing law in California, Col. Collier was admitted to the Illinois bar in 1929. In 1904, he organized the Ralston Realty Co., which later became known as D. C. Collier & Co.

Col. Collier earned the rank of colonel by serving as a lieutenant colonel on the staff of Gov. J. N. Gillette of California from 1907 to 1911.

Col. Collier played an important role in San Diego's Panama-California Exposition in 1915 when he was the first director general and later president. He was a former director of the San Diego museum and a member of the board of managers, American School of Research, Santa Fe, N. M.

Appointed by President

In 1922 Col. Collier was appointed by the late president Harding as commissioner general to represent the United States at the Brazilian Centennial Exposition at Rio de Janeiro, and in 1925 was made director general of the Sesquicentennial at Philadelphia, and was director general of the Order of the Liberty Bell since 1930. He was interested in the start of A Century of Progress at Chicago.

Col. Collier was a 82nd degree Mason, a member of the Archeological Institute of America, California Historical society, Sons of Colorado, Colorado Pioneers, San Diego chamber of commerce, honorary life member of Ramona chamber of commerce, and an honorary member of Associacao Brasileira de Imprensa, Rio de Janeiro. He also was a member of the Chicago Athletic Club, the San Diego Yacht and Rowing clubs, the Sojourners, the Pen an Pencil, State Fencibles and the Booster's club, Philadelphia.

In 1932 Col. Collier was a candidate from the first district for the San Diego county board of supervisors, but was defeated at the primaries. In recent years Col Collier had engaged in the real estate business and passed much of his time at the ranch near Ramona, where he was taken ill Monday.

San Diego Sun, November 14, 1934. Dynamic Energy, Civic Service to S.D. Cited in Tribute to Late Col. Collier; 50-year old pioneer of County succumbs to sudden illness (photos).

A career of 50 years in San Diego was at an end today with the death of Col. D. C. Collier, one of the city's most noted citizens, who died at Scripps Memorial Hospital, supposedly following an attack of acute indigestion. Death occurred at 12:15 yesterday.

Col. Collier became ill at his ranch near Ramona, his favorite weekend retreat, and was rushed to the hospital Monday.

Funeral services will be held at the Bradley-Woolman funeral parlors at 2 p.m. tomorrow under auspices of the San Diego lodge No. 35, F. & A.M.

Col. Collier, who was 63 last Aug. 14, arrived in San Diego as a small boy more than 50 years ago on the old steamer Orizaba. He was born in Central City, Colo.

First Job As Janitor

His first job was as janitor in the First National Bank. Later he studied law under his father, and when barely 21 was admitted to the bar. W. J. Mossholder and Judge Eugene Daney, sr. are the only attorneys here who exceeded his record as a member of the bar.

Many of the young lawyer's clients were unable to pay him in cash. Instead they gave him real estate, much of it considered as worthless lots in what are now Pacific Beach, Ocean Beach, East San Diego, Normal Heights and North Park, all of which he later subdivided and sold at prices which made him wealthy. Part of East San Diego he bought at \$4.50 per lot.

"With so much property on my hands, I woke up to the fact that I had to go into the real estate business --- in fact, was already in it," he often recalled to friends. "I had faith in San Diego and was perfectly willing to take lots instead of cash, although many clients apologized because they thought they were cheating me!"

Gave Fortune to Expo

In 1909, G. Aubrey Davidson suggested San Diego hold an Exposition. Collier became fired with the idea. For five years he devoted all his time and money to the Exposition, and because of this was made director-general of the undertaking. Many times during the five years, and before the enterprise finally blossomed into the famous Panama-Pacific [sic] Exposition of 1915, the idea almost succumbed to apathy, but Collier kept it alive. He put in \$100,000 of his own money; then \$200,000, \$300,000 --- and finally he was "in" and even \$500,000.

The Exposition went over.

In later years he represented the United States at the Brazilian Exposition and more recently was director-general of the Philadelphia Sesqui-Centennial Exposition at \$50,000 per year.

From this he developed the idea of the Century of Progress Exposition at Chicago. Long before anyone else pushed the idea, Col. Collier was promoting it in talks before service organizations and clubs in Chicago. Finally, Chicago business men got behind him. He served for sometime as chairman of the advisory council.

Two years ago he returned here and resumed the practice of law, with offices in the old California Bank building. Ill fortune dogged his later days, but he was happy in his retreat, La Cabana, at Ramona. He opened a "weekend office" there several weeks ago, and, to his surprise, developed a fairly large practice among back country clients.

Operated Railway

During his real estate days, he was owner and operator of a railroad line from San Diego to Ocean Beach.

When former President Theodore Roosevelt offered to raise a regiment to go to France during the World War, he offered Collier a post as colonel. The ex-president's offer was not accepted. Collier, however, did not owe his title to military service, he was made a colonel on the staff of a California governor many years ago, and the title "stuck."

He was known for his picturesque appearance. For 40 years he wore a large "five-gallon: hat and a Windsor tie. Why? "Oh, I just like the combination," he explained to friends. "It make me easy to find in a crowd. Few other men would wear such a get-up."

Col. Collier's first wife was Ella May Copley, sister of Col. Ira C. Copley, San Diego and Illinois newspaper publisher. They were married Jan. 1, 1896, divorced in 1914.

Son Crash Victim

They had two sons, David, jr., a military aviator killed in an airplane crash during the war, and Ira Clifton, who lives in San Diego.

His second wife was Ruth E. Emerson, Oakland, Calif., whom he married Nov. 14, 1915. She died Aug. 28, 1916, On Dec. 13, 1919, he married his present wife, Clytie B. Lyon. Their home is at 3416 Park blvd.

A friendship of more than 30 years standing with his inseparable friend, Carl Heilbron, was broken when Col. Collier died. For years they traded property back and forth, loaned and borrowed money from each other, with never a scratch of paper to show how they stood. Heilbron worked closely with Collier in putting over the 1915 Exposition.

Heilbron was deeply shocked when he heard of the Colonel's death.

Publicized San Diego

“He was the most loyal friend I ever had,” Heilbron said. “He was a man of dynamic energy, and of boundless faith in San Diego. Wherever he went --- from Brazil to Philadelphia to Chicago --- he publicized San Diego. I believe that by word of mouth, he did more to spread the fame of San Diego than almost any other ten persons.”

Collier was a member of many fraternal orders, including the various branches of Masonry and the Elks and was also a Rotarian.

San Diego Union, June 5, 1942, A-2:5-6. GERTRUDE GILBERT HONORED FOR S.D. CULTURAL SERVICE; Vase, Book Given In Recognition of Benefactions, by Constance Herreshoff (photo).

Gertrude Gilbert's long devoted to the cause of the arts in San Diego and her valued service to many civic enterprises called for recognition in tangible form, in the opinion of 200 of her friends, who yesterday presented her with a beautiful silver vase and an illuminated parchment book, in which was inscribed the names of the donors.

Fred Annable, president of the Fine Arts Society, served as chairman of the Gertrude Gilbert testimonial committee, which included such outstanding citizens as George W. Marston, the late Julius Wangenheim, Reginald Poland, director of the Fine Arts Gallery, Wayne von Schaick, of the San Diego Community theater, Mrs. B. A. Buker, secretary-treasurer of the Amphion club, and Mrs. W. H. Porterfield, honorary president of the San Diego Symphony association.

Wangenheim Sponsor

At the suggestion of Julius Wangenheim, made at a meeting of this committee a few days before his death, a silver flower vase was selected as a token of the grateful and affectionate regard in which Miss Gilbert is held by the community. The vase, standing 20 inches high, is engraved in a leaf and scroll design and bears her name and an inscription.

The parchment manuscript accompanying this gift, was beautifully illuminated in the style of the middle ages, by Florence Chenett Hale of the San Diego Art guild. The dedication and the names of the donors are lettered in black. Initials and small conventional designs are picked out in red, blue, and gold leaf.

Heads Amphion Club

No other citizen has done more to further the artistic development of San Diego than Miss Gilbert, a native daughter. For the last 31 years she has served as the president of the Amphion club, which has brought to the city each year the world's finest concert artists, through the Amphion Artists series. Before 1911, the Amphion club brought only occasional artists here. The Amphion club, founded in 1893 as a club of amateur musicians, meeting in each others' homes, will celebrate its 50th anniversary next fall with suitable ceremonies and an opening concert by Heifetz.

As a member of the board of directors of the Fine Arts society from its incorporation until 1940, when health necessitate some curtailment of her activities, Miss Gilbert's enthusiastic support proved an inspiration to the artists and art interests of the city. She also was for many years a member of the executive board of the San Diego Symphony association and has always been a generous supporter of our summer orchestral concerts. Her benefactions to other cultural enterprises in the city are numerous.

Saved Park Buildings

Largely due to Miss Gilbert and Miss Alice Lee, we owe the saving and rehabilitation of our park buildings after the Exposition of 1915. The city council voted to scrap the buildings, With Miss Lee and others, Miss Gilbert started a campaign to save and restore the buildings, raising \$83,000 for the restoration.

The general attitude toward Miss Gilbert is expressed in the gift dedication of the Gilbert testimonial committee: "In the midst of activities, in a world greatly distressed, we, your friends, pause for a little time to review, to contemplate your devoted and long-sustained labors on behalf of our community. We remind ourselves of your services to the Expositions, to the part buildings, the the Fine Arts gallery, to the Amphion club, and to the many other civic and especially musical enterprises and we know that your contribution toward a more gracious way of life in our San Diego is incalculable.

"And so, we who have benefits so much thereby do ourselves the honor of offering you this expression of our enduring appreciation."

San Diego Union, March 29, 1947, B-1:2. MUSIC CLUB HEAD DIES AT HOME HERE (photo).

Miss Gertrude Gilbert, President of the Amphion Club and one of the city's recognized cultural leaders died yesterday morning in her home, 138 Fir St.

Except for a two-year period, Miss Gilbert has served as President of the Amphion Club since 1907 and was responsible for bringing many of the world's finest concert artists to the city.

In addition to her Amphion Club work, Miss Gilbert was a member of the Board of the Fine Arts Gallery from its incorporation until 1940. She was an executive board member of the San Diego Symphony Association for many years and during 1930 was its Vice President.

She was instrumental in preserving the buildings of the 1915 Exposition after the City Council had voted to scrap the structures.

Miss Gilbert was in charge of music for the 1915 Exposition and served on the Women's Executive Board for the 1935 Exposition. During the latter event she also acted as chairman of music and entertainment for the House of Hospitality.

Born in San Diego in the 1870's, she resided here her entire life. Surviving are her brother, Dr. Alfred H. Gilbert, and a sister, Miss Bess Gilbert, both of San Diego.

Services will be conducted Monday at 11 a.m. in Johnson Baum Mortuary. Private burial will be held at Mt. Hope Cemetery.

HISTORY OF SAN DIEGO COUNTY, V. 2, ed. by Carl H. Heilbron, San Diego Press Club, 1936.
COLONEL DAVID CHARLES COLLIER, pp. 171-174.

David Charles Collier was born in Central City, Colorado, August 14, 1871, a son of David Charles and Martha Maria (Johnson) Collier. He came to San Diego with his parents in 1893, and completed his grammar and high school education in the San Diego City Schools.

During 1885 he worked as messenger boy for the First National Bank, but in 1886 he entered the law offices of Collier & Mulford, which firm his father was senior partner. In 1891 he was admitted to the California Bar, and went into partnership with his father. In 1905, with H.A Howard, he organized the Ralston Reality Company, and in 1908 he purchased Mr. Howard's interest, and the firm name was changed to D. C. Collier Company.

Colonel Collier organized and developed many large subdivisions in San Diego city and county, most prominent among which were University Heights, Normal Heights, Teralta Heights, East San Diego, Encanto, Ramona, Ocean Beach, and Point Loma Heights.

In 1908, in order to advance his subdivision work in Ocean Beach and on Point Loma, Colonel Collier built the Point Loma Railroad, which, upon its completion in 1909, he sold to John D. Spreckels. It is today part of the San Diego railway system.

When the Panama California Exposition was projected in 1909, Colonel Collier became its first director general, in which position he served until 1912, when he was elected president, which latter position he occupied until the Exposition was practically completed and ready for opening. For a period of over five years he was the driving force back of the Panama California Exposition, and in the words of George W. Marston, "Colonel Collier was the creative genius of the Exposition." It was due to his vision and determination that the Exposition retained Mr. Bertram Grosvenor Goodhue, the world's foremost authority on Spanish Colonial Architecture, who designed the principal buildings for the exposition, and the California State Building in Balboa Park. It was also through Colonel Collier's insistence that the Exposition company retained the services of Mr. Frederick Olmstead [sic], one of America's best known landscape architects, under whose direction the beautiful landscaping of the Exposition was carried out. It was the artistic efforts and abilities of these two great American authorities that made the 1915 Exposition buildings and grounds a creation of enduring beauty. It was the buildings and grounds of the 1915 Exposition which made possible the holding of the 1916 Exposition, and later the Expositions of 1935 and 1936. Without Colonel Collier's vision and determination and assistance, San Diego would not have engaged the services of these two outstanding authorities and without their services Balboa Park and all our Expositions would have been very ordinary.

In five years of intensive service for our exposition and our city, Colonel Collier received no salary or other financial remuneration, and during this period he expended out of his personal funds a sum in excess of half a million dollars; an example of unselfish, devoted, and generous public service that has never been equaled by any citizen of San Diego.

In 1917 Colonel Collier suggested that our exposition buildings be tendered to the United States Government for use as a Naval Training Station for the duration of the war. He accompanied Congressman William Kettner to Washington, D. C., to present this offer to the Navy Department. The offer was accepted, and the fine record of the Balboa Park Naval Training Station resulted in San Diego's being selected for our present Naval Training Station on Point Loma.

Colonel Collier was a staunch advocate of aviation. In 1910 he organized and was made president of the Aero Club of San Diego. He was personally responsible for bringing Glenn H. Curtiss to San Diego, and for establishing a flying field on North Island. North Island is now the home of the oldest and finest flying field of the United States Navy.

In 1913 Colonel Collier fathered a proposal that the State of California cede to the City of San Diego the tidelands fronting the city on San Diego Bay. With the assistance of prominent citizens and our members in the State Legislature, he succeeded in securing the passage of the necessary legislation. This has given to the city of San Diego title to its tidelands, which are the basis for our present water front and harbor development.

Colonel Collier's work with the Panama California Exposition of 1915 was so outstanding that in 1922 he was appointed by President Harding as Commissioner General for the United States to the Brazilian Centennial Exposition at Rio de Janeiro. His work as commissioner received the warm praise of the official representatives of the principal national [sic] participating, as well as of the Brazilian government itself. The government, in addition to conferring many high honors upon Colonel Collier, made him and his wife and daughter the guests of the nation on a tour through the principal states of Brazil. In 1925 Colonel Collier was appointed Director General of the Sesqui-Centennial Exposition at Philadelphia, and was largely instrumental in laying a proper foundation for that exposition. He resigned when exposition officials failed to keep their verbal pledges to exhibitors he had personally secured. He was retained by the Republic of Panama in 1925 and 1926 as exposition consultant. In 1927 and 1928 he assisted in laying the foundation for the Chicago A Century of Progress of 1925. For a period of nearly a quarter of a century, Colonel Collier was recognized as one of America's leading authorities on exposition matters.

In 1930 Colonel Collier returned to San Diego and again engaged in the real estate business and in the practice of law. In 1931 and 1932 he suggested the building of a Centennial Exposition in San Diego during the year 1934. This proposed exposition was to be held on the harbor front for the definite purpose of beautifying and developing this area, and of making the harbor front as attractive as the 1915 Exposition had

made Balboa Park. The suggestion of the 1934 Exposition was considered untimely by some of our civic leaders and although the foundation for the exposition had been well laid, the plans were not carried through. It is interesting to note that the efforts expended on this project by Colonel Collier and his associates created the civic interest that made possible the 1935 Exposition fostered by the group that considered the 1934 Exposition "untimely." Had the harbor front project been carried through, it would have been an outstanding success because of the tremendous sums which would have been made available by government appropriation under the C. W. A. and the W. P. A. To Colonel Collier more than to any other single individual is due the credit for the 1935 Exposition, first because of his vision in creating the beautiful buildings and landscaping of the 1915 Exposition, and second, because he made the community exposition conscious by his projected 1934 Exposition.

Colonel Collier was married in 1896 to Ella May Copley (since deceased), and through this union had two sons, David Copley Collier (deceased), and Ira Clifton Collier. Colonel Collier was married again in 1915 to Miss Ruth E. Everson of Oakland, California, who died in August, 1916. In 1919 Colonel Collier married Clytie B. Lyon, who survives him.

Colonel Collier was very active in city, county, state, and national politics for many years. In 1902 he was a candidate for the Republican nomination for Congress. In 1908 and 1909 he was a colonel on the staff of Governor James M. Gillett of California, and was active in the state and national conventions of the Republican party.

Colonel Collier was a director of the San Diego Museum; a member of the board of managers of the American School of Research at Santa Fe, New Mexico; a member of the Sons of Colorado and the Colorado Pioneers. He was a past president and life member of the San Diego Chamber of Commerce; a life member of the Archaeological Institute of America; the National Geographic Society; and honorary member of the Brotherhood of North American Indians. He was a member of all the Masonic bodies; a life member of the Al Bahr Temple of the Shrine; a life member of the Elks; a director of the State and County Parks Association. Among his club affiliations were the Rowing Club of San Diego, the San Diego Yacht Club, and the Advertising Club. He was an honorary member of the Rotary Club, and a member of the Sojourners Club, the Cuyamaca Club, the Athletic Club, the San Diegans, and the San Diego Press Club. He was an honorary member of the Associacao and Brasileira de Imprensa of Rio de Janeiro, Brazil, and of the Instituto Graphico e Historico de Bahia, Brazil.

Colonel Collier was a firm believer in the beautification of the city and county, and very active in the work of establishing adequate parks. He gave many acres of land to the city and county for park purposes, notable among which are Collier Park, several blocks in area on the summit of Point Loma, this park has not as yet been improved by the city; Collier Park at La Mesa, which has been improved to some extent; and Collier Park at Ramona, an area which has been greatly improved by the supervisors and the citizens of Ramona.

Colonel Collier died November 12, 1934. As this volume goes to press, arrangements have been completed for placing in the California Quadrangle in Balboa Park, a beautiful bronze plaque as a permanent memorial to San Diego's most dynamic and forceful citizen. This plaque will list the following inscription:

COLONEL DAVID CHARLES COLLIER
A man of vision --- a dynamic leader --- a developer and builder
A great and lovable character
The creative genius of the Panama California Exposition of 1915
An inspiration to the citizens of today.

San Diego Union, November 14, 1934, 5:1. The City Council yesterday turned over to the California-Pacific International Exposition limited control of the Exposition area in Balboa Park for the 1935 Exposition.

San Diego Union, November 14, 1934, 3:2. Death calls **D. C. Collier** after heart attack

San Diego Sun, November 14, 1934. Dynamic Energy, Civic Service to S.D. Cited in Tribute to Late Col. Collier; 50-year old pioneer of County succumbs to sudden illness (photos).

A career of 50 years in San Diego was at an end today with the death of Col. D. C. Collier, one of the city's most noted citizens, who died at Scripps Memorial Hospital, supposedly following an attack of acute indigestion. Death occurred at 12:15 yesterday.

Col. Collier became ill at his ranch near Ramona, his favorite weekend retreat, and was rushed to the hospital Monday.

Funeral services will be held at the Bradley-Woolman funeral parlors at 2 p.m. tomorrow under auspices of the San Diego lodge No. 35, F. & A.M.

Col. Collier, who was 63 last Aug. 14, arrived in San Diego as a small boy more than 50 years ago on the old steamer Orizaba. He was born in Central City, Colo.

First Job As Janitor

His first job was as janitor in the First National Bank. Later he studied law under his father, and when barely 21 was admitted to the bar. W. J. Mossholder and Judge Eugene Daney, sr. are the only attorneys here who exceeded his record as a member of the bar.

Many of the young lawyer's clients were unable to pay him in cash. Instead they gave him real estate, much of it considered as worthless lots in what are now Pacific Beach, Ocean Beach, East San Diego, Normal Heights and North Park, all of which he later subdivided and sold at prices which made him wealthy. Part of East San Diego he bought at \$4.50 per lot.

"With so much property on my hands, I woke up to the fact that I had to go into the real estate business --- in fact, was already in it," he often recalled to friends. "I had faith in San Diego and was perfectly willing to take lots instead of cash, although many clients apologized because they thought they were cheating me!"

Gave Fortune to Expo

In 1909, G. Aubrey Davidson suggested San Diego hold an Exposition. Collier became fired with the idea. For five years he devoted all his time and money to the Exposition, and because of this was made director-general of the undertaking. Many times during the five years, and before the enterprise finally blossomed into the famous Panama-Pacific [sic] Exposition of 1915, the idea almost succumbed to apathy, but Collier kept it alive. He put in \$100,000 of his own money; then \$200,000, \$300,000 --- and finally he was "in" and even \$500,000.

The Exposition went over.

In later years he represented the United States at the Brazilian Exposition and more recently was director-general of the Philadelphia Sesqui-Centennial Exposition at \$50,000 per year.

From this he developed the idea of the Century of Progress Exposition at Chicago. Long before anyone else pushed the idea, Col. Collier was promoting it in talks before service organizations and clubs in

Chicago. Finally, Chicago business men got behind him. He served for sometime as chairman of the advisory council.

Two years ago he returned here and resumed the practice of law, with offices in the old California Bank building. Ill fortune dogged his later days, but he was happy in his retreat, La Cabana, at Ramona. He opened a "weekend office" there several weeks ago, and, to his surprise, developed a fairly large practice among back country clients.

Operated Railway

During his real estate days, he was owner and operator of a railroad line from San Diego to Ocean Beach.

When former President Theodore Roosevelt offered to raise a regiment to go to France during the World War, he offered Collier a post as colonel. The ex-president's offer was not accepted. Collier, however, did not owe his title to military service, he was made a colonel on the staff of a California governor many years ago, and the title "stuck."

He was known for his picturesque appearance. For 40 years he wore a large "five-gallon: hat and a Windsor tie. Why? "Oh, I just like the combination," he explained to friends. "It make me easy to find in a crowd. Few other men would wear such a get-up."

Col. Collier's first wife was Ella May Copley, sister of Col. Ira C. Copley, San Diego and Illinois newspaper publisher. They were married Jan. 1, 1896, divorced in 1914.

Son Crash Victim

They had two sons, David, jr., a military aviator killed in an airplane crash during the war, and Ira Clifton, who lives in San Diego.

His second wife was Ruth E. Emerson, Oakland, Calif., whom he married Nov. 14, 1915. She died Aug. 28, 1916, On Dec. 13, 1919, he married his present wife, Clytie B. Lyon. Their home is at 3416 Park blvd.

A friendship of more than 30 years standing with his inseparable friend, Carl Heilbron, was broken when Col. Collier died. For years they traded property back and forth, loaned and borrowed money from each other, with never a scratch of paper to show how they stood. Heilbron worked closely with Collier in putting over the 1915 Exposition.

Heilbron was deeply shocked when he heard of the Colonel's death.

Publicized San Diego

"He was the most loyal friend I ever had," Heilbron said. "He was a man of dynamic energy, and of boundless faith in San Diego. Wherever he went --- from Brazil to Philadelphia to Chicago --- he publicized San Diego. I believe that by word of mouth, he did more to spread the fame of San Diego than almost any other ten persons."

Collier was a member of many fraternal orders, including the various branches of Masonry and the Elks and was also a Rotarian

San Diego Union, November 15, 1934. MASONIC FUNERAL SERVICES TODAY FOR COL. COLLIER

Masonic funeral services for Col. D. C. Collier, 63, will be today, 2 p.m., in Bradley-Woolman funeral church. Burial will be in the Masonic plot Mt. Hope Cemetery.

Col. Collier died Tuesday at Scripps Metabolic Clinic, La Jolla, after having been stricken with heart disease late Monday while he was at his ranch near Romona. He is survived by his widow, Mrs. Clytie Collier, a son, Ira Clifton Collier, a daughter, Clytie Lyon Collier, all of San Diego; a brother, Judge Frank Collier, Los Angeles, and a sister, Mrs. Mabel Sharpsteen, Berkeley.

Col. Collier, who had resided here 50 years, played an important part in San Diego's Panama-California exposition and was its first director-general. Later he became exposition president. Although Col. Collier was an attorney by profession, being a member of the bar in California and in Illinois, he devoted much of his time to the real estate business and was credited with opening several large tracts, which now are San Diego's residential districts.

San Diego Union, November 15, 1934, 3:7. San Diego California Club directors consider erecting and maintaining highway billboards.

Letter, November 16, 1934, Richard S. Requa, Supervising Architect, to Mrs. Emma Spade, Emergency Relief Administration, San Diego, Calif.

Dear Madam:

Replying to your letter of November 22nd, enclosing copy of Sculpturing Project, Mr. Donal Hord, who is to do the work, has agreed to carry on the work in his own studio, as we have no suitable place in the park.

The block of limestone from which the statue is to be carved is being delivered today from Los Angeles to his studio, located at 1024 Pascoe Avenue.

Yours very truly,

Richard S. Requa,
Supervising Architect.

(Copy of letter taken from Box File 18 Folder 104, California-Pacific International Exposition, San Diego Public Library.)

San Diego Union, November 16, 1934, 11:3. Royal A. Brown, official organist, asserts \$20,000 needed for park organ.

San Diego Union, November 16, 1934, 13:3. Mrs. Adolph Muehleisen, member Board of Education and civic worker, appointed Director of Education for Exposition; duties.

San Diego Union, November 30, 1934, 7:1. Devout gather for worship at Organ Pavilion.

San Diego Union, December 1, 1934, 7:1. Frank N. Davis, vice president of "The National Provisioner" says three packing firms plans display for Exposition.

San Diego Union, December 2, 1934, II, 1:6. Commission to Northern California, headed by G. Aubrey Davidson, plans tour west.

San Diego Union, December 2, 1934, II, 1:8, 3:1. **"Villages of the World"** taking form; other park projects; 1,400 at work on buildings.

San Diego Union, December 3, 1934, 1:4-5. Sun smiles as thousands seek recreation in Balboa Park concerts, games.

San Diego Union, December 4, 1934, 7:1. Work of remodeling "House of Magic" in city's plaza is underway.

San Diego Union, December 5, 1934, 2:4. December issue of *National Motorist*, publication of National Automobile Club, contains feature article on San Diego Exposition.

San Diego Union, December 5, 1934. 3:4. SERA to improve golf course, zoo

Golf course work is expensive because hand instead of machine labor is being used and efforts are being made to put idle hands to work, City Manager Buck told the Council yesterday in defending his recommendation for a \$23,780 SERA project for additional golf course work.

Councilman Rossi had charged that enough had been spent on the golf course to make two courses.

Buck, stating that most of the money would be supplied by the SERA, said:

"We are using shovels and wheelbarrows instead of steam shovels. This is one way to relieve distress. There are not many projects that employ so much labor. This one will keep 72 men busy for 10 weeks."

The Council approved the project.

Also, approved was a \$10,000 SERA project for landscaping at the zoo. The city treasury is to provide none of the money.

San Diego Union, December 6, 1934, 7:4. Civic leaders of San Francisco, Oakland and Alameda support San Diego Exposition plans.

San Diego Union, December 7, 1934, 5:2. San Francisco businessmen meet with San Diego Exposition Commission to coordinate plans.

San Diego Union, December 7, 1934, 12:2. Mrs. Ralph C. Hardie, officer San Diego County Federation of Women's Clubs, discussed plans at Pacific Beach Women's Club, December 4; exhibits from foreign countries; new buildings in park.

San Diego Union, December 7, 1934, 14:1. Representative George Burnham assures short-wave radio station.

San Diego Union, December 7, 1934, II, 1:2. Models of California missions proposed as an educational exhibit.

Letter, Undated: December 8, 1934 (?) J. David Larson, Executive Manager, California-Pacific International Exposition, to Shoolman Brothers, 1115 Avenue "O", Brooklyn, NY

Gentlemen:

We are pleased to advise you that your application for "Permit for Exhibit Space", dated December 8, 193 5 [sic], has been approved and accepted by the California Pacific International Exposition Company. Your exhibit is to consist of imported and domestic novelties, leather goods, china and bronzes, etchings and art pictures and tapestries, distributed by Morbeck of London, England. You will also be permitted to sell any articles which may be so classified. Your exhibit is to be located in space #11, "Palace of Better Housing."

It is understood that you are to secure and cause to be continued in force any permit or license required by any governmental authority or agency for the sale of merchandise or commodities which you propose, and are permitted under your contract with this Company, to sell, and that this Company assumes no responsibility for the securing or continuance of any such permit or license.

(handwritten in margin: "With the confines of your booth.")

The amount of \$281.00 has been received on account of your application, which has been credited to you. The additional sum of \$281.00 will be payable on May 1st, 1935.

Enclosed you will find a copy of "Rules and Regulations for Exhibitors and Concessionaires" adopted by the corporation, which are binding on all exhibitors and concessionaires. When we receive the balance due from you we will issue and forward to you an printed Permit for Exhibit Space.

Yours very truly,

J. DAVID LARSON
Executive Manager

San Diego Union, December 9, 1934, II, 1:1. Semi-primitive designs for Exposition buildings will be softened by plant decoration.

San Diego Union, December 9, 1934 (Club Section), 3:1. Description of **"Hospitality Hall"**, Women's building, auditorium, stage, club rooms, other features; Mrs. Kennie Steele has charge of allocation of space; hopes club women will emphasize spiritual side of Exposition.

San Diego Union, December 11, 1934, 5:3. Sacramento city officials, who came to San Diego to get plans for recreational center, inspect Balboa Park.

San Diego Union, December 12, 1934, II, 8:3. Elwood Bailey returned from 10,000-mile tour; reported great interest in Exposition; made head of Exposition Public Relations Department.

San Diego Union, December 13, 1934, II, 1:2. Mrs. Vesta C. Muehleisen outlined plans before State Council of Education of California Teachers Association; members of advisory committee for Exposition's **Palace of Education** given.

San Diego Union, December 14, 1934, 5:3. Frank Drugan, at meeting in Biltmore Hotel, Los Angeles, December 13, asked representatives of 30 countries and members of consulate service for foreign participation at Exposition.

San Diego Union, December 15, 1934, 1:3. SERA approves eight projects; **Zoo** to benefit.

San Diego Union, December 16, 1934, 2:1. Honolulu Chamber of Commerce plans display depicting commodities of Hawaiian islands.

San Diego Union, December 16, 1934, 6:6. Weavers will weave Gobelin tapestries for Exposition, under direction of Marian Kendall; SERA project.

San Diego Union, December 17, 1934, 3:7. Julian Arnold, commercial attaché American Legation, Shanghai, coming to San Diego to discuss Oriental exhibit.

San Diego Union, December 18, 1934, 10:1. Newsreel to take scenes in Balboa Park today; five Hollywood companies will take pictures of parade of working men.

San Diego Union, December 19, 1934, 1:5, 2:7. Construction work by 2,000 SERA workmen; parade of workmen filmed by five sound newsreel crews; Chairman of Exposition Board Davidson makes announcement.

San Diego Union, December 19, 1934, 5:1. German steamer brings three Siberian bears to **Zoo** in Balboa Park.

San Diego Union, December 21, 1934, 3:7 and December 23, 1934, 1:2, 3:1. Colonel Ed Fletcher submits plans to Mayor R. B. Irones for **California State Building** in Balboa Park to house state and county exhibits; cost \$200,000; approved as SERA project.

San Diego Union, December 22, 1934, 3:5. Dana S. Williams, Imperial Potentate of Mystic Shrine of North America, is shown construction work in park; praises plans.

San Diego Union, December 23, 1934, 1:2, 3:1. Council agrees on SERA aid amounting to \$500,000, including a **California State Building** at an estimated cost of \$200,000 to be located on site of old San Joaquin Valley Building off the Plaza de Panama.

San Diego Union, December 23, 1934, 2:1. Newsreel pictures in Balboa Park made possible by cooperation of firms and individuals.

San Diego Union, December 23, 1934, 8:3. San Diego County Development Federation starts county cleanup campaign.

San Diego Union, December 23, 1934, II, 1:5. SERA band will offer program in Balboa Park today.

San Diego Union, December 23, 1934, II, 1:7-8, 2:1. 3,500 to get Exposition jobs; progress made on all units.

Letter, December 27, 1934, J. David Larson, Executive Manager, California-Pacific International Exposition, to Mr. J. W. Ware, 1060 Sixth Ave., San Diego, Calif.

Dear Mr. Ware:

We are pleased to advise you that your application for "Permit for Exhibit Space" dated September 29, 1934, has been approved and accepted by the California-Pacific International Exposition Company. Your display is to consist of the display and sale of precious and semi-precious gems; especially will this represent the gem mining industry of San Diego County. Your exhibit is to be located in space #12 in the Palace of Modern Home (formerly designated the Palace of Varied Industries).

The amount of \$100.00 has been received on account of your application, which has been credited to you. The additional sum of \$284.00 will be payable on January 15, 1935, and \$384.00 will be payable on May 1, 1935.

Enclosed you will find a copy of "Rules and Regulations for Exhibitors and Concessionaires" adopted by the corporation, which are binding on all exhibitors and concessionaires. When we receive the balance due from you we will issue and forward to you a printed Permit for Exhibit Space.

Yours very truly,

J. DAVID LARSON
Executive Manager

Richard Requa to J. D. Larsen, 9 January 1935, Ford Motor Company folder, box 9, CPIE, 35-36, Collection, SDPL.

January 10, 1935, Letter, Oscar G. Knecht, Chief Inspector, to Richard Requa, Architect, California-Pacific International Exposition, Headquarters Building, Balboa Park, San Diego, California.

Dear Sir:

A permit for the Organ Plaza wall and fountain was issued today. The plans for this wall and fountain display insufficient structural data and no specifications were presented. Nevertheless, rather than cause any delay we have issued a permit. The permit is issued with the strict understanding that you will see that the structural and safety requirements of the Building Code be followed.

A majority of the plans so far submitted to this department have been presented more or less incomplete; no specifications and insufficient or incomplete working drawings and details. We also called your attention to the structural mistakes. We do not desire to inconvenience you or the workmen. Consequently, we allowed the permits to be issued and the work to proceed without delay. However, in each instance, we called attention to the above-mentioned omissions, and delinquencies. On four occasions only were the plans sent back for corrections. Each time they were partially corrected and returned within 24 hours and a permit was then issued. The object of this letter is to point out the fact that we are depending upon you, together with your assistants, to see that all buildings are made structurally safe and that the State horizontal force laws are complied with. Insofar as the plans are concerned, we cannot be sure of the structural safety in many instances, due to specifications and the reasons above mentioned.

This department has no preference regarding the use of steel or wooden trusses, triangular parallel chord, curved or otherwise, nor do we care whether the posts and columns stop at the bottom chord or continue in one piece to the top chord, when properly designed relative to position, connections, external forces, etc. In many instances, of course, one method, device or arrangement may be more economical or expedient than another. All that we require is that whatever method is used, the same must be structurally safe, capable of rational analysis and in harmony with the spirit and intent of the code in such cases made and provided.

On two former occasions we called attention to the fact that additional reinforcing and bracing was necessary in the New Mexico Building Annex. We again mentioned that the other rows of 8 x 8 posts are too light, due to the eccentric loading. See notes on your stamped blue prints.

It has been rumored that someone has been going around intimating that I may have a preference for steel trusses and special curved wooden roofs. Should this nonsense be heard by you, please ignore it, as no doubt you know that I have no preference. I am fully convinced that flat roofs, and trusses, horizontal, sloping, curved, or otherwise, can be economically and safely constructed or erected with local workmen. I am personally acquainted with many of the local mechanics and workmen. Some of the very best mechanics in the country are now directly and indirectly employed under your jurisdiction. We can build both steel and wooded roofs and trusses locally without sending away for special materials, methods, shapes or devices.

Yours very truly,

Oscar G. Knecht, Chief Inspector (signed).

City records show that in 1920 the voters gave 10 acres of park land adjacent to the high school to the Board of Education for intermediate school purposes at the same time that the Roosevelt Junior High School tract was voted out of the park and to the Board.

San Diego Union, January 25, 1935, 10:3. Committee on Finance passes Fletcher's Exposition exhibit measure.

January 26, 1935, Letter, From: J. David Larson, Executive Manager, California Pacific International Exposition; To: Robert M. Gregory, Construction Superintendent, S.E.R.A, Pier Building, San Diego, Calif.

Dear Mr. Gregory:-

Mr. Harry Foster, our Superintendent, has stated that you have made inquiry concerning the building of the amphitheater over on the Exposition Palisades.

In explanation, may we state that we have had scores of requests from the citizens of San Diego to provide a bowl or an amphitheater which could be used after the close of the Exposition for symphony concerts, other cultural musical programs, pageants, etc. As you know, there is no suitable place now in the Park for such features.

After much careful consideration it seemed to the Executive Committee and the Board of Directors that if large exhibitors and other organizations could be prevailed upon to furnish, during the Exposition, excellent cultural programs in such a bowl or amphitheater, the citizens of San Diego would be fully justified in providing such facilities.

Accordingly, during the negotiations with the Ford interests the proposition was submitted to them, and they agreed to furnish very excellent attractions for at least six weeks provided the citizens of San Diego, through the Exposition organization, would furnish the amphitheater. It is estimated that the programs which this organization plans will cost them over \$200,000.

The amphitheater, because it belongs to San Diego, is to be built at the expense of San Diego through the Exposition. No exhibitor will play any portion of the cost. The amphitheater is to be at the disposal of not only the Ford interests but also to all others who will provide suitable entertainment. The amphitheater is at all times under the control of the citizens of San Diego through the Exposition organization.

It is planned to so build the amphitheater that it will serve the citizens of San Diego for many years.

We trust that this explanation is satisfactory, and we again assure you that this amphitheater will be one of the most important assets which will be left for the citizens of San Diego when the Exposition is over, and it will undoubtedly be an important factor in the continued development of the cultural side of the community.

Very truly yours,

J. David Larson,
Executive Manager.

San Diego Union, January 26, 1935, 1:4, 2:4-5. Big **Ford exhibit** assured; \$2 million Exposition plant announced.

San Diego Union, January 28, 1935, 4:1. EDITORIAL: Verdict from Detroit - The Exposition is a good thing for the country, a great benefit to the West, and an opportunity for every exhibitor who takes part in it.

San Diego Union, February 2, 1935, II, 1:2. State legislators inspect Exposition, praise progress.

Letter, February 5, 1935, Assistant Director of Exhibits to Director of Exhibits.

Upon telegraphic advice from Mr. McHenry, you can easily recognize the fact that General Motors is hesitant to commit themselves for participation since knowing they cannot compete with Ford's two million dollar expenditure for special building. They are rather discouraged at the idea of participation.

Mr. McHenry has sent a telegram requesting a sketch be prepared which can be submitted to General Motors and I, therefore, recommend that Mr. Larrinaga be commissioned immediately to prepare a sketch along the following lines:

About an acre or two of space be known as the General Motors Garden. This site will be behind the organ, and that their garden be most beautifully done in a semi-formal way of tropical and semi-tropical growth. That the cars be shown in beautiful, little, exotic temple [sic] at various intervals during this garden. In these temples most beautiful lighting effects can be obtained. At some place in this formal garden there will be a clearing where real class entertainment such as aesthetic dancing, etc., may be put on if they so desire. The canyon can either become part of this garden or be utilized for some spectacular show effect, such as assembling cars or that activity. I know that assembling cars in the canyon is impossible, but I merely say this to illustrate what is in my mind.

I sincerely desire that you give this sketch, myself and Mr. Larrinaga the benefit of your experience in showmanship and the suggestion which can not help but be valuable in the creation of this sketch. I believe one of our sales points will be that it was the most beautiful outdoor auto show ever done in America, and it takes them out of the class of competition with Ford, since Ford is stressing beautiful building where General Motors can stress beautiful landscaping.

And thirdly, and after this Fair is over and after removing their cars, these gardens can always be known as the General Motors Gardens in San Diego. Mr. McHenry advises that next Monday the final meeting is to take place regarding participation, and although I know Mr. Larrinaga is tremendously rushed, I believe this project is of sufficient importance to take priority.

Requa to Waldo Tupper, 6 February 1935, Standard Oil folder, box 8, CPIC, Collection, SDPL.

PMM:S

(Copy of letter taken from Box 9 Folder 32, California-Pacific International Exposition, kept by San Diego Public Library.)

February 6, 1935, Letter: Mr. Tupper, Mr. Requa; Subject: Standard Oil Building.

Since my conference with the Standard Oil representatives several days ago, I have given a great deal of thought to the discussions and the suggestions made, and the more I have thought the matter over, the more I have been impressed with the outstanding feature we can make of a Standard Oil Building, placed at the north end of the main axis of our Palisades Group.

I have given a great deal of study to the plan of the grounds in that location and would suggest quite a radical change and re-arrangement. If the Standard Oil Company will erect a building on the site which its representatives tentatively selected when here. With the help of Mr. Larrinaga, who is a Mexican artist of prominence with considerable architectural designing experience, I have worked out a suggested design for this building. Mr. Larrinaga has made a colored sketch which I am submitting with this report. I am also sending you a sketch of the revised ground plan which, by reference with the present ground plan, you can appreciate the changes required.

While I have been deeply interested in the Aztec and Mayan architecture and have made a study of it for a number of years, I have in Mr. Larrinaga, a co-worker who really knows and feels, and has the rare ability of expressing and adapting to more uses the remarkable architecture of the prehistoric people in Southern Mexico and Central America. I am satisfied, beyond any question of a doubt, that a building located as I have shown it on the revised plot plan, and designed and built after the general character of the sketch, will be one of the two outstanding and spectacular features of our Exposition.

As I explained to the Standard Oil Representative, I have in mind, and we are developing in the Palisades Group, a definite and original architectural scheme. Starting with the Standard Oil design, with flanking buildings, all in prehistoric American architecture, which will be located in the entrance plaza, we pass on to the modern development which is exemplified in the Travel and Transportation building, and the building devoted to Varied Industries, business machines and electricity. These buildings, while modern in character, will all show their direct relation to the prehistoric architecture of America and will demonstrate the fundamental forms and ideas of modern architecture can all be found in our prehistoric architecture of America. The ornamentation, such as we will use in these buildings, will be developed from the Mayan and Aztec forms.

Proceeding on down to the Ford Building, which will be on the south or opposite axis from the Standard Oil Building, we finally arrive at a purely modern architectural treatment in which forms and proportions and other architectural ideas of the ancient American architecture are exemplified, but in which decorative embellishments have been eliminated.

I believe that the architectural scheme which we are working out for the Palisades Group will prove to be one of the most interesting and talked of ideas that has ever been used in Exposition architecture. It will satisfy the tastes of the people of education and culture, and at the same time there will be a tremendous appeal to the people of little architectural appreciation.

It would add greatly to the interest of the building and to the advertising possibilities of the scheme, if a chimes could be installed in the top of the building. The chimes in this location could be clearly heard over the entire grounds and would, therefore, constantly call the Standard Oil Building to the attention of visitors in any part of the Exposition grounds.

(COPY OF LETTER IN FILES OF SAN DIEGO PUBLIC LIBRARY IS UNSIGNED.)

San Diego Union, February 8, 1935, II, 3:7. Exposition area to be closed to traffic February 15.

Letter, February 9, 1935, Waldo T. Tupper, to Mr. Requa & Mr. McHenry; SUBJECT: General Motors.

Following is a hurried sketchy outline of certain features or possibilities which the G.M. Garden of Jewels presents to me:

1 - Each temple to be named after a Jewel -

a - Diamond	- White	- Cadillac
b - Turquoise		
or Topaz	- Blue	- LaSalle
c - Ruby	- Red	- Buick
d - Pearl	- Cream	- Oldsmobile
e - Amethyst	- Lavender	- Pontiac
f - Emerald	- Green	- Chevrolet

Cadillac car in Main Temple can be white and by electric light effects changed into any color desired, or, three distinct models can be used by means of the plate glass mirror illusion.

- 2 - The smoke from the large incense burners from the Main Temple can be used to carry the names or emblems of different G.M. cars. This is easily done by a special electric spot for such purposes.
- 3 - A great variety of colored birds and various species of monkeys in the trees, peacocks on the ground, etc.
- 4 - All fountains to be electric and synchronized to music, a la Singing Fountains. Electrical transcription to be used with music composed by well-known composer, such as De Francisco, who composed and directed all special scores for Cavalcade.
- 5 - Auto fashion show using a variety of cars of different colors - beautiful girls or models gowned to contrast with color of car or to match as desired. From time to time during the Exposition a society auto Fashion Show using debutantes or movie stars could be featured.
- 6 - Fashion Show to be presented from main center stage or pedestal with mirror fountain at base. Four pretty, shapely girls to be used as trumpeters - pennants from trumpets to carry G.M. - these trumpeters to rise thru stage and be costumed differently each appearance. After trumpet call, narrator announces the car and model as it appears; then trumpeters disappear while car is slowly revolving on turn table, and then driven off stage, circling in front of audience, and disappearing into foliage leading to garage.
- 7 - The Main Building can be used for working exhibits. The Fisher Body Company could put on an interesting display, sketches, models, ventilation, demonstration, etc. Brake tests, knee action demonstration, non-shattering glass tests, etc. The building is also large enough to house a display of cars. Here too the G.M.C. financing plan could be explained. Lounge rooms, rest rooms, motion picture theater, etc. could also be included.
- 8 - The Garden of Jewels offers an idea opportunity to do something outstanding and different in electric lighting effects.
- 9 - The idea is NEW, NOVEL, UNUSUALL, OUTSTANDING, DIFFERENT, BEAUTIFUL, ARTISTIC, IMPRESSIVE, DIGNIFIED and INTRIGUING.

ADVERTISING AND PUBLICITY - See "Important Facts", pages 3 and 4.

Within the past two weeks 180 stories have been placed and accepted by various trade magazines and national publications. We have had requests and stories have been prepared for such national magazines as Time, Fortune, Literary Digest, Good Housekeeping, McCalls, Vanity Fair, Review of Reviews, Colliers, etc.

Many of our exhibitors are tying their advertising and publicity campaigns directly into the Fair; for instance - The Shell Oil Company, which as over 34,000 filling stations throughout the U.S., will cover every Vee Board with five-colored one-sheets pertaining to the C.P.I.E. They are also giving away to all these stations a 12 page pictorial folder, station attendants, as they wipe the windshields, will ask the drivers whether they have attended the World's Fair at San Diego yet, and do everything to interest people in the East to drive to California and take in the Fair. In addition to this, the Shell Oil Company will tie their entire national advertising campaign, magazines, newspapers, etc., into the Fair. They are also devoting their radio program to the Fair.

Standard Oil, General Petroleum, Richfield, Texas Oil Company, Associated and in fact all of the major oil companies in the west will use similar means and we are assured that they will billboard the country from Vancouver, B.C., to the Mexican Boarder. Coca Cola will have a \$200,000 (?) display and their Pacific Coast Manager assures us that the entire billboard campaign throughout the U.S. will be tied into America's exposition 1935. The National Biscuit Company, Standard Brands, Inc., Electrical Transcription Company, Spreckels Company, Masonite Corp., Maytag Washing Company and other national organizations have offered similar cooperation; all railroads, steamship companies, bus lines, public carriers of every description will naturally publicize this in a big way because of their desire to help the Fair and increase travel on their lines.

As you know, Harrison has already bought one million tickets for advance sale and will bring his entire Century of Progress organization to California, within the next few days to actively start his campaign.

The American Railway Company have reserved several hundred rooms in the City of San Diego during the period of the Fair and are selling a complete ticket which includes transportation, hotel, meals, sight seeing, etc. Other travel organizations are doing the same thing.

I am enclosing a rough copy of some notes which were taken by a L.A. Secretary, unknown to me at the time when I was talking to a group of salesmen in Los Angeles. There may be some points here that will serve as good ammunition for you. One of the finest endorsements of this Exposition, in my opinion, is the fact that the outstanding showmen and concessionaires of the country are pouring real money into it. Men like Dufour & Rogers, Graham, etc. The first concern is spending over \$100,000 while the latter is investing over \$86,000. All of which means that we will have to get people if they are to cash in on their investment. These men have an uncanny faculty of estimating attendance and both agree that from all the checking they have done we are more apt to play to 10,000,000 people instead of 5,000,000 or 6,000,000 people which we have been telling prospective exhibitors.

February 13, 1935. Be it resolved by the **Park Commission of the City of San Diego** as follows:

Whereas numerous applications have been made to members of the Park Commission and to the Director of Works on behalf of various public and quasi-public organizations and charities that said organizations and charities be permitted to construct within the confines of Balboa Park certain lodges or meeting places; said construction to be under plans and specifications having the sanction and approval of the Park Commission and the Director of Works - but said buildings and lodges to be under the exclusive control and possession of the organization or charity making the said request; and

Whereas precedent for such construction and control has heretofore been created by the granting of such privilege to the organizations known as the Boy Scouts of America, and also to the Girl Scouts; and

Whereas the members of the Park Commission feel that such organizations should, particularly at the present time, be encouraged and that our young people should be encouraged to have more activity within such organizations; that the creation of such organizations within the park would be of great public benefit in that it would tend to keep the members of such organizations off the streets of San Diego and out of the beer parlors and dance halls; and

Whereas the members of the Park Commission appreciate the obvious fact that letting down of the bars for quasi-private and quasi-public organizations in the park might result in severe encroachments over a period of time, the commission feels that such objection should be overcome by setting aside a definite limited area in the park for the use of such organizations;

Now, therefore, be it resolved by the Park Commission that the City Manager of the City of San Diego be requested to set aside a suitable area (but not to exceed ten acres) in Balboa Park at some point adjacent to MORLEY FIELD.

That said area of ten (10) acres be set aside for the purpose of allotting in said area, building sites to various quasi-private and quasi-public organizations and charities, the object of which being to train and care for San Diego boys and girls.

That in said area, building sites be assigned to such organizations subject to application therefor and approval thereof on the park to the Park Commission and the Director of Works.

That the plans and specifications for such buildings must be submitted to and have the approval of the Park Commission and the Director of Works.

That all such buildings shall be with the distinct understanding and agreement that such permission granted for the erection and occupancy of such buildings shall be subject to revocation upon thirty (30) days written notice, and upon the further understanding that should notice of removal be given such organization or charity shall, before the expiration of said thirty days notice, removed from the said park any buildings or improvements placed thereon.

That such permission be granted with the further understanding and agreement that the occupation and operation of said buildings and improvements shall be subject to the direction of the Park Commission and the Director of Works.

That such permission shall be subject to the further condition that said premises, buildings and improvements shall not be used by said organizations for the conduct of any commercial enterprise whatsoever.

Passed and adopted by the Park Commission of the City of San Diego, on the 13th day of February, 1935; Commissioners Otto, Naylor and Yale voting aye.

A. Hill , Assistant Park Director,
Secretary

San Diego Herald, February 14, 1935, 1:3. All Exposition purchases shall be made locally.

San Diego Union, February 14, 1935, 1:7-8, 3:4. **Standard Oil** contracts for space at Exposition.

San Diego Union, February 14, 1935, 3:3. Adrian J. van Rossem, bird expert, joins staff of **Museum of Natural History**.

San Diego Union, February 18, 1935, 1:2, 3:5. City Manager George Buck was asked yesterday in a resolution approved by the San Diego Park Commission to set aside a 10-acre site in Balboa Park for buildings to be constructed by **organizations and charities**.

Letter, February 20, 1935, Director of Exhibits to All Offices; SUBJECT: Hall of Photography.

The management has decided that the Hall of Photography will be located in the building now [known] as the Palace of Science and will comprise Booths 16, 15, 14, 12, 12, 11, 10, 9, 8 and the eastern portion of 7. The exhibits now located in this section of the building will be moved to other locations in the same building. The plans of sales in this building is as follows:

Those exhibits which can be classed as scientific will be sold in the West Wing of the building, and moving consecutively toward the center. The photographic exhibits will be sold in the East Wing of the building as noted above, and if the sale of exhibit space in the Hall of Photography exceeds the space allotted, the Hall of Photography may expand westward. The only party who shall sell space in this Hall of Photography is Mr. John Sirigo. No office will take any action in this field except by direct instruction from the office of the Director of Exhibits.

San Diego Union, February 24, 1935, Society-Club, 7:1. **Donal Hord** work placed in park here, by Julia Gethmann Andrews.

Donal Hord's fountain figure of the Mexican woman with the olla is now in place in the patio of the Hospitality house, Balboa Park, and is no doubt the most permanent note in the exposition grounds. Michelangelo it was, I believe, who said that perfect sculpture demands that one should be able to roll it down the side of a mountain and find it unmarred. Donal Hord's sculpture should meet this test of perfection, it is so completely of a piece.

At the same time, it possesses a deep subtlety and an irresistible rhythm from whatever side you approach it. The simplification of the human figure here adds expressiveness, both spiritually and physically. The face of the Indian woman has an eternal kind of beauty. (One thinks of Chinese portraiture.) There is the shadow of a smile, not the Mona Lisa smile of a decadent Italian society, but a smile that grows out of an elemental wisdom of a society that has lived intimately with rain and sun and wind and the good earth.

It is interesting to pass from the patio into what will be the women's lounge, where San Diego craftsmen are decorating ceiling and doors in the manner and after the pattern of the 14th century craftsmen. The work is an exact copy of the Gothic decoration in the cloisters of the monastery of Montesia, a Dominican convent which stood from the end of the 14th century until recently in the heart of Barcelona. The lounge opens upon the construction of Moorish gardens, the construction of which Mr. Taylor himself is at present supervising.

March, 1935. ***The Architect and Engineer.***

Exposition by William Hamilton, pp. 11-18, illustrated.

California International Fair will be Unique Contribution to Architectural Planning.

With more than eighty-five percent of the buildings of the California-Pacific International Exposition already erected in Balboa Park, San Diego, and the remaining structures definitely taking shape, "America's Exposition of 1935" promises to offer a group of exhibition edifices that will be unique in the exposition annals of the Pacific Coast.

Concisely stated, the architecture of the 1935 California Pacific International Exposition will be a development of the historic and pre-historic architecture of Southwest America, in which modern ideas in building design will be expressed, inspired by the remarkable examples of buildings and decorations in the monuments left by the unknown people who inhabited these favored lands before the advent of the white man.

The embellishments and color treatment of the new exposition palaces will be supplied to a great extent by living forms, trees, shrubs, vines, fruits and flowers, such as only Southern California can produce.

The present park buildings, heritage of the 1915 exposition, are in the Spanish, or, more properly speaking, the Spanish-Colonial style and exemplify the culmination of centuries of art and architectural development in this section of America.

Richard S. Requa, Supervising Architect of the exposition, says:

“In designing the new buildings for this exposition, we will show by modified examples the steps and progress of this development and through the inspiration and ideas of these old forms, produce an architecture in certain of the new exposition palaces that is in harmony with the development during the last quarter of a century in transportation and the industries.

“Thanks to our sunshine and benign climate, we have the opportunity here to supply color and adornments with living plants instead of academic decorations, such as perhaps could not be accomplished in any other portion of the globe. In the Spanish Village and the Court of Pacific Relations, a transitional type of architecture is exemplified, between the prehistoric and the pretentious styles which were produced in the opulent period of Spanish occupation in the Americas. In their proportions and treatment, they are no less interesting than the florid work which followed. They are in the simple, unostentatious, hospitable style that is now influencing the development of our California architecture.

“One of the noteworthy and characteristic features of Spanish, as well as Spanish-Colonial architecture, was their patios and gardens, embellished with fountains and brilliantly decorated tiles. These important enrichments unfortunately were lacking in the 1915 fair, but are to be one of the most prominent features of our present exposition. Among these features special mention should be given to the beautiful Casa del Rey Moro Garden --- reproduced as faithfully as possible --- the finest small garden in all Spain, with its alabaster fountain, grotto, lily pond, quaint old well, seats and pergolas. Next in importance is the Alcazar Garden, planned from a section of the extensive and beautiful gardens surrounding the Alcazar in Seville. The Alcazar Gardens in Spain are considered the finest public gardens in the country.

“In the center of the House of Hospitality, the finishing touches are being put on a patio, which is not unlike the famous patio in the Museum in Guadalajara, Mexico. Chief features of this patio are the arcaded galleries, the large tiled central fountain and pool, and the quaint old well embowered in bananas.

“Another quaint and charming garden is in the court in the Pacific Relations group with its fountain, old well from Algeciras, Spain, and the large pool in which the beautiful trees of the background will be reflected.”

Perhaps the outstanding exhibition building to be erected by an individual exhibitor will be the Ford Motor Company building.

Although this structure, purely modern in conception and treatment, will not be of the Spanish or prehistoric derivation, it will be developed in such a manner as to blend harmoniously with the entire physical plan of the exposition buildings as well as locale.

Situated on the rolling plateau, southwest of the Organ Pavilion and the Music Bowl, the Ford Building will be of circular construction, approximately 350 feet in diameter with a circular patio in the center. The walls of the main building will be forty-one feet high; a tower on the north side of the structure, forming the great entrance rotunda, will be 198 feet high with a base 100 feet in diameter. This tower will rise to a height of 420 feet above sea level. The total floor area of the building will be 118,000 square feet.

The exhibition of late models of Ford motor cars will be the main feature of the patio. It is believed that this will be the first time in automotive history and one of the few places in the world where climatic conditions will make possible an all-year display of cars under the open sky.

In accordance with Henry Ford's idea that art forms a perfect expression for mechanical processes, the exhibition throughout will achieve a blend of artistic harmony. Murals above rare wood wainscots will decorate the walls and color schemes that conform with the entire decor will be used.

Walter Dorwin Teague of New York is the designer of the building and the interior treatment. Mr. Requa is supervising the architectural and engineering plans. He will also be in charge of the actual construction operations.

The rotunda, which will form the base of the tower, will be known as the "Court of Nations." Here a series of dioramas around the walls and in the center of the rotunda will be used to depict a dramatic story of the countries of the Pacific.

In the south end of the Ford Building will be found a theater with a complete stage and screen facilities and a seating capacity of 350. Smoking rooms, lounges, dressing rooms and other quarters of a semi-public nature will be located there.

The basement and the main floor of the building have been designed to sustain heavy loads and vibrating machinery. It will be of reinforced concrete construction and the entire tower will be of structural steel covered with sheet metal to insure perfect fireproofing.

In the basement will be located service rooms, garage and a tunnel entrance. The building, omitting the tower, calls for steel and wood framing with cement stucco on the exterior. The interior is to be finished with acoustical plaster.

The second floor of the south section of the building will contain several lounges, executive offices and kitchen and pantry facilities. The executive lounge will be utilized for a dining room. Opening from this lounge will be a glass enclosed porch overlooking the city, while on the main floor a two hundred and twenty-foot terrace on the arc of the circle will afford a sweeping panorama from Mexico to Point Loma.

Lighting effects throughout the building will be given careful consideration, with the tower receiving a unique treatment in this respect. Stepped-back lights will flood the fluted column, with overlapping layers of color that will "paint" the tower as the rays ascend from the base.

Monel metal and chromium plated trim will be used to provide striking and modern contrasts against the wood of the interior.

It is important to note that the design of this building, as well as the other buildings to be constructed by individual organizations, while providing distinct personality for each structure, will at the same time assure a complete merger of all in a harmonious plan.

For this reason it has been stated that the California-Pacific International Exposition will be an outstanding contribution to architectural planning for spectacles of this nature. Of a certainty it may be said that beauty of building, embellished with plants and flowers, rather than ornamental architecture, will be paramount at "America's Exposition --- 1935."

Circa March 1, 1935. BULLETIN FOR SPEAKERS

With the opening of America's Exposition about two months away construction activity is spurred to new heights. Already we are more than 80 percent complete, and President Belcher has announced we will be ready on May 29th. The work has been started on the huge **Federal Building**, which will house the Government's \$200,000 exhibit. Hundreds of men are employed on building construction throughout the Exposition grounds. Many are detailed to jobs where work goes on around the clock, divided into three 8-hour shifts. On all construction jogs, at least two 8-hour shifts are operating. The **Ford Building**, largest of new constructions, is now beyond the foundation stage, with three building contracts already let. Forms for the retaining walls of the great outdoor **Ford Music Bowl** are now in and steel is being installed. Forms for footings under the stage of the Bowl are being placed. The Ford Company will spare neither money nor

energy in making their superlative Exposition effort. Visitors will be given free rides along replicas of the most famous highways of the Pacific. In the Music Bowl, adjoining the Ford exhibit, a symphony orchestra of eighty pieces will be maintained by the great motor car company.

BUILDINGS

The **Bank of America's** building and the **Spanish Village** are completed. The fifteen hacienda-type bungalows, which make up the **House of Pacific Relations**, where representatives of foreign governments will be quartered, are ready for occupancy. The ten 90-foot trusses which will support the roof of the \$90,000 **California State Building** were swung into place last week. Trusses are now being raised at the **Palace of Travel and Transportation**. Construction here is above the first floor. The **Standard Oil Company** of California has indicated it will begin construction of its \$100,000 building before Friday. General grading of the grounds is 75 percent completed. Landscaping is finished, except where construction makes it advisable to defer it until buildings are ready.

GOLDEN GULCH

In a twisting Gulch, built by the hand of nature, a striking reproduction of a mining camp, typical of the gold rush days of '49, will be placed. There will be shacks of forty-niners, built with actual timber used in construction of the colorful towns of that period and reminding the visitor of an era that died with Bret Harte and Mark Twain. Here one will see the actual door that led to the Cabin in which Bret Harte wrote his famous tales. Here, too, will be replicas of the bars over which the hardy mining men gulped their fiery beverages . . . the color and atmosphere of the roaring forty-niners. To reach this scene one passes from the shadows of Old Spain into the atmosphere of '49 upon the back of a prospector's burro.

EXHIBITS

Installation of exhibitions in the **Palace of Foods and Beverages** was started last week by Coca Cola Company, Challenge Cream and Butter Association, Globe Mills, Standard Brands and other exhibitors.

W. A. Gellerson, Vice-President and director of Libby, McNeill & Libby, outstanding food packers, today announced participation of his Company in the California-Pacific International Exposition. Installation of an exhibit to cost in excess of \$20,000 and employing a dozen attendants will start the middle of next month.

F.H.A. EXHIBIT

Heads of the Federal Housing Administration's activities of the several Western States were notified today that the FHA exhibition will be in addition to departmental displays in the **Federal Building**. The FHA display is designed to show how the public may profit from the National Housing Act, and will visualize clearly phases of the Federal Housing Act heretofore not thoroughly understood by the general public. This exhibit has been authorized by James A. Moffett, of Washington, DC, Federal Housing Administrator.

A modern improved community will spring up in ten minutes, from a dilapidated, antiquated Village, by dramatized, mechanical operations. Thirty buildings in miniature will be _____ community. They will demonstrate "modernization magic" for _____ maximum loans of \$2,000.

Another exhibit, "**Modeltown**", a community of 56 miniature homes, will show newest types of residential construction. It will consist of 14 types of houses in four classifications --- houses that can be built and owned for \$30.00 per month, \$40.00 per month, \$50.00 per month, and \$60.00 per month, inclusive of interest, taxes, fire insurance and amortization of principal.

The 14 houses of each of these four classifications will present different types of architecture --- Spanish, English, French, etc. --- of one and two-story construction in frame, stucco, brick, concrete and steel.

In addition the FHA will establish and maintain a Regional office on the grounds which will be the Official FHA Headquarters at the Exposition. Here we will distribute illustrated pamphlets, booklets and other information desired by visitors to the exhibit.

PALACE OF EDUCATION

This building is about completed and will be the most important new unit contributing toward the educational features of the Exposition. It is of Indian Pueblo style of architecture and contains approximately 15,000 square feet of exhibit space. A most unique exposition of public school education has been outlined by the Director of Education, Mrs. Vesta Muehleisen, under the general theme, EDUCATION FOR GOOD LIFE. The large central room, known as the "Theme" room will portray in an artistic and animated style the seven objectives of education. A beautiful mural for this room is being painted by Miss Belle Baranceanu, which depicts in a realistic and forceful manner the progress of education through the Ages.

A most novel and entertaining exhibit in this building will be the Hobby Display. One of the chief factors in the determination of character is the wise use of leisure time. In recognition of this fact, many school principals of the State are already conducting Home Hobby Contests or Fairs in their schools. Supplementing this effort and as an additional stimulus thereto a series of hobby contests or fairs will be held in order to select a hobby to represent each individual school in the **Palace of Education**. Prizes and medals will be awarded for the most unique hobby in all classes of entries, which will be according to age, classification and types of projects.

FOUNTAIN FOR PALACE OF EDUCATION

Professor Frederick Schweigardt, whose sculptured bust of President Roosevelt stands in the White House study as a gift of the latter's son, Elliott, was found here quietly working on a fountain piece for the **Palace of Education**.

Professor Schweigardt, who lives at 5517 Carlton Way, Hollywood, is now clay modeling a group showing youth triumphant, supported by figures symbolizing home, school, church and community.

The sculptor was formerly on the staff of the Munich Museum, Germany, and more recently executed several important works for the New York Museum of Science and Industry. He refused Philadelphia offers to go to Hollywood. He has many medals awarded for artistic work here and abroad.

NURSERY SCHOOL

In connection with the Parent Education section it is planned to exhibit a demonstration Nursery School. An attractive room for this purpose is being built at the present time. One side wall is so constructed that visitors may look into the room, while the children will not know they are being observed. This demonstration class will be a Federal Emergency Nursery School and will run with the same high standards of Nursery School procedure and the same careful supervision that has characterized the Nursery Schools throughout the country.

Dr. Gertrude Laws, Bureau of Parent Education, has already worked out a splendid scheme by which she will interpret to visitors through a staff of trained workers the parent education angle of the work. These works will be in addition to the regular Nursery School staff. It is hoped to carry on full-day Nursery School program with hot lunches served at noon, followed by naps. The children will have a large yard, well equipped with play apparatus. It is expected this class will offer a great attraction to visitors. This demonstration will be under the local supervision of Mrs. Ethel D. Mintzer, Advisor.

EXHIBIT OF THE UNIVERSITY OF SOUTHERN CALIFORNIA

The following notables were on the grounds last week arranging for the exhibit of the University of Southern California in the **Palace of Education**: Assistant Comptroller of the University of California, Director of the

Riverside Agricultural College, Dean of Education of the University of California Los Angeles, and the Director of the Scripps Institute of Oceanography.

HOUSE OF PACIFIC RELATIONS

Italy was the first country to officially dedicate its hacienda in the group known as the **House of Pacific Relations**. Other countries will soon follow suit. Practically every House is spoken for at the present time. Among those definite are Italy, Japan, Sweden, China, Great Britain, France, etc.

Priceless exhibits are being gathered together from all parts of the United States and South America to tell the story of governments. The great Maya temple and the historic temple of Sacrifice from ancient Yucatan are but two of the many relics depicting early American history.

From Egypt will come treasures from the land of the Sphinx, from China and Japan the riches of the Far East. From every corner of the globe will come relics of the past.

INTERNATIONAL MARATHON

Sanction for an international marathon over the classic distance of 26 miles, 385 yards, was received here from the A.A.U. by A.E.D. Combat Post 1460, Veterans of Foreign Wars.

The race will be run May 30, from Agua Caliente, Mexico, to the grounds of the California-Pacific International Exposition, over the historic route followed by Padre Junipero Serra, founder of California's chain of missions.

F. R. Gleason, promotion manager of the Post, said he anticipate about 150 entrants in the strictly amateur event, including some from Mexico, Cuba and Canada.

The starting gun of the race will be fired, it is planned, by a high official of the Mexican Government. The runners will be met in the Exposition grounds by the Greek Consul and a gathering of American officials.

TRANSPORTATION

Large comfortable tractor-drawn semi-trailers, painted in brilliant colors and each designed to accommodate 100 passengers, will furnish transportation within the grounds of the California-Pacific International Exposition.

The Exposition Transportation Company, specially organized for the purpose and owned by the J. D. Spreckels Company, will operate five large buses. Each of the buses will be named in Spanish for a bird and painted in a color scheme to correspond to its plumage. The names are "La Golondrina" (swallow), "El Loro" (parrot), "El Canario" (canary), "El Cardenal" (cardinal), and "La Paloma" (dove). Seats are provided for 40 persons, but a hundred passengers can be carried comfortably. The transportation fare will be 10 cents.

ATTENDANCE

American Express Company officials have purchased a initial block of 100,000 admission tickets and reserved 2,000 hotel beds daily for the entire Exposition period for the accommodation of travelers who will arrange their trips through that organization. Redpath, Inc., prominent tour organizers, have secured 1,000,000 admission tickets and reserved an additional million in anticipation of heavy demands.

Officials of the Santa Fe Railroad Company report that traffic Westward this summer will be the heaviest since the depression. Santa Fe is increasing its service this summer by the addition of 369 fully air-conditioned cars. Once each week there will be a very special and fast train across the country, which will be drawn by a 3600 horsepower Diesel Engine, now under construction. This is the largest locomotive, as far as horsepower is concerned, in service in the World today. It is being built at a cost of \$370,000. It is possible

to attain a speed in excess of 100 miles an hour. Santa Fe's display at the Exposition will be started late next month.

SPECIAL EVENTS

To date more than 120 organizations, representing every kind of human endeavor, have accepted out invitation for special days at the Exposition. The attendance of several of these organizations will run up into the tens of thousands. In addition to numerous days, many of these organizations will present attractive and very high class programs of every character, including orchestras, choruses, pageants, etc. In addition to the special days designated and the with cooperation of the Exposition Sports Commission many interesting athletic events are being staged, including the National Volley Ball Championship, an open clay pigeon championship match, and International Police Pistol match, in which two teams at least from Mexico City will participate. This match has been given to the Exposition by Chief of Police James A. Davis of Los Angeles, who was given authority this year to hold the match any place he desired.

The Health Department is raising 700,000 fish to keep visitors to American's Exposition from being "stung". The tiny fish are Gambusia Afinis and they are very fond of Mosquitoes' larvae. They will be placed in the many fountains and pools on the grounds of the California-Pacific International Exposition.

San Diego Union, March 1, 1935, 8:1. Many start fund for **Collier memorial**.

San Diego Union, March 2, 1935, 1:3, 3:1. Group to break ground for **Ford Building** today.

Letter, March 6, 1935, G. H. Thomson, Ford Motor Co., to Richard S. Requa, Division of Architecture, California-Pacific International Exposition, San Diego, Calif.

Dear Mr. Requa:

The following is a copy of a telegram received today from H. B. Hanson, Ford Motor Company:

'USE STEEL IN LOW PORTION BUILDING WITH FLAT ROOF RETAINING ORIGINAL INTERIOR CEILING AND WALL DESIGN STOP TOWER CONSTRUCTION GREATLY SIMPLIFIED PRINT IN MAIL STOP THEATRE SPACE AND SECOND FLOOR AREAS RADICALLY REVISED TO SIMPLIFY CONSTRUCTION PRINT IN MAIL STOP REFER LETTER MARCH 5 DISREGARD ITSM FOUR FIVE AND SEVEN STOP RE ITEM 10 OMIT FALSE PARAPET PATIO SIDE BUT MAKE NO OTHER CHANGES DESIGN OF PATIO WALLS USING SHEET ROCK WHERE POSSIBLE STOP FURNISH REVISED ESTIMATE WHEN PLANS RECEIVED STOP PROCEED WITH ALL WORK RAPIDLY AS

POSSIBLE IF NECESSARY SEPARATING STEEL FOR LOW PART OF BUILDING FROM
STEEL FOR TOWER STOP TEAGUE WILL SUPPLY COMPLETE SET REVISED PLANS
EARLIEST POSSIBLE DATE

FORD MOTOR CO H. B. HANSON DEARBORN"

Upon studying this telegram you will note that it will now be possible to proceed with certain portions of the concrete work and I suggest that B. O. Larsen, the contractor, be notified immediately that he can start work tomorrow, with the understanding that he is not to push the work too rapidly for the present.

We should be in a position to release the balance of the work within the next two days.

Very truly yours,

(Sgd.) G. H. Thomson

(Copy of Letter in Box File 18 Folder 51 California-Pacific International Exposition, San Diego Public Library.)

Letter, March 7, 1935, Massmann to Larson; SUBJECT: Christian Science Building

Mr. Earl Giberson, architect, is drawing plans which will be submitted for approval on Saturday morning. This is being followed thru.

Letter, March 13, 1935, Hal G. Hotchkiss, to Richard S. Requa, California-Pacific International Exposition, Balboa Park, San Diego, Calif.

CONGRESS OF THE UNITED STATES
HOUSE OF REPRESENTATIVES
WASHINGTON, D. C.

George Burnham
20th District, California

Committees:
Naval Affairs
District of Columbia

Dear Mr. Requa:

I have sent by air mail today letter of instructions regarding proposed contract with the Government for our building. The specifications you sent are not complete enough to be of use. Please draw a full complete set of specifications and I think you will have no trouble in getting the requirements from an Army Engineer if you do not have them yourself.

I have just looked over the specifications attached to and made a part of the contract with the Century of Progress and it is a volume about an inch and a half thick covering every minute detail possible in a set of specifications, and ours must be as complete. I am sorry I am unable to get you a copy of them, but it

will be impossible in the length of time we have to get them to you. However, I feel you know exactly what will be required and you can get that out as quickly as possible. There must be four copies of these specifications. There must also be four copies of the plans similar to those I have here to accompany the contract.

The Supervising Architect returned the plans to me today with information to the State Department that the building, according to said plans, could be built for the amount of \$125,000.00. In fact his figure was \$124,700.00, and he made the statement to me that if anyone took the contract to put up that building according to your plans he would not make any money on it, but that the Government would get its moneys worth when the building was completed.

The sketch which you sent to me showing the elimination of the column in the front of the doorway entrance is not satisfactory, so will you please go ahead with the original plans which you had for the columns as the officials here do not want an extra column placed in the building.

I am enclosing to you herewith a rough sketch as to how the State and Agricultural Departments' representatives want the office space arranged. I think you will have no trouble in conforming to this. I will send you a copy tomorrow of the letter written by the Supervising Architect to the State Department as to the costs as he estimates them. Of course, this will have nothing to do with your plans or specifications as his figures come within yours.

Hoping that you can get these plans and specifications by the time that the contract is ready, and with very kind personal regards, I am

Very sincerely yours,

(Sgd.) Hal G. Hotchkiss

PS Referring to your letter of March 9th, just as soon as it is possible to obtain the information contained therein regarding the height, width and weight of exhibits and necessary electrical connections, I will advise you.

(Copy of letter taken from Box File 18 Folder 111, California-Pacific International Exposition, San Diego Public Library.)

GENERAL DESCRIPTION OF THE PROPOSED GOVERNMENT BUILDING
TO BE ERECTED AT THE
CALIFORNIA-PACIFIC INTERNATIONAL EXPOSITION
AT SAN DIEGO, CALIFORNIA.

The building will be located on a point of land extending east from the new road, leading south from the organ to the new Palisades group of Exposition buildings. It will face north and will be between the canyon road connecting from Eleventh Street, to the Palisades area, and the Travel and Transportation Building. Directly in front will be a triangular Plaza, substantially in shape and area to the Plaza in front of the Women's Building. The buildings surrounding it will all be in the style of, ,or suggest the architecture of the prehistoric Southwest. The building proper will be 150 feet wide by 170 feet deep. The wings on either side of the entrance facade will be 35 feet wide, along the front, by 25 feet deep, giving an entrance facade of 220 feet. As will be noted on the floor plan, the wings will be used for toilet rooms, lounges, etc. At the rear is a loggia, leading to tropical gardens, which it is proposed to develop on this point to the south.

The entire enclosing walls of the building will be of solid reinforced concrete, strictly conforming in every particular to our local building ordinances and the State earthquake laws. It is proposed at the present time to grade the space below the floor, so that after the Exposition a sloping concrete floor could be installed, suitable for use as an auditorium. Over this grade a level wood floor will be placed for use during the Exposition, covered with linoleum, mastic tile or other suitable material, for durability and pleasing effects.

Steel roof trusses, as indicated by the broken line shown on the floor plan, will span the entire width of the building, resting on the pilasters shown as a part of the exterior walls, and will leave the interior entirely free of posts or columns, except the row of five columns shown on a line with the back walls of the projecting wings, which columns will support the curtain wall which rises above, and back of the main entrance treatment. The roof will be covered with two-inch planking, slow burning construction, approved by the Building Department for buildings of this class, and finished with 20 year composition roof. The building will be lighted by two lines of metal frame skylights, as indicated on the roofing plan. The height from the floor to the bottom of the trusses will be 26 feet, and from the floor to the ridge of the roof will be 42 feet. The height from the floor to ceiling from the main entrance to the line of columns will be 20 feet.

The architectural style of the building will be Mayan, the main entrance is reproduced from the Hall of Governors in Uxmal. The ornamental work will be carefully and faithfully reproduced under the direction of the Mexican artist Juan Larrinaga, who is familiar with and experienced with the Mayan architecture. Soft, pleasing, harmonious colors will be used in finishing the decorations. This also applies to the treatment of the loggia at the rear of the building and to the continuous band around the parapet of the upper part of the building, as indicated on the color sketch.

Attention is directed to the upper part of the great triangular arch that forms the main entrance of the building, as shown on the north elevation. It is proposed to construct this entire upper portion of flashed opal glass, in appropriate colors, and illuminated from behind.

It is further proposed to suitable decorate the interior of the building and provide lighting fixtures harmonizing with the architectural scheme of the building.

The building has been so designed and planned that later, after the Exposition, it can be readily and with comparatively small expense converted into an auditorium, seating approximately 3,000 people. The rear loggia to be converted into a stage.

Very careful estimates have been made of the cost of the building and also the construction time. Bids have been received for the various part of the general structure and if contracts can be let for the concrete work and the steel work not later than March 20th, the building can be erected and the interior finished, ready for the installations of exhibits by May 15th. We are absolutely certain that the building can be completed and finished as above described for the Government appropriation of \$125,000.

(Copy taken from Box File 18 Folder 111, California-Pacific International Exposition, San Diego Public Library.)

San Diego Union, March 13, 1935, 1:6-7, 10:4. California Senate approves Fletcher's measure providing \$75,000 for California State exhibit at Exposition.

Letter, March 14, 1935, Waldo T. Tupper, Director of Exhibits, California-Pacific International Exposition, to Mr. Frederick H. Blair, Executive Secretary Goodwill Industries, Southern California, 342 North Main St., Los Angeles, Calif.

Dear Mr. Blair:

This will confirm our verbal agreement of this date to transfer the Goodwill Industries Exhibit from Space A as shown on the original plans of the Palace of Varied Industries, to space No. 24 in the Palace of Better Housing.

For your information this is the same building but the name has been changed as has the floor plan arrangement. There will be no additional charge to you on this space.

If this is satisfactory, kindly sign and return the original copy of this letter to us, retaining copy for your files.

Yours very truly,

Waldo T. Tupper
Director of Exhibits

NEWS FLASHES FROM CALIFORNIA-PACIFIC-INTERNATIONAL EXPOSITION, March 15, 1935, Vol. 2 No. 5, p. 4:2.

NOTED SHOWS SIGNED; ORDERS LET FOR BUILDING

Prominent showmen from all parts of the world will join to make the Exposition's Amusement zone one of the best ever created.

Four big units already have been signed by Dufour & Rogers. They are the "Crime Does Not Pay" show, "Life," "Two-Headed Baby" and the "Snake Farm."

Lew Dufour and Joe Rogers have returned to Chicago after a flying trip to San Diego, where they signed up the four units. They scored a great hit at "A Century of Progress" and now are participating in the world's fair at Brussels, Belgium.

Construction work on the Dufour & Rogers shows will get underway in Balboa Park on March 15, and both men will return about that time to supervise the work.

Another group of great Amusement zone attractions will be those staged by Graham & Eagle.

Stanley R. Graham has been on the ground in Balboa Park for some weeks, getting things under way for "The Midget Farm," "The Midget City," the "Miss America" show and other midway features to be produced by this organization.

"The Midget Farm" and "The Midget City," where 100 Lilliputians will work and play, will have a combined midway frontage of 325 feet; the "Miss America" show will have a 60-foot frontage, and other Graham & Eagle shows will swell the frontage total at least another 100 feet.

R. L. Ripley's famous "Believe-It-or-Not" show will present a more glamorous spectacle than its predecessor, the Odditorium.

(News Flash from Box File 19 Folder 12, California-Pacific International Exposition, San Diego Public Library.)

NEWS FLASHES FROM CALIFORNIA-PACIFIC INTERNATIONAL EXPOSITION, March 15, 1935, Vol. 2 No. 5, P. 4:1-2.

FAMOUS NAMES SWELL LIST OF EXHIBITORS; Enormous Sums Represented in New Contracts

Millions of dollars worth of new exhibit palaces and displays will make America's Exposition - 1935 the biggest show the West has seen in years.

Nine nationally known firms will build their own exhibit palaces. They are: Ford Motor Company, Bank of America, Christian Scientists, California Exposition Home, Hollywood Potteries, Shell Oil Company, Standard Oil Company of California, and Wells & McClelland.

Food Leaders in Expo

In the Palace of Foods and Beverages, the following companies and organizations have contracted for space:

Bosch Electric Baking Machine Company, California Consolidated Water Company, Calavo Growers of California, California Olive Association, Challenge Cream and Butter Association, Coffee Products of America, Crescent Manufacturing Company, Genessee Trading Company, Heppe Brothers, George H. Harris, Hill Candy Company, Hilandale Ranch, Hollywood Cup, Inc.

Standard Brands, Interclean Manufacturing Company, Huggins-Young Coffee Company, Iokelp Company, The Junket Folks, National Biscuit Company, National Pressure Cooker, Kerr Glass Manufacturing Company, Knudsen Creamery Company, Padre Vineyard Company, Krispy Kate Kone Company, Liberty Orchards Company, Frank Poglitsch, Sparkletts, Vegetarian Cafeteria and Bakery.

George B. Wright, Fred H. Wylia, Associated Ice Industries, A. Sensenbrenner Sons, Coca Cola, Neff K. Bakkers, Household Specialties, Jenny Wren Company, the Desert Date Shop, Fletcher Candy Company and the Kraft-Phenix Cheese Corporation.

Many Housing Displays

The Palace of Better Housing will provide space for this list of exhibitors:

Bowers Manufacturing Company, Inc., Naomi E. Cleaves, Church of Jesus Christ Latter Day Saints, F. E. Compton & Company, Encyclopedia Britannica, Pacific Coast Division Goodwill Industries, Anna Ketonen, Nassau Pen & Pencil Company, W. F. Quarrie & Company, Rosicrucian Fellowship, the Salvation Army, Mrs. J. W. Ware, Western Union.

Foreign Antique & Art Company, Bowen Unique Handicraft, Bookhouse for Children, Gefroj Studio, I. Jacobson, Pacific Union Conference Seventh Day Adventists, F. J. Hansen Company, Limited, Standard Sanitary Manufacturing Company, Ganna Walska-Jules Riviere Parfum, Morbeck of London, England.

Varied Exhibits Slated

The following exhibitors have already contracted for space in the Palace of the Parent and Child: Mrs. Jack C. Adams, Mrs. Constance D. Ellis, Sterile Products Company and the Pacific Coast Hanger Company. In the House of Hospitality will be found the Leroy Gordon Beauty Salon, P. E. O. Sisterhood, Jones Decorating Company, Modern Art Studios, Inc., and the San Diego Neon Sign Company.

In the Palace of Science will be:

Dictograph Products Company, Inc., the Grolier Society, National W. C. T. U., San Diego W. C. T. U., Rees Stealy Clinic, Pacific Coast Division of Encyclopedia Britannica, American Telephone & Telegraph Company, and MacFadden Jewelry.

In the Spanish Village will be the Gefroj Studio, Alelardo Linares, Briggs Floral Company, Rohn and Hutchings, Bernard J. Joachim, Free Port Importers, the Jenny Wren Company, the Verdugo Shop.

In the Palace of Varied Industries will be the American Potash and Chemical Corporation, George H. Harris, Pacific Wire Products, and Simms and Pascoe. The White Sewing Machine Company will have an exhibit in the Palace of Electricity.

Boyer, the society perfumer, will have a complete cosmetic and skin testing laboratory in the Women's Palace. The Clevelin Realty Corporation will exhibit in the Travel and Transportation Building.

San Diego Union, March 27, 1935, 5:5. Italy assumes possession of section in **House of Pacific Relations**.

March 29, 1935. RADIO TALK: The Amusement Zone and Its Attractions

A kaleidoscopic city of merry-making soon will rise in Balboa Park, where the Exposition opens May 29.

The amusement zone of America's Exposition will present an unrivaled group of fun attractions culled from every part of the world. Bookings are being handled by J. Ed Brown and William (Bill) Barie, noted showmen, who are in charge of shows and concessions for the Exposition.

The midway will be 1200 feet long and 350 feet wide, with a 40-foot pavement through the center. The 2400 feet of frontage will present the best shows in existence.

Lew Dufour and Joe Rogers, who scored a great hit at the Chicago world's fair with their shows, will produce new and greater shows at San Diego. Their units will include the "Crime Does Not Pay" show, "Two-Headed Baby," "Life", and the "Snake Farm".

Dufour and Rogers are also producing shows at the Brussels, Belgium, exposition.

Stanley R. Graham and Nate Eagle will present those attractions for which they have become famous. Graham and Eagle were prominent in amusement production for A Century of Progress and at many other previous expositions and fairs.

They will produce "Midget City", "Midget Farm" and the "Miss America" show, as well as two or three other distinctive features.

"Midget City" will be built on doll-house scale, where more than one hundred Lilliputians will work and play.

It will have a city hall, hotel, theater, barber shop, beauty parlor, office buildings and other structures and a completely organized civic administration with a mayor, chief of police and fire department.

"Midget Farm" will be a novel feature with midget cows, chickens, hogs and horses. It will have midget fields producing midget corn and grain. In a shed will be housed the tiny parade wagons and buggies once owned by Tom Thumb, protégé of P. T. Barnum.

The residents of these colonies will range in age from 18 to 60 years. Some are as short as 18 inches and many weigh less than 20 pounds.

They will include dancers, singers, artists and craftsmen.

The Midget City News, the world's smallest newspaper, will be published in a midget printing shop each day during the Exposition and current events and features will be presented from the midget viewpoint.

Final plans for the Ripley "Believe-it-or-Not" show are now being formulated by J. Dwight Funk, who announces that the Ripley show at America's Exposition will far surpass the previous Ripley productions.

Funk and his partner, Frank Zambreno, will personally manage the "Believe-it-or-Not" show. They also will be co-producers of the "Sensations" unit, an illusion show created solely by the refraction of light and without the use of mirrors.

Twenty beautiful girls from all parts of the nation will be seen in this series of animated tableaux. Many art critics and stage producers have commented on the beauty of this attraction.

Actual studio production of motion pictures will be seen at the Exposition.

Sixteen Hollywood studio workers will be stationed in the Exposition grounds during the world's fair, where they will produce animated cartoons and other short subjects as they are made in the Hollywood studios. The Studio will be open to Exposition visitors, who will get a first-hand glimpse of the inside of making movies.

Visitors not only will see the complete production of these films, but will, also, see the finished product in a movie theater which will form part of the exhibit.

Not located on the midway proper, but part of the amusement zone will be Golden Gulch, a typical gold mining camp of California's days of '49.

In a deep, twisting gulch beneath a canopy of trees will be shacks made from actual timbers of the gold rush days. It will be a realistic picture of that era when the names of Jimtown, Hangtown and Whiskey Flat were on the lips of every adventurer from China to Cairo.

So faithful will this reproduction be to the originals that the visitor walking the paths of Golden Gulch will imagine himself transported back to the days of '49, when the name "California" reverberated throughout the world.

An old, wooden door, warped by the winds and rains of more than fourscore years, will add a note of realism to the scene, while the Chinese laundry, iron-barred bank, blacksmith shop and hitching posts will line the streets of the camp.

Throughout the length of Golden Gulch will be found men and machines performing the tasks common to the era when the cry of "Gold!" was enough to bring men from the heath fires of far-off London and the steppes of Siberia. A further note of realism will be evident by the stage coaches and the burros which will form the only ingress to the camp.

The Venetian Glass Blowers, ten skilled craftsmen from Venice, Italy, will show their unique methods of blowing molten glass into many varied forms and designs.

Glass blowing is an art form from the days of the early Egyptians. It flourished during the splendors of medieval Venice, and since that time it has been handed down from father to son.

The world-famous Gay's Lion Farm of El Monte, California, will be another attraction of the amusement zone.

Ponies from the circus stables of Harry Wooding will play an important part in "Toyland", created especially for the children.

The eyes of the show world will be on San Diego this year, with theatrical performers and producers congregating from many lands. The public will find at the California-Pacific International Exposition an unequaled array of midway shows; attractions that are of such outstanding quality that they will obtain the enthusiastic scrutiny of veteran showmen who may previously have concluded that there is nothing new under the sun.

San Diego Union, March 31, 1935, II, 1:2, 2:1-2. Romantic history of Balboa Park is inspiring tale, by Senator Leroy A. Wright.

San Diego Union, March 31, 1935, II, 5:1. **Cactus planting** on large scale planned in park:

Advance glimpses into gardens under construction in Balboa Park reveal a cactus planting on a large scale and a gigantic rockery and pool.

San Diego Union, March 31, 1935, 8:1. **Arabian horses** to be presented as Exposition feature.

San Diego Union, March 31, 1935, 8:2-3. **Charles Wakefield Cadman** appeals to Exposition managers for attention to local musical forces.

San Diego Union, April 1, 1935, II, 1:3-4. Jules F. Jacques, secretary of Exposition music section, will plan programs.

San Diego Union, April 7, 1935, II, 1:4-5. Continuous music festival including vocal and instrumental groups culture feature of Exposition.

San Diego Union, April 9, 1935, 9:5. Federal Housing Administration breaks ground for **miniature model town**.

Letter, April 10, 1935, Norman Huff, D. and M. Tile Company, 707 Antonia Street, Los Angeles, Calif. to Richard S. Requa, California-Pacific International Exposition, Balboa Park, San Diego, Calif.

Dear Sir:

Confirming our verbal quotation of yesterday for the Persian type decorative and plain tile to be set on wall in the park, we will manufacture the tile for the fountain as per your drawings, for the sum of one hundred and twenty five dollars, which price includes the package.

This includes the bottom of the pool, and also to glaze the edges of the tile where they protrude beyond the adjoining tile.

We will submit a sketch of the pattern tile for your approval of colors and design.

Thanking you for this opportunity, and hoping that we may have word to proceed with the work, we are,

Yours very truly,

Norman Huff (signed), D and M Tile Company

Letter, April 10, 1935, Ben Black, Authorized Agent, Fanchon & Marco, Inc. & Kenneth Thomson, Executive Secretary, Screen Actors Guild, Inc. to California Pacific International Exposition Company, San Diego, Calif., Attention: Zack Farmer.

Gentlemen:

This letter sets forth the agreement between Fanchon & Marco, Inc., and Screen Actors Guild, Inc., on the one side, and yourselves on the other.

We agree that we will furnish for the California Pacific International Exposition a motion picture exhibit consisting of treasures, private belongings, personal wardrobes, antiques, and various other

interesting items of the motion picture arts and sciences, together with exhibits showing how pictures are made, motion picture sets, and the like, in order that an adequate exhibit showing the development and present state of the motion picture art may be displayed. In addition thereto from time to time we will cause well known motion picture stars from the membership of the Screen Actors Guild, Inc., to be present at our exhibit.

You agree to furnish us the building, thereto, heretofore known as "Women's Palace", and designed on your ground plan as Building No. 34, the plan of which is hereto attached, and made a part thereof. You will furnish and install in said building such conduits, piping, wiring, plumbing fixtures and electric power outlets as are reasonably adequate for the purpose of making water and electric power available for our use, and will cause the same to be connected to the necessary power lines and water mains to make sure such electric power and water so available. It is understood that the foregoing includes general overhead lighting, but does not include any equipment or appliances peculiarly adapted to our operations within said building. You will keep said building in good condition and repair, except for repairs occasioned by our own negligence. Should the exposition run into the cold season, you will furnish the building heat at our own expense.

You have assured us that you will carry adequate insurance for the protection of both you and ourselves, covering public liability so far as structural defects in the building are concerned, fire and earthquake, and will furnish us evidence before the opening of the Exposition that such has been obtained for our protection. We, however, will maintain workmen's compensation for our own employees and carry public liability, insuring both of us insofar as our own operations are concerned.

You will allow no other exhibit or concession connected with the motion picture industry, but this shall not prohibit the incidental showing of motion pictures in connection with other industrial exhibits or concessions, or prevent any man from walking around the grounds and taking pictures of the spectators, or forbid the making of newsreels, it being the general intent hereof that we shall have the exclusive motion picture exhibit at the Exposition. You will keep the grounds around the building clean and in good condition. We will be permitted to erect a ticket booth or booths outside the building and put up any signs that we feel necessary or proper to further exploit our exhibit. However, we will erect no sign without your approval, which you agree will not be unreasonably withheld, and unless you disapprove said sign, with forty-eight (48) hours after submission by us to you, it will be deemed approved. We agree to conduct our operations so as not to unreasonably interfere with the operations of other exhibitors.

The compensation to you and to us will be determined and paid as follows:

Fanchon & Marco, Inc., will advance all the necessary funds for equipping the building for the purpose of the exhibit, publicity expenses, and other expenses preceding the opening, and for equipping, maintaining, and running this motion picture exhibit. The business management of the motion picture exhibit will be run by Fanchon & Marco, Inc., which will keep true and adequate books of account open to the inspection of both the Guild and the Exposition at any and all reasonable times by said parties, or either of them. The gross receipts of whatsoever kind or nature or howsoever derived from said motion picture exhibit will go into a general fund and a separate bank account and will be disbursed as follows: First, to reimburse Fanchon & Marco, Inc., for any and all funds so advanced and next, for paying the running expenses of said motion picture exhibit, and thereafter, all remaining sums will be divided into three equal parts, one part to go to you, the second part to Fanchon & Marco, Inc., and the third to go to the Screen Actors Guild, Inc.

Notwithstanding the foregoing, no matter how great the initial or running expense, in computing the net to you, you will be paid one-third of all receipts after deducting either (a) the actual initial and running expenses, or (b) Ten Thousand Dollars (\$10,000.00) initial expense and Two Thousand Dollars (\$2,000.00) a week running expenses, whichever results more favorably to you.

Three days after the end of each week, commencing with the end of the first week after the Exposition opens, Fanchon & Marco, Inc., will render you a statement covering receipts and expenses and will accompany the same with any payment due you under the terms thereof.

“Heat”, as herein used, means only a heating system, and not the furnishing of heat.

Overhead lighting does not mean that you will furnish electrical current. (“equipment” crossed out & initialed by LWB)

This agreement between us is for the duration of the Exposition. (“but” crossed out & initialed by LWB)

The relation between you and us is that of Lessor and Lessee, and not that of partners or co-adventurers.

Yours truly,

(signed) Ben Black
(signed) Kenneth Thompson

We agree to the foregoing.

CALIFORNIA PACIFIC INTERNATIONAL EXPOSITION COMPANY.

(signed) Zack J. Farmer

(Transcription taken from letter kept by the San Diego Public Library in Box File on California Pacific International Exposition.)

Letter, April 10, 1935, W. T. Tupper to E. H. Conklin, SUBJECT: Water Exhibits.

Mr. J. L. Van Norman, of the Bureau of Water Works and Supply, just phoned long distance stating that they have decided to participate on the basis covered in my letters of the 9th inst., addressed to Mr. Thad M. Erwin, copies enclosed.

The space we are reserving for them is shown on the enclosed floor plan, and be sure and use this one when talking to him and not the regular floor plan you have, because this plan does not contain prices and I do not want them to have any chance to get into an argument over price rates.

You will note that the total floor area is 7,350 sq. ft., from which we have deducted 640 sq. ft. and given same to Imperial County at no cost, because they would have used this amount of space free in the California State Building, and we are transferring this to make the major exhibit possible.

I am enclosing space application blank properly made out, with the exception of the names of the contracting firms. These and the nature of the exhibit you will fill out.

As to the arrangement of the space to be occupied by the water group, the details of this construction can be worked out by their engineers with our architect. Mr. H. Arthur Price, Civil Engineer of the Bureau of Water Works and Supply, was down here the other day with Mr. Erwin and went into some of the details with our architect, Mr. Requa. Mr. Requa just explained to me that the water companies desire to make an entrance of their own on the side adjoining the California Gardens. The details as to what is desired in this end of the building should be worked out between their engineers and our Mr. Requa. This is merely a detail and will not affect our contract. So I think they should get Mr. Price or whoever they decide upon to handle this down here at once to contact Mr. Requa before we start construction.

You explain to Mr. Van Norman that this is merely an application for exhibit space which he is signing, and that in the letter of acceptance we will embody any special agreements, which will legally then become a part of the contract. I am sure you will do a good job on this.

If there is any point not clear when you get to Mr. Van Norman's office, you can call me by long distance and we can thrash it out. Explain to Mr. Van Norman that we have been holding construction of this building depending upon their participation; and if for any reason he objects to signing our contract, but agrees that he is going ahead with this exhibit, get something from him in writing to that effect which will serve as my authority to proceed immediately with construction. You understand, of course, that if they do not participate, then we would not erect this building. I did not tell them that we were depending on their participation to construct this building; this is merely for your own information, so that you will realize the importance of getting something in the form of a written acceptance, so that we may proceed immediately.

Better do this the first thing in the morning, and once you have a written agreement, call me on the telephone and let me have the information, so I may proceed accordingly.

You might ask them to have their Publicity Department prepare for our Publicity Department the type of story which they would like to have released; or, better still, you can have Mr. Murray contact them for us and obtain all information, which he in turn can pass on to Purcell for instructions.

(Copy of letter in Box File 10 Folder 52, California-Pacific International Exposition, San Diego Public Library.)

April 12, 1935, *Southwest Builder and Contractor*, pp. 13-14: Distinctive Architectural Style for New Exposition Buildings - Old Forms Are Given Touch of Moderne, Progress of Construction at San Diego Fair.

From the standpoint of all traditions the building of an exposition involves the development of a complete new plan. Generally the start is from zero --- grounds and buildings all have to be made. For a few expositions some sort of a nucleus has been made available but none that had been comparable to the one at San Diego utilized for the California-Pacific International Exposition which is scheduled to open May 29.

Beautiful Balboa Park, as landscaped for the 1915 Panama-Pacific [sic] Exposition, and the principal buildings of Spanish-Colonial and Renaissance design, erected for that colorful fair, which have been carefully preserved for just such another enterprise, form the nucleus of the 1935 exposition. It is a fine tribute to the genius of a great artist and architect, the late Bertram G. Goodhue, who created the architectural dream, that the buildings designed by him for such a purpose should have had so strong an appeal to the public that they have been kept intact through two decades.

Problems of the promoters of the California-Pacific International Exposition were greatly simplified by having such a splendid nucleus around which they could build. Many new buildings had to be erected and the opportunity was seized to illustrate in their architectural treatment the progress from the Indian pueblos of the pre-Spanish period to the present time with its Moderne influence. So architecturally the Exposition

buildings run the gamut of architectural traditions of Southern California. The only exposition buildings are among the finest examples of the Spanish Colonial and the Spanish Renaissance and the new buildings are Mayan and Indian Pueblo types with a touch of the Moderne.

Richard S. Requa is director of architecture for the exposition. He is a recognized authority on Spanish architecture and its Colonial adaptations and the Indian Pueblo types of the Pacific Southwest. In working out the architectural scheme of the new exposition he has sought to show by modified examples the progressive steps in the development from the pre-Spanish period to the present time and through the inspiration of the old forms and influence of modern ideas to produce a new and distinctive California style. This is exemplified in the Palace of Transportation and Travel and other structures, in designing which opportunity has been taken to supply color and adornment with growing plants instead of academic ornamentation. Here the broad plain wall surfaces of the Pueblo type are relieved by festoons of plants hanging from concealed planting boxes to form a living frieze. The effect over the white stucco wall surfaces is both striking and pleasing.

Under Mr. Requa's direction, a highly efficient architectural department was organized. His immediate assistant is H. Louis Bodmer, architectural supervisor. Next in line in this department are George Palliser, specifications writer; F. E. Evenson, electrical engineer; and G. H. Davies, structural engineer. Eighteen architectural draftsmen, six structural draftsmen, six electrical draftsmen and eight civil engineers are employed.

Construction work is organized in two divisions, some of the projects being handled by private contractors and others by the exposition staff, employing SERA labor. Approximately 65 percent of the workmen on the projects are SERA workers, the balance being employees of private contracting firms. To facilitate the direction of the SERA crews, a large staff of foremen is employed. They are under the control of O. B. Cole, general foreman.

The men behind the construction scene are H. H. Barter, director of works; Harry Foster, project superintendent and purchasing agent, and C. H. Harper, general superintendent.

Except for the exhibit palace of the Ford Motor Company, which is of steel and concrete, the new buildings on the exposition ground are frame construction with wood roof trusses and white stucco exterior walls. The buildings used during the 1915 Panama-Pacific [sic] Exposition are of similar construction.

Construction operations are now being pushed with all possible speed, two shifts of workers being employed on the dozens of projects now under way, to insure the completion of all structures and installation of exhibits in readiness for the opening on May 29.

The Federal government building will be a permanent structure with concrete walls and steel roof trusses. It was designed by the architectural department of the Exposition in the distinctive style evolved from the older forms with Moderne influence. The ground dimensions are 150 x 170 ft. and the height 35 ft. Of the \$350,000 appropriated by the government for its exhibit, \$125,000 will be spent on the building. It is being erected under contract by M. H. Golden.

The California State building is being erected by the Exposition construction department with SERA labor. It will be a wood frame and stucco structure, 228 x 120 ft., and will cost \$90,000. It was designed also by the Exposition architectural department.

The Palace of Electricity and Varied Industries is about 80 percent completed and the Palace of Education and Women's Palace are finished except for interior painting. Grading for the Transportation and Travel building has been completed and it will be erected under contract by J. A. Hunt. This structure will be 230 x 118 ft. All of these buildings were designed by the Exposition architectural department.

One of the most imposing new structures on the ground will be the Ford Motor Company's building. It was designed by Walter Dorwin Teague, the company's architect, and will house the Ford exhibit from the Chicago Century of Progress Exposition. Construction will be reinforced concrete and structural steel. It

will be circular in form, approximately 300 ft. in diameter, with a tower. Adjacent to it will be an open-air bowl for concerts. The cost of the plant will be around \$350,000. It is being built under contract by B. O. Larsen.

Modern Housing will provide one of the most extensive exhibits planned for the exposition. In the Palace of Better Housing, everything pertaining to construction, equipment and furnishing of the home will be shown. Grouped around it will be the exhibit of the Federal Housing Administration, comprising 100 small scale models of homes illustrating different styles of architecture, different types of construction and different floor plans. These models will be made from designs prepared by architects and selected by competition under the supervision of David J. Witmer, district architectural director of the FHA.

The Model California Exposition Home, representing an investment of \$50,000, including furnishings, is now nearly completed.

Among other features will be the Spanish Village, the largest of its kind ever built for an exposition, and reproductions of the Casa del Rey Moro Gardens and the Alcazar Gardens, all of which are now nearly completed.

Construction of buildings in the Amusement Zone is well advanced. It is estimated that more than \$1,500,000 will be expended on structures and devices in the zone, which will be the largest ever seen on the Pacific coast.

EXPOSITION EDITION

San Diego Union, April 28, 1935,

3:1-2. San Diego's \$20 million Exposition opens in Balboa Park May 29; exhibits will record milestones in development of civilization, recent achievements of mankind.

3:3-6. \$2 million Ford Exhibit and Transportation and Travel exhibits to be magnets for visitors.

3:5. Spanish Village built speedily.

3:6. Rooms reserved for Exposition visitors.

3:7-8. Elaborate city of merry-making in Amusement Zone will provide attractions for old and young.

3:8. Day for Ohioans is set July 28.

4:1-4. Industrial firms of nation will exhibit at San Diego's Exposition; gigantic commercial strides and national progress will be depicted in huge displays.

4:3. Skill of ancient surgeons shown in Exposition display,

4:5. Murals painted for Exposition.

4:7. Equine displays - Gay's Lion Farm, Midway features.

4:8. San Diego expects 5 million to see Exposition.

6:1-4. San Diego **Palace of Fine Arts** exhibits works of world-famed artists; institution in Balboa Park contains steadily growing collection of masterpieces, by Reginald Poland.

6:7. Intricate design seen on **Palace of Fine Arts**.

6:8. Display of old Italian masters brilliant event, by Reginald Poland.

8:1-2. **Palace of Natural History** houses thousands of priceless specimens; diversified collections will be major attractions for visitors, by Clinton G. Abbott, director.

8:1-2. **San Diego Federation of State Societies** will welcome "hometown" visitors to Exposition.

8:3-4. Hydrographic relief map at Exposition, only one of its kind in existence.

8:5-6. Taxidermist shop, where all displays are made, by Clinton G. Abbott.

8:7. Some exhibits too valuable to be exposed, by Clinton G. Abbott.

8:7. Fossil is found on site of Exposition.

EXPOSITION SECTION

APRIL 28, 1935

SAN DIEGO UNION,

8:8. **Palace of Natural History** carries study of nature to schools, by Frank F. Gander, County Supervisor of Nature Study.

8:7-8. Identification exhibits, useful **Natural History Museum** feature, by Clinton G. Abbott.

10:1-2. **San Diego Zoological Gardens** ranks with best in United States; rare collection of animal and bird life will add to enjoyment of Exposition, by Belle J. Benchley.

10:7. "Flying" sea lion to be unusual exhibit at Exposition.

10:8. Two gorillas provide fun for visitors, by Belle J. Benchley.

Section II.

10:1-2. Exposition will present scientific, artistic and cultural exhibits; all phases of world's progress will be represented by displays in brilliant settings.

10:7. San Diego **police** will wear new Exposition uniforms.

10:7. Local Veterans' posts ready to aid Exposition.

10:8. **Palace of Science** offers unique displays.

Section III.

4:3-5. Drawing of **model home** to be given away at Exposition.

4:6-7. **California State Building** to show government at work.

4:8. Varied displays, special events planned.

6:1-2. Living plants to enhance Exposition buildings' beauty.

8:1-2. PTA will provide exhibits for **Palace of Education**.

11:2-4. **Frank Drugan** credited with idea that started San Diego's Exposition.

Section IV.

4:8. Powerful aerial fleet will have exercises in July.

4:8. National Guard will drill for Exposition visitors.

Section V.

6:3-4. 24 nations represented in **Photo Salon** at Exposition.

Section VI.

9:2. 1,700 Indians in San Diego County.

9:3. Counties of California will show their products in San Diego.

9:4-7. O'Rourke Institute instructs children in nature lore free.

Section VII.

2:1. **Boy Scouts** plan active programs for Exposition.

2:2-3. Countless Exposition attractions in superb setting.

2:4. Catholics to attend Mass at Exposition June 2.

2:6-7. Scientific library in Balboa Park provides facilities for extended research, by Alice M. Barlow.

3:1-8. Patrick Francis O'Rourke invites the world to San Diego's Exposition.

4:2-3. Spreckels outdoor **organ** to be played each day.

4:4. **Transportation** facilities will be neat exhibit.

4:8. Smart displays for American women.

6:1. **Gold Rush** days will live again.

8:2-3. Girls have fine **Scout House** in Balboa Park.

8:4-5. Special art collection featured.

12:1-8. **Café of the World** will serve epicures of all nations.

San Diego Union, April 29, 1935, 2:7-8. Representatives of Czechoslovakia and Germany raise flags in **House of Pacific Relations** circle.

San Diego Union, April 29, 1935, 4:1. EDITORIAL: For the Exposition - We want the world to see our Exposition. We want the world, too, to see our prosperous and beautiful city.

San Diego Union, April 30, 1935, 5:1. **Café of the World** to use 50 cooks.

San Diego Union, April 30, 1935, 5:5. **Standard Oil** plans unique displays.

San Diego Union, April 30, 1935, II, 1:2. Exposition outside **lighting** ample to supply ten towns.

San Diego Sun, May 1, 1935, 11:2-3. **Ford exhibit** to present wonders of modern age.

San Diego Sun, May 1, 1935, 12:2-4. Mayan architecture, **Standard Oil Building** feature.

San Diego Sun, May 2, 1935, 1:3-4, 2:6. Real **nudists** to be at Exposition.

San Diego Sun, May 2, 1935, II, 13:2-3. Building the Exposition.

San Diego Sun, May 2, 1935, II, 15:2-3. Exposition Mixed Chorus has 500 voices.

Letter, May 3, 1935, Vandeburg to Sandusky; SUBJECT: Amateur Broadcasting Station

This is to advise that we now have an excellent amateur radio broadcasting station among other exhibits and attractions here in the grounds. Short Wave Station WGUSA will be located in a room at the head of the stairway directly under the tower of the Science Building.

The station will be maintained and operated without cost to the Exposition under the management of Messrs. Earl Kiernan, Howard Breedlove and A. Wayne Prather. It is strictly an amateur station, and operators will be chosen day to day from the ranks of amateur radio operators here in San Diego.

The broadcasting equipment is being built and will be installed without cost to the Exposition, and the radio station will operate in broadcasting short-wave messages on highlights of the Exposition to other short-wave stations. Its power is sufficient to reach all parts of the world, and we should gain some good publicity from this source.

The station will be open to the public without charge, and an attendant will be maintained to explain the operation of the short-wave equipment.

Let me know if you want additional information.

(Sgd.) CMW

San Diego Sun, May 4, 1935, 3:3-4. Carl H. Heilbron, president Chamber of Commerce, endorses Visitors' Bureau; accommodations for an anticipated surplus of 10,000 visitors needed.

San Diego Union, May 5, 1935, 1:3-4, 10:1. **"House of Magic"** will display electricity marvels; vast exhibit by big national concern announced for Exposition at cost of \$50,000.

San Diego Union, May 5, 1935, 13:1. Earth to auto is theme of **Ford** display.

Letter, May 6, 1935, H. A. Van Norman, Chief Engineer & General Manager, Bureau of Water Works & Supply, 207 So. Broadway, Los Angeles, Calif., to Zack Farmer, Managing Director, California-Pacific International Exposition, Balboa Park, San Diego, Calif.

Dear Sir:

I have been advised that we are sending our men to San Diego tomorrow with complete plans and specifications for the construction of the 100-foot tower to be erected at the entrance of our water exhibit --- together with other floor plans which you requested.

The engineers have planned for a very elaborate entrance detail consisting of this 100-foot tower which is to have water cascading over it --- all to be flood-lighted at night --- making a very pleasing and spectacular feature for the exposition. This tower will have a very desirable and conspicuous location at the end of the California Flower Gardens and facing on the large forecourt of approximately 7,000 square feet where suitable benches are to be placed for the accommodation of the public.

In order to avoid so much red tape and construction details in the way of bids, etc., by this Department, arrangements were made with your officials whereby they would construct this tower and bill it to us in addition to the space charge specified in our application for lease.

However, since we find our finances are limited, if your guaranteed cost for this tower is excessive and too far out of line with reasonable costs, it will mean that this entire tower feature must be eliminated from our plans --- unless there is some way in which your officials can arrange to absorb some of this expense.

In view of the fact that the erection of this tower with water cascading over it will be an asset to the exposition itself, and feeling sure that it will be to the interest of the entire exposition to retain this feature, I would recommend that this tower construction be handled on a 50-50 basis.

I would greatly appreciate it if you would go into this matter quite thoroughly and will hope that you can see your way clear to make the necessary arrangements with my representative in order that they may carry out their present plans as far as our finances will permit.

Very truly yours,

(Sgd.) H. A. Van Norman

San Diego Union, May 6, 1935, 1:7-8, 5:5. Triple shifts of labor bring Exposition's buildings near finish.

San Diego Sun, May 6, 1935, 1:6-7, 6:3-4. Spectacular **light system** to paint Exposition grounds.

San Diego Sun, May 6, 1935, 4:6. **Fun Zone** nearly ready.

New York Times, May 7, 1935, 18:8. A special three-cent stamp will be issued to commemorate the California-Pacific International Exposition which opens in San Diego on May 29.

San Diego Union, May 7, 1935, 1:6, 9:1. Exposition to floodlight sky; electrical display to be dazzling.

San Diego Union, May 7, 1935, II, 2:4. Naval exhibits en route here for Exposition.

San Diego Sun, May 7, 1935, 1:2-3. Hollywood moves into **Hall of Fame**; three freight cars loaded for film exhibit; will make movies daily.

San Diego Sun, May 7, 1935, 20:5-6. Four-legged pickaninny girl to be exhibited in **Believe-it-or-not** show.

San Diego Union, May 8, 1935, 1:5, 5:1. Group to confer today on California State exhibit; Eagles establish quarters; Swedes set flag raising; actors announce plans.

San Diego Sun, May 8, 1935, 1:3-4. State officials in San Diego complete Exposition plans.

San Diego Sun, May 8, 1935, 4:2-3. Glamorous maidens feature in "**Sensations**" show in Amusement Zone.

San Diego Sun, May 8, 1935, II, 11:2-3. Exposition opens in 20 days; exhibit schedule rushed.

San Diego Union, May 9, 1935, II, 2:1. Committee to invite guests to Exposition opening.

San Diego Sun, May 9, 1935, 8:6-7. Historic **highways of the world** reproduced as Exposition feature.

New York Times, May 10, 1935, 10:4. The Mexican government has authorized exhibition of the Monte Alban jewels in San Diego, Calif. During the fair starting May 20 [sic].

San Diego Sun, May 10, 1935, 1:2-3. Giant **Boulder Dam** model scheduled for Exposition; 30-ft. reproduction arrives tomorrow; terrain to be shown in contour map; for installation in Amusement Zone.

San Diego Sun, May 10, 1935, 22:5-6. Twenty-five tribes of Indians to live at Exposition.

San Diego Union, May 11, 1935, 1:7-8, 2:7. Exposition at half-way mark in advance ticket sales.

San Diego Union, May 11, 1935, 5:6. Japan quarters in **House of Pacific Relations** will be opened with ceremony.

San Diego Sun, May 11, 1935, II, 9:2-3. Tons of machinery moved into **Firestone's exhibit** in **Ford Building** today; actual production of rubber parts scheduled.

San Diego Union, May 13, 1935, 5:4. 400 men on job "dressing" park's flora for Exposition.

San Diego Sun, May 14, 1935, 1:2-3, 7:3-4. Electric moon, borealis rival nature at Exposition; ten miles of high-voltage wires "nerve" networks in park.

San Diego Sun, May 14, 1935, 5:4. **Globe** theater ready for run at Exposition.

San Diego Union, May 14, 1935, 1:7-8. Exposition construction at new peak; work started on lakes, gardens.

San Diego Union, May 14, 1935, II, 1:5. **Ford Building** nearly finished.

San Diego Sun, May 15, 1935, 1:1-2. Aladdin's Lamp miracle performed at Exposition.

San Diego Sun, May 15, 1935, 18:2-4. **Ford Building** nears completion.

San Diego Union, May 15, 1935, 1:7-8. Record-breaking speed made on Exposition buildings.

San Diego Sun, May 16, 1935, II, 11:2-3. Fifty nature lovers on way to **nudist** colony.

San Diego Union, May 16, 1935, 1:1. Big arch rises on Exposition plaza.

San Diego Union, May 16, 1935, 9:2-4. Helene Richards, 1915 Exposition groundbreaking "Queen Ramona," recalls fete.

San Diego Union, May 16, 1935, II, 1:2. Scientific exhibits to be featured at **Ford exhibit**.

San Diego Union, May 16, 1935, II, 1:8. Traffic body suggests Exposition no-parking areas.

San Diego Union, May 17, 1935, 1:3, 2:6. Work on radio station; system of amplification starts at Exposition; broadcasting facilities to be of network magnitude.

New York Times, May 18, 1935, 2:2. President to visit Exposition at San Diego; he promises trip some time this summer.

San Diego Sun, May 18, 1935, 5:4-5. Five symphony orchestras scheduled for **Ford Bowl**.

San Diego Sun, May 18, 1935, II, 9:6-7. **"End of Trail"** exhibit featured.

New York Times, May 19, 1935, Section 9, II, 15:6-8. A Great Fair For the Pacific; the International Exhibition Soon to Open in San Diego is Expected to Draw Millions of Visitors to the West Coast, by Alvin J. McGowan.

San Diego, Calif.

The nearly four centuries of progress and achievement in the West with their climax in the gigantic works now being constructed will be portrayed in bold strokes at the California Pacific International Exposition, which will open in Balboa Park in San Diego on May 29 and continue until November 11.

Such is the main theme. It represents a long evolution from the original idea of the fair, which was to be representative chiefly of Southern California. The large construction projects hereabout were too breathtaking to be left out. Of course the Federal Government was invited to exhibit also; so was the Mexican government, and the circle kept on widening until now some twenty-three or more foreign countries will be represented.

Great interest has been created throughout the United States and much of the rest of the world. Inquiries of travel agencies indicate that an unprecedented number of tourists will travel to the Pacific Coast for the 1935 world's fair. Confident forecasters are mentioning 10,000,000 as the probable attendance figure for the season. President Roosevelt has announced his intention of coming to the fair.

San Diego is considered the logical site for such an exposition because it claims to be the birthplace of civilization in the West. It was to San Diego bay that the explorer Juan Rodriguez Cabrillo in 1542 first touched the mainland of present California. It was here that the first mission was established in 1769 by Spanish priests. Many relics of the early settlement lie within a short distance of the exposition grounds.

More than 100 Buildings

The exposition proper comprises more than 100 buildings, representing a total investment in excess of \$20,000,000. Most of them are permanent structures which were a part of the 1915 Panama Pacific [sic] Exposition commemorating the completion of the Panama Canal, but many new and modern structures have

been built to house the varied exhibits at the coming fair. Heavily clustered with trees and shrubs, they make a scene of dazzling brilliance.

Two of the great struggles for progress in this region have been for water and transportation. The struggles are commemorated in the Palace of Water and Transportation. Here is told the story of man's fight for the "white gold" of the semi-arid West and the advance of transportation from the days of the sandal-shod Spanish priest down to the present streamlined era.

Part of the story is being sponsored by the Metropolitan Water District of Los Angeles in a huge display. Relief maps and working models of great irrigation and water-supply systems will be strikingly shown. Aqueducts, dams, channels, and reservoirs will be reproduced to scale.

All-American Canal

Also in this building will be a graphic representation of the relief project of the All-American Canal, now under construction in Southern California, which will open up thousands of barren acres to agriculture and provide homes for many American families. The exhibit will also tell the story of the Boulder Dam, one of the world's great engineering projects, and of other undertakings connected with the water problem in the West.

In the transportation section will be a special department devoted to the historical phase of travel. Many relics which played an important part in the development of travel in the United States are being assembled. These include such colorful objects as the horse trappings of the early Spanish Dons, the ox-carts of the first settlers, covered wagons, stagecoaches and other crude vehicles.

The United States Government, which has constructed a Federal exhibit palace costing \$200,000, will develop two themes. One exhibit deals with the operations of twenty government departments, which more than forty attendants will help to explain. The other is that sponsored by the Federal Housing Administration.

The first phase of the FHA exhibit is a bit of modernization magic, a dramatization of the improving of homes under maximum loans of \$2,000. There will be shown a community of houses antiquated, poorly designed and in need of repairs. In the space of ten minutes it will be changed into a community that is highly modernized and improved.

Still another phase of the exhibit will be the presentation of a "New Deal City," showing fifty-six houses in miniature, designed to display the newest and best type of residential construction.

Mexico to Participate

General Pascual Ortiz Rubio, former President of Mexico and an honorary director of the exposition, has announced, through President Cardenas, Mexico's decision to participate officially in the San Diego fair.

Included in the Mexico Exhibit Palace will be the famous Monte Alban jewels, priceless Maya gems, which were shown at Chicago's A Century of Progress Exposition. These are now en route to San Diego, where they will be displayed under special guard. The Mexican government will also have exhibits from the Departments of Agriculture, Communications, Education and National Economy.

Plans are being made to bring to San Diego for the duration of the fair the famous Tipica orchestra of 100 pieces.

A unique exhibit will be that of the Screen Actors Guild on Hollywood. This group will put on display such famous objects as Mary Pickford's curls, Charlie Chaplin's shoes, George Arlis's monocle and other items from the archives of the screen capital.

As to architecture, many of the buildings are of the early Spanish renaissance and Spanish Colonial styles. These are the buildings constructed for the 1915 exposition. The new buildings suggest the oldest and most typically American schools of architecture --- the ancient Maya and Indian pueblo.

Industrial Exhibits

Some of the notable commercial exhibits will be found in the Ford Building, including modern industrial devices of all kinds. This building, intended to be permanent, stands on high ground overlooking San Diego Bay and will serve as a landmark for air pilots. Adjacent is a 3,000-seat amphitheater and orchestral shell. Here the symphony orchestras of Los Angeles, San Diego, San Francisco, Seattle and Portland will play during the fair.

In this park of the park roads suggesting historic highways that have contributed to the development of the civilization of nations settling along the Pacific have been laid out, flanked by characteristic scenery. Among these world-known arteries are the Gold road of Panama, one of the ancient Inca highways of Peru, the old Spanish road in Mexico, the Oregon and Santa Fe trails, and Alaska's Fairbanks highway.

Other exhibits will cover a great range of subjects. The Palace of Science will portray developments in its field down to the newest marvels in telephony; the Palace of Natural History contains 307, 803 specimens of birds, fish, animals, reptiles and plants; the Palace of Fine Arts, a striking collection of old masters and moderns including Ruben's "The Holy Family," and a priceless Gobelin tapestry, and so on.

The entire United States fleet will concentrate in local waters for two-week periods. The first concentration will begin on June 10 and last until June 28. The second will be from August 7 until September 1. President Roosevelt will be here during one of the concentrations for a review.

San Diego Union, May 19, 1935, 1:4, 2:5. 3,000 men race against time to get Exposition ready.

San Diego Union, May 19, 1935, II, 1:2. Exposition to have Schweigardt statue group; sculptor donates work for **Palace of Education** when funds fail; exhibit won by Mrs. Vesta Muehleisen.

San Diego Union, May 19, 1935, II, 4:5. Visitors to be barred from Exposition grounds as work speeds to finish.

San Diego Sun, May 20, 1935, 1:5, 2:3-4. San Diego orphans to pull switch to open Exposition; will turn on lights after talk by President Roosevelt.

San Diego Sun, May 20, 1935, 3:2-3. Zorine, queen of the **nudists**, flourishes under San Diego sun.

San Diego Sun, May 20, 1935, 6:3-4. Six architectural styles to prevail at Exposition.

San Diego Union, May 20, 1935, 5:2. Artists finishing **California State Building's** historic murals.

SAN DIEGO SUN

EXPOSITION EDITION

MAY 21, 1935

Section A

4:2-4. 1935 Exposition product of 1915 Fair; idea brought to San Diego by G. A. Davidson.

5:1-2. Shakespeare "streamlined" to be presented in replica of London theater at Exposition

12:1-2. "Arco del Provenir" to be Exposition surprise.

Section B

2:1-4. Frank Drugan, little man with big idea, gave American big 1935 coast Exposition.

3:3. Fifteen foreign nations in Exposition.

4:3-5. **“House of Charm”** to be magnet for debutante and homeowner alike at 1935 Exposition.

10:3-6. Chinese aid Exposition; Quon Mane exhibit.

Section C

1:1-2. Old mining days live again in **“Gold Gulch”**.

1:7-8, 2:2-3. Thrill rides, lions, midgets, two-headed baby, Dillinger’s auto on Amusement list.

3:6-7. Twenty-five tribes of Indians to live at Exposition.

Section D

2:5. Welcome Note is Hospitality House Theme: Atmosphere of Spacious Casa Achieved in Decorations, by Katharine Morrison Kahle.

In Hospitality House, the official reception building of the California-Pacific International Exposition, the women’s committee will act as gracious hostesses to the Exposition guests. It was the desire in planning the interior decorations of the building to give the rooms a feeling of welcome and the atmosphere of a comfortable spacious casa and at the same time keep all appointments consistent with the architecture.

Though the lounges and reception rooms of Hospitality House are being furnished in harmony with the Spanish-Colonial architecture of the building, they will not be replicas of old Spanish rooms.

Modern Antiques

Instead, the spirit rather than the letter of the period is followed in all the furniture, rugs and draperies and accessories. Color, line and texture suggest the ruggedness of the Spanish, yet at the same time a certain modernity is suggested.

Furniture and fabrics have been made to order

The large reception room, called the Sala de Oro, has gold for its dominant color. In this room, a gold rug and handsome, handwoven draperies of a beautiful golden tone set the color note, which is contrasted by upholstery and accessories in tones of light and dark peach and blue-green. Beautiful mirrors of Spanish design reflect the coloring of the room and a rare old Italian cabinet, the gift of Mrs. A. S. Darlington of La Jolla, an antique Mexican chest, and a pair of Mexican “Portero de Hostea,” used as lamps, set the atmosphere of the room. This is a formal yet comfortable room.

As In Mexico

The large reception room upstairs has a pleasant color scheme of blue-green, gold and old faded reds, set by the beautiful handwoven drapes and the painted chairs and cabinets. Plants growing in glazed pottery jars give the loggia the effect of the typical Mexican outdoor living room. From the loggia open two spacious decks, furnished in outdoor furniture and colorful umbrellas.

In addition to these large rooms is a tower committee room, a men's lounge, which is decorated in a rich color scheme of browns, tans and lacquer red, and a women's lounge, whose dominant note is a cool restful green.

All appointments of decoration, including linens, dishes and furniture, have been especially ordered for the building and are in harmony of color, texture and design.

Section D

2:7. Two Hostesses Daily Provided Sala de Oro - Miss Mary Marston, member of the Women's Executive Board, is chairman of the Hostess Committee, which will serve under the Board. Miss Marston's committee will provide two hostesses each day in the Sala de Oro, attractive lounge of Hospitality House.

Members of the committee include

Clinton Abbott	Paul Jennings
Robert Frazee	E. D. Miller
E. T Hale	Sam Sherman
Mary G. Hatch	W. L. Van Schaick
A. E. Holoway	
Anne Halliday	Mary Vivian Conway

Portrait: Offices of the Women's Executive Board are Mrs. Frank Frye Jr., secretary; Mrs. John Ward, first vice president; Mrs. Lorens Barney, second vice president; and Mrs. Clark Cavanaugh, third vice-president.

7:1. \$50,000 home featured on Exposition grounds; 12-room Monterey colonial dwelling open to public.

10:1-6. San Diego women saved former Exposition palaces.

Section E

2:1-8. Balboa Park beauties all man-made, by Richard Pourade.

11:1-4. Hard workers made Exposition.

publicity Release, San Diego, 1935: Plan for Sea Island Sugar Exhibit of Western Sugar Refinery, California-Pacific International Exposition.

LOCATION: This Exhibition is designed for a space approximately 71' x 95', located at the easterly end of Building #12 at the intersection of Avenida de los Palacios and the Avenue of Nations.

GENERAL CHARACTER: The area is divided into two main subdivisions: (a) the Theater and (b) the general exhibit space in which are located various exhibit items. The entrance to the Theater has been placed well back in the general exhibit area for the purpose of increasing circulation around the exhibits. The exhibit area can be reached either (a) from the aisle in Building #11, across a gang plank and onto a wharf suggestion (to create the impression of landing from a ship) or (b) the main aisle in Building #12. A principal element in creating the tropical island setting will be the cycloramic drop featuring tropical verdure, mountains, etc. The foreground of the cyclorama consists of actual plants (both real and artificial) and rock (paper mache) formations, possibly with trickling waterways, ferns and other appropriate items. The columns of the building are to be made to simulate palm trees.

Set out some three feet from the base of the cyclorama will be a native style, thatched roof hut, the walls of which will largely open to afford a view of the background. The front of the hut will be a low stage

on which will be exhibited the large size replicas of the toys featured on the sugar bags. These figures will pass across the stage with varying characteristic movements.

To the left of the foregoing will be a display of actual sized dolls, such as can be made from the patterns on the containers. These will be sold for a nominal figure, mailing facilities being provided. A placard can suggest that the toys can be obtained without cost by purchasing the 10 pound bag of Sea Island Sugar which has the figures printed thereon.

To the right as one descends the gang plank will be shelves for a display of Sea Island packages. In this general area tables and chairs may be placed. These will undoubtedly prove inviting to foot-weary visitors. These might lend to the Sea Island idea by having beach umbrellas over the tables.

To the south of this area is located the Cooking Demonstration. This will be surrounded by a counter at which refreshments will be served, probably at a slight charge. While at the counter the cooking demonstration can be observed.

Much atmosphere would be created by the introduction into the scheme of various tropical birds and a few monkeys. These would have to be located with due regard, both for their own safety and that of the public. It might be possible for the monkeys to be dressed in suits giving them the appearance of animated Sea Island sugar bags. The attention-attracting power of these features, particularly the monkeys, would be great.

THEATER: In the course of a conference relative to this exhibit, Mr. Tupper mentioned the striking success of the theatrical method of presentation at the recent "Century of Progress" at Chicago. In view of this experience, the present scheme features a small theater, seating about one hundred and fifty, in which can be shown both the educational motion pictures which it is desired to present, as well as other entertainment as may be desired. The general scheme is to attract attention by means of entertainment given on the balcony near the aisle and main entrance to the building/ During this entertainment, either by placard or voice an invitation will be extended to attend the presentation to be given in the theater. While the people are entering the entertainers can reach the stage through an overhead passage way and continue to entertain the audience until the time to show the film. On leaving the theater, the public will again traverse the exhibit area.

San Diego Union, May 21, 1935, 1:7, 2:4. Construction of major Exposition projects nears completion.

San Diego Union, May 21, 1935, II, 1:5. Mrs. Paul Maiss, general chairman of the Women's Civic Hospitality Committee, will operate the model house in the Plaza as the Hospitality House for Exposition visitors.

San Diego Union, May 22, 1935, 1:7-8, 2:5. Exposition hits homestretch as opening looms week ahead.

San Diego Union, May 22, 1935, 1:4-5. **Zoo** is host to two Bactrian camels brought from Kansas City.

San Diego Sun, May 23, 1935, 1:5-6. Exhibit palaces sold out, Exposition finances good, all bills paid.

San Diego Sun, May 23, 1935, 5:6-7. "Fix-it" brigade smooths path for Exposition officials; David N. Millan heads Public Relations Committee.

San Diego Union, May 23, 1935, 12:1. **Ford** by-product plant miniature arrives for Exposition.

San Diego Union, May 23, 1935, 12:7-8. Gigantic map nearing completion as part of **Ford** exhibit.

New York Times, May 24, 1935, 23:5. Ford Building appears in the center of the Fair stamp.

San Diego Sun, May 24, 1935, 1:6-7. 10,000 workers speeding Exposition for opening.

San Diego Sun, May 24, 1935, II, 13:1. Exposition parking plans strike legal snag; Byers rules against lots in parks; Commission is split.

San Diego Union, May 24, 1935, 12:2-3. Exposition Excerpts.

San Diego Sun, May 25, 1935, 1:6-7, 2:6-7. Two million tickets sold in advance for Exposition.

San Diego Union, May 25, 1935, 1:3-6, 2:4-5. Plans for Exposition opening announced.

San Diego Union, May 25, 1935, 12:1-3. **Standard Oil Tower to the Sun** will be dedicated today.

San Diego Union, May 25, 1935, 12:5-6. Village of 52 historic buildings in miniature added to **Ford exhibit**.

Los Angeles Times, May 26, 1935, III, 10:1. Film History Exhibit to Be in Spotlight; cinema folk to hold many parties on first night, by Sylva Weaver.

San Diego Union, May 26, 1935, 1:1, 2:5. Exposition opening will be broadcast to 75 million; two national chains book four programs.

San Diego Union, May 26, 1935, 4:5-7. Acres of beautiful flowers, lighting effect on foliage, constitute one of Exposition's dazzling spectacles, by Ada Perry.

San Diego Union, May 26, 1935, 11:1. **Ford Bowl** gets most powerful organ in world.

San Diego Union, May 26, 1935, II, 1:2. Art decorations tell vivid story of **California State**.

San Diego Union, May 26, 1935, II, 12:1. Cast to enact plays of Shakespeare at replica of **Globe** theater.

San Diego Union, May 26, 1935, II, 12:3. **Model Infantry Unit** to set up Exposition camp; to be situated on Midway adjoining Indian Village.

New York Times, May 27, 1935, 6:5. Mexican president Cardenas has invited Luis Rodriguez to represent him at the San Diego Fair; he leaves tomorrow; Monte Alban jewels leave tomorrow night.

San Diego Union, May 27, 1935, 1:2. Skeleton found on Exposition ground with bullet in skull.

San Diego Union, May 27, 1935, 1:6-7, 2:3. 4,000 racing against time as Exposition's deadline nears.

San Diego Union, May 27, 1935, 1:6-7, 2:3. Exposition clean-up crew ready; builders leave, last nail pounded in; crowd due.

San Diego Sun, May 28, 1935, 1:8, 3:2-3. Exposition ready; dress rehearsal set for tonight.

San Diego Sun, May 28, 1935, 3:1-4. **Nudists** frolic for laws OK.

San Diego Union, May 28, 1935, 4:1. EDITORIAL: A Proud City - These visitors of 1935 will see a great Exposition. Those who look beyond it can see a proud city, secure in its pride.

DESCRIPTIVE GUIDE BOOK

of the

CALIFORNIA-PACIFIC INTERNATIONAL EXPOSITION

at
SAN DIEGO, CALIFORNIA

1935

Published by
American Autochrome Co.
300 West Grand Avenue
Chicago

The Exposition grounds occupy 300 acres in Balboa Park, famous as one of the five most beautiful parks in the world. The park is the center-point of San Diego and covers an area of 1,400 acres of mesa broken by canyons. It is bounded on the east by 28th Street, on the West by Sixth Street, on the South by Date Street, and on the North by Upas Street.

In 1915, the Panama-California Exposition was held in Balboa Park.

All of the permanent buildings of that Exposition, which are of Spanish Renaissance and Spanish Colonial design, are utilized as exhibit palaces in the California-Pacific International Exposition. Added to these are many new structures, bringing the number of buildings to more than 100.

The architecture of the Exposition has its origin in Mexico which developed a type of Spanish-Colonial adapted to the climate and temperament of Mexico. A wonderful architecture exists in Mexico of cathedrals, public buildings and palaces of the great families. This architecture shows Aztec and Mayan influences most noticeably in its Baroque ornamentation. Indian artisans were capable of most intricate and luxuriant carvings which they lavished on the surfaces of blank walls. The polychrome tile, rich fabrics, and the painting and gilding of statues are products of their skill and artistic taste. It was this combined Mexican, Aztec and Mayan versatility that inspired the architecture of the San Diego Exposition.

The new buildings of the Exposition are located mainly on the Palisades and include the Palaces of Electricity, Transportation, California State, Federal Building and Hollywood Hall of Fame. These buildings are a combination of the two oldest and most typically American schools of architecture, the ancient Mayan and Indian Pueblo. Planes, heavy overhanging cornices and a rounded treatment of all corners are featured throughout. The buildings present a picture of startling simplicity. Vast, unbroken surfaces and sparsity of detail and of right angles give a picture that is close to that found in native-American villages.

The Exposition section of the park is laid out in the form of the letter "S." An Amusement Zone provides the top of the "S," exhibit palaces occupy the middle portion, and the lower portion is devoted to recently-constructed exhibit palaces and to industrial buildings.

To accomplish color and decoration architects allowed plants and flowers to grow on the exteriors of the newer buildings. They achieved decorative effects through the contrasting shadings of plants as they climb or cluster across the faces of buildings or trail from cornices and from troughs on the roofs.

Thus the Palace of Electricity takes its color scheme from the compensating greens and lavenders of trailing Lantana and the Palace of Transportation is adorned by the brilliant yellow and green of the climbing ice plant.

CABRILLO BRIDGE

The western approach to the Exposition grounds is over the Cabrillo Bridge to the arched gateway of Science Tower. Cabrillo Bridge crosses Cabrillo Canyon, one of the canyons that cut deep gashes into Balboa Park. The bridge with its approaches is 1,505 feet long and has a span of 450 feet and a height above

Laguna del Puente of 110 feet. In the lagoon are water lilies, rushes, pampas grass and bamboo. Beautiful lawns, trees, shrubs, and luxuriant foliage characterize the park west of the bridge. Slender Italian cypresses mark the approach to the bridge and groves of Acacia Baileyana, clothed in spring with aromatic plumes of golden yellow, embower the entrance to Tower of the Science of Man.

TOWER OF THE SCIENCE OF MAN

The Palace of the Science of Man was the California building at the Exposition of 1915-16 and is considered to be one of the finest examples in the United States of Spanish-Colonial architecture. The approach to Science Tower over Cabrillo bridge has been compared to the approach to Toledo, over the river Tagus. The Tower is the outstanding architectural feature of the Exposition, its warm gray belfry stories rise 200 feet to a tiled dome with a wrought-iron weather vane. The tower gleams in glazed and colored tile, its walls of warm gray reflecting the sun.

Science Hall has a facade rich with broken moldings and crowded with ornaments like the cathedral fronts of old Mexico. The sculpture of the frontispiece is the work of Furio and Piccirillo [sic] and constitutes an historical hall of fame. The rich, exotic Churrigueresque carvings frame figures of the discoverers and founders of San Diego and California and their sponsors. The figures are those of Father Junipero Serra, Cabrillo, Vizcaino, Father Jayme, first martyr of the San Diego mission, Father de la Ascension, who accompanied Viscaino, Vancouver, first English navigator to enter San Diego Bay, Portola, the first Spanish governor, and Charles V and Philip II of Spain. In the design of the frontispiece are incorporated the coats of arms of Spain, Mexico, Portugal and the United States and the conventionalized state seal.

The Hall of Science is in the form of a Greek cross and suggests a cathedral. The dome is embellished with a rich mosaic of tile in gold, blue, green, yellow, jet black and white. Surmounting the dome is a lantern of rare beauty. In many respects the building suggests the historical cathedral of Oaxaca, Mexico. The late Bertram Goodhue was the architect.

Viewed from the gardens in the rear are seen low domed pavilions in the angles of the transepts and the half dome of the apse covered with colored tile.

Saint Francis Chapel is in the Hall of Science and many blushing brides and bridegrooms have been married before the beautiful altar and reredos. Elaborately modeled, gilded and colored, the reredos extends from the crown of the barrel vault of the shallow chancel. A carved statue of Our Lady and Child, brought from Mexico, occupies a place of honor. On the right is a statue of San Diego de Alcala.

SAN DIEGO MUSEUM

The western entrance to the Exposition is through an archway in the walls that suggests the gates of a Spanish fortress and opens into the California Quadrangle. This quadrangle was made up of the California and the Fine Arts Buildings in 1915-16 and now houses the permanent collection of the San Diego Museum.

The main floor of the Palace of Science (former California Building) is devoted to Mexican and Central American archaeology. Here are seen replicas of the Mayan monuments, cast from the originals in the thick jungles of Guatemala and Yucatan. These monuments, often weighing several tons, are elaborately carved with hieroglyphics and portraits of important personages. They are especially fine examples of the stone-cutting art, and were made by a people who possessed neither steel nor bronze. Among the reproductions are a model of the palace of Uxmal, Yucatan, and another of the Temple of Sacrifice in Chichen Itza, Yucatan. Here Maya priests performed rites of human sacrifice. Here too is a copy of the ancient Aztec calendar stone and the very newest type of calendar produced by a San Francisco firm: the Eternal Calendar Corporation, 57 Post St.

Small clay and stone figurines, pottery and other ethnological collections from the same region are also found here. On the main floor are also life-sized models of Indians in various occupations, mining and working copper, quarrying obsidian and stone, making arrowheads.

Jessop Archery

In the upper galleries is the Jessop archery collection, probably the finest of its kind in the world, numbering 5,000 pieces and containing comparative types of bows and arrows and other weapons used in the far corners of the earth.

The collection offers bows, arrows, armor and shields from such widely separated places as China, Burma, Korea, Japan, Guinea, Africa, New Zealand, Australia, Germany and the American Indian villages.

The tiny poisoned darts of the African pygmy tribes contrast with the mighty cross bows of German warriors of medieval times.

One of the outstanding weapons in this collection is a bow used by the giant Mongols who were ruled by Genghis Kahn. Of the reflex type, it requires a pull of 100 pounds and can send an arrow 500 feet, or through a three-inch plank.

Second floor exhibits are devoted to North America. The balcony shows the Indians of Southern California. This collection is the most representative, authoritative and complete one covering this territory and was made possible through the receipt of government grants, in 1929 and 1930. Other second floor exhibits represent Egypt, Greece, Asia and the South Seas.

MUSEUM OF ANTHROPOLOGY

The southern end of the quadrangle contains the Museum of Anthropology. Here are shown, in casts from living subjects, the various races of mankind, also the development of individuals from childhood to old age. Life masks and busts are of males and females of American Indian, Eskimo, Mongolian, Maori, Malay, Australian, Bushman, Negrito, Pygmy and Zulu origin.

An important section consists of plaster portraits and skeletal casts of extinct prehistoric peoples.

Peruvian Trephining

The skill of ancient Peruvian surgeons is revealed in an intriguing display of the operative surgery known as trephining, which consists of removing a piece of bone from the skull. Aboriginal surgeons performed this operation successfully.

A comparison between the Peruvian skulls on display here, and the medical records of the Civil war, indicates that ancient Peruvian surgeons were more successful in trephining than army surgeons during the Civil war.

Included among the skull exhibits is one with a bandage in position, as left by a primitive surgeon. The roll is cotton gauze and resembles modern surgical gauze in texture.

More than 60,000 specimens of stone tools are housed in the anthropology wing of the museum, adjacent to the exhibit on the evolution of man.

More than 100 stone tools, some of which are 200,000 years old, were recently added to the permanent collections. Included are those of Cro-Magnon, Neanderthal, Piltdown and Neolithic species. They were obtained from the Field museum, Chicago.

SCIENCE HALL

Science Hall, on the north side of Avenida de los Palacios, fronts on Plaza del Pacifico. The frontispiece of this tower is taken from the Church of San Francisco in Puebla, Mexico. This wing has two flanking bays projecting over the portales and enclosing a patio. From one corner rises a stair turret, Moorish in characters, its top bright with black and yellow tiles. At each end of the patio a faun spurts water from his mouth into a pool of feathery bamboos and magnolias. At the southeast corner of the patio is a picturesque balcony high up on the bare expanse of wall with iron grills and rich sculpture.

Bell Telephone

In a specially constructed section of the Palace of Science is a series of exhibits of the American Telephone and Telegraphy Company, brought here from the Bell Telephone laboratories.

These include the "speech inverter" by means of which the speaker's voice is "scrambled" into a meaningless jumble, applying the general principle of telegraphic and radio code to the spoken word, and then delivering the speech, after "unscrambling" it, in proper manner to the receiver.

Another of these telephonic wonders is the oscilloscope, a device that reproduces sound in light waves across a darkened screen, affording each visitor an opportunity to "see" his own voice.

A third interesting device is the magnetic recorder, whereby telephonic conversation is recorded on ordinary telephone wire instead of employing records or sound films.

Monte Alban Jewels

One of the most valuable exhibits in the entire Exposition is that of the Monte Alban jewel treasures, presented by the Mexican government. Archaeologists found these heavy gold rings and necklaces and crystal cups in an ancient tomb near Oaxaca, Mexico.

Palace of Photography

The eastern end of this hall is called the Palace of Photography. Here is held the Fifth International Salon of Photography, staged under the auspices of the Camera Enthusiasts and Pictorialists of San Diego.

Distinguished boards of judges will make awards in the various groups, which include pictorial, scientific, natural color, transparencies, professional portraiture and commercial photography.

The salon is regarded as the most important event of its kind to be held in the United States this year. Gold and silver medals and ribbons will be awarded in all classes by John Sirigo, official photographer of the Exposition.

ALCAZAR GARDENS

These gardens are between San Diego Museum and the House of Charm with a Mission-style campanile facing the Avenue of Palaces. They are a reproduction of a section of the gardens of the Alcazar in Seville, Spain, and are ablaze with beautiful blooms. From the Gardens, a rustic bridge leads to the million-dollar Spreckels outdoor organ, the Ford Palace and the Music Bowl. Sightseers find this rustic bridge affords easy access to every part of the Exposition grounds.

HOUSE OF CHARM

The House of Charm adjoins the Tower of Science and is joined to it by a delightful pergola. This was the Russia and Brazil building in 1915-16 [sic]. Its main facade is on Plaza de los Estados [sic] and consists of a central arch flanked by two bell gables resembling the Sanctuario de Guadalajara in Mexico,

Between the Children's Palace [sic] and Science Tower are the beautiful Alcazar Gardens. The entrance to these gardens is at the north east corner. Here is a Mission-style belfry and beyond it is the tile domed tower of the building in yellow and blue. The gardens overlook Palm Canyon.

In the field of fashion and beauty aids, women will discover a wealth of exhibits in the House of Charm. They will want to see the demonstrations of cosmetics, coiffeurs; study the latest in gowns, furs, shoes, novelties; and view the animated pictures that are offered daily in the auditorium. The parades of beautiful girls, adorned in the latest frocks, and the moving picture shows will attract both sexes.

PALACE OF FINE ARTS

Facing on the Plaza del Pacifico is the beautiful Palace of Fine Arts, which first opened its doors on February 28, 1926. William Templeton Johnson, architect, designed the palace. Ornamentation of the building belongs to the Plateresque period of Spanish renaissance, many of its main features finding antecedents in the University of Salamanca, Spain.

From the facades of the palace, the stone faces of Cabrillo, Vizcaino and Vancouver [sic], doughty explorers of bygone centuries, gaze over Balboa Park. [sic] Just above the doorway is a shell, designed to honor the memory of Saint James (San Diego) [sic], whose body, according to legend, was deposited by the sea on the shores of Spain.

On one side of the shell is a figure modeled after Michelangelo's statue of David; while on the other side is a reproduction of Donatello's statue of Saint George, who slew the dragon.

Above are two small ships representing vessels in which Columbus sailed from Europe to discover the New World. In circles above the ships are the busts of Ribera and El Greco, , Velazquez, Zurburan and Murillo are represented by full-size statues in three niches.

In the next panel above are the coat-of-arms of the United States, flanked by those of the Kingdom of Spain and the State of California. Above is the head of Father Junipero Serra.

In the first room of the building the visitor will find a combination of laces and fabrics of all sorts, and glass and ceramic ware. The central feature is a glorious Flemish Renaissance tapestry, wherein the Queen of Sheba and her retinue arrive to meet King Solomon.

One of the unique treasures consists of four panels of lace specimens: Venetian rose point; French point d'Alencon, Flemish Mechlin work, Irish crochet, Buckingham all pillow-made lace, and several of the best types from old Spain.

An assemblage of medieval and other decorative furniture and artistic furnishings comprise a magnificent arrangement in gallery No. 2. It might be called the room of the Spanish Retable of Saint John.

The Oriental room contains an almost unique group of some 35 objects of glazed pottery from old Korea.

In the Palace of Fine Arts, special stress is laid on the best work of the great Spanish artists. Paintings by El Greco, whose best work was done in Spain after his successive emigrations for Greece and Italy; by the de Zubiaurres, deaf and dumb Basque brothers, whose work will live long as art endures; by Sorolla, Zuloaga and other great Spanish artists attest the appreciation of the Exposition art directorate for Spanish painting. Beautifully painted is the Spanish scene called "Daughter Maria in the Gardens of La Granja" by Sorolla.

Another Spanish painting of international fame is Zuloaga's full-length portrait of "Antonio La Galega" in her dress of violet-black and silver and of deep rose red. Other well-known masterpieces by the Basque, Valentin de Zubiaurre, are of the old "Golden Wedding" couple and "Abuelos" (Grandparents).

The great art of Spain, Flanders, Germany, France, Italy, Holland and England awaits the visitor in the second of the two largest galleries in the building. There are saints, members of royalty and other secular figures by El Greco, Coello, Rubens and Zurbaran of Spain [sic]; "The Holy Family," by Rubens, and a "Mystic Marriage of Saint Catherine," by an unknown Fleming; a colorful Saxon courtier by Cranach of Germany; landscapes by Corot and Courbet, religious altarpieces from Old Italy, and figures by Maes, the Dutch friend of Rembrandt, and by Sir William Beechey of England.

ARTISTS OF THE AMERICAN SOUTHWEST

In this group will be found the work of Albert Bierstadt, Toby Rosenthal, Thomas Hill, Maurice Braun and William Keith. The German-born Bierstadt's "In the Yosemite Valley" has been borrowed from the New York Public Library for the duration of the Exposition. Rosenthal's "Cardinal's Portrait," subject of much critical acclaim, is also hung in the Palace of Fine Arts. Maurice Braun has made the Southern California scene the locale for many of his impressive landscapes. A number of these are the property of the San Diego Gallery. William Keith, best known for his "Golden California," is also well represented. Modern Americans, in addition to the Western artists already mentioned, include George Luks, Winslow Homer, George Bellows and Robert Henri.

CAFÉ OF WORLD

The Café of World is at the northeast corner of Plaza del Pacifico and was the Pan-Pacific building in 1915-16. Its ornate architecture suggests the urban palaces of the City of Mexico and recalls the house of the Counts of Heras in that city. The two symmetrical corner towers of the Café of the World and House of Hospitality, facing each other across the Avenue of Palaces, are modeled after that of the Palace of Monterey at Salamanca [sic]. The arcades of the Café are beautifully adorned with trailing brilliant bougainvillea and other vines.

HOUSE OF HOSPITALITY

The House of Hospitality resembles the Hospital of Santa Cruz at Toledo, Spain. Emblazoned on its exterior walls, its corner tower and arcades are the coats of arms of the countries of the Pan-American Union. This was the Foreign Arts building in 1915-16.

Visiting dignitaries will be received and entertained in the House of Hospitality, one of the most sumptuously furnished buildings in the Exposition grounds. The building houses studios of the interior decorators and artists who created displays and exhibits for the Exposition. In this building, too, there is an auditorium of 600 capacity for movies, music and plays.

Visitors will find pleasant spots in which to rest in the several lounges and on the roof garden, and there are banquet halls, private dining rooms and a bar.

There is a public café and outdoor dining terraces in and around the building. This building serves as headquarters for the federation of state societies.

Important rooms in the House of Hospitality, on both the first and second floors, open onto an arcade overlooking the inner court, which was copied after the famous convent patio of Guadalajara, Mexico. The centerpiece of the central fountain of this patio is a statue cut from a 1600-pound block of limestone by Donal Hord. The figure is that of an Indian girl, seated, with an olla in her lap from which water falls into the pool below.

Through the frescoed arches in the rear of the House of Hospitality appear the terraced paths and verdure of a replica of the famous Casa del Rey Moro gardens of Ronda, Spain. This is the finest garden in all of Spain, with its alabaster fountain, grotto, lily pond, quaint old well, seats and pergolas.

BOTANICAL BUILDING

One of the most popular attractions of the Exposition is the Botanical Building and the Lagoon, variously called Laguna de las Flores and Laguna del Espejo, but, whether you call it the Lagoon of the Flowers or of the Mirror, it is a Lagoon of Beauty. It lies between the Café of the World and the Palace of Foods, and leads to the Botanical Palace. From the Café and the Food Palace, little corner pavilions in a Spanish-Renaissance style, with Baroque sculpture, border the lagoon. In the lagoon, the vegetation increases in density to a tropical luxuriance at the upper end. Around the pool are grouped Blackwood acacia, Grevillea, camphor, araucaria, eucalyptus, and lotus.

The botanical palace is a high-arched structure of steel arches and redwood lath covering. In the rear is a glass house. It contains a great number of specimens of tropical and semi-tropical plants, palms, bamboo, banana and ferns, vines, tree ferns, crotons and dracaenas from South America.

PALACE OF BETTER HOUSING

The Palace of Better Housing is connected with the House of Hospitality by a tile-covered corridor that joins the arcades of both buildings. The architecture of the palace is reminiscent of the Casa Consistorial at Palma, Majorca, Spain. In the cornices of the roof is the brilliance of bright blue, red, green and gold in a soffit frieze. This building was the Canadian building in 1915-16 [sic]. Along the west side of the palace is a walk that skirts the edge of a deep canyon lined with eucalyptus and Pepper trees.

In the 36,200 square feet of floor space of the Palace of Better Housing are gathered hundreds of exhibits having to do with real estate development, home ownership, home building, with types of architecture, and with construction and building supplies.

One of the most interesting exhibits is that of the F. J. Hansen Co., Ltd., Real Estate and Land Developers of La Mesa and San Diego, California. This Company shows a motion picture that tells the story of building in California since the day when Juan Rodriguez Cabrillo first landed in San Diego.

The movie indicates how Father Junipero Serra struggled to found a chain of missions in California, the first of which was Mission San Diego de Alcala --- the ruins of which can still be seen --- and contrasts an irrigation ditch built by Indians under the direction of the Spanish padres with San Diego's present, vast water-delivery systems. In a similar manner, the crooked burro trails of the early days are compared to modern broad highways.

Another interesting feature of the F. J. Hansen Co. exhibit is an animated display showing the operation of a modern avocado farm.

Other exhibitors in the building are: Bowers Manufacturing Co, Inc.; Naomi E. Cleaves; Church of Jesus Christ of Latter Day Saints; F. E. Compton & Co., Encyclopedia Britannica, Pacific Coast Division, Goodwill Industries; Anna Ketonen, Nassau Pen and Pencil Co., W. F. Quarrie & Co., Rosicrucian Fellowship, Salvation Army, Mrs. J. Ware; Western Union; Foreign Antique & Art Co., Bowen Unique Handicraft; Bookhouse for Children; Gefroj Studio; I. Jacobson; Pacific Union Conference Seventh Day Adventists; Standard Sanitary Manufacturing Co.; Ganna Walska-Jules Riviere Parfum; Morbeck of London, England.

The Radio building is adjacent to the Palace of Better Housing and Exposition news items are broadcast from there.

FEDERAL HOUSING ADMINISTRATION

In the beautiful glade south of the Palace of Better Housing, the federal government has a visual exhibit showing the great benefits and opportunities offered by the FHA (Federal Housing Administration).

Modernization Magic

The first phase of the FHA exhibit is described as “Modernization Magic,” a dramatization of improving of buildings under maximum loans of \$2,000.

This presentation consists of a community of about 30 poorly designed, antiquated buildings in need of repairs.

In the space of ten minutes by means of a dramatic, mechanical operation, the scene changes from that of a dilapidated old town into an improved, modern community.

Model Town

Another phase is the presentation of “Model Town,” a community of fifty six miniature model homes, designed to show the newest and best types of residential construction.

There are twenty four one-story houses and twenty four two-story houses of varied architectural styles and plans, ranging in construction costs from \$300 to \$7,000. There are several steel houses and a group of modern-type houses. Side walls are of wood siding, shingles, stucco, brick, concrete and steel. Roofs are of shingle, tile and other materials.

Suggested floor plans for all the houses are presented for visitors to study.

This is the largest and most comprehensive exhibit ever conceived and executed by the Better Housing Program of the Federal Housing Administration.

PALACE OF FOODS AND BEVERAGES

The Palace of Foods and Beverages is one of the largest buildings of the Exposition. Its facade on the Avenue of Palaces is a two-story arcade between flanking pavilions suggesting 18th century architecture at Queretaro, Mexico. The east front on the Avenue of Nations has a chapel facade with two flanking bell towers with domes and tile and iron finials and an elaborate frontispiece. The building is polygonal, like a great convent, with the apse projecting toward the Botanical gardens. At the south side of the choir, a little patio is recessed into the building. A sanctuary entrance is at the apse end, with a choir and bell turret above. A memorial to Father Junipero Serra is in the chapel.

The building is a one-story structure with three floor levels that are connected by ramps.

The greatest assemblage of food and beverage exhibits ever shown under one roof is displayed inside the building. Everything having to do with foods and beverages --- from the newest patented can opening gadget to the marvels of operations in bottling companies are demonstrated here.

A complete cake baking exhibition occupies one corner. In another, the whirring machinery of a Coca Cola bottling plant produces a filled and ready-to-market product every second. The latest methods for canning and packing foods are shown. In fact, everything pertaining to foods and drink --- the principal necessities of human life -- are attractively shown in this building.

Coca Cola

Placed at the main entrance so as to be visible upon entering is a “Fountain of Light.” “Water” falls in graceful curves through successive silver basins until four silver dolphins spray the water into urns set for it at the corners of the service bar, where bottled Coca Cola is sold. The “water” is formed by a mesh, set with multitudinous crystals, and is illuminated by incandescent lamps so placed that they reproduce the illusion of flowing water.

Standard Brands

Dioramas and models carry the story of Standard Brands products to housewives and, simultaneously, show grocers and bakers the most effective way to present them to the public. In addition, the Company furnishes stage entertainment. Among the brands are Fleischmanns' Yeast, Chase and Sanborn's Dated Coffee, Tenderleaf Tea, Royal Baking Powder and Royal Deserts.

AVENUE OF PALACES

The Avenue of Palaces is the main boulevard of the Exposition and extends from the east entrance on Park Boulevard to the west entrance at Cabrillo Bridge, nearly 700 yards long. Lining it are the Palace of Science, House of Charm, House of Hospitality, Café of the World, Food and Beverages, Modern Homes, and Natural History. It is a broad esplanade with rows of pleached Blackwood acacias set in formal order. Banked against the arcades and faces of buildings are shrubs, vines and flowering plants. Arcades, or portales, in Spanish-Colonial style, adorn the facades of the palaces and vine-covered pergolas that connect the buildings. These provide sightseers with places to promenade and to rest.

PALACE OF NATURAL HISTORY

The first building encountered at the east plaza entrance is the Palace of Natural History. This building is of reinforced concrete construction with "restricted" (?) Baroque ornamentation and of Spanish-Colonial design. It contains two floors, a basement and a large laboratory.

This splendid museum was thrown open to the public in January, 1933. The San Diego Society of Natural History, which operates the museum, is the oldest scientific organization in Southern California and the second oldest in the West, having been incorporated on October 9, 1874.

Once inside the door, visitors find themselves in a bower of living beauty; for, right at the entrance, the museum has placed a display of California wild flowers. Tables bearing fresh, blooming flowers, on either side of the doorway, are replaced continually.

The ground floor contains representations from the earth and from "waters under the earth." Here are minerals, fossils, fishes, whales and creeping things like reptiles and amphibians.

The floor above, or main floor, is devoted to birds and mammals, two groups the public esteems most.

Top floor displays include botanical exhibits and many varieties of butterflies and insects, as well as other features.

While there are 876 specimens of mounted birds on exhibit, there are 11,500 birds in the research collection. The ratio for mammals is 277 to 9,250; for insects 1,700 to 165,000; for plants 1,559 to 14,500, for reptiles 181 to 5,458; and for shells 4,700 to 115,000.

Civilian Conservation Corps

The important work of the Civilian Conservation Corps is presented in the Palace of Natural History. It occupies 5,000 square feet. Forestry and other outdoor aspects of CCC work are illustrated by the exhibits that have been installed in the palace.

Lost Continent of Mu

A hydrographic relief map, a feature of the museum, spurs the interests of seekers of hidden knowledge regarding the mystery and romance of the lost continent of Mu. Four years were required to gather data and to make this map, the only one of its kind in existence.

Under the direction of Captain Claude Banks Mayo, the scientific staff and crew of the U. S. S. Ramapo made 17,239 sonic soundings to ascertain the topographical features of the ocean bed. To do this, from 1929 to 1933, they sailed over a 7,000 mile stretch of the Pacific Ocean from California to Manila. In doing so, they discovered two deep spots, where Mount Everest --- the world's highest peak --- could be submerged and still have thousands of feet of water above before touching the ocean's surface. These were Nero Deep and Ramapo Deep, the latter named for the U. S. S. Ramapo.

The map shows the presence of a continental shelf off the coasts of North America and Asia. The ocean floor near North America is comparatively smooth while, in the part closest to Asia, it is broken by ravine-like formations and by mountains.

The hypothesis that once there was a bridge of land from China to Mexico is partially strengthened by oceanic contours in this topographical reproduction.

According to some scientists, the lost continent of Mu --- which presumably existed 13,000 years ago and covered a great portion of the South Pacific Ocean --- had its northern boundary near what is now the Hawaiian Islands. The southern boundary was north of New Zealand and northeast of Australia. It measured about 3,000 miles from north to south and 5,000 miles, east to west.

The "sonic sounding" hydrographic process is an outgrowth of World War experiments. As contrasted to earlier methods of sounding by cables, "sonic sounding" is obtained by measuring sound impulses projected to oceanic depths by oscillators.

TAOS PUEBLO

An Indian pueblo at the north border of the Exposition consists of reproductions in stone [sic] of Zuni and Taos pueblo habitations that rise, tier upon tier, above one another. Rooms are accessible only by ladders that lie on outer walls.

Southwestern Indians weave baskets and rugs, fashion pottery, jewelry and weapons and carry on the business of their daily lives within the pueblo.

Visitors can see some of the Indian's religious rites and ceremonial dances. One of the buildings in the pueblo is a kiva, or underground chamber, where solemn celebrations and councils are held. Indian women may not enter the kiva, but white visitors may. The entrance to the dark chamber is by a ladder that leads down from an opening in the roof.

Representatives of Hopi, Moqui, Ute, Navajo, Apache, Mission and other tribes and groups perform centuries-old dances and ceremonials of a religious, or nearly religious character. Matrimonial and burial rites and other aspects of Indian culture are depicted vividly and faithfully.

Since 1920, the San Diego Area Council of the Boy Scouts of America has used the Indian Village as its headquarters. The San Diego Council had a membership in 1934 of over 3,500. During the Exposition, camping facilities have been set aside for the 70 Scout troops of San Diego City and County and for visiting scouts from the United States and from all over the world.

SPANISH VILLAGE

North of the Avenue of the Palaces and on the Avenue of Nations lies Spanish Village, the largest village of its kind ever built for an American Exposition. More than 40,000 mission tiles were used to roof its buildings, which cover about 90,000 square feet.

The cheerfully picturesque and informal architecture of Spain --- squat aches, antique wood beams, sturdy buttresses and corbels --- predominates. Wishing wells, backed by olive trees, are scattered about, surrounded by a riot of blooms. Flowers in pots hang from walls.

Brilliantly hued awnings, lamps of wrought-iron, and hand-made tiles add to the color scheme.

Open-faced stalls in inviting courts offer interesting bits of old and new merchandise.

In the spacious patio restaurant is a wishing well copied from one in the house of Conde Rule at Valencia, Spain. The restaurant serves appetizing Spanish dishes.

The north portal in Spanish Village was inspired by the Puerta del Castillo de Sigüenza in Spain. Clustered around the base of the tower and bordering a small plaza with seats and a central fountain are a few shops, such as might grow outside the city gates of Spanish towns. Olive trees and potted flowers add color to the scene.

The art and culture of Old Spain and Mexico, the commodities, interests, methods and customs of the people are presented. Senoritas perform dances from their native regions and sombreroed senors demonstrate their skill in crafts.

Japanese Tea Room

Quaintly garbed Japanese girls serve delicious brews, stimulating tea and rice cakes in a location set back to the north between the Botanical and Food Products building.

AMUSEMENT ZONE

The Midway is a kaleidoscopic city of merrymaking. It is 1,200 feet long and 350 feet deep, has a 40-foot pavement and a frontage of 2,400 feet. Concession buildings comprise a medley of architectural shapes and styles. Taken altogether, attractions on the Midway have an estimated value of \$1,500,000.

Midget City and Midget Farm

Gulliver's travels never led him to a more bizarre land than Midget City and Midget Farm where the inhabitants are more than 100 Lilliputians.

Built to doll-house scale, the bungalows, hotel, restaurant, telegraph office, gas station, grocery store, butcher shop, and the office of "Midget City News" accommodate the reach and stride of the little people, whose ages range from 18 to 60 years. Many of the midgets weigh less than 20 pounds and the smallest is 18 inches tall.

One of the world's most famous couples resides in Midget City. They are Captain Werner from Berlin, Germany, who is 18 inches in height, 29 pounds in weight, and 22 years of age, and Margaret Ann Robinson from California, who is one inch taller than the Captain, weighs 18 pounds and is 18 years of age. Their betrothal was announced in Chicago last year and they will be married with pomp and ceremony in Midget City.

Midget Farm, designed along Spanish-Colonial lines, is a novel creation. A midget farmer, his wife and farm hands operate this establishment. Midget cows, chickens, hogs and horses move about the grounds while planted lots produce midget corn and grain. A parade of tiny wagons and a buggy, once owned by the famous Tom Thumb, are housed in a midget shed.

Midget City is in the center of the Midway and Midget Farm is about one block north.

"Days of Saladin," is an equine display that features 14 blooded Arabian horses from the W. K. Kellogg ranch at Pomona, California. Frank Binninger produces this show.

Venetian Glass Blowers

Opposite Midget City, the atmosphere of Venice, Italy --- city of canals --- is transplanted to the Exposition. Here Royal Glass Blowers demonstrate the skill that has won them acclaim. The workmen learned their trade at the Venice and Murano Company, located in the Barbarigo Palace on the Grand Canal in Venice. Aside from the art work produced by its glass blowers, the Royal Factory presents a priceless collection of modern and medieval glassware.

Other Midway attractions include: Miss America, Flea Circus, Sensations, Crime Does Not Pay, Life, Two-Headed Baby, Snake Farm, Darkest Africa, Freak Animal Show, Ripley's Believe-It-Or-Not, Globe of Death, Laff in the Dark, Toyland, Lens Wonders of the World starring "Stella," Loop-O-Plane, and Swooper Ride.

The Nudist Colony is located at the head of Gold Gulch on the southeast side of El Prado.

HOLLYWOOD POTTERIES

The Hollywood Potteries of Los Angeles constructed its exhibit building opposite Spanish Village on the Avenue of Nations. Here the company shows early and new methods of making clay pottery.

ZOOLOGICAL GARDENS

Housing more than 2,500 specimens, the Zoological Gardens, opposite the Midget Farm, is second in importance to the Bronx Zoo in New York. And the Bronx Zoo leads only in number of animals. Mrs. Belle Benchley, the curator of the Zoo, is the only woman zoo keeper in the world.

Visitors find the open grottos for bears and cats and the artificial mounds for sheep and goats to be the most remarkable of all the animal enclosures.

In descending order from the top of a canyon, the open grottos house American brown and black bears, grizzly bears, Galapagos fur seals, Kodiak bears, polar bears, a Pribilof fur seal, Alaska black bears, Siberian bears, a harbor seal, African lions, California sea lions, tigers and elephant seals from Guadalupe.

Animal Kingdom

This year the Zoo is displaying many baby animals. These include two families of baby lions, a pair of baby Bengal tigers, a trio of Siberian bear cubs, a young ocelot, and a number of baby deer, antelope, buffalo, goats and sheep.

Animals recently added to the Zoo include a tapir, a sloth, a pair of Pacific coast land otters, three Siberian bears, a striped hyena, a Nubian ostrich, and a male orangutan.

Highest Bird Cage in the World

The Zoo has the highest bird cage in the world with a height of 95 feet. Eucalyptus trees, Australian pines and acacias, growing inside the bird cage, offer high-flying birds shelter and nesting places, while low-flying or ground birds find accommodations in caves and crevices in the cement walls or in low-growing shrubs. Birds within the cage who breed and raise their young include anhingas, Australian brush turkeys, cranes, egrets, flamingoes, frigate birds, gallinules, green pea fowl, herons, ibises, rails, tree ducks, and Victorian-crowned pigeons.

The floor of the cage drops with the side of the hill and takes the shape of a series of ledges containing pools that are connected by a rivulet. Man-O'-War birds with a five or six-foot wing-spread and egrets and roseate spoonbills circle overhead, the large cage having sufficient space to allow soaring.

About 50 species of water turtle inhabit the pools. They range from the small-neck turtles of Australia to mud turtles of Europe and Africa. The group also includes several kinds of American turtles.

Vying in number of specimens with the water turtles and surpassing them in size, land tortoises at the Zoo range from box turtles [sic], weighing a few ounces, to a 500-pound Galapagos tortoise.

Mountain Gorillas

Brought back from the Belgian Congo by Martin and Osa Johnson, two mountain gorillas at the Zoo are the only mountain gorillas in captivity. They are six years old, weigh about 250 pounds each, and have yet to reach their maximum weight. Before they sold them to the San Diego Zoo for \$11,000, because of better climatic conditions here, the Johnsons turned down an offer of \$17,000.

SHELL OIL

Located on the Avenue of Nations, south of Spanish Village, the Shell Oil Building where travel information is dispensed. An exhibit sets before visitors a huge map with vari-colored neon tubes that form the principal highways of the United States..

THE MODEL HOME

On the Avenue of Nations a \$50,000 Model Home, opposite the southern end of the Amusement Zone, is surrounded by beautiful plants. The home is completely furnished and will be given away as first prize in a contest when the Exposition closes. Companies that made this exhibit possible include Washington Elger Company (plumbing supplies); Masonite Corporation (floor and wall boards); El Rey Roofing Company (roofing); Price Pfister Company and Rheem Manufacturing Company (builders' supplies); and Barker Brothers (home furnishings).

SPRECKELS OUTDOOR ORGAN

An outdoor organ faces the Plaza de los Estados at the south end of the Exposition's main cross axis.

The organ and colonnades are the gift of John D. and Adolph B. Spreckels. Harrison Albright, an architect, designed the pavilion in which the organ is located. The organ itself was built by the Austin Brothers of Hartford, Connecticut. It is the first outdoor organ to be built anywhere as scoffers thought that an outdoor organ was impractical.

The even-tempered climate in San Diego has made it possible for the outdoor organ to be played year round. Carefully-kept records from 1915 to the present show that there have been about 10 days a year when the organ could not be played because of unfavorable weather.

The organ has a pedal manual and four complete keyboards. A peristyle on both sides of the central organ pavilion is of Neo-Classical design with many decorative features suggestive of ancient Greece.

A garden wall, some distance from the organ stage, separates the Plaza de los Estados from the esplanade leading down from the Plaza del Pacifico. A fountain in the center of the wall was inspired by a fountain in Chapultepec Park, Mexico City.

Concerts are played at the organ daily by the San Diego civic organist and visiting organists.

HOUSE OF PACIFIC RELATIONS

The House of Pacific Relations is not a single house. Instead it consists of 15 cottages in a Spanish-Mediterranean style that are arranged around an open meadow. They are located southwest of the Spreckels Organ. Small enclosed gardens, patios, courts, covered porches, fountains and a wishing well, copied from one in Ronda, Spain, convey an informal atmosphere. A lily pond surrounded by a rock garden in the central court is an attractive feature.

The fifteen cottages, dubbed “haciendas,” are occupied by people from foreign lands such as the British Empire, Czechoslovakia, Denmark, Germany, Italy, Yugoslavia, Norway, Portugal, Cuba, Mexico, Japan and China.

The Exposition constructed the buildings and then turned them over to the participants on the condition that they present programs typical of their home countries on two days during the Exposition. The programs will consist of dances and folk songs.

STANDARD OIL COMPANY OF CALIFORNIA

The Standard Oil building is located on the large plaza in the Palisades opposite and northeast of the Ford building. It has the shape of a “L” and is surmounted by a circular tower divided into four sections. The tower is about 110 ft. tall and carries on three faces vertical “Standard Oil” signs. Decorative relief on the outside of the building is derived from Maya and Aztec prototypes.

The building is an important link in the pageant of architecture around the great open plaza in the Palisades. Its irregular shape, tall tower, and fascinating designs mark it as one of the most beautiful --- if not the most beautiful building in the Palisades. Seven large murals, depicting western scenery, on the lower level enhance the building’s beauty and indicate the themes of some of the exhibits inside.

The finely-finished interior houses exhibits devoted to Standard Oil products and illustrates the uses they perform. The main exhibit, not directly related to Standard Oil, depicts dramatic scenery in the western National Parks of the United States.

PALACE OF EDUCATION

Four important groups have animated or static exhibits in the Palace of Education. They are American Association of University Women, California Teachers’ Association, congress of Parents and Teachers, and National Education Association.

The Palace of Education was the New Mexico Building in 1915-16. It shares the rough-beam protrusions and irregular walls that are hallmarks of Indian Pueblo buildings in New Mexico. Two belfry towers flank the portal of a church-like annex on the left. A second-story loggia, or tribunal, is over the ground-floor entrance. An enclosed court in the main building on the right and fine wood carving and ziggurat-type outlines around a fireplace are derived from similar features on Indian Pueblo churches and pottery at Acoma and Isleta, New Mexico.

The building contains large and small auditoriums, exhibit rooms and smaller utility rooms. These are arranged around a center hall, or theme room, that is dedicated to the progress of education. The enclosed center hall --- an open-air patio in 1915-16 --- contains models and dioramas that portray in a vigorous manner how education fosters art, history, science, beauty, culture and play. A mural across the west wall and a pool and fountain on the floor in front are intended to illustrate aspects of education.

Mrs. Vesta C. Muehleisen is responsible for the organization and presentation of exhibits. She has provided space for exhibits demonstrating the following specialized areas of education: special, rural, vocational, continuation, adult, college and university, homemaking, art, music, visual, and handicapped.

A nursery school in the basement of the Palace of Education, managed by Dr. Gertrude Laws, from the Bureau of Parent Education, is intended to aid parents in the care and training of babies. This project is sponsored by the federal government and is under the overall direction of Mrs. Rebekah Earle, supervisor of nursery school education in California, who is assisted by Mrs. Ethel D. Mintser, a San Diego expert in child care.

HOBBY CONTEST

An exhibit of hobbies in the Palace of Education shows how the wise use of leisure time develops character and ability. Realizing the benefits of hobbies, many school principals in California have conducted hobby contests in their schools.

As a stimulus thereto, winners of these contests have been chosen to represent their schools by showing samples of their work in the Palace of Education. They will be awarded additional prizes and medals for the most unusual hobbies in all classes and according to age and types of projects.

PALACE OF WATER AND TRANSPORTATION

The combined Palace of Water and Transportation Building is located southwest of the Organ Pavilion and northeast of the House of Pacific Relations. The Palace of Water, or northeast section of the building faces a garden distinguished by the plants and flowers of California.

The jointly-occupied building is rectangular in plan, is spanned by 96-foot trusses, and provides 27,000 square feet of exhibition space. Great, prow-shaped pylons suggestive of adventure and travel establish themes to be dealt with inside the Palace.

A panel in terrazzo of a Viking ship on the pavement is in front of the Palace of Transportation while a mural above the main door depicts phases of transportation.

Inside, the story of transportation in California from the Spanish ships that arrived in San Diego Bay in 1542 to streamlined automobiles of today is presented. There are miniature models of toiling oxen next to the newest automobiles, of clipper ships next to ocean liners, and of snail-paced "wood-burners" next to trains, such as the Burlington's "Zephyr" and The Union Pacific's flyers. All aspects of transportation including airplanes, automobiles, buses, ships, and trains are on display.

The exhibit showing progress in aviation travel is noteworthy. Here the early flying machines are compared to the latest streamlined sky cruisers. As might be expected, the display pays tribute to San Diego's role in developing aircraft from the infancy of the industry to the present.

In the Palace of Water section huge building programs, such as Boulder Dam, the Grand Coulee power and irrigation project, the San Francisco bay bridges, the All-American Canal and other public and private works, are illustrated and explained.

Exhibits on both sides of the building express the idea of progress, which the California-Pacific International Exposition has chosen as its theme. Here are presented four centuries of development in the West leading up to the present when mankind appears to be on the edge of a new era of prosperity, the like of which has never been seen before.

CHRISTIAN SCIENCE BUILDING

The Christian Science Building is located a few steps to the east of the Palace of Water and Transportation. Building and exhibit represent an investment of more than \$20,000. The building houses a Christian Science reading room, a display of the history of Christian Science that features the writings of its founder, Mary Baker Eddy, and an exhibit of the "Christian Science Monitor."

FEDERAL BUILDING

Located south of the Palace of Water and Transportation, the Federal Building contains the exhibits of over 20 departments of the federal government. The building's exterior has Mayan-type frets. It is said to be one of the finest Maya-Revival style buildings ever executed. Details on the principal facade were adapted from the Palace of the Governors in Uxmal, Mexico. Dimensions are 150 by 170 feet and walls are of

reinforced concrete. As there are no windows on the walls, lighting comes from transoms on the roof or from within.

Displays inside the building illustrate governmental operations and show how these operations have changed since the establishment of the U.S. Government in 1789, upon the adoption of the U.S. Constitution by the states of the union. A post office display depicts the progress of mail service from the days of Pony Express. The National Museum, also known as the Smithsonian Institution, shows artifacts relating to the pioneer history of the Southwest. A coin machine, part of a U.S. Treasury exhibit, demonstrates how money is made.

Facing the entrance on the northwest, a free-standing portico of Mayan design leads to a garden with semi-tropical plants, laid out as a parterre.

CALIFORNIA STATE BUILDING

The California State Building, built as a SERA project, is located between the Ford Building and the Hollywood Hall of Fame and west of the Firestone Singing Fountain. It has four large panels in low relief around the concave walls at the entrance and terrazzo panels below. An exhibit, "California's Government at Work," previews exhibits within the building. Dioramas show the two houses of the State Legislature in session, the Governor's office, the work of highway maintenance, financial activities, and other state functions. Practical exhibits show how the State responds to citizens' concerns. For example, an exhibit explains the need for natural resource conservation.

The State has allotted space to its 58 counties without cost. The county exhibits emphasize the commercial, industrial, social and tourist advantages of the counties for, business people and for visitors..

FIRESTONE SINGING COLOR FOUNTAIN

The Firestone Singing Color Fountain is located on the lower or south end of the plaza in the Palisades. The fountain is unlike any other in the world as jets of water rise and fall with the notes of music and colors in the water change from blue on bass notes to sparkling hues on high notes. Some of the world's greatest electrical engineers labored long to produce this effect. The fountain's base is 100 feet long and 15 feet wide. In tune with music, a diamond-like spray shoots 20 feet in the air as powerful light rays penetrate its misty waters. The varying velocity of the sprays and the changing colors add a visual dimension to the music that comes, as if by magic, from hidden loudspeakers.

The concerts are given daily and include instrumental and vocal music.

SIGHT-SEEING BUSES

Large, comfortable, tractor-drawn, semi-trailers, painted in brilliant colors, and each designed to accommodate 100 passengers, furnish transportation within the grounds. Each of the buses is named in Spanish for a bird and painted in a color scheme to correspond to its plumage. The names are "La Golondrina" (swallow); "El Loro" (parrot); "El Canario" (canary); "El Cardinal" (cardinal), and "La Paloma" (dove).

HOUSE OF MAGIC

Floyd Gibbons, a noted war correspondent, christened the House of Magic, a section in the Palace of Electricity. While on a visit to the General Electric Company research laboratory at Schenectady, New York, Gibbons was so amazed by the electrical experiments he saw there that he alluded to them in a radio broadcast as "The House of Magic."

The House of Magic is part of a larger electrical display sponsored by the San Diego Gas and Electric Company, the Southern California Edison Company, the Los Angeles Bureau of Power and Light, and the California General Electric distributors. R. L. Smallman, General Electric Company engineer from Schenectady, is in charge of the General Electric exhibit.

Thirty-minute stage presentations are given in a theater that seats 300. Lecturers explain how the spectacular effects in the House of Magic were obtained and a motion picture titled "Interesting Highlights on the Science of Seeing" shows the proper lighting fixtures to use for reading.

In a five-minute program in the "Talking Kitchen," a refrigerator, range and dishwasher talk to one another.

Other exhibits show how light transmitted over a beam can be used in place of radio waves; how corn can be popped by radio waves without the use of heat; how a "stroboscope" can make a propeller rotating at 1800 revolutions a minute look as if it is standing still; and how a cathode ray oscillograph can transform sounds into visual waves.

FORD BUILDING

Ford Motor Company exhibits are housed in a large, building in the shape of a Figure 8 that rises high over the city and is visible from Point Loma, on the far side of the harbor of San Diego. The building is so prominent, that pilots use it as a landmark. After the Exposition is over, the Ford Building will remain as a monument to the part the Ford Motor Company has played in transforming appearances and life in Southern California.

Court of the Pacific Nations

The "Court of the Pacific Nations" forms the small circle or top of the Figure 8. Visitors enter this court through the front entrance to the Ford Building. In the center are 12 dioramas that depict the use of motor cars in each of 12 Pacific nations. Flanking these, on the sides of the court, are 12 more dioramas, six on each side, that represent how the principal raw materials use in motor cars --- iron, aluminum, zinc, lead, copper, sillimanite, cotton, wool, soy beans, asbestos, and cork --- are produced or extracted from the earth.

Beyond the court, towering above six high glass doors opening into the industrial halls, are a pair of giant murals, 40 feet high, depicting the development of civilizations on lands bordering the Pacific Ocean.

The main building is divided into three industrial halls. In one of these halls, processes in the making of car parts from iron and steel are demonstrated; the manufacture and functioning of spark plugs and ignition wiring is explained; and the making from soy beans of oils used in motors and in paints is illustrated. It is from his successful conversion of soy beans into parts that Henry Ford got his idea of an "Industrialized Farm," that could produce and, in some cases, process parts needed by industries.

Magic of Science

A second hall houses displays of by-products manufactured by the Ford Motor Company, modern industrial devices, and a dark room with a stroboscope, X-ray photos, and an electric eye. Also in the section, mechanics and technicians tear down and build up a Ford V-8 engine, show how master gages are kept accurate to within two-millionths of an inch, demonstrate are various body designs for cars are tested, and explain the principle of the "rollover" chassis.

In a commanding position in the center of the hall are three historic Ford cars: the first car built by Henry Ford in 1893; the first Model A built in 1903; and the first Model T built in 1908. Sometime in June of this year (1935) the two millionth Ford V-8 made will be driven from the Red River Rouge Plant in Dearborn, Michigan to San Diego and put on display.

The third hall houses laboratory exhibits demonstrating the ends to which technicians go to assure the quality of Ford parts and exhibits of rubber parts, safety glass, and enamels that are used on car bodies.

The building has restrooms for men and women and four lounges. In the large patio, or open area within the larger of the two circles that make up the Figure 8, are two circular pools that are joined to form another Figure 8 with a flowered "V" running through both pools, thus completing the familiar "V-8" symbol.

At night concealed lights and flood lights illuminate the exterior of the building highlighting its concave surfaces while colored lights in the center patio paint the fountain and other patio lights focus on Ford cars.

FORD BOWL

In addition to the Ford Building, visitors to the Ford exhibits will find a 3000-seat amphitheater called the Ford Bowl that has been cut into the western slope of a hill. An orchestral shell covers the stage of the amphitheater. During the Exposition, the symphony orchestras of San Diego, Los Angeles, San Francisco, Portland and Seattle will perform in the Bowl.

So sharp is the slope of the hill that the top of the orchestra shell is on a level with the entrance to the Ford Building.

Verne O. Knudsen, who designed the Ford Bowl, claims it is acoustically perfect. He planned his design so that echoes would be eliminated, a condition common to outdoor amphitheaters.

The shell is 80 feet wide, 40 feet deep and 40 feet high. It acts as a sounding-board and a canopy for a stage that is 100 feet wide and 71 feet deep. A hedge grows in front of the stage, behind which are lights that are used to create color effects on the stage. The shell is also lighted.

ROADS OF THE PACIFIC

The Ford Building and Ford Bowl are located on the southern end of a promontory that is skirted on three sides by canyons. The irregular topography and contours of the canyons have been utilized as a site for "Roads of the Pacific," still another major Ford Motor Company attraction at the California-Pacific International Exposition.

Fourteen historic roads are reproduced in 200-foot sections, making, in all, a continuous route more than a half-mile in length along the sides of the canyons. Visitors may ride over the roads in new Ford V-8 cars. Each section has been landscaped to suggest the county in which the real road runs.

El Camino Real (the King's Highway), between San Diego and San Francisco, was traversed by early Spanish and Mexican colonists. The Santa Fe Trail, between Independence, Missouri and Santa Fe, New Mexico, was opened by American traders. Both roads were reproduced with packed and oiled soil and with plants and shrubs reminiscent of those on the original roads.

Appropriate landscapes were also created for the following simulations: the Oregon Trail, from Independence, Missouri to Portland, Oregon; the Yuma Road, from Yuma, Arizona to El Centro, California; the Cariboo Highway in Canada, from Yale to Barkersville; the Richardson Highway in Alaska, from Valdez to Fairbanks; the Gold Road in Panama, from Porto Bello to Old Panama; the Old Spanish Road in Mexico,

from Mexico City to San Blas; the Inca Highway from Quito, Ecuador to Chile; the Benguet Road in the Philippines, from Manila to Baguio; the Ballarat Road in China, from Peking to the Summer Palace; the Tokaido Road in Japan, from Tokyo to Kyoto, and the Great North Road in New Zealand, from Auckland to Wellington.

GOLD GULCH

Gold Gulch occupies a shallow, twisting canyon south of the Federal Housing Administration exhibits. It is reached by burros and stage coaches. The atmosphere and decor is that of a gold-mining camp going full blast.

Beneath a canopy of trees, shacks of miners and their hangers-on are made from old timbers, some of which were taken from decrepit mining towns. An old wooden door, warped by wind and rains, adds authenticity to the scene. A Chinese laundry, iron-barred bank, blacksmith shop, sheriff's office, jail, hitching posts, and shacks line the streets of the camp.

Men and machines throughout the camp perform tasks similar to those of free-lance gold prospectors. Recordings of western music, cowboy songs and sheet music are sold in a ramshackle building. Books are sold on Jackass Hill in a replica of a cabin used by Mark Twain. Workers in a rustic Navajo shop make jewelry and weave rugs and blankets. Visitors ride 1,000 feet into the earth by means of a mine-shaft elevator that offers a vertical panorama and a five-foot drop. The visitors emerge from a hole in the side of a canyon at the bottom of the drop.

Stage-coach hold-ups, athletic tourneys, whip-cracking contests, and other lively events are staged twice daily.

The memory of General John A. Sutter will be honored in the Gulch on Sutter Day. Other famous Californians will also be recognized on their special days.

OLD GLOBE THEATER

The Old Globe Theater is situated behind the Palace of Science. It is a reproduction of the Old Globe Theater of London in which Shakespeare's plays were performed during the reign of Queen Elizabeth. A similar reproduction had been built for the 1934 Century of Progress Exposition in Chicago, from which the idea and the actors in Balboa Park came.

Director Thomas Wood Stevens, who directed the theater at the Chicago Exposition, has rehearsed and staged condensed versions of eight of Shakespeare's works. These are: "Julius Caesar," "A Midsummer Night's Dream," "All's Well That Ends Well," "King Lear," "Macbeth," "As You Like It," and "The Comedy of Errors." Stevens also prepared "Doctor Faustus" by Christopher Marlowe as a supplement to the Shakespeare plays.

Except for the Marlowe play, the plays are presented without scenery and as close to the conditions of the original performances as today's scholarship will allow.

LIGHTING

The California-Pacific International Exposition offers a night scene not seen at other Expositions. Screens on concealed floodlights cast colors against buildings in that accent their architectural features. By way of contrast, other floodlights bathe trees and shrubs in soft colors.

Buildings and rides on the Amusement Zone are outlined by bright incandescent and sparkling lights.

In June and again in August, when the United States Fleet concentrates in San Diego, it is expected that the brilliant searchlights on the ships will make an illumination show, the like of which has never been seen before on the Pacific Coast.

BALBOA PARK, A TROPICAL PARADISE

Balboa Park, inside and outside the Exposition, contains over 300 species of trees, including rare as well as common specimens. Among these are rubber trees from Australian; cork trees from Spain, oaks from Japan, and palms from sub-tropical and tropical countries. The park has 40 kinds of eucalyptus, 35 kinds of acacia, and 15 kinds of pine trees, including a rare specimen from the Canary Islands.

Broad lawns stretch in all directions. Eucalyptus trees line walks and paths. Flower gardens add their special notes of joy in locations where they can do the most good.

The west side and central portions of Balboa Park abound with sub-tropical and tropical growths. Plants, which in many parts of the world grow only in hothouses, bloom openly in Balboa Park.

NOTE: The above guide was so poorly written and contained so many errors that I felt myself obliged to edit and correct passages while typing the guide for this collection.

TIME SCHEDULE FOR CBS-NORMANDIE BROADCAST, May 29, 1935

11:55	- 12:00	New York and Normandie
IMR NY - San Diego		
12:00	- 12:00-1/2	Mission Bell
12:00-1/2	- 12:01-1/2	Mixed Chorus "The Old Mission Bell"
12:01-1/2	- 12:04	California Tower - Panoramic Description

12:04	- 12:08	Spanish Village - Announcer & Jose Manzineras
12:08	- 12:09	California Tower
12:09	- 12:13	Gold Gulch - Announcer - Man-in-the-street - Music
12:13	- 12:15	California Tower - Describe north of Exposition grounds
12:15	- 12:22	Ford Symphony - Announcer
12:22	- 12:23	California Tower
12:23	- 12:26	Café of the World - Announcer & Del White Orch.
12:26	- 12:26-1/2	California Tower - Announce Roberts Band
12:26-1/2	- 12:28-1/2	Organ Pavilion - Harold Roberts Band
12:28-1/2	- 12:29-1/2	California Tower - Closing Announcement & Sign Off

Announcers will be at following spots:

California Tower
 Spanish Village
 Gold Gulch
 Ford Symphony
 Café of the World

11:55	- 12:00	From New York and Normandie
12:00		Whistle from Normandie
IMR		
12:00	- 12:00-1/2	Ringling of Old Mission Bell
12:00-1/2	- 12:01-1/2	Mission Choir singing "The Old Mission Bell"
12:01-1/2	- 12:04	To the California Tower

BRECKNER: Good afternoon, Ladies and Gentlemen. In the twinkling of an eye, the magic of radio has spanned an ocean and a continent. The mellow tones of the old Mission Bell afforded a striking contrast to the sonorous blast of the Normandie's whistle and took you back to that day in 1769 when Fra Junipero Serra, venerable founder of California's historic missions, hung that same bell from a convenient tree and sent its first call ringing out into the stillness of the valley.

At the moment we are located high up in the Tower of the California Building, right in the heart of Balboa Park in San Diego, where the magnificent California-Pacific International Exposition is all set to swing open its gates to a waiting world. Incidentally, this tower, designed by the late Bertram Goodhue, is considered to be the finest example of Spanish-Renaissance architecture in these United States. From our vantage point, we are looking out over a vast panoramic scene of rare charm and beauty. Out across the waters of the Pacific, the Coronado Islands form a protective bulwark for the famous "Roads" where Uncle Sam's mighty

battle force will drop anchor about ten days from now, to take part in the greatest Fleet concentrations in the history of the U.S. Navy. What a tremendous spectacle that will be.

Sweeping out from the shore in a wide graceful curve is Point Loma, sheltering Silver Gate. It might interest you to know that it was almost 400 years ago that the intrepid Don Rodriguez Cabrillo sailed his tiny Spanish galleon, the San Salvador, past Point Loma, thru Silver Gate and on into the Bay. This little act marked the discovery of California, and to you are historically minded, that event took place several decades before the founding of America's first colony at Jamestown.

But enough of history. Let's see what's here today. There's North Island, home of the army and navy air-force, on the outer edge of the harbor; right down in front of us, the towering buildings of San Diego's business district; and just a step across the street brings us into Balboa Park --- across spacious lawns, up and down dozens of winding trails, through many flowering gardens and shaded lanes --- and here we are at the entrance gates of America's Exposition - 1935. Books will be written about the sheer beauty of the setting, so it would be futile for use to attempt any descriptive fireworks.

But let's look at some of the buildings. Rising to a dominating height down at the Palisades is the circular Ford building with its 118,000 sq. ft. of floor space, down the hill and to the left is the Ford Music Bowl, where symphonic concerts will be presented twice daily; across the way is the California State building, the Motion Picture Hall of Fame, Palace of Education, House of Pacific Relations, Palace of Electricity and Varied Industries, Palace of Travel, Transportation and Water, the Federal Building, and many other buildings too numerous to mention. Swinging away from the Palisades and over to the East is the colorful Spanish Village. The streets are filled with gaily caparisoned natives of Spain --- surely there must be music down there. Let's transfer controls to the village for a few minutes.

12:04 - 12:08 Spanish Village. Jose Manzineras and Announcer.
Orchestra: Early Spanish Music (Very low background - slow buildup)

GOODWIN: (Talks over music) Here we are at the Spanish Village near the Eastern Entrance to the grounds. Those of you who have been in Spain will be instantly taken back to that sunny land when you see this bright spot. It was designed and built under the personal supervision of Juan Larrinaga, famous Spanish artist, and so you may know that it is authentic and correct to the minutest detail.

But there seems to be music in the distance. Let's stroll down this little street and pick up some of the atmospheric highlights. Nice smooth walking along this flagstone paving and the street's as clean as a whistle so we won't be stumbling over things. Fine substantial looking buildings --- heavy adobe walls --- tile covered roofs --- and would you believe it --- well, well. There's something that all the money in the world couldn't have installed. A whole flock of those pesky little mud-swallows have recognized home atmosphere and have moved in, taking complete possession of the under sides of the eaves. Well, these little fellows have picked themselves a good spot, because they are right next door to a very inviting looking Spanish café.

In a place of this sort you would naturally expect a lot of riotous coloring, and here it is in abundance, in these quaint little shops that display all kinds, sizes and shapes of pottery, rugs, drapes and tapestries. In fact, it seems that everything has been done to make this a real visit to a foreign land

But the rhythm of the music intrigues me. Let's slip thru this arcade over into the next street and see if we can't bring it in a little more clearly for you. (Music swells up to nearly full.) There they are, a group of young caballeros and senoritas in their native costumes, seemingly having the time of their lives. I'll try to get their leader over here and introduce him. (calls) Hi there, Jose! Would you come over here a minute?

Ladies and Gentlemen, allow me to present Jose Manzineras.

JOSE: (Greetings in Spanish)

ANNCR: And now say that in English.

JOSE: (Translates greetings)

ANNCR: Thank you, Jose. Now do you mind if we listen to your music for a minute

MANZINERAS ORCHESTRA: SPECIALLY ARRANGED SPANISH MUSIC.

12:08 - (Fade out orch. & switch to Tower)

12:08 - 12:08 TOWER

BRECKNER: Back here at our focal point in the California Tower and while you were listening to Jose Manzineras, we were watching an interesting sight. Right down below us is a building that, from here, looks like a huge doughnut. Closer inspection showed it to be a two-story building with open balconies facing the inner court --- little costumed puppets moved about in lively animation and then it suddenly dawned on me that it is that exact replica of the old Shakespearean theater in London, known as The Globe. A nice tie-in because that gives us a bit of Old England as well as Old Spain.

There is another phase of California history that is well portrayed here in the grounds, and that is the Days of '49. We can't see it from here because it is completely hidden in one of the many canyons that nature has cut in this big park. But to give you a close-up picture of that unique spot, let's switch down to the Gold Gulch.

12:09 - 12:13 to GOLD GULCH

Sound: Hillbilly Music - crowd music - blank shots.

LINKLETTER: Good afternoon, pardners, I'm speaking to you from the Old Stamp Mill, right in the heart of the Gold Gulch, the rip-roarin'st mining camp since the days of '49. Here, located in a genuine canon, heavily wooded and a quarter-mile long, are all the activities of the early mining days of California. This Old Stamp Mill is a ramblin', crudely built replica of the original mills, with hard-rock miners, dance-hall girls, and poker-faced gamblers busy entertaining the huge crowd of Exposition visitors who are flooding the camp. The canon at this point, and the main buildings of Gold Gulch are scattered around a sort of square or plaza, right in front of me. To the right is the weather-beaten Trading Post, Ike's Pawn Shop, and some Injun camps.

Across from them is the Marble Mine, and a real old time blacksmithing shop, where a black-bearded, mighty-muscl'd smithy pounds out the day's quota of horseshoes and chains. Farther on, I can make out the cockfight pit, the Cider Mill, and the Half-way House, where the prospectors stop for a drink and a free feed for their horses.

This whole Gold Gulch is a hilarious mining camp . . . the answer to a 49-er's prayer, and it's only three minutes on the hoof, jackass or burro from the main diggins of the Exposition. But the real feature of the place is that Gold Gulch is not a show --- it's real! You rub shoulders with characters like Gopher Joe, Screw Bean Benny, Liminatin' Lim, and Sheriff Lucky Oliver, whose badge reads: "You can do as you like . . . almost!" (Chuckle)

The whole atmosphere makes you want to discard flannels and necktie for a pair of boots and a Stetson sombrero. There is plenty to do with duels, holdups, lynchings, and gold panning for nuggets in the stream which runs right down the canon through the heart of Gold Gulch . . . and when someone hits the bull's eye at the shootin' gallery, all the lights of the town go out of a moment. This is a real prospector's Paradise on a perpetual holiday. Right in front of me, making its way through the crowd, is an old dog crawling down the dusty road on its belly . . . Say . . . Sheriff . . . Sheriff Lucky Oliver . . . will you come over a minute and help me out on this . . .

OLIVER: Sure thing, Pard . . . what'll it be?

ANNCR: Ladies and gentlemen, here's one of the most colorful of all our Western characters . . . Two-Gun Lucky Oliver, the Sheriff of Gold Gulch. Say, Sheriff, what's that old dog crawling down the road for? Wild bronco kick it?

OLIVER: Naw, why that's jest a candidate on his way to enter the laziest dog contest.

ANNCR: (Chuckle) Another one of your eternal contests, eh?

OLIVER: Sure . . . we have mule-swearin' contests, one-arm cigarette rollin', ropin', ridin', gold pannin', and shootin' competitions every day.

ANNCR: Do you expect any trouble from the bad hombres and tin-horn gamblers around here?

OLIVER: Wal, now, there might be a few lynchin's needed to quiet the boys down . . . but outside of a stagecoach holdup every couple of hours, we don't expect more than a few killin's here and there.

ANNCR: Thank you, Sheriff Oliver. Before I have to sign off, I'd like to get a woman's viewpoint of this bewhiskered wilderness. And let's see now . . . here's one coming up the stops . . . Pardon me, Miss, but would you assist me in this broadcast by telling the radio audience your impression of Gold Gulch?

WOMAN: I don't know what to say . . . everything is so different . . . I mean these old buildings, and all the bearded miners and . . . well, just the spirit of the place is so utterly unlike anything I've ever seen before.

ANNCR: You aren't scared by all these rough characters?

WOMAN: Oh, don't be silly . . . I think they're just divine. I'm going to spend the rest of the day here and see the Exposition tomorrow.

ANNCR: Thank you, Miss. And now, our time's almost up, and we'll listen awhile to our Hill-Billies before you take your next hop away from us here in historic old Gold Gulch. So-Long.

MUSIC

12:13 - 12:15 to California Tower

BRECKNER: Here we are in the California Tower again. We have changed our position to see what's doing on the north side of the Exposition grounds. Looking down the Avenida de los Palacios, lined from east to west with fragrant black acacias, are the permanent structures of Balboa Park. These truly beautiful exhibit palaces of Spanish-Renaissance and Colonial architecture are the House of Hospitality, Hall of Science, Palace of Fine Arts, Café of the World, Palace of Foods and Beverages, House of Charm, and Better Housing.

Just beyond is a new enclosure that is the most peacefully serene spot on the grounds --- it is the home of the Nudist Colony. Bet let's not linger there just now. A hurried swing to the extreme north edge of the Exposition grounds discloses the justly famous Balboa Park Zoo, with its cageless type open grottoes where the wild animals have homes that closely approach their native habitats. The Zoo covers a total of 180 acres, which is approximately the same amount of territory the Exposition proper embraces.

And right there, skirting the outer edge of the Zoo is the Zocalo, that's just a Spanish word of Aztec origin meaning "gathering place" and that's what it will be, for that ¾ mile stretch of odd-shaped buildings is the fun zone or midway, or whatever you may choose to call it. Would you like to hear the barkers and the other ballyhoo artists? O.K., let's try it. Here they are!

GOODWIN: (Ad lib introduction to barkers.)

(Fade in barkers who will be out in front of the studio, but leave the tower mike open so that announcer can pick up at any spot.)

Well, those leather-lugged lads certainly know how to sling their patter. But on thru the midway, or rather the Zocalo, and out to Indian Village, which is an exact replica of the well-known Taos Pueblo in New Mexico, that in the minds of many ranks as the original American apartment house. There is a wild mob of almost 200 native Americans over there representing 30 different tribes --- and will those Redskins make "Big Medicine: during this summer and fall?

Now, let's swing down to one of the real highlights of the Exposition; from the Taos Village at the northern edge, to the Palisades at the southern tip of the grounds; from the oldest building to the most modern structure.

12:15 - 12:21-1/2 FORD MUSIC BOWL

BULOTTI: We are now broadcasting from the Ford Music Bowl, where an audience of thousands is gathered to hear the opening concert of the San Diego Symphony Orchestra, conducted by Nino Marcelli. The Bowl is an outdoor amphitheater on the sloping side of a canyon with is white orchestra shell framed by a green background of rolling hills. As his contribution to this international broadcast, Mr. Marcelli has chosen the brilliant fantastic "Rhapsody Espana" by Charbrier. Mr. Marcelli and the San Diego Symphony Orchestra . . .

SAN DIEGO SYMPHONY ORCHESTRA . . .

BULOTTI: That was just a sample of some of the fine symphonic concerts that will be broadcast this summer from the Ford Music Bowl. Programs have been arranged for each afternoon and evening during the entire summer when symphony groups from San Diego, Los Angeles, Seattle, Portland and San Francisco will be heard. And during the week of July 19- 25 the famous Mormon Tabernacle Choir from Salt Lake City will be here to entertain.

But there's one spot right in the center of the grounds that we haven't even mentioned ---- it's the Plaza del Pacifico.

12:22 - 12:23 CALIFORNIA TOWER

BRECKNER: The cynosure of all eyes is the Arco de Provenir, or Arch of the Future, from which colored lights will play on buildings surrounding the Plaza. These lights in turn will be reflected in the two huge lagoons that flank the tower. I leave the resulting picture to your imagination. All around the edge of the Plaza is a heart-warming sight . . . little flower booths with gay awnings and a perfect riot of colored blossoms; each booth tended by a dark-eyed Mexican senorita in native costume.

Further along is the big out-of-doors Organ Amphitheater, with its hundreds of comfortable benches. And, speaking of benches, all over these grounds, in every nook and cranny, under shade trees, along cool arcades, in all the exhibition palaces, hundreds of chairs, seats and benches have been placed, affording ample opportunity for resting and visiting.

And now away to one of the brightest spots on the grounds, where joy will reign supreme at all times, and where a dull moment will never be able to creep in. Ladies and Gentlemen, the Café of the World!

12:23 - 12:26 CAFÉ OF THE WORLD

MUSIC: Del White Orchestra

STEIN: And here we are right in the middle of one of the brightest spots of the entire Exposition --- not only from the point of view of gay, pleasure-seeking throngs, but because of the unusual decorative scheme that has achieved something distinctive. As you step inside the Café of the World, you are instantly transported

to the central Plaza of a Spanish village. Your attention immediately focuses on the huge stone arch that marks the entrance to the village and, under the arch, Del White and his orchestra are enjoying the spotlight and giving us a bit of musical background for this descriptive persiflage. Cleverly-lighted scenes along the walls, and the huge blue, dome-like ceiling give the impression of Sunny Spain at its best. It has the appearance of a Fiesta and everywhere color upon color in a riotous pattern of systematic confusion, from the pastel shades of the china and glassware on the tables, up to the pink and green vine-covered walls of buildings around this Plaza, thru a shower of many-hued silken draperies from a score of balconies, all blended into an exhilarating effect. Opposite the orchestra a series of arches lead to a cocktail room, which, if appearances affect behavior, many a party will make merry in the Café of the World.

But, now on with the music. Let's listen to the pulsating rhythms of Amapola, played by Del White and his orchestra, and sung by Eben Coe, famous baritone soloist.

12:26 - 12:26 ½ CALIF ORNIA TOWER

BRECKNER: Slightly dizzy from the fast tempo of that last number, but still able to carry on, we are back here in the California Tower for a brief moment. Far down at the Organ Amphitheater a young army of musicians have assembled who have been organized as the Official Exposition Junior band. They're standing at attention, they're alert, they're ready for that downbeat from the baton of Hal Roberts, their leader. And there they go!

12:26 ½ - 12:28 ½ EXPOSITION BAND (Music to be selected)

(Music fades down and is background for closing announcement.)

12:28 ½ - 12:29 ½ CALIFORNIA TOWER

BRECKNER: (Roberts Band background music) And so we conclude the final chapter of this kaleidoscopic swing through the grounds of America's Exposition. A preview of some of the highlights that will be on display during the coming months for the thousands who will make this bright spot the mecca of their vacation trips. Exposition builders had but one thought in planning this project for the world to view --- - "This will be a better Exposition, must as 1935 is a better year". The shades of Juan Rodriguez Cabrillo, discoverer of this glorious country, and Fra Junipero Serra, founder of California's missions, looking down on this work in the land they found and settled, will see much to fill them with pride. This program, originating on the great liner Normandie, just off the coast of France, and concluding in San Diego, on the grounds of America's Exposition - 1935, was arranged by Special Features and Public Events Department of the Columbia Network. Your announcer is Gary Breckner. This is Columbia Broadcasting System.

San Diego Historical Society Research Library.

Letter, July 2, 1935, R. E. Craig, Comptroller, Barker Bros., Inc., to J. David Larson, Executive Manager, California-Pacific International Exposition, San Diego, Calif.

Dear Sir:

We regret very much that we are obliged to register a very definite protest to you as executive manager of the San Diego Exposition regarding the manner in which the leasing of space in the Palace of Better Housing has been handled.

If we had known that this building would be used for any other type of exhibits than its title indicates we would not have leased space for exhibit purposes. The building as it now stands is, in our opinion, a palace of religious sciences and costume jewelry concessions rather than a Palace of Better Housing. We have had innumerable criticisms for exhibiting along with this class of concession, and feel that the Exposition management certainly has not been mindful of our best interests since the lease was signed.

From the standpoint of traffic we believe that the building is perhaps the poorest one in the Exposition. Traffic that does get into the building is quickly dissipated by the type of concession housed therein.

We feel that our investment in the Exposition in the Palace of Better Housing and the Casa de Tempo house merit your utmost cooperation and consideration. If you will remember, we also furnished without cost to you the radio broadcasting quarters and the Press Club.

We are hopeful that you will accept our criticism in the spirit in which it is given, and that you will tell us frankly what we may look forward to for the balance of the Exposition.

Very truly yours,

BARKER BROS. INCOPORATED

KETONEN, Anna

Concessionaire

San Diego, Calif.
(Balboa Park)

OR 48 53 June 6, 1935

HISTORY

She is report single, is aged in the 50's, American born of German lineage, and came here recently from Washington, D.C., where claims to be operating in the antique and modern jewelry line, under the trade style of "LaFayette Gift Shop". Antecedent history has been requested.

She recently obtained a concession at the California Pacific International Exposition.

METHOD OF OPERATION

Located in Booth No. 50, Palace of Better Housing Building, at the California-Pacific International Exposition, she is retailing imported and domestic antiques, costume jewelry, silver filigree, tapestries and rugs.

FINANCIAL INFORMATION

Interviewed this date she refused detailed information, asserting that she had been established over a period of 20 years at Washington, D.C.

Merchandise at the concession would inventory between \$6,000 and \$7,000, fixtures of the establishment represent a cost of \$800 to \$1,000. Extent of liabilities is not known locally.

She has not as yet established banking connections locally, and pending receipt of antecedent information from Washington, D.C., quarters consulted withhold an expression pertaining to her worth or responsibility. However, it is known that at Washington, D.C., she is credited with a conservative worth of \$10,000 to \$20,000, for credit purposes, and has a satisfactory debt paying reputation.

Neutra, built entirely of steel with exposed portions coated with aluminum; air channels run through walls and when the heat of the sun warms them, it automatically starts a cooling draft; low-temperature electric heating element underneath the floors for warmth. San Diego Historical Society Research Library.

June 10, 1935. *Time Magazine*, "National Affairs" - CALIFORNIA: "Miracle of 1935"

When Chicago's Century of Progress opened two years ago, two enterprising Midwesterners of 19 sat up all night for the distinction of being the fair's first sightseers. Midwesterners, when they age and retire, make their way by thousands to Southern California. Hence last week bent, gray-headed Howard Jackson, a one-time publisher of Oshkosh, Wis., was the first man to hand his ticket to a sombreroed gatekeeper and pass through the turnstile at San Diego's California-Pacific International Exposition.

Situated on the brink of the Pacific, ten miles from the Mexican border, San Diego is a bustling city of 150,000 whose chief assets are one of the world's finest harbors, the adjacent rich resort colony of Coronado, the biggest West Coast naval station and Army, Navy and Marine air bases. From Chicago the city's resourceful businessmen borrowed their reason for having a fair this year. It was to represent approximately "four centuries of progress" dating from 1542 when Portuguese Navigator Cabrillo's ships entered the harbor. More realistic were San Diego's two main inducements to hold a fair: 1) to bait ten million tourists into the city before Armistice Day; 2) to put to some practical use 1,400-acre Balboa Park and the many permanent Neo-Hispanic buildings by the late Bertram Goodhue left over from the Panama-California Exposition of 1915-16.* Accordingly, the citizenry passed the hat to collection \$500,000 for organization expenses, concessionaires were invited to participate, the U.S. Government appropriated \$125,000 for a building, Henry Ford and Standard Oil erected two more, 32 foreign governments are represented in the House of Pacific Relations, and "a city of magic in a land of dreams" became California's latest attraction last week.

Notable was the official opening fanfare. Secretary of Commerce Roper was on hand to hope that the Federal exhibit would be "of educational value to the country." Undersecretary of State Phillips assured California that out of Japan's commercial invasion of the U.S. would come "a cooperative solution." Postmaster General Farley struck off a big 3 cent commemorative stamp which was sure to get him into more philatelic hot water because the most prominent feature was the Ford Building. And a 8 p.m. on opening day, President Roosevelt from Washington radioed that he hoped to get out to San Diego's show this summer. Following the President's address, the lights went on. "Chicago went in for brilliant glitter," San Diego's news-hawks had observed, "San Diego will aim at soft glow."

Under the soft glow of colored lights playing on bowers of palm and eucalyptus trees, a comfortable but by no means spectacular crowd of 25,000 began to see the fair sights in earnest. In the Palace of Science was many a 20th century industrial gadget and the original gold spike with which Leland Stanford joined the Union Pacific and Central Pacific railroads in 1869. In the Ford Bowl was playing the San Diego Symphony, to be followed throughout the summer by orchestras from Portland, Seattle, San Francisco, Los Angeles and the 250-voiced Mormon Tabernacle Choir from Salt Lake City. Mexico had again sent north its Monte Alban Mayan treasures. But the real fun was, as usual, to be had on the Midway.

Smuggled in a ravine was the "Gold Gulch Mining Camp," complete with an old-time saloon, ogling dance hall girls and some bearded characters in hickory shirts splashing in a muddy wallow with pans. Tabloid versions of Shakespearean drama were playing at "Shakespeare's Old Globe Theater," an old-time Chicago attraction. A concession called "The Hollywood Parade" exhibited Mary Pickford's curls, Charlie Chaplin's shoes, some old cinema sets, and bogus picture-making. A horse show called "The Days of Saladin" was featuring a gray stallion said to have been ridden by Rudolph Valentino, and in the Indian Village Chief Big Tree, supposed to have posed for *The End of the Trail*, went on view. Climax of the whole brummagem business was the "Zoro Gardens." There a bearded oldster in a G-string and a chorus of gauzy young female exhibitionists were conducting a "nudist colony." For 25 cents a spectator could stare at them, then go off among the trees, take off his own clothes, join the colony. A crowd of thrifty peeping-toms took in the whole show through the knot-holes of the surrounding fence.

All this was billed as "The Miracle of 1935" and San Diego was enthusiastically determined to make its fair a success. So eager was Mayor Percy James Benbough that all ranks of the citizenry should profit from the exposition, and all kinds of visitors should find the city hospitable, that last fortnight he called into the Chamber of Commerce Auditorium 225 local saloonkeepers, gamblers, bookmakers and dive-operators. In an hour's speech notable for its frankness, the one time police chief who also runs an undertaking establishment on the side, warned his listeners: "Don't let your money go to anyone who claims he can fix you at City Hall. We are going to get rid of the chiseler and the rat and we need your help If you insist on doing an illegal business --- and mind you, I am not telling you it's all right --- take your chances. . . . It will break you if you have to pay protection money and fines too."

Said President Martin Healy of the San Diego Liberal Businessmen's Association (bars, night clubs) "It's just what I wanted to hear."

Said Johnny Niehl of the Hercules Club, "I don't see anything wrong with the Mayor at all."

Said Herman ("The Jew Kid") Hetzel of the Gold Club: "It was a very sensible talk. He'll make a good Mayor. Bookmaking isn't really a crime."

*In competition with the great Panama-Pacific International Exposition held the same year at San Francisco to commemorate the opening of the Panama Canal. True to the tradition of Northern and Southern California rivalry, San Francisco will stage a world's fair in 1937 to mark the completion of its two new bay bridges.

NUDE & NATURAL, Vol. 14, No. 2, Fall 1994. Nude Living #10, 1962: Nude and Natural: Zoro Nature Park & Alois Knapp, 27-30.

Zoro's Pageant of Nudism at Two World's Fairs

In 1935, Nudism Had A Flair For Showmanship, by Fred W. Fox (illus.)

Caption: Alois Knapp, founder of Zoro Nature Park in Roselawn, Indiana, is pictured with some members including Yvonne Stacey (the girl nearest Knapp during the "Sacrifice to the Sun" showings at Chicago's world's fair of 1934. Yvonne later became Queen Zorine and the San Diego nudist pageant took its name from Zoro.

Caption: ZORINE OF ZORO hosted an excellent afternoon tea, evidence of the gentility of nudists, at the 1935 World's Fair in Balboa Park, San Diego.

Caption: The troupe pictured here donned some brief garments for the benefit of pre-exposition publicity for newspaper and newsreel cameras.

“NUDISM IS NOT LEWIDISM”: That pithy rhyme became the battle cry of Yvonne Stacey, the slender and beauteous violet-eyed brunette who by the time she was 25 had become probably the world’s most celebrated nudist of modern times.

If that sounds like a eulogy by a press agent so be it. I was the press agent for this vivacious and high-spirited girl who won fame internationally as Queen Zorine of the Zoro Gardens nudist pageant at the San Diego world’s fair of 1935.

There was much controversy --- and antagonism too --- that assailed Zoro Gardens. Queen Zorine, impresario-narrator Dr. Frederic S. Merrill and producers Stanely Graham and Nate Eagle before, during and after the summertime presentation in Balboa Park.

But in the perspective of the years that have followed, it seems to me that Zoro Gardens was the most singular and memorable enterprise to acquaint the public with nudism.

Queen Zorine

Yvonne Stacey was a dedicated apostle of nudism but she was not a fanatic. To her, nudism was never obscenity. She had an almost evangelical zeal to glorify it. She believed nudism had a divine origin, as exemplified in the Biblical passages of Genesis I:27,28. The true image of God could never be indecent she reasoned. Yvonne abhorred the poronography and pandering of the miscalled “nudism” of many burlesque and striptease shows.

When she departed from Balboa Park in the autumn of 1935 to embark upon a nationwide tour, Yvonne declared: “We have shown thousands the moral and physical benefits of nudism and we have destroyed the illusion that in God’s greatest handiworkd --- the human body --- there can be anything shameful.”

The physical benefits of nudism were demonstrated to her at an early age. Born in Missouri and schooled there, she had become a social worker after her graduation from Washington Univesity. During a visit to a married sister in Chicago, Yvonne was stricken by pneumonia and sent to a sanitarium. While undergoing treatment three that included sun baths, she met Dr. Alois Kanpp, founder of Zoro Nature Pakr at Roselawn, Indiana, about 65 miles southeast of Chicago.

Having gone into the sanitarium weighing 95 pounds and emerging healthy and strong at 115 pounds, Yvonee realized that living a clean life in the sunlight benefited both body and spirit. She became a member of the Chicago Nude Culture Guild, a group of young nudists who soon visited Roselawn. Yvonne joined Kanpp’s nudist park and visited it as often as leisure time from her job in Chicago permitted.

It was also about that time that F. Merrill Smith, a young impresario and publicist active in Chicago, prevailed upon Alois Knapp to foster a public relations program including a youth movement and forum appearances by Kanpp. Smith persuaded Knapp to invite Nate Gross, a Chicago newspaperman, to visit Roselawn. A series of articles by Gross entitled “Five Days in a Nudist Colony” were published serially and created popular interest in nudism.

These newspaper articles became the progenitor of the nudist pageants at both the Chicago and the San Diego world’s fairs, according to Smith. “Gross, a portly journalist who weighed 275 pounds, presented quite a sight as he scampered around Zoro Nature Park on his reportorial chores.”

Not long afte Gross’ stories were printed, the energetic young Smith, aided by Yvonne Stacey and several other nudist devotees, devised a publicity gimmick to impress officials of Chicago’s 1933 Century of Progress Exposition, who had rejected their proposition to stage a nudist show at the world’s fair.

The result was a bonafide nudist wedding, held in secret behind closed doors. Participating with the bride and bridegroom were Yvonne as a bridal attendant, Smith as a best man, a pastor garbed in a goatskin loincloth and four othersssss. The only other witnesses were newspaper reporters and photographers and newsreel cameramen. Knapp narrated the proceedings for the newsreels. Photos and movies were then shown all over the country and shook up an avalanche of publicity. Immediately other showmen on the fairgrounds became interested in possibilities of a nudist pageant.

Chicago World's Fair

Thus it was that in the final four months of the second year of the Century of Progress Exposition the nudist drama, "Sacrifice to the Sun God," became a big hit. For example, on Columbus Day in 1934 more than 114,000 persons passed through the turnstiles to view the newly created Queen Zorine (Yvonne Stacey) and her company in this spectacle.

Alois Knapp appeared as narrator for 22 performance but then withdrew leveled at him by operators of other nudist camps throughout the country. Yvonne and five other members of the Roselawn group continued, and Smith, who had adopted the more theatrical name of Dr. Frederick S. Merrill, took over as narrator in Kanpp's stead.

When the Chicago fair closed forever at the end of 1934 there already were bids from several showmen to take the nudist pageant to the California-Pacific International Exposition in San Diego which was scheduled to open on Memorial Day in 1935. Eventually an agreement was reached with producers Stanley Graham and Nate Eagle.

These two men had other shows, including the famed midget village, which they would move from Chicago to San Diego. But Smith (as we will continue to designate Dr. Frederic S. Merrill) and Yvonne didn't want their nudist show to be located on any midway with its burlesque shows and traditional raucous surroundings. Theirs would continue to be a dramatic presentation of nudism and not a striptease, they asserted.

It was further agreed, according to Smith, that only genuine nudists would be employed in the drama. However, Graham and Eagle countered with a proposal that only the nucleus of the show be transported from Chicago and that the rest of the cast be drawn from California nudist camps, thus cutting down on traveling costs. Yvonne and about five other members of the Roselawn colony, together with Smith, formed this cadre that came to San Diego. Four nudists from California subsequently joined them in the Balboa Park pageant.

Thereafter, when it was determined that some members of the augmented San Diego troupe of about 15 persons were not nudists but merely beautiful girls or theatrical performers, it caused some of the first friction between Yvonne and Smith on the one hand, and producers Graham and Eagle. It also raised cries of fraud from some West Coast nudist groups.

San Diego World's Fair

The locale chosen for Zoro Gardens in Balboa Park is an idyllic tree-shaded glen. Vestiges of it remain to this day, just inside the main gate to this magnificent 1400-acre municipal preserve.

Tiers of stone benches were built on the terrace behind a stone wall. From these seats spectators could gaze upon the grassy dell where Queen Zorine and her attendants moved about.

Zoro Gardens were remote from the bustle and din of the fair's midway. A small brook rippled through this sylvan amphitheater and there also was a miniature waterfall. Blossoming shrubs perfumed the night air and there were vari-colored moving lights projected from the high trees, the shrubs and gleaming across the floor of the glade. This fantasy of light was created by Hollywood's famed illuminating engineer, Otto K. Olesen. No Persian temple of old was ever arrayed more impressively than this modern counterpart.

On a knoll across from the audience seats and beyond the floor of the glen was an open-air kitchen where nudist maidens prepared dinner for their troupe. This obviously was just an atmospheric touch, for despite the electric range and refrigerator, no meals ever seemed to be forthcoming. However, the lovely cooks, primly clad in tiny aprons, seemed to be busy preparing the victuals and it was a side-scene that at least dished up many hearty laughs from the spectators.

Before and after the processional drama, which was about 20 minutes long, and was presented five times nightly, the nudist girls played volleyball on the grass, sometimes an impressive game of miniature golf, or just draped themselves prettily on the ground while they played checkers, read or gossiped.

“Sacrifice to the Sun God” was based on an ancient Persian legend of Zoroaster and the sun worshippers. Zoro Gardens in San Diego was named in honor of Kanpp’s Roselawn colony and also in tribute to Zoroaster. Queen Zorine’s name also was a derivative of both.

Narrator Smith did not appear in person. With dramatic effect and often extemporaneously, he broadcast a prologue to the drama and also described the meaning of nudism as related to modern life, extolling its physical and mental benefits.

When Yvonne Stacey and her troupe arrived at the railroad depot in San Diego about ten days before the fair’s opening, they were met by a great conglomeration of reporters, photographers, newsreel cameras, press agents, civic leaders and exposition officials. It is possible that some of them expected to see these folks from Chicago detrain clad in no more than their own epidermis. Certainly there was excitement in San Diego when it became known that a nudist show was to be in Balboa Park.

When Yvonne and her attendants stepped from the train all garbed in the smartest modes, there was a remarkable lessening of incipient panic when the welcoming throng beheld them.

In response to brief speeches of greeting, Yvonne smiled graciously and said, “Nudism stands for physical and mental health --- a body radiating with vitality and a mind open to respect and reverence for that body, our most precious possession, and a willingness to study its needs.

“Men and women in all walks of life take infinite pains to preserve the valuable qualities of their motor cars but they must trust to luck in the matter of their own physical health. We of the nudist colonies are not fanatics. We enjoy the glow of sunshine when it is warm and comforting, but on cold nights we put on clothing.”

During that summer Zoro Gardens became the most publicized attraction of the San Diego world’s fair and the focal point of its glamour was Queen Zorine, who always conducted herself with great poise, pleasing dignity and appealing charm. The night before the nudist pageant was opened, there was what we press agents call an “undress rehearsal.” It was attended by local law officers, jurists, clergymen and club leaders and others who might be expected to censure or attempt to stall this bold venture into public display of nudism.

The earnestness and talent of the performers won approval. In fact, after a while hardly anybody seemed to notice that the players were nude.

This pleasant undertaking had one disappointing interlude. That was in July when evangelist Aimee Semple McPherson was scheduled to come from Los Angeles and lead hundreds of her congregation in observance of their special day at the exposition. We had invited Mrs. McPherson to visit Zoro Gardens and she had given tentative acceptance. For benefit primarily of eager newspaper reporters, Queen Zorine had even planned a two-woman tea party in Zoro Gardens for her distinguished guest. But at the last moment Mrs. McPherson sent regrets that she would not attend Zoro Gardens during her tour of the fair. Although we were dismayed, this rebuff got Queen Zorine more nationwide publicity than might have resulted otherwise.

In late August, Yvonne and Smith parted company with Graham and Eagle. Picture postcards of the nudists and Queen Zorine had been put on sale at the Zoro Gardens gate and elsewhere. Smith and Yvonne termed this a breach of contract because they had not authorized sale of the postcards and were not being paid any of the proceeds from the sales. This, coupled with their earlier protest against the inclusion of non-genuine nudists in the Zoro Gardens troupe, caused Yvonne and Smith and others to quit the fair.

On Tour

When she departed from Balboa Park, Yvonne Stacey took away with her most of the glamour that surrounded that pageant --- the finest authentic nudist exposition ever presented to the public. They visited Hollywood briefly, then embarked on a nationwide tour that began at the Oriental Theater in Chicago. "Sacrifice to the Sun God" was staged in abbreviated form but not entirely nude. In succeeding years in theaters and night clubs this show was a moneymaker and got great popular response.

But if Yvonne Stacey had taken the real lure out of the Balboa Park show, she had also lost what the memorable San Diego attraction had given her --- the world's most enchanting natural pageant for a nudist pageant.

There was a nudist show in Zoro Gardens in 1936, the second and final year of the San Diego fair, but it lacked the luster of the original. Nonetheless, during two years Zoro Gardens drew more than 360,000 persons through its portals for a glimpse of nudism. During that time police had cracked down on burlesque shows on the midway that were deemed objectionable. It was obvious that suggestive nakedness was not in the same category as the nudist pageant of "Sacrifice to the Sun God."

The last time I saw Yvonne was in Hollywood in the autumn of 1935 when she was en route from San Diego to Chicago.

After many successful night club and theater appearances, Yvonne turned to evangelism. Smith, who served in the U.S. Air Force in World War II and was grievously injured in the Germans' buzz bombing of London, became a Chicago theatrical agent and impresario heading F. Merrill Smith Associates.

When I located Smith after many years, one of my first inquiries was about Yvonne. It was a shock to learn that she had died in 1954, succumbing to a lingering cardiac illness.

In the bedeviled lives of most press agents there come too few really great stars or selfless people with missions or celebrities who are honestly dedicated to their art or profession without vainglory or deceit. To me, Yvonne Stacey --- the nudists' Queen Zorine --- was one of the illustrious few. She remains a bright and glamorous star in my memory.

June 15, 1935. *Colliers*. "Tomorrow Comes to San Diego," by W. B. Courtney . . . excerpt

. . . You quit the Tower, to meet the living men whose enterprise and dreams of beauty made this holiday possible for you. There are many, of course, whose services are fully as devoted and valuable as those who are sung. It is our misfortune to have time only for power heads.

Juan B. Larrinaga, the artist, who spilled colors and floodlights and buildings with abandon over the 300 acres of Balboa Park that were set aside for the Exposition, scrambled them with mad joy, and then said presto and stepped aside and you saw by day a fairyland of ordered genius, and by night a quaking aurora. Larrinaga is a Mexican, who left home in Lower California at seventeen aboard a donkey and starved and fought his way from painting murals in Texas saloons and sets in border honky-tonks to a foremost place in western American stage and movie design.

Richard Requa, the architect of the Exposition, has added to the Spanish Colonial and Spanish Renaissance of the old fair, the American prehistoric ingredients of Aztec, Maya and Pueblo architecture. In his conception, he has patterned the steps along which architecture has developed from the most ancient expressions, to the most modern in our Southwest. He has had the witty courage to take advantage of the climate and gain adornment and coloring for his buildings by the use of living plants. Foliage not only binds the foundations to the ground setting; but flowers stream down from boxes hidden along the parapets so that the walls of every palazzo are vivid cataracts.

The Man Behind the Idea

Zack J. Farmer gathered the Exposition into his strong hands and hurled it over the deadline. He is the managing director. He is one of the extraordinary men of the Pacific Coast. You may not consider it a favor, but Farmer is responsible for your heaving heart so much about Los Angeles in the last decade. He organized community development thought up there; and persuaded the town's editors to declare truce in that one field --- a miracle when you reflect that in Los Angeles American journalism has reached its Bowery. Alone, he put over the Olympic Games --- which everybody said would be 1932's outstanding failure --- and turned a profit of nearly two million.

For the Coast, the San Diego's Exposition's success as a show and spectacle if nothing else --- was guaranteed when Los Angeles gave him leave of absence to come down here. Farmer is from Colorado. He is lean as an ear of Indian maize, dusty as a tumbleweed, with a homespun face. He likes to sit on a rock in the desert and mope. He has known the hatred and rancor of ranch-fencing warfare; he has known the peace that comes to a man who looks up from the desert floor to where sunset breaks on range peaks and spills down the slopes and fades there. He is a boy, a zealot, a visionary, a poet. He is brown enough to be a Hindu, and you think there must be something of the snake charmer in him; for he has blown on the flutes of grit and imagination and out of the green jungle of Balboa Park white spires have writhed, opalescent domes have swelled.

It will cost you fifty cents for each general admission to the Exposition grounds --- although I might rent you my pass for two bits a day. All the major "palacios" are free; while private concessions on the Midway and elsewhere will make you fork over ten cents or more each. You cannot take your car inside the grounds. Parking space will be available outside. Inside, busses patrol the main stems; but you won't need them unless you are infirm. The Exposition layout is in the shape of a letter "S" and you can take shortcuts through cool, shaded woods. Indeed, the principal assets of this fair are, first, its lush setting; and second, the completeness of its buildings.

Unlike Chicago and other fairs --- where, if you walked to the rear of the trim buildings, you found yourself looking into the unpainted innards; studding, cardboard, sawdust --- the San Diego Exposition is as callipygian as she is refined and elegant in profile. You will not have to roast on vast sun-griddled pavements. You will never be more than a pace length from shade. A hundred feet from walls that enclose the latest gadgets of science, you may lose yourself in primitive canyons; pick wild flowers with no cops to say boo; glimpse coyotes, or scare up wild bunnies. Take your camera; wherever you point it here an unforgettable picture will be framed. Remember to judge your exposures for Latitude 30 degrees.

This hardened old collector of world's fairs believes you gain from them in proportion to what you bring to them; and San Diego's Exposition, more than any other in my opinion, will reward you abundantly as you come with heart or mind open, or merely on pleasure bent. If you want a Midway --- there is one. Exposition midways change with morals and with the advance of entertainment science. This one will have familiar things, including peep shows that are just educational, mind you. It will have thrills, and rides and fakes; but it will also have Boulder Dam and Crime Never Pays, and lion and snake farms, and Alfie the homeless Mechanical Man.

If I were to tell you all the wonders and beauties, natural and feminine, that you will find you would not have to come to the fair and that would not be good for American business. One nobly thoughtful feature: you can sit your way down all through the Exposition. There will be 1,500 benches --- each large enough for eight Westerners, or six Easterners. There will be splendid gardens; faithful copies of the noted Casa del Rey

Moro backyard of Ronda, Spain, and of the Alcazar in Seville. There will be a Japanese tea garden and a Japanese school ship down in the harbor on a mission of friendliness.

In the Café of the World, which you will only think is al fresco, you may order the dish you liked best in Shephard's in Cairo or in the Foreign Club in Shanghai. There will be terrace and garden dining. Music, too. The Spreckels Organ, facing the Plaza del Pacifico, is unique, famous throughout the world. In the Ford Bowl you may sit on moonlit nights and see the hunched ridges of the Inkopah Mountains holding up the sky to the south; catch the sheen of the ocean on the west; and inhale the fragrance of the intervale carried to you by trade winds, as you listen to concerts by symphony orchestras.

A Trip Through the Fair

There will be special fiestas for each of the fair's 167 days. And there is no end of beautiful and imposing palaces --- "palacios," we call them out here, and the streets are avenidas. No doubt you, too, will pick up a few Spanish words. In the palacios you will find the usual demonstrations of homemaking, exhibits of travel and industry, and of art and science. In the Motion Picture Hall of Fame, you will see actual movies in the making, by Hollywood squads. In the \$350,000 Federal Building you will find more than twenty government department exhibits, including a post office in actual operation; and a Model Town in which you are instructed by the Housing Bureau in ten minutes how with a loan of \$2,000 from your government, you may convert a down-at-the-heels community into a fit subject for anybody's picture postcards.

Along the "Pacific Roads," with typical Exposition informality, you will travel in half a mile, through China, Japan, Hawaii, and the old Mexican treasure trail from San Blas to Veracruz. The Republic of Mexico, by the way, has one of the outstanding exhibits; including the priceless Monte Alban jewels, Maya antiquities sent in an armored car under the guard of Mexican soldiery; a show-off team of charros, trick horsemen; and the famous Tipica orchestra.

The House of Pacific Relations, a group of fifteen haciendas around a green plaza, will always remain for me the most seraphic picture the Exposition affords. These casitas are like patrician thoughts, given substance, and dropped to jell in emerald arbors. You might not appreciate what Cuba and Jugoslavia have to do with Pacific Relations, until you learn Pacific is used in the meaning of peace, not of geography. There is a suspicion the Nudist Colony might not be so pacific with holy men and police to pacify. The idea was to get genuine Nudists from their lairs in Germany and Indiana; but they would have nothing to do with commercialized exhibitionism. So these Exposition nudists are hirelings from the stage; but the result is the same.

The Exposition says it is all in the interests of good health, clean living, right thinking, and that the colony is really a semi-religious affair. Well, even though your worshipful faculties may be deficient, it will be worth your while to enter this amphitheater, deep in a sylvan glen, to see what Nudists do with their time besides play. I know a spot --- the top of the frontier express company blockhouse in Gold Gulch --- from which you can peep into the Nudist Colony.

In the Days of Forty-nine

Gold Gulch, by the way, is the most distinctive and truly authentic of the concessions. In it you may share the ribald fund of the Forty-niners. It covers twenty-one acres, close to the main gate of the Exposition, yet lost in a winding arroyo from which you may see, try though you will, no sign of modern life, no pole or wire; not even a corner of the rest of the fair. From the moment you board the ramshackle old stagecoach, or the pack burro, and rattle down the rough trail shouting, "Yip-pee!", you may have a very real illusion of moving down three-quarters of a century in time. Gold Gulch is a reproduction of a mining camp of '49; not just a set, but a living, actual lode-country post, where bearded miners are at work and you might see Bret Harte or Mark Twain any moment. Down here you can uncork all your suppressed desires to be mean and tough and ornery.

San Diego's California-Pacific International Exposition is not the largest the nation has ever known; but it is the most glamorous. You will not find here the most colossal this, the most stupendous that; your soul will

be touched, rather than your muscles. You will not perceive in this fair the bounce of Saint Louis', the ambition of Philadelphia's, the gusto of San Francisco's, the vastness of Chicago's; but you will be aware of the spunkiest fist the Far West has yet shaken at national economic bogeymen. You will discover the pioneer lilt of the Forty-niners and the homeliness of Middle West state fairs astonishing and strangely blended and translated for the first time into an International Exposition. You will be vastly entertained, mildly educated, wholly charmed. San Diego, convinced that exquisite Balboa Park, justifies all her claims as an international exposition city, has Browning in her backbone: "If you get simple beauty and naught else, you get about the best thing God invents."

Release, California-Pacific International Exposition, 1935: MAYA ARCHITECTURE,
author unknown.

Data taken from the book of this title by George Oakley Totten (Maya Press, 1926)

Long have we sought to be inspired in this country by ancient Greek and Roman architecture, the heritage of Europe, little realizing that buried deep in the dark jungles of the southern lands of the North American continent lie vestiges of an almost forgotten race --- a race that ran its course and died --- remains in temples, pyramids and palaces of a cultural civilization worthy of the highest consideration.

At the time Imperial Rome was dazzling the ancient world with the brilliance of its entertainments and the magnificence of its architecture there flourished on this side of the Atlantic a nation with an architecture so fine and a civilization so brilliant as to even rive Rome in its barbaric splendor.

This people, the Mayas, aptly called the Greeks of the New World, founded their civilization in Guatemala and Honduras and later, during what might be termed the Renaissance period, moved to Yucatan, where they built magnificent cities: Uxmal, Mayapan and Chichen Itza. Then death claimed its toil and Maya art was dead. No, not dead, but only slumbering, because art eternal never dies. It slumbered to be awakened at some distant date by the young and vigorous people of the north, whose privilege is [or] should be to take the work up where Maya left off and carry on. May we now experience the beginning of the second Renaissance of this great classical American architecture.

While we have no date as to when this remarkable people migrated to lands where they produced their architectural masterpieces, the earliest recorded date found on their structures was about 96 BC. However, it was not until the Renaissance period, from the tenth to the thirteenth century, A.D., that their finest monuments were built.

It was during this period that the cities of Mayapan and Uxmal were founded. It was an age of revival of classical learning and the rebirth of the arts. The naturalistic styles of architectural decorations became more conventional than in the earlier period. Characteristic features of this new decorative are masked panels, faces reduced to rectangular panels, the use of geometric diaper backgrounds, fret meanders and banded columns were common motives of decorations.

Many undeveloped ideas from the Valley of Mexico were grasped by the architects of the period and developed into masterful works, an outstanding example of which was the "Palace of the Governor" in Uxmal.

The Federal Building in the California Pacific International Exposition in San Diego is a free interpretation of this magnificent example of Maya architecture. Necessarily, modifications had to be made and the structure adapted to modern Exposition purposes, but the main features have been retained, such as the great triangular entrance portal with its pylons and broad frieze treatment supported on plain walls of rectangular blocks.

The design and treatment of the great glass panels over the main entrance was suggested by decorative figures done in stucco on the interior walls of a building in Mayapan. By means of back lighting this panel it was endeavored to reproduce the effect of glowing colors which are still in evidence in these monuments of antiquity.

The stone used for the exterior facing and decorations of the Maya buildings was of a rich brown color, very beautifully and harmoniously polychromed, and it has been the endeavor to reproduce these colors as nearly as possible to conform to the original.

Mr. Juan Larrinaga, a Mexican artist of great ability, had charge of the detailed design and execution of this ornamentation. He has spent much time in Yucatan and has made a close study of Maya art. His knowledge, experience and skill has a decorative artist is evidenced in the execution of this work.

June 24, 1935. *Time Magazine*. Letters:

Sirs: What a nasty and disagreeable article your correspondent wrote about the fair in San Diego [*Time*, June 10]. Well aware are we all that every exposition must contend with midways and sideshows. But that your representative should overlook the glorious beauty of the fairgrounds, which alone would warrant a visit from millions of visitors, is hard to forgive. Many subscriptions will you lose on the West Coast from this article, but not mine. . . .

San Diego, Calif.

Orrel P. Reed

Sirs: Important people from the world over have seen San Diego's Exposition and have said it is the most lovely, most beautiful one that has ever been. SHAME ON TIME! . . . My feelings are very much hurt. From now on until our subscription runs out, I shall put *Time* in the wastebasket as soon as it comes, and I will tear it, too, so the janitor won't get any pleasure from it. . . .

San Diego, Calif.

Mrs. Grace Trevey

Sirs: . . . You fail to report the buildings are beautiful, the architecture authentic, the setting unique and exotic. The trees, flowers and the climate are perfect. It may not be the largest exposition, but what there is of it is all there and with no false fronts. . . .

San Diego Calif.

Frank A. Gazlay, Attorney at Law

Letter, June 24, 1935, A. H. Hill to Victor M. Clark; Subject: Log Rollers on Midway

Last evening, Sunday, June 23rd, my mother and I were passing the Log Rollers concession on the Midway at about ten o'clock.

There was a big sign by the entrance reading "FREE ADMISSION, etc." The ballyhoo barker shouted in this manner: "Free Admission - come on everybody, just come right in. We are doing this to advertise this show, and are letting everybody in free." We went in, as did about 150 other people.

When the audience was seated, the inside man made a talk to the people. He said the show would last about 12 minutes, and requested that no one leave during the performance. Then he said they were selling souvenir buttons reading, I believe, "We Have Seen the Log Rollers at the San Diego Fair." He said that he hoped that everybody who enjoyed the performance would buy one of these souvenir buttons. He suggested that the show was worth 25 cents, but that a smaller sum would also be acceptable. Then about three men, I believe, passed among the audience with the buttons and contacted everyone individually. Nearly everybody paid something.

While, of course, there was no compulsion to buy, the atmosphere created was such as to "high-pressure" the majority into buying a button by creating the impression that those not buying were "cheap skates."

While I am on this subject, I might mention the following:

I visited the Midget Village Saturday evening, June 22nd, at about eight o'clock. About 100 people were seated, waiting for the stage show. Then a man called for attention and gave a spiel on the wonderful Hawaiian Candy he was selling. This continued for about ten minutes, during which time several men went among the audience selling this candy. The first attempt was not very successful, so he played the candy up stronger, emphasizing the free prizes contained in every package, etc. The whole thing bored me, and it seemed that people with only a limited time at the Exposition might resent wasting all this time when the thing had absolutely no connection with a Midget Village.

All of this is just for your information.

AHH

cc - Ed Brown, Tupper.

(Copy of letter in Box File 10 Folder 24, California-Pacific International Exposition, San Diego Public Library.)

Letter, June 24, 1935, Elinor Hutchings, Secy., Concessionaires of Spanish Village, to Mr. Tupper, C.P.I.E., San Diego, Calif.

Dear Mr. Tupper:

We of the Spanish Village feel that we are in a bad way, especially the group in that section from one to fifteen, which should be called the Deserted Village. However, the suggestions we are making cannot fail to be of benefit to the Village as a whole.

In the first place, we rented out places in the Village with the understanding that it was a place of small shops and the space occupied by El Diego Bingo game was composed of four separate spaces thru which passers by could either look or cut thru to this section. In fact, we commented on the fact that any of these shops could be very easily seen. As it is, it has the same effect as a high fence and that fact that it does not open until evening except on Saturday and Sunday adds still more to the effect of still life. We feel that these conditions are the direct fault of the Fair Association and we need assistance to work out our problems.

Secondly, the especially bad spot from four to ten is called to your attention. Certainly none of use would have knowingly rented space beside dressing rooms and offices. The fact that one of our concessionaires moved is an illustration of its effect. Further, we feel that owing to poor signs or lack of them, designating the Spanish Village as such, many people cannot find it or do not recognize it as such.

We feel that this second aisle does not get anything near a fair percentage of the people coming into this Village. We are in a bad spot and suggest the following things, most of which were promised to use when we rented our spaces.

First of all, Arches over every entrance saying "Spanish Village."

Some form of adequate lighting such as flood lights and also strings of festive lights to take away from the air of gloom and darkness.

Also, to take away from the glare in the daytime and to get people to stop and look around, we suggest that benches be placed everywhere there is a place suitable and many more plants be placed wherever possible.

Also, as we were certainly promised, we request our own troupe of musicians to be in the Village at all times.

We also suggest some directory system whereby the visitors will find the concessions by number. We suggest uniform numbers and corresponding numbers and names be painted on the walls at suitable places.

Lastly, to come back to the worst spot in the Village, namely, spaces 6-7-8, we suggest that something like a trellis be built to hide the fact that it is a vacant spot and that vines and plants be placed in front of the trellis, also seats, as an inducement for people to stop.

You can well see that with the El Diego closed until 6 o'clock and three blank spaces here, there is not much to attract people of this spot.

We understand that most of these requests have been made already and cannot understand the delay in getting action, and earnestly recommend that they receive your immediate attention.

Very truly yours,

(Sgd.) Elinor Hutchings

Letter, June 26, 1935, P. E. Smith, Libby, McNeill & Libby Food Products, 60 California St., San Francisco, Calif. to F. M. Sandusky, Director of Exhibits, California-Pacific International Exposition.

Dear Mr. Sandusky:

As the representative of this company at the California Pacific International Exposition, I wish to go on record as being vigorously opposed to several types of exhibits that have been granted space in the Palace of Foods and Beverages.

At the opening of the Exposition, this building was considered one of the finest, if not the finest exhibit building on the grounds, with such outstanding exhibits as our own, Kraft Cheese, Standard Brands, Sea Island Sugar, Owens Illinois and many others. Since that time, however, there have been other exhibits added, which could be more properly called concessions, that have materially detracted from the appearance of the Palace of Foods and Beverages.

The writer cannot see, by any possible stretch of the imagination, how such displays as jewelry counters, perfume stands, fountain pen stands, art galleries, silhouette artists and others of this type can be housed in this building and still have the building classed as a Food and Beverage Building.

It does not seem to me that very much consideration has been given the exhibitors who represent genuine food and beverage companies; also, there does not seem to have been a great deal of consistency displayed in the leasing of space. Believe you will agree that the proper place for these displays would be in the House of Charm and several of them would not be out of place on the Midway.

I sincerely hope that you will use your good offices to see that there will be no more of this type of exhibit allowed in the Palace of Foods and Beverages and also, if possible, have the present ones removed to their proper locations.

Respectfully yours,

(Sgd) P. E. Smith, Libby McNeill & Libby.

Letter, June 27, 1935, F. M. Sandusky, Manager of Operations, Director of Exhibits, California-Pacific International Exposition, to Mr. Phelps, Hollywood Motion Picturescope, Space #30 - Spanish Village.

Dear Mr. Phelps:

We have your recent request to allow you to take 16 mm motion picture films of visitors to the Exposition and to have these films shown in your exhibit Space 30 - Spanish Village - the following day. The management will permit you to do this from a designated spot on the grounds to be mutually agreed upon. However, this is not to be considered as a "walk-around" privilege. It is understood that you are to pay the Exposition \$25 per week for this privilege.

You further request permission to amend your contract to permit the sale of perfume from your exhibit booth in the Spanish Village. After due consideration, this request we are not able to grant. However, the management will permit you to amend your contract to include the sale of photographic supplies and novelties from your booth #30, Spanish Village, provided however that we have an approval in writing of this privilege from Jr. John Sirigo, the Official Photographer.

If this is in accordance with your understanding, would you kindly sign this letter where indicated below, and as soon as written permission is secured from Mr. Sirigo you may proceed along the lines outlined in this letter.

Yours very truly,

(Sgd) F. W. SANDUSKY

July 1935, *American Architect*: "San Diego after Twenty Years . . . a study in contrasts

The picture on the facing page [aerial view of Plaza de America and Palisades] is more than an excellent air view of the San Diego Exposition. It is a pointed commentary upon the changes that have come upon architecture during the last two decades. Also it suggests, though indirectly, perhaps, some of the causes for these changes. This is food for professional thought, entirely aside from any consideration of esthetics involved.

In the background of the picture are some permanent reminders of a former exposition held in San Diego in 1915. Among them is the Panama-California Building, which, with its bridge approach, was designed by Cram, Goodhue and Ferguson, architects. Dominating the foreground and conceived by the industrial designer, Walter Dorwin Teague, is the structure that houses the Ford exhibit of mass production marvels.

Both buildings were erected primarily for exhibition purposes. But the former has been made into a permanent show place, preserved finally for its picturesque and romantic beauty. The Ford Building will, probably, be removed at the close of the present Exposition.

To many this may be significant from an esthetic point of view, for the contrast between the design of the two buildings is glaring. But the contrast itself is important also. For practical exhibition purposes, the Ford structure is, probably, vastly more efficient. It appears to have been developed from a well-defined plan for the exhibition which it houses. It contains no windows, thereby providing the maximum amount of wall space. The shape is conducive to almost perfect circulation within the building. Its equipment includes all the mechanical innovations which make possible the execution of such an unorthodox design.

Herein lies the really significant point in this study of contrasts. During the last twenty years, science and industry have wrought miracles which soon will become commonplace. As adoption of the telephone and radio changed our habits of communication so can utilization of present-day equipment and materials change our habits of building. And as better methods of transportation altered the pattern of our social structure, so also can the widest application of building elements now at hand change the aspect of the buildings we conceive.

No brief is held here for the "modern" design of the Ford Building as opposed to the "traditional" characteristics of Goodhue's older structure. Many will stamp the former as hard and too mechanical. Perhaps the same criticism could be leveled at any structure which utilized to the fullest extent all the modern possibilities of structure and equipment. It is a difficult thing to know. It is still to rare an occurrence when such a building is produced.

"The Pacific International Exposition Opens in a Blaze of Glory," by Leo J. Martin, Agent's Office, Los Angeles, Calif., July, 1935, **Santa Fe Magazine**, Vol. 29, No. 8, illus., pp. 7-15..

New Thrills, New Things of Beauty, Are Presented to An Appreciative World

On July 16, 1769, Fray Junipero Serra, Franciscan, the Order of Friars Minor, planted a wooden cross and founded the first of the California missions, San Diego de Alcalá.

The day was clear, warmed by a bright sun. Against the northern bluffs, for the spot was not far removed from the Pacific shoreline, white-foamed breakers broke the stillness. To the south, the placid bay waters rippled about the Spanish brigantine, the San Carlos. The hills which drew away from the sandy beach had turned brown under the summer's sun.

Not more than forty Spaniards and Lower California neophytes, weary and ill, witnessed the founding. Each knee, however, was bent and each head was bowed as Father Serra planted the cross and raised his eyes. He invoked Divine aid in the undertaking. He prayed that the seeds he was sowing would take root: that it would flourish through the years for the glory of God and the honor of the Spanish crown.

On May 29 last, one hundred and sixty-six years later, special trains steamed into the railway terminal of the city of San Diego. The sun shone brightly. In the bay countless craft rode at anchor. The bluffs to the north retained a touch of their winter's green.

The hundreds who disembarked from the trains found, embedded in the undulating hills, a cross. It was not a cross of wood or of iron. Not a thing of humility nor faith. It was a broad sweep of gray, smooth stone-like. It lay flat in the soil.

At the head of the cross stood a great white building, dedicated the Palace of Fine Arts. At the foot, its tower and circular body framed in green woodland, rose the impressive Ford building, dedicated to progress and to the genius of an American industrialist. On the right arm of the stone sweep stood a beautiful arroyo bridge, flanked by a great tower, the Palace of the Science of Man. On the left, broad arches rose to meet the sun. Beneath these, people passed to tread the great cross.

Superimposed upon and converging on the flat sweep were countless buildings and countless people; innumerable flowers and displays; items of food, clothing and utility; innovations, relics, old world treasures and bewildering revelations of science and the arts; a seemingly inexhaustible array of industrial, textile, automotive, railway, laboratory and clinical exhibits; expositions baffling in their ingenuity; discoveries profound in their wonder and beauty --- all beyond the realm of Father Serra's dreams. Almost, the assembled wonders blotted out the loveliness of the hills, on which they stood.

In Fray Serra's day, since time immemorial, man has been infused with an urge to build. His victories, his every progress have been expressed in terms of brick and concrete and stone, fashioned into monuments to his liking.

This great flat cross, with its embellishments, was something of a modern Babylon. It was history -- the progress of one hundred and sixty-six years. It was a resume of the conquests and victories of science, the accomplishments of business. It was, in a sense, the millennium. It mocked Father Serra's humility. It glorified his vision. It exemplified the fervency of his prayers.

The Pacific International Exposition had opened its doors. California, its flowers, sun and natural wonders were combined with the attractions of many nations and the sciences of an entire world. It has been a great task. Now it was something of a dream come true. The heads of several nations would be present during the months to come. World dignitaries would be in attendance. The men who had directed the Olympic games, the genius which had aided the Chicago World's Fair, the agencies which long had emphasized California's place under the sun --- all had joined in the motivation of the undertaking.

Joined, that is, with the city of San Diego. For many months this city of 150,000 has pursued the myriad tasks pertinent to entertaining an estimated 5,000,000 souls, and to exhibiting the properties of an exhibition which they hoped would surpass all those which had gone before. The task, however, had not been too difficult, because it was not new. Back in 1915, San Diego, with a small population, less available

resources and a highly competitive field, had opened and for two years had successfully conducted the Panama-California Exposition.

At that time the city had a tract of land, 1,400 acres, called Balboa Park, a mesa with canons, dells and woods, situated in the heart of the city. These acres had been landscaped and had become a thing of beauty. Through the years that beauty had been retained. Numerous buildings had been erected, beautiful structures of stone, steel and cement. They still were as beautiful --- the San Diego Museum and Archaeological Institution, Indian Arts Building, Botanical Building, Montezuma Gardens and lesser structures and plots, housing in all a worthy exhibit of flora, fauna and the arts. In this setting, revamped to a modern tone and enlarged on an international scale, the California-Pacific International Exposition had sprung into being. And with it a patronage which bid fair to exceed this border community's expectations.

All Aboard for San Diego

We boarded the train at Los Angeles --- and that meant the Santa Fe, the only Los Angeles-Dan Diego rail connective.

We hurried beyond the Los Angeles River bed, into the suburbs, and in a few miles entered the orange groves. Riding through the waves of green never was a difficult pastime, while beyond the green indenture there were towering palisades and a blue sea to parallel the track.

The crowd was a holiday one, with many nations represented. The majority, however, were from our own middle west and east. All lacked the strain which sometimes takes hold of travelers bound for an important objective. The important objective was there; but San Diego stood for palms and flowers and touches of Old Mexico -- life with fiestas in the ascendancy and siestas just around the corner. The train sped past San Juan Capistrano Mission, Spanish San Clemente, pastoral Torrey Pines, and emerged above San Diego Bay.

Every manner of craft seemed to be anchored in the placid waters. There were many units of Uncle Sam's Pacific guardians, countless small boats and pleasure craft --- as if Santa Barbara and Santa Monica enthusiasts suddenly had converged on this former berth of the brigantine San Carlos. There were schooners, packets, yachts, launches, sail boats, tankers, coaster passenger and great liners from all the seas, with as many more of the latter destined to arrive each week. There were flags and steamers and gay sails' aeroplanes and innumerable dots, which, no doubt, were bathers.

We were back on the observation platform by that time. Aircraft zoomed over the water. From the bluffs to the far southern horizon the planes were visible. The easterners were a bit awed by the sea and air spectacle; but they should have expected it. Colonel Lindbergh and the Spirit of St. Louis started that history-making flight from San Diego. (We were at that moment passing the great aviation field dedicated to Colonel Lindbergh.) And San Diego Bay early was declared by navy men to be among the first ten natural harbors of the world. Hundreds of embryo middies, bound for the San Diego training school, had ridden over these same rails.

The station platform was crowded. Not a jam; rather a good-natured crowd, having a lot of fun trying to find the rest of the folk. A band blared and a lot of good people got together. There were delegations versus delegations; and it ended something akin to the irresistible force and the immovable body.

There were Spanish señoritas and dons. Perhaps those laces and frills were not so precise after a few weeks; but they were more than appealing then. There were navy men and marines, soldiers and policemen. More bands, more delegates, more friendly groups. The unattached traveler, however, was not neglected as the facilities were all-inclusive. There was a wealth of beautiful girls, official hostesses and others --- so many in fact that the sprinkling of celebrities, Hollywood and other points, were relieved of the customary spotlight. And the entire area leading from the terminal was profuse with flags, steamers, and flowers --- depicting and representing all nations and all peoples.

A Beautiful Setting Unfolds

On the ten-minute ride through the business district to Balboa Park we found San Diego clean, bright and gaily decorated. We wondered if anywhere in the world there was a setting like the one unfolding before us --- the ocean, Mexican border, favored coast climate and a city essentially residential and bubbling over with diversion possibilities. And one with a central woodland like Balboa Park, ranking as it did among the first five city parks in the world. Add all that to a year's dress-up campaign, and a blending of the old world with the new, and you have the San Diego of today.

At the east entrance of the Exposition were flags, flowers and banners of every conceivable color and in greater abundance, particularly in the vicinity of the arches, the eastern gateway to the Exposition. There was a great crowd traversing the boulevard, the Avenue of Nations, which led past El Zocalo, housing counter attractions and novelties, but the thoroughfare was pleasantly broad.

We passed beneath the arches to tread the great white cross and to view what undoubtedly was California's most ambitious undertaking. The international flavor of the Exposition was becoming more pronounced. This was any nation's affair. Looming largest before us, having remained anti-lunch as it were, was the Café of the World, where, they assured you, the food required to meet your latitudinal and longitudinal needs, hemispheres notwithstanding, could be provided.

The eastern entrance and Cabrillo Bridge, the western gateway, encompass a broad clearance called the Avenida de Los Palacios, the horizontal beam of the great cross. The vertical plot, from the Palace of Fine Arts to the south, merges with the Avenida de los Palacios at the broad Plaza de Pacifico, the heart of the Exposition. The latter gives way to diverging avenues, which circle on a southward sweep to the Ford rotunda.

The ground plan is excellent. There is no confusion and no unnecessary steps. Nothing overlaps, and one is assured that nothing is inadvertently passed by.

Converging on that set-up from the north is the Indian Village. On the southeast, Gold Gulch. On the southwest, the Villages of the World and the Palace of Education. Tree-lined walks lead from El Zocalo or Fun Zone to the zoological gardens on the north, to the botanical gardens and then back to the great flat cross.

All that is set down in a broad acreage of flowers, green grass and trees. It is outdoor California at its best. And it should be. They have been cultivating and landscaping Balboa Park since the Panama Exposition. And during the past six months, that beauty has been augmented by numerous reproductions of world-famed gardens. We shall, however, forego further discussion of Balboa Park's horticultural attractions and start our tour of the Exposition proper.

International is the House of Pacific Relations, emphasizing the union of nations in peace and amity. Great Britain, Japan, Mexico, Denmark, China, Sweden, Italy, Portugal, Yugoslavia, Germany, Czechoslovakia, and other nations are housed in hacienda type cottages, which stand side by side, with floral patios, surrounding an inner court and garden. The attendants are arrayed in the costumes of their homeland. The buildings themselves form a beautiful homelike cluster.

The Federal Exhibit Palace, erected by our government, completes the international aspect. It is a huge building in Maya design, bordering an arroyo and fronted by a great lawn. You cannot fail to have a better understanding of the functions of the Washington government departments after spending a few hours viewing these exhibits. The departments of agriculture, commerce and labor; the navy, Tennessee Valley Association, Smithsonian Institution, Library of Congress and committee on aeronautics; the marine corps, printing office, veterans' administration and post office --- all have commanding displays of their activities. For popular appeal there are samples of dead letters, parcels and nefarious schemes to defraud by use of the mails.

A Miniature Tour of California

It doesn't seem possible that the wonders of California's eight hundred mile length could be brought together; but the California State Building holds a miniature tour that is remarkable in its completeness. The industries and pursuits of counties are displayed; and then the state in general completes the tour. The frontal landscaping reproduces every climatic condition within the state. That includes timberline pines and Death Valley cacti --- bare rocks and below sea level sand and gravel.

The Palace of Science displays are representative of the abstract and pure sciences, also the latest innovations in the applied sciences. Among other things you can hear your own telephone voice and make Alpha, the ten-foot robot, roll his eyes and shake his head. The robot's inventor puts the steel man through a variety of paces. There are exhibits showing the history of man and his cultural growth. There is a Mexican collection that is worthy. Mayan, Yucatan, the Philippines and the Orient come into the historical spotlight.

You are quite thoroughly into the Exposition by the time you meet up with the sciences. All that time has been spent walking along wide thoroughfares, in and out of what apparently are mellowed buildings, and always in the midst of flowers.

Missing are the unpainted sandwich stands with their flag coverings. Miniature replicas of the larger buildings, fresh and clean, in Mayan, Aztec and Spanish, cater to the not-to-be-denied hot-dog and soft-drink demand. Little Spanish orchestras and dancers mingle with the crowds. Flower vendors are everywhere. There are special buses and innumerable roller chairs for those who desire a "parlor car" method of sightseeing.

The Palace of Photography covers every branch of its subject and it also houses the fifth annual Salon of Photography in which photographers from all over the world are competing.

The Motion Picture Hall of Fame presents a history of the industry and oddities and mementos of the stars and productions of yesterday. Movies are made and, during the summer, most of the stars will come down from Hollywood.

The Palace of Travel, Transportation and Water houses exhibits of inordinary [sic] interest. The subject of travel is covered from ox-carts to the present time; and into the future. There is the story of aqueducts and canals constructed in conjunction with the Boulder Dam project. Of great interest is Minton Cronkhite's \$50,000 miniature Santa Fe Railway System, with ten trains operating on a 2,000 foot track from Chicago to San Diego via the Grand Canon, if you please.

An impressive facade with a bas-relief in bronze above the entrance marks the Palace of Electricity and Varied Industries; while around the cornice near the roof are continuous flower boxes with green vines and scarlet bougainvillea trailing over the edges. Inside, electricity does everything you thought it could do and things you scarcely believe it does do. There is the House of Wonders and a replica of Boulder Dam and its power line that for sheer artistry is something worth viewing.

In the Palace of Fine Arts are paintings, sculpture, furniture, craftwork, lace, glass and other exhibits of international art. There is El Greco's "Agony in the Garden," Brancusi's controversial "Bird in Flight," Bierdstadt's famous "Yosemite" and works of Whistler, Tayer, Picasso and Solano; also Rubens' "The Holy Family" and works of Murillo, Granach, Goya and other Old Masters. There are landscapes, murals, portraits and tapestries by the score.

Fronting the Plaza de Pacifico is the mammoth Spreckels Organ with its semicircular colonnade. A permanent feature of Balboa Park. Music plays an important part in the Exposition. Harold W. Roberts, musical director of U. S. C. fame, has drilled an orchestra of several hundred pieces and a chorus of 1,000. The great Spreckels Organ, numerous Ford orchestras and organ, and the public address system flood the grounds with music at all times. Throughout the summer there will be many visiting artists and guest conductors. A library of 3,000 records insures a continuous flow of music at odd ours over the loud speakers.

The Arch of the Future

Near the Spreckels Organ rises the towering Arch of the Future, with beautiful pools at its base. This is a key sot, the central control of the public address hookup. This amplification system is one of the most elaborate and the first of its kind ever installed. It as a radius of ten square miles and sufficient power to drown out any sound within that sphere. Released through 156 sound units or horns a variety of music floods Balboa Park --- dance tunes on the lively El Zocalo; symphonic and operatic selections in the Park's quieter retreats. Important announcements are rapidly dispatched with insured listener contact. President Roosevelt's voice was amplified last May 29.

The Palace of Food [sic] and Beverages is a fine example of Spanish Colonial architecture. Needless to say that a complete resume of edibles and liquids is unfolded within this structure. You'll discover ways of eating you never thought of; foods you didn't know existed; and you may gain the idea that you haven't been doing yourself justice in the matter of tasty edibles.

The Palace of Better Housing and Modeltown and Modernization Magic disclose man's inventive genius in making the home an easier and more attractive place in which to live; modern household utilities and kindred things; examples of landscaping and planting; and pools, gardens, lawns, flower beds, walls and somewhat gloried driveways. This is an important exhibit and a profitable one for those who take their time and see it in its entirety.

The Palace of Education is a resume of California's progress in education. And that reflects the progress for most of the states. The subject is thoroughly covered. Social, abstract, vocational and health needs; arts, crafts, agriculture, house planning, and exceptional child training; Indian education, nautical, physical, science, home making, visual and training of the blind, are a few of the branches touched. Adjacent to the Palace is a grotesquely beautiful collection of desert plants.

The House of Charm is something of a no man's land. It emphasizes beauty and loveliness; and everything pertaining to femininity.

Southwest of the House of Charm is a reproduction of the world-famed Alcazar Garden of Seville. It is breathtaking at first glance and is one of the Exposition's most beautiful offerings.

Dedicated to Henry Ford, the Ford Building, a circular white-surfaced structure fronted by a high tower, stands on a promontory bordered on three sides by arroyos. In one of the latter lies the Ford Music Bowl, where concerts by notable symphony orchestras are given. In another arroyo, fourteen historic travel lanes are reproduced, including El Camino Real, the Santa Fe Trail, the old planked highway from Imperial Valley to Yuma, and others of Peru, Australia, Japan, Canada, Panama, China and Mexico.

The Ford Building is fronted by the beautiful Plaza de America and the Plaza de las Aguas Cantantes. The latter surrounds the Firestone Singing Fountains, where a subdued lighting creates the illusion of rising and falling water attuned to music. In addition to viewing the field-and-mine-to-consumer program in the making of a Ford car, one may see industrial dioramas or moving histories of the modern age. The Ford exhibit is profoundly impressive. Both Henry Ford and Edsel Ford will be Exposition visitors during the summer. They deserve a warm welcome.

Gold Gulch is a twenty-two acre reproduction of an 1849 California mining camp. You may enter this exhibit on a burro or in a stagecoach; and going down into the arroyo, you'll have a lot of mining-town realism shook into you.

The town is a page of history. There's an old newspaper office, the *Gold Nugget*, and it's published on Wednesdays "if the editor ain't drunk." Also, sourdough shacks, mining operations, sheriff's office and jail, saloons, dance halls and quite a few bad characters hanging around. Gold Gulch will rival other popular attractions because there is a lot of genuine fun involved.

The Shell Oil Building is a giant shell and deserves a token of appreciation. Inside is a great map with national highways electrically outlined.

We saw Governor Merriam and offices of the army and navy with other civic leaders at the House of Hospitality. This is the focal point of the Exposition, where visiting dignitaries are entertained. The patio of the building reproduces the famed convent courtyard of Guadalajara, Mexico. In the rear is a reproduction, yellow, red, green and pink of El Casa del Rey Moro at Ronda, Spain's renowned garden.

Someone deserves a great deal of credit for the Standard Oil Company's great Tower of the Sun. This building catches the eye. It is red with numerous sculptured symbols in bas-relief. It ranks with the finest on the grounds. Inside is portrayed the story of the benefits of petroleum to the human race. The national parks are parades in the unusual "Illuvision."

The Old Globe Theater, patterned after the London playhouse of that name founded in 1599, presents versions of Shakespearean plays. The theater has a novel setting near the Cabrillo Bridge, and the territory has become Old English for the occasion.

The botanical gardens, museum of natural history and zoological gardens cover many acres of beautiful landscape. The gardens are a welcome retreat. Nature never fails us. The museum contains 397,088 specimens of birds, fish, animals, reptiles and plants. The zoo covers many acres, all wooded and houses more than two thousand specimens. These worthy things are permanent features of Balboa Park.

The Spanish Village, fronted by a Moorish wall, is a reproduction of a village in Spain. There are numerous buildings, olive trees, flowers, shrubs and a rather lively patio,

We liked the Indian Village. It is set apart, has ample ground space, and there is much of genuine worth to be seen. Indians from various tribes, the Navajos, Pawnees, Hopis, Cherokees, Iroquois, Mohawks and others are in residence. There are ceremonials and craft work, also athletic contests. The Indians are courteous and friendly. They mingle with the crowd and help to make one's visit instructive and enjoyable. The government has made good strides toward the betterment of the Indian and it is reflected here. The Boy Scouts of San Diego are playing an important part in the direction of the Village.

The Fun Maker Perform

Ladies and gentlemen! Step into El Zocalo!

Here are dare-devil motorcycle riders, a midget farm, including humans, animals and crops; Zoro Gardens; Ripley's "Believe It Or Not", "Crime Never Pays" (but it does on El Zocalo); Snake Farm with reptiles from all over the world; Gay's Lion Farm (down from El Monte and worth seeing); Days of Saladin, the Arabian horses of Kellogg's ranch; rides for the children; Boulder Dam, map and models of operations; log rollers, and numerous other worth while attractions.

El Zocalo is the home of raucous voices, leather throats and stupendous adjectives. Its 2,400 feet of frontage is packed tight and represents a heterogeneous array of architecture. There are numerous attractions billed to follow: where they will put them is a problem for the committee. Right now El Zocalo is noting if not international

It is an expansive thing --- this California-Pacific International Exposition. And Balboa Park truly is beautiful. The surprising thing is the appearance of age, which seems to hover over gardens and buildings alike. By day it is a bright and lovely sight.

At night flood and colored lights glow over the acres which encompass the great flat cross. Soft, hushed strains of music float upon the air. The Chicago Fair, it seems, went for brilliancy. Here everything is softened. The Exposition is a great flowering garden, bathed in subdued rainbow light; while Balboa Park's remaining acres of woods, arroyos and bridges are flooded with moonlight. It may be an international exposition but Spanish gardens seem to have the upper hand.

From the social angle, San Diego and the Exposition committees in general are all aflutter. Notable are everywhere. One wonders how the exacting functions of society can be carried through.

There is much to look forward to. President Roosevelt has signaled his intention of visiting the grounds during the summer. Social editors advise that the Prince of Wales also will be an Exposition visitor. Then there will be former King Alfonso of Spain, Herbert Hoover, the premier of Great Britain, almost all the ambassadors to the United States, and many consuls and titled foreigners and prominent men in all professions throughout the world. San Diego is destined to have a busy summer.

Back down the valley along the coast Father Serra raised his wooden cross, blessed it and prayed for Divine Air. Scurvy had weakened his followers, the Indians were unfriendly. But aid came. The men regained their health, the Indians, one by one, were baptized, the mission grew and prospered.

Back in San Diego and in the heart of Balboa Park are assembled today the great things as humans appraise great things on the earth, representing one hundred and sixty-six years of ceaseless progress. Millions of persons are converging on this city --- millions replacing that faithful band of yesterday. For events shape themselves and time moves on.

If you possibly can arrange it, treat the great white cross of the California-Pacific International Exposition during the present summer. It is an important journey. It is America's Exposition for this year, 1935, and, for that matter, for any year.

San Diego Union, July 7, 1935, Society-Club, 1:1-3. Art world to stage five July functions at Exposition.

Letter, July 8, 1935, Waldo T. Tupper to Farmer & Larson; Subject: SPANISH VILLAGE.

I understand that the exhibitors and concessionaires in the Spanish Village held an indignation meeting today and are up in arms because the Village is not attracting as many people as it should. As you know I went over this situation with Mr. Requa and Mr. Barter and we made a number of recommendations which have been passed on to Mr. Barter to figures costs on. In addition to the recommendation submitted to Mr. Barter I would suggest that we run a series of pennants or streamers from the decorative banner poles leading from the Avenue of Palaces up to the Shell Oil Building and at that point put a sign made of cut-out letters - painted in black and orange with a silver flitter center. This sign should read "VISIT THE SPANISH VILLAGE AND MIDWAY."

I think we should go to the expense of keeping at least two or three musicians in the Spanish Village at all times. If we allow the exhibitors in the Spanish Village to hire this orchestra they can get three pieces for around 60 to \$75.00; whereas, if we do the hiring we will have to pay Union rates, which would cost us about \$58.00 per musician.

If it meets your approval I would like to sell the exhibitors and concessionaires in this Village on taking the Olvera Street Puppeteers to put on continuous free performances in that area in the southeast corner of the Village --- spaces 3-A, 3-B and 3-C --- the large open space which adjoins the fire station. I can get this puppet show --- four people, all the equipment, costumes, etc. --- for \$100.00 per week and this prorated among the exhibitors would only stand each of them about 50 to 75 cents a day.

My thought would be to have an announcer --- just before presenting the final puppet show --- take the stand and tell the audience that they were the guests of the exhibitors and concessionaires in the Spanish Village --- that this is the same show which played for three years in Olvera Street, which packed houses at a \$1.00 per seat --- that everyone here will want to send some gift or souvenir of the Fair to friends or relatives and that the stores in the Spanish Village carry a complete line of gifts and souvenirs at the right prices, etc. etc.

I would also suggest that we put some benches in and around the Spanish Village and all of the exhibitors and concessionaires in the Village are in accord that the extra lighting should be much brighter. They are not interested in maintaining the dim, colored light effects which we tell them is typical of a Spanish Village of this kind --- they say it is dismal and like a morgue, so I recommend that we give them more light.

Letter, July 9, 1935, J. David Larson, Executive Manager, California-Pacific International Exposition, to R. E. Craig, Comptroller, Barker Bros., Seventh St., Flower & Figueroa, Los Angeles, Calif.

Dear Mr. Craig:

In reply to your letter of the 2nd inst.

There is something to what you say, although I feel that you are naturally more sensitive to the situation than the vast majority of visitors to the Better Housing Building.

One reason for the situation is that large interests in Los Angeles, who had pledged us their support in the Better Housing Building, abandoned us at the last minute and went into the so-called Housing Show in Los Angeles. Many of them have since told us that they now regret exceedingly that they did this because their show did not turn out so well, we understand, and the greater opportunities were here.

The F.H.A. and others will support the facts about what happened here in the closing weeks when we were rather precipitately abandoned by many firms whose best interests obviously were to exhibit here. We worked until the last minute to prevent this, and finally decided that the worst thing we could have would be empty space. It them being close to the opening of the Exposition, we did the best we could under the

circumstances in the interest of those who had taken space, such as yourselves and numerous other substantial exhibitors.

We have plans for improving the situation in that building and are watching the questionable spaces that you refer to very carefully for the first opportunity to change them. It is entirely possible that the situation will be improved from time to time.

We certainly do accept your letter in the spirit in which it was written. We have endeavored, heretofore, to express our deep appreciation of your participation in the Exposition, and of your generosity and helpfulness in respect to the press and radio buildings.

Your exhibit should remain where it is, and we are sure that its presence there will yield constructive results to you as the vast majority of the public is not having, and will not have, the impression that you, who are so close to it, are sensitive to. On top of this, because of our feeling toward Barker Bros., we have held ourselves, and do so now, in a position of welcoming any suggestions that you may have now or later regarding anything that we, as the Exposition, can do toward assisting you in any additional plans you may devise for your participation here, or any way that we can promote your best interests in the Exposition.

Please be assured that you have in us a friendly understanding, and a desire to be of assistance whenever possible. If you have any ideas or suggestions we shall be mighty glad to receive them from you.

Sincerely and cordially yours,

(Sgd.) J. David Larson
Executive Manager

Letter, Filed July 10, 1935, E. M. Edwards, Operating Concessions & Exhibits, San Diego, Calif. to C.I.P.E., Attn.: Mr. Tupper.

Gentlemen:

Your rules are very plain regarding the matter of signs, the placing of them, etc. I have followed those rules rather than doing a job and then allowing your Exposition to blister as has been done by others. For days I have urged someone with authority to issue a permit to place two or three signs in positions that will assist in pulling me out of a position that is soon to force me entirely out of the Exposition. Mr. Barter refuses to allow this concession notwithstanding the fact that everyone in this area has signs, some of which are of the "box-car" type. Almost every patron of the place express themselves as having difficulty in locating the café. I know that any do not find it at all. The fact that I am isolated is not of my making. It must be yours. To arbitrarily refuse to let me try and save my position is just unadulterated poor treatment extended to a person who has played the "game" since coming into this show.

By all means I should close since my place tonight inasmuch as I have finally been told that NO SIGNS are to be allowed. My business has run as low for days as \$75.00. It should be running \$600.00. It is the outstanding show place of the Village. I cannot operate at a further loss just to maintain a fine looking place in this area. I shall work out my food the best way possible and close Tuesday evening. This will not for the moment effect the operation of the Jenny Wren.

Just this one more thought. I am taking a loss of about \$10,000.00 in this deal. You will assume a loss of perhaps \$5,000.00 in commissions. All of this due to the refusal to allow me the right to place some insignificant signs directing the public to my establishment while others have the right to sign as they please.

Yours truly,

(Sgd.) E. M. Edwards

San Diego Union, July 13, 1935. Expo Excerpts . . . President Heber J. Grant and his party of Mormon church celebrities were guests at the Ford Motor Co, at the Exposition Thursday, because, it is said, the Mormons feel that the Ford company has been more than considerate of their organization on many occasions and particularly in engaging the Mormon choir of Salt Lake City to take a prominent part in Ford Music Bowl activities.

The popularity of Negro spirituals was well attested when a capacity crowd of visitors in the House of Hospitality auditorium applauded the excellent work of the 116 singers in the George Gardner Negro Chorus. The program, which was repeated at night, included such numbers as "It's Me Standing in Need of Prayer," "O Mary Don't You Weep: and "Every Time I Feel the Spirit."

Of the 500,000 persons who have viewed the National Parks "Illuvision" show in the Standard Oil Tower of the Sun, it is said that less than a score have been able to figure out how the imperceptible changes from scenes of one park to another are effected. The officials in charge of the exhibit keep the secret closely guarded.

Alpha the Robot is drawing larger crowds daily in the Palace of Science where he talks, smokes, fires a pistol and obeys all sorts of oral commands. Prof. May, the inventor, explains it is all done through vibrations of the human voice with the harmonics or overtones filtered out and eliminated. Which leaves the average Robot admirer as much mystified as before. Alpha does about everything but walk, and Prof. May says a walking robot who is good for anything else is out of the question. "Too much mechanism required inside to permit him to walk," the professor explains. "If he walks he can't seem to have brains enough to do anything else."

“Tiny Annie,” the huge woman character of the Gold Gulch section, who weighs 260 pounds and stands taller than most men, is well known in the Evergreen country as Helen L. Bushnell, radio performer.

This is Nevada day at the Exposition and it is expected thousands of visitors from the state made famous by the Boulder dam project will be in attendance. Utah comes next on July 24, and Michigan on July 31. Harry Morgan, special days and events managers, has succeeded in lining up all the states in the Union with the assistance of Harry Hunter of the Federated State Societies of Southern California. He figures that these state celebrations alone will increase Exposition attendance by nearly a quarter million.

Mayor P. B. Benbough proved himself the chief “cut-up” yesterday at the Kansas day celebration. At the west gate he grabbed one of the rickshaws from its operator, piled Mrs. Ed Sample and Mrs. Forrest Warren in it, and set off at a gallop for the organ amphitheater. When he arrived, his honor was dropping wet with perspiration.

Mrs. Ruth Beewall sang two solos, “Come to Me” and “Ecstasy” with Neil Cave as accompanist. Douglas Peace and Dean Nauman sang to duets. Mrs. Nauman accompanied them.

Minutes of Special Joint Meeting of Executive Committee and Finance Committee of the California-Pacific International Exposition Company, July 16, 1935.

A special joint meeting of the Executive Committee and Finance Committee of California-Pacific International Exposition, Company, a non-profit California corporation, was held in the Cuyamaca Club, Union Building in the City of San Diego, California, on the 16th day of July, 1935, pursuant to a call of the President and the Chairman of the Finance Committee.

The following members of the Executive Committee were present’

Frank G. Belcher	W. F. Raber
Emil Klicka	Samuel E. Mason
W. B. George	Oscar W. Cotton
Samuel I. Fox	Edward Bernard
Walter Ames	

There was absent:

John Lawrence Fox

The following members of the Finance Committee were present:

Julius W. Wangenheim	Douglas Young
Frank G. Belcher	Armistead B. Carter
Emil Klicka	John F. Forward, Jr.
Jerry Sullivan, Jr.	Hal G. Hotchkiss
Edward Bernard	G. H. Whitney

There was absent:

Asher E. Holloway

There was also present at this meeting Frank Drugan, Executive Secretary.

The President, Jr. Belcher, reported details of a meeting of the Finance Committee under date of July 15th, at which meeting the resignations of Messrs. Zack Farmer, J. David Larson, Waldo T. Tupper, Harold W. Roberts and Eyre Powell were presented and action concerning them deferred for 24 hours.

Mr. Raper inquired if it were possible to consider going ahead with the present Management. The President, Mr. Belcher, replied affirmatively. Mr. Raper inquired if there were any possible exceptions among the five who had offered their resignations. The President, Mr. Belcher, replied that possibly Messrs. Robert and Powell would be exceptions.

Mr. Bernard reminded the Committees that certain Management activities, including contracts would require the attention of present members of the Management and suggested

acceptance of the resignations with regret, and with the request that those resigning should remain for a period of approximately 10 days during the period of reorganization.

Mr. Wangenheim recommended immediate acceptance of the resignations.

The President, Mr. Belcher, announced that Mr. Farmer intended to remain near San Diego on vacation. He did not know where Mr. Tupper or where Mr. Larson would be.

Mr. Samuel I. Fox inquired concerning the cause which apparently suddenly precipitated the resignations. The President, Mr. Belcher, suggested that the Management was unable to meet the requirements of the Finance Committee, and referred to complications in the Spanish Village and in the Midway.

Mr. Bernard expressed the opinion that the sudden resignations were due to "conditions," rather than to "personal feelings." It was Mr. Bernard's view that the resignations were suddenly precipitated by dealings that were held directly with representatives of the Midway and the Spanish Village, rather than through Management.

Mr. Walter Ames expressed the opinion that those who had resigned had acted irregularly in sending their own publicity men to Los Angeles to release their resignations to the press.

Mr. Whitney suggested that the resignations be accepted and compensation be provided to those resigning up to the end of the month, and with the request that the members of the Management remain until the end of the month to be of assistance, if required.

Following discussion, upon motion duly made by Mr. Hal G. Hotchkiss, seconded by Mr. Samuel I. Fox and carried, it was decided to recommend to the Board of Directors that it accept the resignations of Messrs. Zack J. Farmer, J. David Larson, Waldo T. Tupper, Harold W. Roberts and Eyre Powell as of July 15th, when filed, with regrets; and that the President be authorized to give to Messrs. Farmer, Larson Tupper, Roberts and Powell such letters of commendation of their work as he may see fit to provide; and that the President, together with two members of the Board of Directors selected by him, be authorized as a committee to take temporary control of the Exposition pending its reorganization. Those voting affirmatively included the President, Mr. Belcher, and Messrs. Julius Wangenheim, Samuel I. Fox, Emil Klicka, W. B. George, Walter Ames, W. F. Raber, Jerry Sullivan, Jr., Oscar W. Cotton, Douglas Young, Armistead B. Carter, Samuel E. Mason, John F. Forward, Jr., Hal G. Hotchkiss, and G. H. Whitney. Mr. Edward Bernard voted negatively. Messrs. John Lawrence Fox and Asher E. Holloway were absent.

Mr. Carter inquired who would be the two members of the Board of Directors to be appointed to the President's committee of temporary control of the Exposition. The President, Mr. Belcher, replied that he had not yet selected them.

Upon motion duly made by Mr. Mason, seconded by Mr. Forward and unanimously carried, it was decided to authorize the President to appoint a commission of three to go to Los Angeles to confer with the Chamber of Commerce to insure proper appreciation of the value of the Exposition to Los Angeles, with a view toward insuring continued support.

Mr. Bernard inquired concerning the status of Mr. Waldo T. Tupper's override commission. The Chairman of the Finance Committee, Mr. Wangenheim, explained that the override agreement with Mr. Tupper had expired on February 1, 1913, but that since then three or four additional contracts were possibly involved, entailing a commission of about \$1200, whose adjustment and settlement had been entrusted to the committee comprising Mr. Larson, Mr. Folda and Mr. Dailard.

There being no further business, the meeting adjourned.

Frank Drugan, Executive Secretary.

Scrapbook No. 20 - Ruth Norton, July 16, 1935. Three glass tanks of tropical fish in Japanese bungalow in **House of Pacific Relations**, Miss. Misao Kawamura, hostess; motion picture showing activities of Transamerica Corporation at **Palace of Travel and Transportation**.

San Diego Sun, July 16, 1935, 1:5. Control body to rule Exposition is considered.

Letter, July 17, 1935, C. M. Vandeburg, Dir. Radio & Public Address, to Frank G. Belcher, President; SUBJECT: Radio Department and General Suggestions:

On the heels of our fine conference last night, I am encouraged to submit a number of suggestions and ideas from this department having to do with our operation and other departments in the Exposition. In line with our discussion concerning outside radio talent, I can say definitely that such programs as Jack Benny, Ben Bernie, California Melodies, Hollywood Hotel and Ed Wynn's program are obtainable if charges for stand-by orchestras can be absorbed or eliminated by the local musicians' union.

The matter of the stand-by orchestra varies as follows: For any visiting radio orchestra, it will be necessary to hire an equal number of local musicians at union wages, plus a \$1.50 per man, for broadcast time, for the duration of the program as played by the visiting orchestra. Should the visiting orchestra desire a rehearsal, they are permitted two hours for this purpose without the stand-by orchestra. For any such rehearsal, there is a charge of \$1.50 per man.

At the opening of the Exposition there were a half dozen such programs lined up for presentation at the Studios of the Exposition. It was necessary to cancel all such programs because the visiting groups were unwilling to play the stand-by fee, the local musicians would not waive it and there was no allotment in our Exposition budget to carry the expenses. Even at this late day, if a fund were created for stand-by charges, I think it would be possible to bring in a number of outstanding radio programs for presentation here.

A budget of two or three hundred dollars a month would help materially in attracting radio talent worth many thousands of dollars in gate receipts to the Exposition. While on the subject of radio charges, I would also like to mention a condition that has made it rather difficult for this department to encourage the release of sustaining programs by the radio net works, CBS and NBC. Because our radio equipment was owned, installed and operated by a private concern, it has been necessary to make a charge against the radio

net works for any programs taken from remote pickup points within the grounds. Such charges are quite in order, but since we do not have a budget to meet them, it has been necessary to call on the net works to pay these pickup charges, ranging from \$20.00 to \$35.00 per broadcast, when remote field equipment was used.

At the present time, we can secure a number of additional programs on the networks each week, were we in a position to waive remote charges now billed to the net works. This is another matter I would like to discuss with you whenever convenient.

Immediately following is a list of suggestions that I think would improve the operation of the radio department and at the same time increase our coverage and effectiveness to a very large degree.

- (1) A workable budget to employ radio talent for radio broadcast.
- (2) A determined drive to encourage dramatic talent from the Exposition, with a small fund to defray expenses and pay talent in such dramatic shows.
- (3) Greater variety in the program presentation at the Organ Amphitheater.
- (4) The net works are becoming reluctant to taking large bands, large choruses, and heavy music of the type released over the past month,

Specialty shows, vaudeville programs, minstrel shows, variety programs, athletic contests and small vocal and instrumental groups are needed to add color to our radio menu.

I am also submitting a list of general suggestions from members of this department and offered with the sincere desire of improving and adding color to the promotional and entertainment side of the Exposition.

- (1) More free entertainment on the grounds.
- (2) A well organized, consistent effort to encourage radio visitors to visit the Midway, Gold Gulch and Café of the World.
- (3) An Exposition circus or its equivalent in the dead spot at the northern end of the Midway.
- (4) Smokers, athletic contests, rifle drills and mock war games in the army camp. This is to attract crowds to the Army Camp.
- (5) Beauty contests, baby shows and fashion parades at the Central Plaza or the gardens near the Botanical Building.
- (6) A Log Rolling show daily in one of the reflection pools by the Arch.
- (7) Model yacht regattas and other aquatic feats that could be adapted to the pools at the Arch.
- (8) A daily 30 minute variety show featuring legitimate concessionaires at the Organ Amphitheater or the radio studios. Each concessionaire to be on 5 minutes and with prizes offered for the outstanding act.
- (9) The addition of one of more dancing girls to the band of strolling troubadours.
- (10) Unusual races to cover and encompass the entire grounds of the Exposition, example: Bicycle, balancing, walking, rickshaw, peanut pushing, push wagons, etc.
- (11) Daily airplane stunts over the grounds to be climaxed with the release of a number of balloons to which are attached tickets to Midway concessions.

Many of these suggestions may be without value. We offer them with a sincere desire to be helpful and in the hope that some of them may be used in the general betterment of the Exposition.

Also attached to this report will be found a complete summary of radio activities since the inception of this department, including total number of programs released, type, time and date of release, whether local, coast or transcontinental, and the value of such radio programs, figured on a commercial basis.

The fact that we did not have a budget until two weeks ago, makes it impossible for me to submit an absolute accurate report on the cost of this department to date. However, we have kept a detailed record since the inception of the department and our total expenditures, including construction and furnishing of the studios, maintenance, salaries and overhead, will not exceed \$8,000.00 up to and including July 1. In return for this expenditure, we have presented a total of 232 radio programs with a commercial value of \$800,000.00. We have no funds for radio talent and to date have expended exactly \$8.00 for radio talent.

I take considerable pride in submitting our report and will add that it will be possible only through the fine cooperation of the Exposition Music Department and my own loyal, energetic and enterprising staff. They have become masters in the promotional art and have operated on the theory that what is good is free.

Very sincerely,

C. M. Vandeburg
Director of Radio and Public Address

Letter, July 18, 1935, Robert E. Callahan, To the Board of Directors of the California Pacific International Exposition, San Diego, Calif..

END OF THE TRAIL, INCORPORATED, INDIAN VILLAGE, \$250,000 Setting.

Gentlemen:

I came to San Diego intent upon producing authentic Indian shows, designed to educate as well as to entertain --- to create and maintain programs which would leave pleasant thoughts in the mind . . . But when more interest is manifested in trying to place side-shows, bull fights, white men with feathers, monkey acts and goats at the entrance to this beautiful village; when Boy Scouts are ignored and their parents charged admission to enter their own village the night of their monthly Court of Honor; when all these things are

made a part of the village activity for the sake of a few extra dollars, I can no longer give sincere attention to the enterprise --- and have on this day transferred my interest to other endeavor.

I am surprised that our sponsors have no consideration of what the public thinks after they have paid 25 cents to enter these grounds. Announcers have been allowed to exaggerate beyond all reason --- even insist that people come to see Sitting Bull in person, the Sioux Indian who was killed over sixty years ago. Every child knows that! People come here to see how Indians lived in the early days, but authentic ceremonials cannot be given with the present setup --- and I do not care to be a part of such shows.

To me, this setting --- costing over \$200,000 --- with its fascinating pueblos, ladders, strings of peppers, feathered flags, Sun Temple, and other atmosphere, is impressive --- and I have assembled some of the most colorful Indian artists in America. But when Beer Garden publicity is allowed inside these grounds, and other selfish moves to numerous to mention, I can only say --- may the Exposition continue and may the powers that be rise at dawn with new thoughts to keep the Boy Scouts' Indian Village free from anything which might leave a dark spot on the map of San Diego's Exposition ---- tomorrow I go forth with pity for those whose God is gold, and who are ruining the most beautiful Exposition the West has ever seen, if such tactics are continued.

Cordially and sincerely.

Robert E. Callahan (signed)

Letter, July 19, 1935, Waldo T. Tupper to J. David Larson, SUBJECT: Television Theater.

At one time in the negotiations for a Television Theater in spaces Nos. 25, 26, 27, 28, 30, 31 and 32 in the Palace of Electricity and Varied Industries, we had apparently completed arrangements with Mr. Gurinian and he was to furnish television and operate same providing I could secure a party with \$4,000.00 to underwrite the cost of transportation of television equipment, engineers, construction of theater, etc.

I got Mr. Cusack and Mr. Bolger to agree to put up \$1,500.00 a piece and told him if I couldn't get a private individual to put up another \$1,000.00 I would get the Exposition to contribute that amount in construction work on the theater, the same to entitle them to a 25 percent interest in the share held by Cusack and Bolger. Upon the definite assurance of Jimmy Bolger, a man whom I have known for a number of years and who is secretary to Chief of Police Davis in Los Angeles, I got you to guarantee for the Exposition the payment of

\$2,000.00 - construction cost for the theater and which was the bid submitted by the Los Angeles Scenic Studios.

Our construction department was in no position to perform the work at that time as they were literally swamped and you guaranteed this account with the understanding that Cusack and Bolger would put up their money as soon as the equipment and all arrived from the East.

Shortly after you guaranteed this account and when the theater was about half completed, I discovered that Gurinian was crooked and had falsified certain statements which he had made to Cusack and Bolger as well as myself, so I refused to have anything further to do with him.

However, at this time, through our Chicago office, I was able to contact Mr. Procnier, who was the television engineer whom Mr. Gurinian intended to use. Procnier was working for the firm who owned the television equipment and, as you know, came on bringing the equipment and engineers with him.

After this theater was built, Cusack and Bolger took the stand that it was not a \$2,000.00 job, although both of them had personally assured me that we would not lose a penny if you guaranteed the construction account and that they would play it as soon as they perfected their partnership.

I did tell them that I was confident I would be able to get a third party to put up \$1,000,000 and if I couldn't, the Exposition would contribute \$1,000,000 toward the cost. I felt this would be a very good deal for the Exposition, as, first of all it would fill the space, which if I left vacant would have been a terrible thing for that particular building and secondly it would not only be an asset to the Exposition but would make some money for them as well.

About that time my sister-in-law, Mrs. Scott, wanted to get employment in the Exposition and had a little money to invest, so she agreed to put up the \$1,000.00, but wanted me to look after it for her. When Cusack and Bolger took the attitude they did about repudiating a contract that had already been made, I advised her not to go in with them. By repudiating the contract, I mean simply this: They knew we had a contract to build the theater for \$2,000.00 and after it was built they contended it was only a 13 or \$1,400.00 job. This contract was made in good faith and at a time when labor was at a premium, when all exhibit organizations had their hands full and if anything it was an accommodation job on the part of the Los Angeles Scenic Studios who built this theater.

I have just talked to Mr. Procnier and he says Cusack and Bolger will be down tomorrow and he feels that a satisfactory settlement can be made at that time. If a satisfactory settlement is not made and inasmuch as the Exposition had a contract with the Los Angeles Scenic Studios for the payment of the theater, there is only one recourse for the Exposition and that is to shut down or take over the Television Theater. They are making money and I personally know that they have accumulated close to \$2,000.00 in net profits since they opened.

I am leaving today for Ensenada and expect to be back on Tuesday or Wednesday of next week and you may definitely count on me going over to the Exposition, if need be, and help straighten this matter out.

Letter, July 27, 1935, Victor M. Clark, Director of Events and Attractions to All Exhibitors.

Friday, August 16th, will be SOUVENIR DAY.

Souvenir Days have always proven big attendance builders in other Expositions. The idea is that Exhibitors give a souvenir to everyone attending their booths. With the full cooperation of all Exhibitors and the wide publicity which will be given we can make this a big day for the Exposition and for You --- "Something for Nothing" always attracts throngs.

Many Exhibitors already have indicated their desire to cooperate and have given to us for publicity purposes the name of the item to be given away.

May we have an expression from you at the earliest possible date, and the extent to which you may participate, so that we may govern our publicity accordingly.

Handwritten Note: Mrs. Kline #15 Electrical will give away Turquoise Nuggets. (Sgd.) Sandy 8/3.

No Date. Ford Exposition: Souvenir Coins

The first shipment of 10,500 souvenir coins arrived in San Diego today from the Ford Motor Company's River Rouge Plant at Dearborn, Mich. The coins were designed by Walter Teague of New York and made in the die room of the Ford plant.

At the Ford Motor Company's plant there are approximately 925 different metal alloys from which was chosen a German silver alloy to be used in these coins, which are a trifle larger than a twenty-five cent piece. The souvenirs are obtainable at the Ford Exposition building.

Letter, July 31, 1935, Marian B. D'ave, Exposition Secretary, Palace of Fine Arts, to W. J. Behan, House of Hospitality, Balboa Park, San Diego, Calif.

My dear Mr. Behan:

Confirming my telephone conversation of even date, will you kindly see that the auditorium of Hospitality House is made available for the exhibition of 25 paintings by Negro artists, on August 24th, which has been designated "NEGRO DAY" at the C.P.I.E. The auditorium should also be made available to the Negro committee for purposes of a reception, lecture, or any other feature they may have in mind.

Mrs. Leslie Parker is in charge of arrangements in this regard, and I have told her that you have agreed to make the auditorium clear for her use on that day, and suggested that she contact you direct concerning further negotiations relative thereto. Her telephone number is M. 1516.

Thanking you for your cooperation with us in this regard, I am,

Sincerely yours,

(Sgd.) Marian B. D'ave.

San Diego Union, August 10, 1935, 1:7-8, 2:3. Busy weekend starts with six special Exposition events.

San Diego Union, August 11, 1935, 1:1-2. Program - Beech Nut Day, York Rite Day, Food Industries Day.

San Diego Union, August 11, 1935, 7:1. National Park chiefs inspect Exposition **CCC Camp**.

San Diego Union, August 11, 1935, 9:6-7. Exposition Excerpts.

Letter, August 12, 1935, Gary C. Breckner, Director, Radio & Public Address, to Harry Witt, Manager, Radio Station KGB, 1012 First St., San Diego, Calif.

Dear Harry:

I have the following broadcasts to submit which I think CBS would be interested in:

1. August 24th. The combined Negro Choruses from Pasadena, Los Angeles and San Diego under the direction of George M. Garner and Frieta Shaw. The latter's group has already appeared on CBS and received much favorable comment. In addition to this group, there will also be present a number of nationally prominent Negroes from the educational and literary field. It goes without saying that CBS has a large listening audience among the Negroes, and since this is National Negro Day at the Exposition, they could do much to build good will by producing this program.
2. August 31st. Our big 500 Voice Chorus with guest soloists in a specially arranged program at the Ford Music Bowl. Under Dr. Rosenberg, this group has achieved excellent voice production and a wide variety of songs.
3. The same group as in No. 2 will appear on September 7th at the Organ Amphitheater with an entirely new program plus the Exposition Band and Royal Brown at the Organ.
4. September 17th is known as Constitution Day all over the United States. Harry Chandler of the Los Angeles Times has succeeded in interesting the Honorable James M. Beck of Philadelphia, world-famous speaker and acknowledged authority on the Constitution, to address the Nation on that day. As you know, the biggest newspapers in the country sponsor Constitution Day, and hundreds of thousands of school children participate in various contests. It has been suggested that Mr. Beck address the Nation from Philadelphia and that the prize-winning orator address the Nation from the Exposition where entire Constitution Day contests will culminate in the awarding of prizes. It strikes me that this would be a splendid educational feature for Columbia as it particularly is of interest to the younger generation.

The time on any of these programs can be set to meet the convenience of a broadcast. I would suggest the 3:30 to 4:30 spot which is now being used by the Symphonies. For your information, I am trying to arrange with the Exposition that they assume the cost on all remote equipment after August 22nd.

I hope you will give these programs your serious consideration and send the information along through the usual channels.

Sincerely yours,

GARY C. BRECKNER, Director

(Box 27 Folder 18, California-Pacific International Exposition, San Diego Public Library.)

San Diego Union, August 12, 1935, 1:1-2. Program - Children's Day, American-Japan Student Conference Day.

Scrapbook No. 20 - Ruth Norton, August 13, 1935. Salvation Army exhibit in **Palace of Better Housing**: models and colored slides illustrating how the Army "salvaged humanity" through "salvaged material". San Diego Historical Society Research Library.

San Diego Union, August 13, 1935, 1:1-2. Program - National Society Daughters of 1812 Day.

San Diego Sun, August 14, 1935, 3:3-4. **Aimee McPherson** says she draws bigger crowd than **nudist** camp.

San Diego Sun, August 14, 1935, 3:2. Girl leaps in Exposition's chute.

San Diego Union, August 14, 1935, 1:1-2. Program.

San Diego Union, August 14, 1935, 1:3-4. Representative Philip Goodwin feted by G. A. Davidson on visit to Exposition.

San Diego Herald, August 15, 1935, 1:2. Casey finds new way to get two-bit pieces at Exposition.

San Diego Sun, August 15, 1935, 1:5, 2:2. Exposition presents new features; **Fanchon and Marco** offer free shows daily.

San Diego Union, August 17, 1935, 1:3. Crowds pay silent tribute to **Will Rogers**.

Scrapbook No. 20 - Ruth Norton. 10,500 Exposition coins distributed free to visitors by Ford Motor Company; thousands of sticks of Beech-nut gum given away in **Palace of Food and Beverages**.

San Diego Union, August 18, 1935, 1:7-8. Program - Japan Day, Delta Sigma Theta Sorority Day, National Association of Postal Supervisors' Day, American Motorcycle Day.

San Diego Union, August 18, 1935, 1:4, 5:1. Governor **Frank Merriam** host with San Diego to Los Angeles crowds at Exposition; parade, luncheon, Organ Amphitheater program.

San Diego Union, August 18, 1935, 3:1. Buddhist rites at Exposition attracted large audience to Organ Amphitheater last evening.

San Diego Union, August 18, 1935, II, 8:2-3. U.S. Navy holds retreat ceremony at Exposition every Monday.

San Diego Union, August 19, 1935, 1:1-2. Program - Royal Neighbors of America Day, National League of American Pen Women Day.

San Diego Union, August 19, 1935, 1:7, 2:6. **Edsel Ford**, wife, visit Exposition incognito.

San Diego Union, August 19, 1935, 5:1. **Japanese** honor Washington, Lincoln in Exposition ceremony; sports-dancing feature all-day program.

San Diego Union, August 19, 1935, 5:2-3. Three more days of **Fanchon-Marco** shows remain for Exposition visitors.

San Diego Union, August 20, 1935, 1:1-2. Program - New York Day, Ellen Beech Yaw Day.

San Diego Union, August 20, 1935, 1:5, 2:3. **Edsel Ford** says prosperity near, by Ben Lemmon.

Scrapbook No. 20 - Ruth Norton, August 21, 1934, Sound film at **Palace of Water** showing story of water in Southern California.

Letter, August 21, 1935, Mr. Foster to Mr. Gildred; SUBJECT: S.E.R.A. OPERATIONS

I have received definite instructions to close down on S.E.R.A. operations tomorrow night regardless of the status of the work which might be incompletd. This shut-down will of course affect the Exposition financially to a great extent because of the necessity of completing and carrying on some of the work which is very essential.

I am making every effort to secure at least a very small crew for a period of another week in order to finish up some of the odds and ends which have been under way. However, I doubt very much whether or not this will be done, but will learn more about it this afternoon.

In the meantime, Mr. Barter and I are working up a complete report on just how we will be affected and will submit this to you immediately. As you know, we have a project under the new program, namely W.P.A., which will give us sufficient money to carry on our complete program. This new project has already been approved insofar as the local and district offices are concerned and is now in San Francisco awaiting the authorization from Washington to put under way the W.P.A. program in California.

It is very hard to say just when the new program will go into effect. It might be three or four days -- - a week --- or it might not go into effect for a month. However, we have very definite assurance that this program will be under way not later than the middle of September.

Of course, the major program for the S.E.R.A. is landscaping, and as the new landscaping and replanting program was done entirely by S.E.R.A. forces an enormous amount of money was saved. We have also maintained a crew of fifteen or sixteen mechanics, who have been able to take care of numerous repairs and remodeling to the buildings. These problems come up from day to day and without S.E.R.A. forces, if the work is essential, it would have to be done with Exposition forces.

As soon as I have any further information, I shall immediately notify you.

(Transcription from letter in Box Files of California-Pacific International Exposition kept by San Diego Public Library.)

San Diego Union, August 21, 1935, 1:1-2. Program - Texas Day, Music Teachers' Association Day.

San Diego Union, August 21, 1935, 5:2-3. Council hears plans to use **Palisades** buildings for San Diego Civic Center; proposal by Martin Healy, head of Liberal Businessmen's League; Frank L. Hope, architect, submitted drawings; plenty of space for parking automobiles.

San Diego Union, August 21, 1935, 6:1. San Francisco Symphony will play closing concert at **Ford Bowl** tomorrow, by Wallace Moody.

Interdepartmental Correspondence, California-Pacific International Exposition; August 23, 1935.

To: Messrs. Dailard, Drugan, Crandall, Eckhart, Gildred, Hotchkiss, Smith, Wangenheim, Wood.

From: L. R. Folda

Subject: Minutes of the Adjustment Committee Meeting held August 21, 1935

The Committee is to meet with Mr. Muller of the Muller Catering Co., who is now operating the stand and at which time this matter will be settled.

The Committee finds that the Manuel Goodman contract has never been approved and will endeavor to push this through

Mr. J. S. Kerley is not operating on the grounds and no approval by the Committee will be given for him to sell his books.

The Committee did not have sufficient information for use to pass on the Lockwood-Shakleford Co. situation covering space 8A in the Palace of Food and Beverages, and, when we have gone further into this, we will advise Mr. Novak of our findings.

The Committee authorized the charge-off of \$190.34, being a portion of the Coca Cola account on our books. This amount represents labor and material furnished 6/30/35 in the amount of \$14.34; work as per agreement 4/30/35 in the amount of \$176.00. The Exposition entered into an agreement with Coca Cola Co. to reinforce the floor under their Exhibit which amount has been paid and the above amount is a further charge made for the same work over and above the contract entered into with them.

The Committee, on recommendation of the Finance Committee, has made an assignment of the Ted Goldstein account on our books, filing suit and attaching his account at the Exposition branch of the Bank of America. Mr. Goldstein owes us \$357.15 for back rental. We are authorizing Mr. Eckhart to make a check for \$50.00 to Gray, Cary, Ames & Driscoll to cover a bond for which they have given their check.

The Committee has requested that Mr. Brown endeavor to remove as quickly as he can the stands between Spanish Village and the main thoroughfare. Also, that he notify the different parties to clear away all unnecessary card tables used by Mr. Wolcott in the sale of the Official Guide Book.

The Committee authorized Mr. Wood to contact Mr. Williams of the Coast Catering Co. for the removal of his stands opposite the Nudist Colon⁷ and tender in lieu of this stand the warehouse rental.

The Committee has received two checks in settlement of percentage on the Race Horse machines as agreed with Mr. Dunas in the amount of \$53.08, which we are forwarding to Mr. Eckhart for entry. This will bring the account up to the week of August 17. We are also forwarding to Mr. Eckhart a check for \$546.84, covering the percentage of the International Drug Co. for the same period, covering food and drugs.

The Committee discussed with Mr. Sirigo the photo machine in the Pass Division and agreed that Mr. Sirigo put in an attendant to maintain this machine during the hours that the Pass Division is open. Mr. Sirigo, from this date on, is to receive a total of twenty-five cents for each photo made in that this will take care of his expense. Heretofore, people have had to go to the Gulch or on the Midway to have their pictures taken, which did not prove very satisfactory.

The Committee also discussed with Mr. Sirigo his expense account in organizing and constructing the Fifth International Salon of Photography. According to Mr. Sirigo, the Exposition was at one time going to put up a building to house the Photography Exhibit, but was later decided to use the Hall of Science. Mr. Sirigo went to considerable expense, and he now requests that we take care of this amount. This matter is held in abeyance until such time as further data can be accumulated.

Mr. Foster's memo to Mr. Gildred was discussed, and it was deemed advisable that Mr. Foster contact Television and the Robot, arriving at some definite rental for the chairs furnished by the Legion. The Committee will cooperate with Mr. Foster in securing some agreement, should he need their aid.

The Committee approved the rebate of \$14.21 per day for twenty-eight days to Mr. Cayre, but did not approve the \$50.00 requested by him for building the doors for his Exhibit. This refund of \$14.21 per day covers the period from the opening date of the Exposition to the opening date of the Exhibit.

The Committee has made an offer of \$200.00 to Mr. Slavik for the shoe shine stands which we had removed from the different rest rooms. The check will be authorized in this amount when Mr. Slavik has accepted this amount in full settlement.

The Committee does not feel it advisable for us to request Bufour and Rogers Can Stands to be placed on a weekly rental basis in that shortly after the opening of the Exposition, this request was made by Mr. Dufour and declined by the Exposition.

The Committee did not accept Mr. Barnet's offer of fifty percent of the gross sales to the Exposition for the privilege of selling cushions at the Organ.

The Committee has allowed a reduction of \$21.00 on the amount of Marie Svaboda, Space 33, Spanish Village, known as the Peasant Art Shop in that she offered to pay the balance of \$79.00 provided we make the adjustment. Upon investigation we find that the space was not evenly divided when the partition was put in. According to our books, Mrs. Svaboda owes us \$100.00.

The Committee approved Mr. Brown's request that Mr. Joachim be allowed to sublease his space in the Spanish Village to Mr. S. H. Nadoff. Mr. Nadoff is to sell the same merchandise that he is now selling in the Spanish Village in Booth 31.

The Committee declined the reduction Mr. Casey has taken in the amount of \$113.75 for parking ticket credit given in the month of July. We find no authorization in the files for Mr. Casey to take advantage of this credit, and, therefore, are requesting Mr. Eckhart to make collection of this amount. We are also notifying Mr. Eckhart that Mr. Casey had made a practice to keep the lower portion near the Fire Station, as well as the space near the Yorick Theater, open until such time as he has filled the balance of his parking space, after which time he charges fifty cents for parking in these two zones. If Mr. Casey desires to follow this procedure, it will be necessary for him, according to the terms of contract, to pay 65-35 and not 55-45.

The Committee received a further request from George E. Coblentz for \$300.00. In view of the fact that he cannot furnish us with any definite commitment by the Exposition, we decline to make any settlement.

The Committee has declined the transfer of Mrs. Verdugo to the space formerly occupied by Mr. Briggs in the Spanish Village, in that we do not feel obligated to pay \$200.00 for this space so that we could accommodate Mrs. Verdugo. Mrs. Verdugo has been a source of trouble since the opening of the Exposition, and if she is willing to pay \$200.00 for this corner, we will approve the transfer. The Committee also recommends that this space be put in the hands of Mr. Sandusky with the intention of locating some Concessionaire to take the space.

In the matter of Mrs. Herman Rudick, operating the Midget City Bazaar, on which we receive ten percent, we find that the contract is to come through when the necessary changes have been made. The Committee recommended that Mr. C. Peters and Mr. A. M. Livermore be allowed to operate without a contract on a week to week verbal basis and that the amounts now in suspense be transferred to a revenue account.

The Beechnut Packing Co. contract is still under discussion in that they are objecting to pay five percent for the privilege of operating a lunch stand.

San Diego Union, August 23, 1935, 1:1-2. Program - League of Hard of Hearing Day.

San Diego Union, August 23, 1935, 1:5, 5:1. Local symphony will play again at **Ford Bowl** concerts; second series of programs to begin August 31, by Wallace Moody.

San Diego Union, August 23, 1935, 1:2. Fleet steams home in 15-mile parade; 400 planes will soar over ships; gigantic review to honor children; Admiral Reeves' flagship will lead vessels past Ballast Point at 2:00 p.m.

San Diego Union, August 23, 1935, 3:3-4. Ten thousand Exposition visitors stand at attention for Will Rogers services; 30th Infantry, U.S. Army provisional rifle company conducted modified funeral services at 5:00 p.m. yesterday in Plaza del Pacifico.

San Diego Union, August 23, 1935, 5:2. Mrs. Albert Lytle Deane, world press advocate, declares Exposition a "Symphony".

San Diego Union, August 23, 1935, 6:1. Carrie Jacobs Bond, composer, honored at Exposition Wisconsin event.

San Diego Union, August 23, 1935, 6:1. Children win Admission Fight; protest announcement that Labor Day would not be a "Nickel Day" for children.

San Diego Union, August 23, 1935, 6:2. Music program at Exposition today.

San Diego Union, August 23, 1935, 6:3. Visitors to Exposition warned to care for dogs in automobiles.

San Diego Union, August 23, 1935, 6:4. Southern cities to have special Exposition day.

San Diego Union, August 23, 1935, 6:4. **Model CCC Camp** dedication fixed for next Monday.

San Diego Union, August 23, 1935, 6:4. Exposition Excerpts.

San Diego Union, August 23, 1935, 6:6. **National Negro Day** is featured event tomorrow.

San Diego Union, August 23, 1935, 7:1. Exposition welcomes guests in unique **Casa del Rey Moro Café**.

San Diego Union, August 23, 1935, II, 4:1. Sargent Johnson's terra cotta sculpture of head of "Esther" in **Palace of Fine Arts** has wide appeal, by Reginald Poland.

San Diego Union, August 23, 1935, II, 12:1. "Daddy" Rango, radio philosopher, celebrates his 47th birthday with a picnic Sunday on 6th street side of Balboa Park.

San Diego Union, August 24, 1935, 1:1-2. Program - Navy Day, National Negro Day.

San Diego Union, August 24, 1935, 9:2-3. **Joe E. Brown**, film comedian, to visit Exposition Monday; many Nickel Day events planned.

San Diego Union, August 24, 1935, 9:3-4. **Old Globe** players honor hard-of-hearing visitors; appliances installed by management at seats occupied by special guests.

San Diego Union, August 24, 1935, 9:2. Acrobats in free show at **Gold Gulch** last night.

San Diego Union, August 24, 1935, 9:4-5. **Dr. Francis E. Townsend** will speak at Exposition tomorrow; big crowd due.

San Diego Union, August 24, 1935, 9:5. **National Negro Day** attracting thousands here.

San Diego Union, August 25, 1935, 1:7-8. Program - Townsend Day, Delta Chi-Sigma Day, Yugoslav Day, Young Ladies' Institute Day, National Association of Purchasing Agents' Day, Navy Day.

San Diego Union, August 25, 1935, 1:6. **Dr. Francis E. Townsend** to make address at Exposition today; originator of old-age pension plan will be guest of honor at **Ford Bowl**.

San Diego Union, August 25, 1935, 1:2, 2:4. **National Negro Day** offers rare musical numbers.

San Diego Union, August 25, 1935, 5:1. Music feature by Welsh groups planned at Exposition.

San Diego Union, August 25, 1935, 5:7. Yugoslav event today expected to attract 5,000.

San Diego Union, August 25, 1935, 14:1. Exposition band, chorus praised for fine work, by Wallace Moody.

San Diego Union, August 25, 1935, II, 7:6-7. **John Morley** discusses park planting; praises citizens and specialists at August meeting of **Floral Association**; 100 pounds of selected nasturtium seed were planted this year in Balboa Park; park absorbed nearly 600,000 plants for ornamental purposes between January and

June; at present 70,000 petunias and 50,000 other sets are going in for winter bloom; plummy maze of **Palm Canyon** is causing a slight case of green eyes among Florida visitors; azure border of ageratum around **lily pond** taking the place of a wire fence; put in to prevent "kids" from falling in.

San Diego Union, August 25, 1935, Society-Club, 1:1-2, 2:1-2. **Court of Honor** reception will be held as welcome courtesy to Navy officers Tuesday.

San Diego Union, August 26, 1935, 1:1-2. Program - CCC Day, Navy and Marine Mothers' Day, Children's Day, Bicycle Day, Navy Day.

San Diego Union, August 26, 1935, 1:2, 5:1. Thousands cheer **Townsend** in Exposition talks; rains fail to bar big attendance; old-age pension leader hits Congress; make stirring appeal for abolishment of poverty; sees victory.

San Diego Union, August 26, 1935, 1:4. Needy children to be guests at Exposition tomorrow.

San Diego Union, August 26, 1935, 3:2-3. San Diego Symphony will close **Ford Bowl** season, by Wallace Moody.

San Diego Union, August 26, 1935, 5:6-7. **Joe E. Brown**, bicycle events on "Nickel Day".

San Diego Union, August 26, 1935, 5:8. 5,000 Yugoslavs celebrate their day despite rain.

San Diego Union, August 27, 1935, 1:1-2. Program - Marine Day, Orphans' Day, Underprivileged Boys' Day, National Locksmith Association Day, Navy Day.

San Diego Union, August 27, 1935, 1:6-7, 2:1. Boys, bikes and freckles greet **Joe E. Brown** at Exposition; children crowd around film comedian on Nickel Day; wheels and shapes of many sizes are displayed.

San Diego Union, August 27, 1935, 5:1. **CCC Model Camp** at Exposition dedicated; 2,000 workers gather.

San Diego Union, August 27, 1935, 5:2-3. Many Orphan Homes will send children to see Exposition today.

San Diego Union, August 28, 1935, 1:1-2. Program - National Sojourner's Day.

San Diego Union, August 28, 1935, 1:1-2, 2:2. Orphans' Day makes 2,000 little ones happy at Exposition.

San Diego Union, August 28, 1935, 5:1. Huge Naval Band presented at **Ford Bowl**.

San Diego Union, August 28, 1935, 5:1. Master Barbers will have Exposition day next Sunday.

San Diego Union, August 28, 1935, 5:6. Farm Bureau Day announced for Friday.

San Diego Union, August 28, 1935, 5:6. Exposition Excerpts.

San Diego Herald, August 29, 1935, 1:1-4. Exposition has banner week of its history as reports are collected from every section of San Diego Fair.

NOTE; **SAN DIEGO UNION** is missing from San Diego Public Library microfilm for August 29, 30 and 31. **SAN DIEGO EVENING TRIBUNE** is substituted.

San Diego Sun, August 29, 1935, 5:2-5. Chet Johnson, San Francisco newspaperman, writes of San Diego Exposition.

San Diego Evening Tribune, August 29, 1935, 1:2-3. Program.

San Diego Evening Tribune, August 31, 1935, 1:3. City prepared to house big Exposition Crowds.

FOR TO ADMIRE AN' TO BUY, September 1935, **Western Advertising**, pp. 12-23, 26-30.

Nearly three million admissions have been clicked through the turnstiles at Balboa Park, San Diego. Visitors from every state and nation have turned gaily into the Avenida, singing with Kipling:

For to admire an' for to see,
For to be 'old this world so wide -
It never done no good to me,
But I can't drop it if I tried

Here is purchasing humanity in the mass, on the one hand; and on the other, a multitude of commercial exhibits in which vendors of tracts and tractors, jewelry and chewing gum, compete to ensnare their interest. What has each group learned about the other?

The best place to start looking for this information is where other inquirers go --- Shell Oil Company's information service, housed in a great shell 60 feet high, set in the midst of gardens on the Calle de Colon, and in two smaller shells elsewhere on the exposition grounds. What is the commonest question asked of Shell attendants, who have satisfied the curiosity of 150,000 persons?

The question most frequently asked is *not* "Where is the nudist colony?"

It is *not* "Where can I get something to eat?" --- although this ranks next to the top.

The most frequent question is: "Where is the Ford building?" The Ford display, most expensive, ambitious and widely publicized of all, is easily the outstanding feature of the exposition for the average visitor both as he enters and as he leaves. And, after the topic of food, questions about other commercial exhibits come next in frequency. There are as many inquiries about them as about all the purely entertainment features combined.

Shell's service was established to stimulate western travel, and includes complete travel information, but it also extends to almost every conceivable subject. Almost a million people have entered Shell's doors (actual count in mid-August was 722,000); Shell's proportion of the total gate has been

consistently about one-third; and 6 percent of all visitors have been given information, in addition to seeing Shell's display. In answering 100 questions an hour since May 29, Shell attendants have been able to learn a good deal about the fair-going public.

Shell's observations indicate that the typical visitor wants, first of all, to see the Ford display; second, to think about eating. He likes the exhibits that are scientific, mechanical and colorful. If there is no movement, he quickly tires and goes on; if there is movement, he will stay through the entire performance and listen to the sales talk. If he is an easterner, his special interest is local color --- Spanish and early western atmosphere.

The Visitors' Whims

He is a collector; willing to load himself with free samples and literature. He objects to paying even a few cents for anything which he considers a sample; but he will pay readily enough for food or entertainment that offers obvious value. His is patronizing restaurants on the exposition grounds generously since they reduced their prices. He is pretty childish in his choice of things to see and do. He wants someone else to plan his tour of the exposition.

He is particularly delighted with exhibits which, like Ford and Coca Cola, show actual manufacturing processes of products with which he is familiar. His most frequent source of dissatisfaction is in failing to find some exhibit which was announced in pre-exposition days but which did not materialize. And he insists on losing someone in his party and asking Shell to help in the finding.

Another exhibit that will have probably checked off its millionth visitor by the time this story appears is that of Standard Oil Company of California. Early last month, when the exposition was only 70 days old, attendance at Standard's Tower to the Sun had totaled 674,000 --- or 33.1 percent of exposition admissions.

Standard has made its bid for favor with the striking architecture (Modern-Mayan-Aztec) and the proportions (110 feet in height) of its building and with an entertainment feature which wears an air of mystery. Forty-five to fifty times each day Standard presents its "illuvision" show, portraying the national parks in color and in three dimensions, by a secret process, developed in its own organization.

That the color and movement of this display are what the public likes is evidenced by the rarity with which anyone turns away before the 12-minute show is over. Many see the illuvision several times.

This advertiser is working to promote western travel, choosing the national parks as a specific objective. No results from this effort were expected to be visible until next year, but already the superintendents of some of the parks have reported increased traffic directly traceable to Standard's missionary work in San Diego.

Attendants distribute a handbook, "Adventuring through the National Parks of the West" at the Sun Tower; of the thousands given out, only a handful have been thrown away on the exposition ground, to be picked up by the caretakers.

Sea Island Plays to Children

Mr. Ford's display, reputed to have cost over \$2,000,000 (and looking it) gets nearly 100 percent of the gate. Perhaps next in attendance is the display of Sea Island Sugar, largest in the Palace of Foods and Beverages. Here the child is the special objective and the selling burden is thrown on Sea Island dolls, which just now are an important part of every phase of the Sea Island sales program. The exhibit includes a puppet show circus, a parade and a color moving picture in which is told the story of sugar and of the dolls on the sugar bags.

This exhibit pulls them in; it is consistently drawing between 38 and 45 percent of the gate, partly because of its entertainment value and partly because of its strategic location. Many visitors, attracted to the display because it is large and restful, stay for a half-hour program with evident enjoyment.

In an adjoining "refreshment hut" Sea Island carries on a different sort of selling. Lemonade is sold at 10 cents a glass, including cookies or cake. But the lemonade is un-sweetened. The consumer sweetens to his own taste, using the surprising instant-dissolving sugar. Attendants point out the superiorities of this sugar, and also suggest that the housewife can make equally appetizing cookies and cake from recipes given on Sea Island packages.

In the Palace of Foods and Beverages there are a dozen or so lunch counter, maintained by exhibitors, which are thronged at almost any hour of the day by hungry men, women and children. These paid-for meals go down on top of innumerable free food samples, and help many of the exhibitors pay for costly displays. Kraft Cheese, Standard Brands, Fisher's Blend Flour and Coca Cola are a few of the comestible products represented by a display and dispensed at the same time, at a price.

Questions About Wine

An exhibit which is making special note of questions asked and answered is that of the Wine Institute. Ten leading California wineries, members of the institute, are representing their industry through the Wine Temple in the Palace of Foods and Beverages.

The Wine Temple is not a selling exhibit; it gives away no samples; its chief purpose is to impart information. Especially common are inquiries about the right kind of wine to serve with a given food, and the relative merit of California and imported wines. Older people often ask what has become of a brand which they knew well before prohibition. "Are any real champagnes made in California?" is frequently asked. "Can you make wine out of oranges?" is another common question, as is "Can you buy direct from wineries?" And a multitude of specific points about the processing of wines and their use, especially of dry wines, are cleared up.

Each day's grist of inquiries is reported together with facts about those who visited the exhibit. Analysis of a week's report shows that 66.6 percent of those who asked questions were residents of California, 33.4 percent from other states; 71.2 percent were middle-aged; 21.6 percent were young and 7.2 percent were elderly; 85.5 percent appeared to be American and 14.5 percent foreign; attendants classified 15 percent as persons of wealth and the rest as of moderate income. Sweet wines are preferred by 54.6 percent of the questioners, 36.1 percent expressed a preference for dry wines, and 9.3 percent had no preference. But practically everyone knew something about wine --- its taste, if not its full effects.

Associated Oil Company can make no check of its "percentage of the gate," beyond the gross total reported by the exposition management, for to the exposition visitor, Associated is a friendly voice. The company operates the public address system on the grounds --- two studios, seven pickup stations, and 156 loudspeakers making up a concentrated network for public announcements and for broadcasting entertainment. Since it is almost impossible for any visitor to miss hearing and identifying this Associated Service, the company believes it can claim 100 percent of the gate. Some observers have reported their opinion that Associated is "stealing the show"; on the other hand, exhibitors who offer entertainment or expository displays are convinced that they have something that Associated cannot get through the air.

Wells Fargo Instructs

Two big financial institutions are offering exhibits which are interesting contrasts in showmanship. Wells Fargo Bank & Union Trust Company of San Francisco has on display its famous collection of Western Americana --- an 80-year old Wells Fargo stagecoach, veteran of the Overland Trail; the renowned Golden Spike, on public view for the first time since 1869 when the first transcontinental railroad joined East and West; with it, the original painting, "Driving the Last Spike"; the Menendez collection of rare golden nuggets; an interesting display of early firearms; James Marshall's gold-mining tools; and a variety of rare and curious items, authentically portraying the glamorous story of the early West. This display, on account

of its nature and its location, attracts a selected group. Nevertheless, there are about 5,000 visitors a day, or about 20 percent of the total admissions. And, nevertheless, visitors who pause before the precious Golden Spike, protected by a beam of light striking a photoelectric cell, persist in thrusting hat or paper through the light ray and sounding a general alarm, bringing the police posthaste.

Transamerica Corporation maintains a small theater, seating 80 persons, in which is presented a moving picture telling a factual story about the organization. No attempt has been made to add popular or dramatic appeal, but from 2,000 to 2,500 see the picture daily, and many who arrive late for one showing stay to see the next performance. There is no attempt at selling; but stockholders of Transamerica and depositors in its subsidiaries have been enthusiastic in their comments on the character of the exhibit.

Most readers of **Western Advertising**, if they have not seen the Ford building and exhibits at San Diego, have at least heard about them --- the modern main structure looped in a Figure-8; the elaborate dioramas showing how Ford draws upon the natural resources of the world; and other dioramas showing the use of Ford cars and trucks in countries bordering the Pacific; the 27 exhibits of manufacturing and testing machinery; the "Roads of the Pacific" on which visitors are carried in Fords, getting a demonstration of the car simultaneously with a lecture on 14 historic trails and highways; the Ford Bowl, presenting concerts and recitals to exposition crowds.

Donald H. Long of Ford Motor Company, San Diego, gives the following indication of what his organization is realizing from the fair:

"To date (August 22) 1,425,456 persons have visited the Ford Exposition Building. It is reasonably expected that 2,750,000 will have gone through the exhibit halls before the Exposition closes on November 11.

"For the most part, people come to an Exposition, we have found, to be entertained and amused. They will not stand for being gypped. They are willing to spend their money, but they insist on value received for each dollar expended. It is evident that the visitors coming now are more liberal with their expenditures than those who came earlier.

"The three best drawing exhibits on the grounds are, in order, Ford Exposition Building, Midway and Gold Gulch (Days of '49'ers) and the Globe Theater (tabloid Shakespeare).

"Visitors to the Exposition are orderly, good humored and generally in a Mardi Gras mood. They are intent on seeing as much of the Fair as they can with the least effort, in the shortest time, and at the smallest expense.

"In the Ford Exposition Building, which requires two and one-half hours to make the round of the exhibits if the lectures are followed one after another, a larger majority stay with the lectures one after the other than did so at Chicago last year.

"It is our opinion that a higher percentage of Fair visitors here are prospects for Ford V-8 cars than was the case last year at Chicago. This is partly because of the type of persons coming to this Fair and partly because of the slightly improved national economic condition."

Fisher Flouring Mills Company is a Pacific Coast concern that had a sentimental as well as a practical interest in exhibiting at San Diego. Those who can remember the San Francisco fair of 1915 remember Fisher's scones. Fisher has tried, in its first California advertising venture in 20 years, to make scones as important a part of the San Diego exposition. The booth, which advertises Family Flour while doing a land-office business in toothsome scones (with raspberry jam and butter), is only part of Fisher's exhibit, third largest in the Food [sic] and Beverage Palace. One-third of the space is allotted to the bakery trade, and more than 800 persons directly connected with the bakery industry have stepped up and introduced themselves.

According to E. G. Lawrence of Fisher's Los Angeles office, it took time for the San Diego exposition to swing into its stride --- "for the first few weeks the crowds seemed to lack fair atmosphere. Attempting to go through the whole fair in four or five hours gave the early visitors a poor conception of the quality of the exhibits. In the last few weeks this has changed; people seem to go around in a more friendly mood, with the idea of learning and seeing things. Good prospects are more numerous, and we are making sales in goodly numbers . . ."

Still a different value is sought by A. Sensenbrenner Sons, Los Angeles manufacturers of Santa Fe cigars. The chief feature of this company's display is a realistic mechanical wax figure smoking a Santa Fe. His appearance and lifelike movements deceive many onlookers. Spanish-costumed attendants sell an attractive box of ten Santa Fe's at a reasonable price, and mail it free to any point in the United States. Sensenbrenner Sons say: "Very often this helps to get a brand started in a community in which there is no present sale. Since the opening of the exposition we have received a great many letters from eastern retailers, undoubtedly due directly and indirectly to gifts of Santa Fe cigars sent by people from the exposition."

But a fair is primarily a place of institutional effort, and for long-circuit rather than short-circuit selling. Institutions that seek to do a general educational job are therefore prominent in San Diego.

The California Redwood Association has a two-room structure in the Palace of Better Housing, showing interior and exterior uses of redwood. Attendance in this Palace (somewhat off the beaten track) is relatively poor, but since those who come are usually definitely interested in housing, the percentage of live prospects is high. Many who see the redwood exhibit are builders and architects. The Association is answering questions for about one-half of one percent of all who see the exhibit, and one-fifth of this number are actually building or remodeling. Of those requesting information, 85 percent are from Southern California, 10 percent from Northern California, 5 percent from other states. Everybody seems to like the two-room house of redwood; in fact twenty persons have offered to buy it and live in it.

Challenge Cream and Butter Association has a huge relief map of the Pacific slope, on which are indicated in colored lights the Association's producing and distributing points. The story told by display and attendants is whole institutional --- the growth of the Challenge organization to its present size (20,000 Pacific Coast producers) as one of the world's great marketing associations. Challenge has been able to trace several new deal customers to the fair display, and perhaps a dozen wholesale customers from outside California.

The Southern California-Arizona Association of Ice Industries has found that it is doing a job not only for its own market but also for ice throughout the country. Its modern black-and-chromium display sets off gleaming white ice refrigerators and gives many fairgoers a new conception of these appliances. Ice companies from many states have written in to report sales directly attributable to the exposition. Few visitors from the East, reports the Association, had realized that today's ice refrigerators are thoroughly modern in appearance and in efficiency of operation. Features that have opened eastern eyes are the freezing units (for desserts, etc.) in the ice refrigerator, the air-conditioning units using ice, a device for cutting ice cubes from a block of ice. The display, of course, emphasizes the advantages of "ice-man's ice" over ice made in a power-refrigerator from domestic drinking water.

Institutional endeavor of a different kind is represented by the display of Owens-Illinois Pacific Coast Company, a modernistic 85-foot long exhibit of glass and glass containers. This company has two displays. One is directed to the general consumer; it shows many types of products in glass, strives to create a thorough-going confidence into action by giving her recipe booklets and guides to preserving foods. Results have already been reported in the form of increases in sales of glass-packed coffee, for example, to people who have been to San Diego. The industrial exhibit makes a different appeal; it has elicited hundreds of questions on industrial application of glass. In connection with the Owens-Illinois exhibit, there is small but complete stage, on which appears a magician, to gather and entertain the crowd at regular intervals.

San Diego Union, September 1, 1935, 1:2, 3:2. Wine Industries program starts holiday at Exposition; Modern Woodmen and other organizations celebrate "days" during weekend.

San Diego Union, September 1, 1935, 1:4-5. Program - Cactus and Succulent Society of America Day; Richfield Oil Co. Day, Modern Woodmen of America Day, Lutheran Day, Welsh Day, Barbers' Day, Delta Omega Day.

San Diego Union, September 1, 1935, 3:4. Charles Cadmen Day Wednesday.

San Diego Union, September 1, 1935, 4:1. Musical variety features week's programs, by Wallace Moody.

San Diego Union, September 1, 1935, 10:2. Marston tells history of Junipero Serra Museum.

San Diego Union, September 1, 1935, II, 1:1, 2:4. **California State** exhibit shows resources of the state; 23 counties present display acclaimed for its educational value.

San Diego Union, September 1, 1935, II, 1:4-5, 2:3. "Four Cornerstones of American Democracy," in **Palace of Education** considered sculptor Schweigardt's masterpiece.

San Diego Union, September 1, 1935, II, 1:7. Municipal **golf course** is \$7,107 in red for fiscal year 1934-35; course turned in revenues of \$31,425.75; hopes of paying off the bonds issued to build the course with revenues from the course have failed.

San Diego Sun, September 2, 1935, 1:1, 2:3. Visitors break attendance records at Exposition; a total of 74,019 persons passed through the gates yesterday, exceeding the previous high Sunday mark by 24,000. . . . Topping the day's program were events for 5,000 Welsh people assembled for celebration of Welsh Day.

San Diego Sun, September 2, 1935: 2:2-3, San Diego Symphony thrills big audiences in **Ford Bowl** concerts, by Arthur Henderson.

San Diego Sun, September 2, 1935, 3:3-4. Seeing the Exposition, by Magner White.

San Diego Sun, September 2, 1935, 4:5-6. Midgets, "Macbeth" top **nudists** as popular Exposition features, by Charles Moore.

San Diego Sun, September 2, 1935, 5:2-3. Rare Exposition art, including "Stella," Zoro and **Gold Gulch**, lauded.

San Diego Union, September 2, 1935, 1:1-2. Program – Western Public Golf Championship Day; Modern Woodmen of America Day; Welsh Society Day; Escondido Day.

San Diego Union, September 2, 1935, 3:4. Guns will roar in Exposition air "raids" on three Army days.

San Diego Union, September 2, 1935, 3:5. Cactus growers convene at Exposition.

San Diego Union, September 2, 1935, 3:6. Welshman plan celebration at Exposition today.

San Diego Union, September 2, 1935, 3:6. Barbers gather at Exposition for "day".

San Diego Union, September 2, 1935, 3:7. Joe (Kid) Egan, veteran sports follower, "plugs" San Diego Exposition.

San Diego Sun, September 3, 1935, 1:4, 2:6. Three-day 170,000 total gate at Exposition; grand total of 3 million expected tomorrow.

San Diego Sun, September 3, 1935, 2:5. Betty Jean George of Houston Texas, "Gal Mayor" of **Gold Gulch**, in office twice.

San Diego Sun, September 3, 1935, 3:1-2. Three Cadman appearances on Exposition day honoring him; San Diego composer to be made chief of Sioux tomorrow at **Indian Village**.

San Diego Sun, September 3, 1935, 9:1. "Enemy" ready to "take" Exposition.

San Diego Union, September 3, 1935, 1:1-2. Program.

San Diego Union, September 3, 1935, 1:1-2, 8:6. **Ford** General Sales Manager arrives for special events.

San Diego Union, September 3, 1935, 1:3-5. Concessionaires gleeful as crowds pack **Midway**.

San Diego Union, September 3, 1935, 1:3-6. 170,301 see Exposition show in three days: Monday, September 2 – 60,081; shatters opening day attendance of 59,365 and Monday, August 26 attendance of 37,557.

San Diego Union, September 3, 1935, 8:1. Welsh Festival at **Organ Amphitheater** highly enjoyed, by Wallace Moody.

San Diego Union, September 3, 1935, 8:5. Army planes assembling for attack on Exposition.

San Diego Union, September 3, 1935, 8:6. Marcelli wins ovation from **Ford Bowl** audience, by Wallace Moody.

San Diego Union, September 3, 1935, 8:7. Admission Day pageant planned for Exposition.

San Diego Union, September 3, 1935, 8:8. **Gold Gulch** has another wedding.

San Diego Sun, September 4, 1935, 1:2, 2:4. 3 million mark to be reached at Exposition today; 3-day Army celebration has given attendance a boost.

San Diego Sun, September 4, 1935, 2:2-3. Seeing the Exposition: San Francisco at San Diego Exposition, by Magner White.

San Diego Sun, September 4, 1935,, 4:1. Cadman on KFSD tonight in premiere of “Trail Picture Suite”, composer to play during Exposition concert, by Willie Werner.

San Diego Sun, September 4, 1935, 5:1. Hostile Army attacks by land and air in realistic offensive.

San Diego Sun, September 4, 1935, 5:4. Russian music heard at Exposition, by Arthur Henderson.

San Diego Sun, September 4, 1935, 5:8. Exposition stresses Admission Day.

San Diego Sun, September 4, 1935, 8:6-7. Tea for Saint George Daughters to be give in **House of Hospitality**; dinner and reception this evening will climax program arranged for Cadman Day at the Exposition.

San Diego Sun, September 4, 1935, 8:8. Associated Art Group to have “day”; luncheon in the **Casa del Rey Moro** Café at noon.

San Diego Sun, September 4, 1935, 10:7. 548,000 see **Ford** exhibit in one month.

San Diego Sun, September 4, 1935, 11:6. 1,000 **Ford** men visit Exposition.

San Diego Union, September 4, 1935, 1:1-2. Program – Army Day, Charles Wakefield Cadman Day.

San Diego Union, September 4, 1935, 1:7, 8:1. Army moves in to start three-day show; day and night air attacks and defense to be part of demonstration.

San Diego Union, September 4, 1935, 8:3. Admission Day parade, pageant being planned.

San Diego Union, September 4, 1935, 8:4-5. Cadman music to feature composer’s Exposition “day”.

San Diego Union, September 4, 1935, 11:4. "Cornerstones of American Democracy" fountain in **Palace of Education** to be dedicated tomorrow night.

San Diego Herald, September 5, 1935, 3:1-4. Exposition breaks all records.

San Diego Herald, September 5, 1935, 3:2-5. Exposition nights with Monte – Café **of the World**, created though the interest of J.S. Madill, president of operating company, in San Diego's Exposition; Madill also entrusted John Gage with supervision of **Casa del Rey Moro** Café.

San Diego Herald, September 5, 1935, 4:2-7. Romantic days of '49 culminate in **Gold Gulch** weddings.

San Diego Herald, September 5, 1935, 5:1-2. On the **Midway** – the Exposition's **fun zone**.

San Diego Sun, September 5, 1935, 1:5, 2:5. Three millionth Exposition visitor is honored; Mrs. J. A. Richards of San Diego, "Queen Mother," feted until ten last night.

San Diego Sun, September 5, 1935, 2:6-7. Roses of all hues and from various lands shown at Exposition.

San Diego Sun, September 5, 1935, 4:1. Machine guns, Mozart mixes in KGB releases from Exposition tonight, by Willie Werner.

San Diego Sun, September 5, 1935, 6:4-5. Many "mayors," alive or "dead" echo brief reign in **Gold Gulch**.

San Diego Sun, September 5, 1935, 6:7. Notables here for "Peace Day".

San Diego Sun, September 5, 1935, 8:1. Socialites honor Army officers at Garden Tea; Major General and Mrs. Malone complimented at reception in **Court of Honor**.

San Diego Sun, September 5, 1935k 8:7. "The Four Cornerstones of American Democracy" to be dedicated in **Palace of Education** tonight.

San Diego Sun, September 5, 1935, 9:1. Night raid on Exposition, Army's climax of day; Crowds see inside "Fighting machines" as war rages.

San Diego Sun, September 5, 1935, 9:6-7. 500 voices to be heard on choral program in **Organ Amphitheater** Saturday afternoon and evening.

San Diego Sun, September 5, 1935, 12:1-2. Motorcade to boost "Legion Days" at Exposition, by Wilfred M. Clark.

San Diego Sun, 13:5. Western Association of Art Museum Directors to meet at Exposition.

San Diego Union, September 5, 1935, 1:4-5. Program – Army Day, **Ford** Day.

San Diego Union, September 5, 1935, 1:7-8, 3:8. **Ford** "Victory" special to bring 1,000 for today's Exposition program.

San Diego Union, September 5, 1935, 1:5-7. True Vow club member is "Queen Mother" of Exposition as turnstile clicks 3 million; Mrs. A. J. Richmond greeted by officials; escorted with husband on special tour; honored at dinner.

San Diego Union, September 5, 1935, 3:2-3. San Diego Symphony Orchestra strikes popular vein in Viennese night concert at **Ford Bowl**, by Wallace Moody.

San Diego Union, September 5, 1935, 3:4. Music features Charles Cadman Exposition Day.

San Diego Union, September 5, 1935, 5:1. Crowds watch local artists working at Exposition.

San Diego Union, September 5, 1935, II, 1:2. Fliers plan Exposition "attacks"; night maneuver main feature of three Army days.

San Diego Union, September 5, 1935, II, 1:3. Exposition Excerpts.

San Diego Union, September 5, 1935, II, 1:6. Sculptor Frederick William Schweigardt will be honored at Exposition tonight.

Minutes of the Adjustment Committee of the California-Pacific International Exposition, September 6, 1935.

L. R. Folda to Messrs. Dailard, Drugan, Crandall, Eckhart, Gildred, Hotchkiss, Smith Wangeheim, Wood.

The Adjustment Committee met with Mr. Wangenheim this morning and approved the reduction of percentage now paid by the Café of the World by two and one-half percent on the main dining room and the service bar. There was granted no reduction on the Coffee Shop and the two bars adjoining the Café. This percentage is retroactive to July 14, only as to the amount now owing and not effecting the money paid to us on the present balances.

The Adjustment Committee reviewed the bill rendered by Mr. Sirigo with Mr. Wangenheim and it was decided that the Exposition stand the expense of building the walls for displaying the photographs selected as prize winners, which bill amounts to \$589.00.

The Committee reviewed Mr. Funk's letter relative to Century Sensations in which he requested a refund of \$200.00 to cover his overdraft on our books and asks that no further demolition be deducted from his settlements. The Committee recommended that this \$200.00 be allowed and transferred on our books and that an additional \$75.00 be allowed to take care of the insurance which our Insurance Committee has been unable to secure and that we continue deducting the regular weekly deduction from his settlements for the duration of the Exposition until an amount has been accumulated as called for in the contract.

The Committee has again interviewed Mr. Black and secured from him a check for \$500.00 to be deposited with the Exposition for demolition and transportation of sets and equipment. Also, we are informed that the settlement checks for the two previous weeks are being mailed today from Los Angeles.

The Committee approved the charge-off of small electric bills charged against the various Exhibitors for lighting during the time their booth was under construction. The total amount of these 28 bills is \$28.11. In each case, the party has refused to pay, claiming that such service was to be furnished before meters were installed or that they received no such service, and others said that they were not open as stated on the bills.

San Diego Sun, September 6, 1935, 1:7-8. Army makes final air raid on Exposition – closing maneuvers.

San Diego Sun, September 6, 1935, 1:6, 2:3. Five British flags at Exposition; 10,000 British subjects in celebration.

San Diego Sun, September 6, 1935, 2:3-4. Exposition groups fete crew of British cruiser Danae during its rest in San Diego port.

San Diego Sun, September 6, 1935, 4:1. **Gold Gulch** "opera" to get NBC airing from Exposition tonight, by Willie Werner.

San Diego Sun, September 6, 1935, 10:1. Western artists will be feted at “Bohemian” affair in park; Donal Hord will give demonstration of his work.

San Diego Sun, September 6, 1935, 13:6-7. “Cadman Day” climaxed by rare Exposition program.

San Diego Union, September 6, 1935, 1:4-5. Program – Army Day, **Ford** Day, New Mexico Day, National Funeral Directors’ Day, British Empire Day.

San Diego Union, September 6, 1935, 1:4, 3:1. Optimism is **Ford** Day keynote; gathering at Café **of the World** is feature of program as nearly 1,000 employees have first day at Exposition.

San Diego Union, September 6, 1935, 1:6, 2:7. Army planes show speed in Exposition “attack”.

PRESS BULLETIN #7 - Page 3, October 2, 1935.

The President placed the roses on his lap, smiled at Mrs. Trapnell and spoke a few words of appreciation for the tribute to him. Also, he waved his hat in greeting to groups of girls from foreign

bungalows in the House of Pacific Relations who were assembled on the steps of the tower edifice behind Mrs. Trapnell.

The girls, clad in colorful costumes of their native lands, roundly applauded the President with shuts and hand-clapping. When the din subsided, Frank G. Belcher waved a hand and Tomokazu Hori, Japanese consul for the entire Southern California district, stepped forward from the ranks of his costumed nationals. Conspicuous on the platform beside the consul was a handsome and large Cloisonne vase.

“Mr. President, in honor of the Japanese residents of San Diego, I give you this vase as a tribute of their esteem and affection,” the consul said, in part.

President Roosevelt, seemingly deeply affected by the goodwill compliment, took a few moments before replaying, then said:

“I will treasure this gift all my life, and I hope for many generations to come this vase (he pronounced the “a” like “ah”) will stand to all as a symbol of peace and amity between countries bordering the Pacific.”

The vase itself, a pigeon-blood colored one, was said to be highly valuable.

Following his official greeting and the presentation of the vase to him, President Roosevelt settled back in his seat and his fellow-passengers took places around him. Cameramen, newsreel workers, newspapermen and wielders of microphones for radio broadcasting fell back and the presidential car then began to move slowly along the Avenida de los Palacios in the direction of the House of Hospitality, where the President was entertained at a luncheon given in his honor by exposition officials.

All along the palm-lined thoroughfare, dense throngs packed behind rope barriers cheered the Chief Executive and the latter, with a happy smile on his face, waved his hat constantly. The Plaza de Mexico still teemed with visitors after President Roosevelt passed by, however, because in the wake of his car was a parade of other cars and marching groups.

This procession was featured by a band from the San Diego American Legion Post #6 which led contingents of Boy and Girl Scouts. Also in the line of march was the red-uniformed Merkley’s Musical Maids Band. When this parade swung past the plaza, whistles sounded and the 30th Infantry company and band wheeled into line

Hurd. . . . excerpt . . .

Mr. Roosevelt awoke early after enjoying a good night's rest in a suite at the Hotel del Coronado to which he went from his train on arriving here last night.

While Mrs. Roosevelt went for a swim in the hotel pool, Mr. Roosevelt spent an hour conferring with Keith Morgan, director of the Warm Springs Foundation, and a group of others interested in extending the fight against infantile paralysis.

At 11 a.m., he set out for a round of activities which ended only when he boarded the Houston.

The President first visited the army and navy bases on North Island. Then, accompanied by his party, he inspected the Marine Base and the Naval Training Station before proceeding to the exposition. At the training station he paused to watch difficult exercises by the sailors, carried out to a musical accompaniment.

Greeted by Foreign Nations

The beautiful California Tower was the scene of the first official greeting by the exposition to the President. Soon after his party had entered the grounds via the west gate and had crossed the **Cabrillo Bridge**, the President's car was halted in front of the spire.

There Mrs. Mary Belcher Trapnell, sister of Frank G. Belcher, exposition president, presented Mr. and Mrs. Roosevelt with a large bouquet of flowers on behalf of the thirty-five foreign nations represented in the picturesque **House of Pacific Relations**, located in the **Palisades** area of the fair grounds.

Tomokasu Hori, Japanese Consul for the Southern California district, completed the good-will **expression** of foreign groups by presenting to President Roosevelt on behalf of Japanese residents of San Diego, a pigeon-blood cloisonné vase.

The President's car next was drive along the palm-lined Avenida de los Palacios, the main east-west thoroughfare through the fair area, to the **House of Hospitality**, where he and Mrs. Roosevelt were guests of exposition officials at separate luncheons. The President was entertained in the Sala de Oro.

Mr. Roosevelt was the third President to appear in San Diego, the others having been Benjamin Harrison and Woodrow Wilson.

San Diego Union, October 3, 1935, 1:8, 3:8. Ovation given President Roosevelt; he **expresses** gratitude; mighty cheers in **Stadium** as he delivers address; close to 200,000 San Diegans and visitors; took 30-mile drive through military and naval establishments, the Exposition, the **Stadium** and city streets; headed southward on cruise back to Washington last night; Mrs. Roosevelt left by airplane after circling over the fleet off Point Loma.

San Diego Union, October 3, 1935, 2:1. "Good Neighbor" policy pledged in **Stadium** talk.

San Diego Union, October 3, 1935, 2:5. Happy to be here, says President Roosevelt on visit to Exposition; crowds line bridge to see President pass; first lady arrives at Exposition early.

Intensely dramatic it is simplicity was the welcome extended to the President of the United States when he arrived at the west gate of the Exposition at 12:00 p.m. yesterday.

Since early morning, thousands of persons had stood in a long line extending across **Cabrillo Bridge** to the **House of Hospitality** where President and Mrs. Roosevelt were to have luncheon at two separate functions. For hours soldiers, sailors and marines had stood guard, keeping clear the lane over which the Presidential party would pass. An American Legion color guard was massed outside the gate.

Then, preceded by a cordon of motorcycle police, Franklin D. Roosevelt arrived in a touring car that stopped just inside the gate. Frank G. Belcher, president of the exposition, was waiting. There was a quick exchange of smiles, and Belcher's two-work greeting, "Welcome, Sir."

"Happy to Be Here"

"I am happy to be here," said the President.

In the car with Roosevelt were Mayor P. J. Benbough, Rear Admiral William T. Tarrant and Governor Frank Merriam. Admiral Tarrant left the car to surrender his place to Belcher. It took only a moment and the car sped away, followed by 18 others.

The President was a visitor at the Exposition.

Mrs. Roosevelt, who had entered the grounds almost unnoticed through the east gate, had been sightseeing at the Exposition for three hours and did not join the President until after the luncheon parties.

Accorded an ovation every foot of the way, the President was greeted warmly by the cheering throng that awaited him in the plaza before the **California Building**, the first stop for the entourage. Equally cordial was the greeting of smiles and hat-waving which the President returned to the assemblage.

Appearing vigorously well and happy, Roosevelt held his hat to his breast as the 30th Infantry Band swung into the National Anthem.

Flowers, Vase Presented

Several presentation ceremonies were enacted in front of the **California Building** steps on which stood girls of many nationalities dressed in native costumes of their countries. Mrs. Mary Belcher Trapnell, official hostess for President Roosevelt's visit to the Exposition, was presented to the distinguished guest by Frank

Drugan, executive secretary of the Exposition. Mrs. Trapnell stood on the ramp platform beside the Presidential car and handed the chief executive a large bouquet of American Beauty roses.

“As hostess and representing the 34 nations identified with the **House of Pacific Relations**, I present to you these flowers as an expression of our love and gratitude,” she said.

The President accepted the flowers with a few words of appreciation, and waved a greeting to the girls on the steps behind Mrs. Trapnell. A tall red Cloisonné vase was presented to President Roosevelt by Tomokazu Hori, Japanese Consul for southern California, who said, “Mr. President, on behalf of the Japanese residents of San Diego, I give to you this vase as a tribute of their esteem and affection.”

President Roosevelt, obviously deeply touched by the international goodwill compliment, did not reply for a moment. Finally he looked up quickly into the face of the donor and said, “I will treasure this gift all of my life and I hope for many generations to come this vase will stand to all as a symbol of peace and amity between countries bordering the Pacific.”

Three Separate Luncheons

Newsreel and other cameramen, who had been taking advantage of the ceremonies to obtain pictures, fell back after the presentation of the vase and the car moved slowly along the Avenida de los Palacios to the **House of Hospitality** where Exposition officials were hosts at a luncheon for the President in the Sala de Oro. About 100 newspaper men and women were luncheon guests of the Exposition in an adjoining room.

Besides the guest of honor, those present at the Presidential luncheon were his secretaries, Marvin H. McIntyre and Stephen Early, J. F. T. O'Connor, Colonel E. N. Watson, Captain Wilson Brown, Secretary Harold Ickes and Harold Ickes, Jr., Doctor McIntire, Keith Morgan, Harry L. Hopkins, Turner Battle, Oscar Chapman, Frank Walker, Mayor Benbough, Frank Belcher, G. Aubrey Davidson, Representative George Burnham, Philip L. Gildred, Hal Hotchkiss, Adolph Miller, Douglas Young, John L. Fox, Governor Merriam, Mayor Angelo J. Rossi, San Francisco; Admiral Joseph M. Reeves, Rear Admiral T. J. Senn and Julius Wangenheim.

Thanks Entertainers

At Mrs. Roosevelt's luncheon, held in the loggia at the **House of Hospitality**, hosts and hostesses were members of the Exposition board of directors and their wives. Spanish music and dancing in the patio entertained all three luncheon parties simultaneously and when the President crossed the patio after the luncheon, he paused for a smiling, “Thank you,” for the entertainers.

The Presidential party left the Exposition at 1:45 p.m. for the **stadium**. Mrs. Roosevelt was in the car with her husband when they left the fair.

FORD DAY, Saturday, October 19, 1935, California-Pacific International Exposition.

12:00 noon PARADE of 16 - 1935 V-8 Ford Cars starts promptly from west gate.

These Ford V-8's will be driven by uniformed drivers accompanied by a girl in

white sitting beside each driver. The parade will come thru the west gate to the arch and will be met by the Amaroc Drum and Bugle Corps, composed of 35 pieces, who will lead the parade of 16 cars to the Midway, following the transportation bus line, and return to the Plaza del Pacifico and thru the arch down to the Ford Building, thence to the patio where they will be lined up for the new car showing, which will take place both Saturday and Sunday, October 19 and 20. This is a preview showing of the new cars.

Immediately upon arrival of the new Ford cars into the patio, Jose Manzanares and his orchestra will start one hour of special concert music, beginning at 12:30 and will last until 1:30. Also, Jose Manzanares will play his regular daily schedule from 4:00 to 5:00 and from 7:00 to 8:00 PM. This additional hour from 12:30 to 1:30 will also take place on Sunday as well as Saturday.

It has been requested by the Ford management that our P.A. System given them announcements as many times as possible calling to the attention of Exposition visitors the new car showing in the Ford patio. Mr. Don Long is sending Gary Breckner, a copy to be used over the P.A. System. Also, the Special Events Dept. will place in all programs the Ford Day program for Saturday and call attention to the new car showing both Saturday and Sunday, and not only in the programs but also on the Special Events boards on the grounds.

(Announcement taken from Box Files of California-Pacific International Exposition kept by San Diego Public Library.)

San Diego Sun, October 19, 1935, 1:7 (Saturday). Attendance to date 4,101,494; average daily 28,681; attendance October 18 – 13,421.

San Diego Union, November 1, 1935, 1:5, 2:6. Major General Malone, commander of the 9th Corps area, lauded democracy in talk at an afternoon program in the **Organ Amphitheater** in honor of the 30th Infantry.

PRESS BULLETIN #19, Saturday, November 2, 1935; SUBJECT: Supplymen

One hundred trucks, gaily decorated in celebration of Jubilee Week at the California Pacific International Exposition, will parade from the west gate around the grounds of the world's fair Wednesday, November 6, when "Supplymen's Day" is observed, it was announced today.

The event marks the first commercial parade to be held since the fair opened and honors the merchants who have kept the exposition supplied with the countless necessities of the huge "city within a city."

Gus Arnheim and his famous orchestra, playing in the organ amphitheater from 7:30 to 8:30 p.m., will dedicate special numbers to the exposition supplymen and Jose Arias and his Troubadours will play a special number written for the day's observance by W. W. Wheatly.

The entrance parade will start at 6:30 p.m.

(Press Bulletin #19 taken from Box Files of California Pacific International Exposition kept by San Diego Public Library.)

November 2, 1935. Program – Southern California Horseshoe Pitchers' Tournament Day, State Farm Insurance Companies' Day, American Junior Red Cross Day, University of Redlands Day, Will Rogers Memorial Day, American Red Cross Day, Insurance Agents' Day, Home Economics Day, Art Mart Day, Kids' Day, Legion of Valor Day, Girl Scouts' Day, May Robson Day, YMCA Day.

San Diego Union, November 11, 1935, 1:5, 2:4. Senator William Gibbs McAdoo spoke at the **Organ Amphitheater** yesterday afternoon; visions a permanent Exposition as an institution of international relations for the nations of the Pacific.

San Diego Union, November 11, 1935, 4:1. EDITORIAL: Tonight and After – Early next year, the same Exposition will open again, and San Diego will make its bid for the title of the nation's Exposition city.

San Diego Union, November 11, 1935, II, 1:2. 1935 Exposition officially ends at midnight; military pageant will be feature of last program.

San Diego Union, November 11, 1935, II, 1:5. Music prevails in Festivities as Exposition nears end, by Wallace Moody.

November 11, 1935. THE RISING TIDE by Richard Pourade (San Diego, 1967)

- p. 224. The 1935 Fair closed on November 11. The exposition corporation had spent \$1,250,000 of its own money, of which \$650,000 had come from paid-in subscriptions, \$300,000 from advance ticket sales, and \$300,000 from the sale of exhibit space. The books were closed with \$315,833 in the bank, enough to return half of what had been advanced and \$70,000 in reserve to restore park areas to their former condition.

Total attendance was 4,784, 811.

The reopening was scheduled for February 12. . . . The Fair never reached the attendance of 1935. Too many of the exhibits were no longer new and there was competition from fairs in other sections of the country. The **Ford** Company, along with the other major exhibitors, reduced or changed their exhibits. The magic had faded. The fair would stagger on until midnight on September 9, 1936, but the number of visitors to both fairs would reach 7,220,000.

November 12, 1935. Minutes of the regular meeting of the Park Commission held in the Administration Building, Balboa Park, November 12th, 1935, at 4:00 o'clock. Members present: Commissioners Otto, Naylor and Yale.

The Meeting was called to order by the President, Commissioner Otto.

Minutes of the meeting of October 8th were approved and read.

A letter was received from the San Diego Floral Association with the request that their building be returned to them at the close of the Exposition. The Secretary was instructed to notify them that their request will be given consideration by the Commission at the proper time.

Communications were received from Ashton Dearholt and the local Chamber of Commerce relative to the Burroughs-TARZAN-Enterprises securing movie rights within Balboa Park and the use of a park building for a sound stage. The Secretary was instructed to notify the company that action on the part of the Commission is impossible at this time, but they would be glad to cooperate when the park is again available for such use. Upon the suggestion of Mr. Naylor, Mr. Otto agreed to discuss the matter with the officials of the Exposition to see if they would be in a position to act upon the proposition.

Mr. Yale presented a petition requesting the City to enter into a lease for a period of five years with one Dan Nothrup for Pueblo Lot 1340 at a rental of \$150.00. It was duly moved, seconded and carried that the petition be approved and referred to the City Attorney for the drawing of the lease.

Discussion of the proposal to remove the clipped acacias along the Prado. Mr. Morley reported that the Exposition desired to remove these and replace them with Cocos plumosa in order to develop certain lighting effects. A letter was received requesting that as few changes as possible be made along the main avenues through the park. It was the opinion of the Commission that the matter should be given considerable discussion before any action was taken.

It was suggested by Mr. Yale that a letter **expressing** the sympathy and best wishes of the Park Commissioners be addressed to Sydney Hill. So ordered.

Upon motion, seconded and carried, the meeting adjourned.

Signed W. Allen Perry, Secretary.

Source?, November 12, 1935. Record set by crowd at Exposition with 83,238; a grand total of 4,784,411 persons have passed through the gates since May 29.

Source?, November 12, 1935. **Ford** exhibit leads at Exposition with 2,722,765; **Midget Village** was tops among concessions with 375,000.

Source?, November 12, 1935. Workmen busy preparing Expo for 1936 opening.

San Diego Union, November 12, 1935, 1:8, 2:5-6. 76,000 jam Exposition for closing; lights out as bugler blows taps; attendance sets record; ceremonies held at **Organ Amphitheater** and **Plaza del Pacifico** at midnight.

San Diego Union, November 12, 1935, 2:1. 30th Infantry to be back next year.

San Diego Union, November 12, 1935, 3:7. Federal Housing Administration Model Town to remain for Exposition next year.

San Diego Union, November 12, 1935, 4:1. EDITORIAL: "Agency of Peace" – Claim for Exposition as a peace factor is negligible; it is a first-rate Exposition and that's enough reason to renew it for next year.

San Diego Union, November 13, 1935, 1:7-8, 2:2. Belcher plunges into work for better Exposition next year.

San Diego Herald, November 14, 1935, 1:1-4. Exposition closes; Mexican gambling may return; fight against dominion of San Diego's Fair by alien slickers is fight in which all citizens must take part.

San Diego Union, November 14, 1935, 1:7, 2:7. Plans for Exposition next year begin to take shape.

San Diego Union, November 15, 1935, 3:2-3. Military funeral of Major General J. E. Kuhn held at **Organ Amphitheater** yesterday afternoon.

San Diego Union, November 15, 1935, 5:6-7. Changes ordered for **Gold Gulch, Midway**.

Letter, November 16, 1935, Austin L. Black, Deputy Regional Director, Modeltown, America's Exposition, San Diego, Calif. to Philip Gildred, Managing Director, California-Pacific International Exposition, San Diego, Calif.

Dear Mr. Gildred:

This is to advise you that the Federal Housing Administration will provide during the period of the 1936 Exposition supervising personnel for the Federal Housing Administration exhibit and office, as well as furnishing to visitors to the Exposition printed information on general National Housing Act matters in addition to the special illustrated Modeltown Home Selectors, the same as we have furnished during the past period of the Exposition.

With this information, and with the cooperation of Mr. Stuart Ripley, you will be enabled to draft WPA Project which will take care of maintenance and other activities pertinent to this Better Housing Project upon the Exposition grounds.

It is our understanding that the Exposition management will be responsible for the preservation of the Modeltown Houses and Modernization Magic Exhibit during the interim period, and also that the Exposition management will supply the landscaping materials for rehabilitation of Modeltown for the reopening, and any other necessary expenses for material to equip the exhibit up to the standard at least of what it had been during the past Exposition period, and that the Federal Housing Administration is in no way liable either for materials or labor incidental thereto.

You may be assured that the Federal Housing Administration will continue to provide full cooperation with the Exposition management to make this project a successful feature in the new period of the Exposition operations, and will also extend whatever cooperation is possible in the matter of publicity and other activities to stimulate interest in this Better Housing Project.

We are engaging a capable assistant to Mr. Ripley, who will report for duty here on December 1st, approximately, and who will remain here throughout the interim period, and also throughout the operation period. This man will be on the Federal Housing Administration payroll.

There are other matters of the Federal Housing Administration cooperation with the Exposition which I am today bringing to the attention of yourself and Mr. Hotchkiss and Mr. Clark in the hope that we may further cooperate in other ways through a new program of activities which can be carried out by our organization during the coming year.

An acknowledgment of this letter is respectfully requested.

Very truly yours,

Austin L. Black,
Deputy Regional Director.

J. David Larson and Hart Miller to Mulligan (?), 18 November 1935, FHA folder, box 16, CPIE, 35-36, Collection, SDPL

Letter, November 18, 1935, Assistant Executive Manager, California-Pacific International Exposition, to Church of Jesus Christ of Latter Day Saints, 153 West Adams St., Los Angeles, Calif.; Att'n: Mr. Nicolas G. Smith.

Gentlemen:

This will serve as a release of all obligations arising out of, or in any wise connected, with your application, dated January 3rd, 1935, covering a space in the Palace of Better Housing in the California-Pacific International Exposition for the period from May 29th, 1935 to November 11th, 1935.

This will also confirm your oral arrangement with us, relative to the construction of a building on the Exposition grounds directly north of the Standard Oil Building, which building was constructed prior to May 29th, 1935, and was occupied by you from the period from said date to November 11th, 1935. The entire amount of ground rental for the space occupied by this building was \$1,344.00, of which you have paid the sum of \$672.00, leaving an unpaid balance of like amount.

It is understood that this building, so constructed by you is your property, and can be removed by you at any time prior to January 1st, 1936. In the event of a continued participation by you, in the California-Pacific International Exposition, for the proposed period from January 15th, 1936 to September 9th, 1936, you will be permitted to leave this building intact at it's present site until the date last mentioned, and to occupy the same from the period of January 15th, 1936 to September 9th, 1936, without the payment of a further ground rental, after which time you will be permitted to remove same.

Very truly yours,

CALIFORNIA PACIFIC INTERNATIONAL EXPOSITION

Assistant Executive Manager

(Copy of letter taken from Box File 25 Folder 10, California-Pacific International Exposition, San Diego Public Library.)

San Diego Union, November 18, 1935, II, 8:1. "Falstaff" plans to be at Tavern as Exposition reopens.

Minutes, November 19, 1935, Special Meeting of Executive Committee, California-Pacific International Exposition Company, California Corporation.

A special meeting of the Executive Committee of California Pacific International Exposition Company, a non-profit California corporation, was held in the Board of Directors Room of the House of Hospitality at Balboa Park in the City of San Diego, California, on 19th day of November, 1935, at 11:00 o'clock A.M., after notice given by telephone to each member of the Committee, except Mr. Frank G. Belcher who was absent from the City. There were present and acting at said meeting the following, constituting a quorum:

Hal G. Hotchkiss	John Lawrence Fox
Emil Klicka	Oscar W. Cotton

There were absent:

Frank G. Belcher	Walter C. Wurfel
S. E. Mason	

There were also present Mr. Julius Wangenheim, Mr. Walter Ames, Mr. H. O. Davis, Mr. Philip L. Gildred, Mr. Wayne W. Dailard, Mr. Frank Drugan, Mr. A. C. Bartlett, and Mr. A. K. Whyte.

The Chairman, Mr. Hotchkiss, called the meeting to order.

The minutes of the previous meeting had been sent to the individual members of the Executive Committee.

The Chairman, Mr. Hotchkiss, announced that the meeting had been called in connection with an article in the San Diego Sun on the previous day, concerning the Mayor's intended appointment of a committee on buildings and grounds, objection to the removal of acacia trees and other items.

Mr. Davis emphasized that only 60 days remained to build the new show, asked that he and his workers not be hampered by committees, stated that the landscaping and amusement zone and lighting operations were behind time, explained that most of the acacia trees that had to be removed were dead, reminded the Committee that his job could not be completed by January 15th unless he was let to go ahead without hindrance.

Mr. Wangenheim expressed the opinion that the trees in the Plaza might be taken out and that this matter be referred to the Park people to decide. Mr. Cotton expressed the hope that the Park Board would approve taking out the trees.

Mr. Davis reported that Mr. Foster had advised him that he could not reconstruct the Spanish Village. Mr. Davis was of the opinion that because it had been a S. E. R. A. project and belonged to the City, he could proceed with its reconstruction and intended to do so.

Mr. Klicka asked for specific plans of procedure from Mr. Davis.

Mr. Wangenheim suggested going ahead and recommended that the sum of \$160,000 indicated by Mr. Davis for the Spanish Village, new lighting, landscaping and balance of amusement construction, but not maintenance, be added to the salary schedule that had been submitted as a form of budget.

Mr. Davis indicated that his approximations of expenditures would show perhaps \$40,000 for grounds, \$35,000 for lighting, \$10,000 for the Children's zone, and \$75,000 for the Mexican street.

Mr. Klicka again requested itemized program to avoid repeating the experience at the commencement of the Exposition. Mr. Davis replied that he could itemize his operations only to the extent

of what he might say in a letter, and that he might switch some funds from landscaping to lighting and to other operations.

Following further discussion, it was decided to ask Mr. Davis to submit, for the action of the Executive Committee at its next meeting, such a form of letter as would cover his projected operations and their cost.

The Chairman, Mr. Hotchkiss, explained to Messrs. Arthur K. Whyte and A. C. Bartlett of the San Diego Union and the San Diego Sun, respectively, the tentative plans to take out some of the acacia trees. Mr. Bartlett counseled the Committee not to antagonize public opinion at the commencement of the new Exposition. He stated that Mr. Otto of the Park Board was against moving the trees, but that Mr. Naylor of the Park Board was favorable.

The Chairman, Mr. Hotchkiss, requested Messrs. Oscar W. Cotton, Walter Ames, H. O. Davis and the Secretary to meet with the Park Board concerning the removal of the acacia trees.

The Executive Manager, Mr. Gildred, reported having just heard from Mr. Davidson at Washington to the effect that the Federal Building would remain with the Exposition until September 9th.

The Secretary was instructed to see to it that the Fire station gate was opened as an entrance to the Zoo, and that a statement to that effect should appear in the Press.

It was the sentiment of the Committee that the Public Relations Committee, comprising Messrs. David N. Millan, Walter Ames, Sam S. Porter, Jerry Sullivan, Jr., Joseph E. Dryer, Donald C. Burnham, and Harry Callaway, should be requested to function again.

There being no further business, the meeting adjourned.

FRANK DRUGAN
Executive Secretary

(Transcription of Minutes taken from Box 5, Folder 13 of California-Pacific International Exposition kept by the San Diego Public Library.)

November 19, 1935. Letter, Julius Wangenheim to Subscribers, California Room, San Diego Public Library.

Subscriptions	\$650,000

San Diego Union, November 19, 1935, 1:2, 2:8. Council, Exposition heads to revise agreement for 1936 control.

San Diego Union, November 19, 1935, 1:5, 2:6. Citrus industry, Housing Bureau plans major new exhibits at Exposition.

San Diego Union, November 19, 1935, 9:4. Nine **Pershing Drive** lights included in new contract.

Special Meeting of Executive Committee, California-Pacific International Exposition, November 20, 1935.

The mayor requested that the sum of \$75,000 that had been deposited by Mr. Julius Wangenheim in local banks at 1%, 1-1/2%, and 2% interest, set aside for Post-Exposition rehabilitation of the Park, be placed in a trust fund. Exposition leaders were of the expressed opinion that the cost would not run as high as \$75,000. Councilmen agreed that if the cost was less, the difference would go back to the Exposition treasury. Following discussion, it was left to the Acting City Attorney, Mr. H. B. Daniels, and the Exposition's attorney, Mr. Walter Ames, to work out together a satisfactory plan for this fund.

City Manager Flack announced appointment of an advisory committee, consisting of George W. Marston, Julius Wangenheim and John G. Morley to aid him in passing on changes requested. Any major changes in the Park's landscaping or topography are to be approved by the Council. Manager Flack said he proposed not to bother the council with minor matters that could be handled by him and the advisory body, but would insist that larger matters go before the council for approval. No changes in Park landscaping without City approval would be undertaken, the Management agreed.

Digest of Minutes of Executive Committee, November 20, 1935 et al (as reported to Directors at meeting of December 3, 1935).

November 20, 1935 - (Meeting with Mayor, City Manager, Acting City Attorney and City Council)
- The Mayor requested that the "Post Exposition Reserve" Fund of \$75,000 be placed in a trust fund. Exposition officials expressed the opinion that the cost would not run as high as \$75,000. The Councilmen agreed that if the cost was less, the difference would go back to the Exposition treasury. It was left to the Acting City Attorney and the Exposition's Attorney to work out together a satisfactory plan for this fund. The Mayor requested that the parking privileges for the parking areas be given to the Exposition --- the Exposition to receive and have the full benefit of all profits therefrom and to pay the City each month the difference between the normal expense, under ordinary City conditions and the actual expense during the Exposition period for the payroll and other expenses of the Police and Fire Departments. This cost to be billed to the Exposition each month. A maximum of \$5,000 a month was set. This item is to be made a first charge of revenues received from the operation of the parking area by the Exposition. This proposal was agreed to go with the understanding that the Exposition would be allowed to transfer its monthly surplus. The Mayor stated that "border games", etc. would be prohibited. The Mayor requested more restrooms, especially for ladies, and that three-fourths of the restrooms be free. Mr. Hotchkiss advised the Mayor that his wishes concerning toilets would be carried out with the best proportion of free toilets possible. City Manager Flack announced the appointment of an advisory committee, comprising George W. Marston, Julius Wangenheim and John G. Morley to aid him in passing on minor park changes requested. Major changes in park's landscaping or topography to be approved by the City Council. The Mayor requested and the Management agreed to provide entrances to Exposition grounds so full access would be made possible to Park institutions such as the San Diego Museum, Fine Arts Gallery, Zoo, and Natural History Museum during the reconstruction period. Reasonable access to location of reconstruction work to be provided and auto traffic prohibited because of the danger and confusion it might cause. All buildings, except those housing City institutions, to be closed to the public. Complete closing of the grounds to the public for 14 days before reopening of the Exposition was agreed to. It was agreed that San Diegans of one year residence or longer will be employed by the Exposition except where local help cannot be obtained. In case of exceptions, the Exposition Executive Committee will adopt a special resolution authorizing such employment so there will be a complete record of the labor situation. In addition to fire and other insurance requirements,

the Exposition is to carry liability insurance to relieve the City of the cost of any claims for damages arising out of use of the Park for Exposition purposes. The Mayor, Councilmen and Exposition officials expressed satisfaction on the settlement of control ordinance provisions during the meeting.

November 22, 1935 - A new contract between the Exposition corporation and John Sirigo was presented and approved with changes suggested. The contract for vending machines was ratified by the Executive Committee. Mr. Weston Settlemeier and the Carl Graf Company of Los Angeles were engaged to serve in the Sales Department. Tentative forms of agreement with Eckert's Bavarian Beer Garden, the Drugstore, the Café of the World, the Café Casa del Rey Moro, the Nudist Colony, the Midgets, Television, and the Robot were presented to Mr. Dailard, and no objections were offered by the Executive Committee members. A letter to Dr. Lyell C. Kinney from Mr. Hotchkiss, requesting Dr. Kinney to serve as chairman of a committee representing the Executive Committee for the purpose of securing, if possible, the National Medical Exhibit for the Exposition, and also requesting him to appoint Dr. Alex M. Lesem to serve with him on this committee, together with a third member, was presented and approved. The third member appointed later is Dr. M. D. Harding. A letter from Mr. H. O. Davis, covering the cost of his operations, was submitted. It was reported that insurance binders, expiring November 22nd, had been extended for an additional ten days. The proposal to send one of Mr. Mason's busses cross-country for advertising purposes was discouraged by the Exposition publicity department. It was decided that Management would submit a formal budget to Mr. Wangenheim.

November 25, 1935 - It was reported that the Federal Building was to function for 30 days after reopening, and thereafter to be closed if no appropriation for maintenance is passed by Congress. It was reported that a proposal to use a blimp to advertise the Exposition at the Pasadena Tournament of Roses had been declined. It was decided that Mr. Hotchkiss should confer with the District Attorney and thereafter to negotiate tentatively with the owners of the Casa de Tempo for its purchase by the Exposition.

November 27, 1935 - It was decided that at such time as the U. S. Grant Hotel would provide a subscription of \$8,333.33 or more, the subscription of the Balboa Brewing Company for that amount would be eliminated from the records. The budget as submitted by the Management was referred to the Finance Committee.

November 29, 1935 - There was general discussion concerning continuation and reopening items, with no action being taken in respect thereto.

December 2, 1935 - A letter from Messrs. Emil Klicka, W. W. Dailard, Raymond M. Wansley and Julius Wangenheim, covering auditing and accounting functions was read. The recommendations set forth in said letter were approved. It was the sentiment of the Committee that insurance coverage be referred back to the Committee comprising Messrs. Wayne W. Dailard and L. R. Folda, with the addition of Mr. Walter Ames and Mr. S. E. Mason as chairman, with authority to arrange immediately for all fire insurance coverage as outlined in the letter of November 11th addressed to Mr. Drugan from Mr. Folda, and to decide about remaining coverage's after procuring advice of counsel and after studying wishes of City Purchasing Department. A committee from the San Diego Building Trades Council conferred with the Committee and presented a form of agreement with the request that the Exposition corporation sign it jointly with the San Diego Building Trades Council. The proposed agreement was entrusted to a committee comprising G. Aubrey Davidson, Chairman, and S. E. Mason, Walter Ames, and Wayne M. Dailard. Mr. Cotton requested a 30-minute period at the next Executive Committee meeting for reports concerning the publicity and special events departments. The meeting adjourned to reconvene following the Board of Directors meeting on Tuesday, December 3rd, in the Board of Directors room in the House of Hospitality.

"Thus Endeth the First Chapter of America's Exposition - 1935," by Esther Mugan Bush, **Santa Fe Magazine**, December 1935, illus., pp. 15-17.

Faithful unto the last, our weather man turned on his very finest brand of California sunshine for Armistice Day, November 11 --- the day on which America's Exposition of 1935 came to a close. Spirits ran high. All day long the grounds were crowded with merry-makers, eager to see and to hear. Souvenirs were being grabbed at slightly reduced prices; eating places were mobbed --- sold out long before closing time.

The most colorful feature of the afternoon's program was the Spanish fiesta presented by the combined troupes of Jose Arias and Carlos Arandas, who, with their troubadours, have been among the most popular features of the Exposition, bring as they did a touch of old world joyousness.

Jose Arias, as master of ceremonies on this occasion, charmed not only with the numbers presented but with his fascinating blending of Spanish and English. When he expressed the desire to be with us again in 1936 --- as he was in 1915 and in 1935 --- everyone in the audience seconded the wish. The troubadours were everywhere during the Exposition, but particularly in the House of Hospitality, where, with their bright colored blouses and picturesque hats, they heightened the color of an already brilliantly colored patio.

Always in great undertakings, there is one who is the guiding spirit, yet who remains very much in the background. And so it was with America's Exposition. Not until very close to the end was the public told much about Frank Drugan, founder of the California-Pacific International Exposition, founder of the House of Pacific Relations, executive secretary of the California-Pacific International Exposition.

We had a Frank Drugan Day, when a beautiful pageant was presented from the organ platform by the representatives of the various nations, which had dwelt side by side, in the House of Pacific Relations --- each having a separate bungalow --- during the Exposition. Tea was served in the patio by attendants in the colorful costume of the various nations. And on that day Mr. Drugan came into his own --- or, should I say that the public came into its own in being given an opportunity to meet this splendid executive who guided the Exposition through speedy promotion into successful fruition. Frank G. Belcher, president of the Exposition, referred feelingly to Mr. Drugan's great work in his speech on closing night.

SOS! SOS!

Calling all lexicographers! Calling all lexicographers! The SANTA FE MAGAZINE representative floundering in a sea of loveliness. Adjectives exhausted. Send emergency order of superlatives at once.

My friends, I was eager to tell you from first-hand experience the minutest details of the last inspiring moments of America's Exposition, and so I sat for two straight hours on a hard, backless cement bench, close to the edge of the pool in Plaza del Pacifico, on the opposite side of which retreat exercises were to be conducted by the Thirty-ninth Infantry just ten minutes before the bugler sounded taps and the lights went out.

And now I find myself without words to picture for you this glorious scene.

A big, white, smiling full moon had taken the place of the gorgeous sunshine. A slight breeze rippled the flags gaily festooned from tower to tower. The aurora borealis atop the organ pavilion played its multicolored lights over the thickly populated grounds. Gaiety reigned.

Anticipating something like what had happened in Chicago at close of A Century of Progress, the park was well policed. But there was no boisterousness, no drunkenness, no disorder.

At 11:30 the lights in Plaza del Pacifico were turned off and the closing program began at the organ pavilion, reaching all parts of the grounds by the loud-speaker system. Royal Brown, official organist, presented an Aztec Indian pageant for which he had arranged the music.

Then Frank G. Belcher, the young president of the Exposition, delivered his farewell address, speaking with all the enthusiasm, the confidence, the promise that is youths to command. Gratefully, to those who had cooperated in making the Exposition a success; happily, of the benefits that have accrued to San Diego; hopefully, of benefits yet to come. He was splendid. Speaking of the moral uplift, he stated that only sixty-six arrests had been made in all San Diego during the entire Exposition period.

The 300-voice Exposition chorus, under Dr. Earl Rosenberg, sang, "Auld Lang Syne," at the end of Mr. Belcher's talk; and, then, in the distance we heard the rat-at-tat-tat of the approaching infantry. In the light of the moon only they took their places in front of the Palace of Fine Arts, under command of Captain Thomas M. Starke, where they were joined by President Belcher.

Suddenly a flood of lights disclosed the massed flags on the stops of the building and spotlights called attention to various items of interest --- the stars and stripes, waving gloriously from its high flagpole and reflected in the placid pool; pigeons, a tradition in Balboa Park since the 1915 Exposition, taking in the scene from their vantage perches on the three statues above the door of the Fine Arts Palace.

I watched for the gold fish to come to the surface of the pond and parade, as I have seen them do when the band played military numbers, but they evidently were fast asleep, for only a few tiny minnows rippled the water.

Black Dan and another black beauty mounted by two policemen, who always head the parade of the men in uniform, pranced proudly, as if aware of the solemnity of the occasion.

As the flag was lowered, its reflection seemed to come up to meet it, and you could have heard a pin drop so reverent was the attention given to this ceremony. The flag was folded and placed in the hands of Captain Starke, who with words that brought a lump to more than one throat, presented it to Mr. Belcher, who responded in equally touching words.

Then --- a hush! All eyes followed the spotlight focused on the Hall of Photography, and there, standing right on the edge of the building, silhouetted against a starlit sky, stood Joe Galli, bugler, who sounded taps. Lights out! San Diego's Exposition of 1935 was officially closed.

The 1925 Exposition was essentially a cultural exposition. And it was largely a youths' exposition. Youth bore many of the burdens. Frank G. Belcher wasn't much more than an infant when this writer came west in 1915 to write up the Expositions being held that year in both San Diego and San Francisco; Harriet Mortell, manager of the department of music, is only --- but why tell a lady's age? She might not like so well to see it in print twenty years from now. Another young executive whom I met is Mr. Masters, chief of publicity, who made it possible for me to supply this magazine with such splendid illustrations.

I have told you much about our cultural aspects. Nowhere was this better exemplified than in the very fine exhibit of the Standard Food brands, where one could purchase a cup of "dated coffee" for a dime and enjoy a dollar's worth of entertainment. Colonel Snap, who arranged and managed this exhibit, with the very able assistance of his charming wife, deserves much credit for having assembled as much pulchritude, brains and talent in the group of waitresses, who not only served with a graciousness which made their duties an art but who could sing, dance and entertain in various ways.

But now we're not talking so much about the Exposition that was, but the Exposition that is to be. We're opening again on January 15, bigger and better than ever. Much will have been weeded out in the way of exhibitions; bigger, better displays will take their place. In this matter of exhibits, the 1935 Exposition was but a dress rehearsal for the one to follow. But nowhere in the world can there be found a more perfect setting; nowhere a climate which makes it possible to enjoy the Exposition every day in the year; nowhere could greater attention have been paid to comfort. As William B. Courtney said in *Colliers* last spring, before the Exposition opened, it was possible "to sit your way all around the grounds." Benches everywhere, and cool, shady lanes and canyons.

Hope to see you all next year. Merry Christmas!

San Diego Union, December 7, 1935, 9:1. Hollywood Secrets, Playback, and Revue of the Nations planned at Exposition’s **Fun zone**.

San Diego Union, December 8, 1935, 1:1, 14:1. Businessmen form group in four sections to boost Exposition; volunteer committee plans canvass of leading United States concerns.

San Diego Union, December 8, 1935, Sports, 3:3-5. 1915 Exposition’s \$10,000 road race a headliner.

San Diego Union, December 9, 1935, 1:3, 2:5. Work rushed as Exposition opening plans are made.

December 10, 1935. Minutes of the regular meeting of the Park Commission held in the Administration Building, Balboa Park, December 10th, 1935 at 4:00 o’clock. Members present: Otto, Yale and Naylor.

The meeting was called to order at 4:00 p.m. by the president, Commissioner Otto.

A letter was received from J.H. McKinney, Deputy City Attorney, advising the Commission that a lease for residential purposes of Pueblo Lot 1340 would be illegal. Mr. McKinney had previously recommended the lease. Due to this reversal of opinion, it was moved by Mr. Naylor, 2nd by Mr. Yale, that the Commission withdraw its recommendation in favor of the lease. Motion carried.

A letter was received from Mrs. Muriel Simpson requesting suspension of that portion of the terms of the merry-go-round agreement requiring the payment of a \$500.00 minimum fee. Upon the recommendation of the Park Director, it was moved by Mr. Naylor, seconded by Mr. Yale, that the Commission recommend the suspension of the \$500.00 minimum for the year 1936. Motion carried.

A request was received from Thor Eriksen, Activity Director of the Army & Navy YMCA, for special rates at the Municipal **Golf course** for service personnel. Since similar requests had been denied to the Fire and Police Departments and other organizations, it was moved by Mr. Yale, 2nd by Mr. Naylor, that the request be denied, and the Secretary instructed to inform Mr. Eriksen that facilities of the club house would gladly be made available to a service golf club if such is organized. Motion carried.

Mr. Morley presented plans for a fishing pier at Sunset Cliffs, submitted to him by the City Manager. After an inspection of the plans, it was moved by Mr. Yale, 2nd by Mr. Naylor, that they be approved. Motion carried.

Discussion of grading, surfacing and making proper improvements in the parking area of the **golf course** before the rainy season. It was moved by Mr. Naylor, 2nd by Mr. Yale, that the Commission concur with the recommendations of the Park Director in completing this parking area by grading, providing drainage, resurfacing or oiling this parking area. Motion carried.

The Secretary was instructed to arrange a conference with the City Manager, at which time the Commission might discuss problems arising from the Exposition.

After discussion it was moved by Mr. Naylor, 2nd by Mr. Yale, that the Park Commission gratefully accept the palms offered by Mr. Otto for improvement of the area along Sixth Avenue. Motion carried.

Upon motion, seconded and carried, the meeting adjourned.

Signed W. Allen Perry, Secretary.

San Diego Union, December 10, 1935, 1:6, 2:5. Exposition promised **Ford** exhibit; displays from Pan-American Highways and General Motors expected soon; music plans told.

San Diego Union, December 11, 1935, 1:2, 2:6. \$600,000 Mission Bay Park job to start; President Roosevelt has approved expenditure.

San Diego Union, December 11, 1935, 3:2-3. Gildred praises Exposition backers; outlines 1936 objectives.

San Diego Union, December 11, 1935, 3:2-3. Council asked to face high cost of Exposition nose-powdering.

San Diego Herald, December 12, 1935, 2:2-3. Barter, Davis and Van Dusen must quit Exposition or community faith in integrity of directors will cease.

San Diego Herald, December 12, 1935, 2:1. Exposition.

San Diego Union, December 12, 1935, 1:4, 2:5. O. S. Harper named new works head as Exposition plans expansion.

San Diego Union, December 13, 1935, 1:4, 2:5. **Standard Oil** announces new exhibit in 1936.

San Diego Union, December 13, 1935, 9:1. Manager of the Ripley Odditorium fined \$150 for exhibiting deformed persons in California for pay.

San Diego Union, December 14, 1935, 5:6-7. Joseph W. Kendall named music director for 1936.

San Diego Union, December 15, 1935, 14:1-3. Work will begin tomorrow on **fun zone** of modernistic design, "different from anything ever seen before".

San Diego Union, December 19, 1935, 5:5-7. Representatives of Steel Buildings, Inc. and Santa Fe Railway spent hours at Exposition yesterday, determining the nature and location of new exhibits.

San Diego Union, December 22, 1935, 1:1-2, 4:7. Belcher returns from East; reports new exhibits, great interest.

San Diego Union, December 22, 1935, II, 1:7, 2:2. **Enchanted Isle** to be children's paradise.

Letter, December 24, 1935, Lyell c. Kinney, Chairman of the Committee on Medical Exhibits, to New York Representative, California-Pacific Exposition.

Dear Sir:

The Committee on Medical Science Exhibit of the California Medical Association has approved granting space to the following firms in the Eastern district for commercial exhibits.

Burroughs Welcome Company, New York
E. R. Smith & Sons, New York
Johnson & Johnson, New Brunswick, New Jersey
McKesson & Robbins, New York
Mulford Biological Laboratories, Philadelphia

The Committee will contact these firms by airmail immediately, outlining to them the progress of the Medical Science Exhibit and requesting them to furnish an exhibit.

The Committee will also ask the following firms to place exhibits in the Hall of Science:

Parke Davis & Co., Detroit
Abbott Laboratories, North Chicago
Ely Lilly & Co., Indianapolis
Mead Johnson & Co., Evansville, Indiana
S. M. A. Corp., Cleveland
Petrolager Corp., Chicago
General Electric X-Ray Corp., Chicago
Eastman Kodak Co. (Medical Division), Rochester
Cutter Laboratories, Berkeley, Calif.
Wallace & Tiernan (Water Purification)
California Dairy Council

The Committee has adopted the following rules for Commercial Exhibitors:

- (1) The Exhibit must emphasize educational, research or Public Health features rather than strictly commercial products.
- (2) Only such drugs may be exhibited as have been approved by the Council on Pharmacy and Chemistry of the American Medical Ass'n.
- (3) No literature, products or samples may be distributed without the signed approval of the Committee of the California Medical Ass'n.
- (4) No firms will be permitted in the Hall of Science except those invited to exhibit by the Committee of the California Medical Ass'n.

Many of the above firms have motion pictures of an educational nature to demonstrate to the public. Each firm entering the exhibit will be given opportunity to show such films as are approved by the Committee in the Motion Picture Theater in the Hall of Science. This will provide a double contact with the public, that is both their exhibit and their educational films.

The Medical Science Exhibit is sponsored by the California Medical Ass'n. and the San Diego Medical Society. Thus, exhibits in the Hall of Science will carry to the public the approval of Organized Medicine in California.

The Committee has contacted and is making arrangements with several National Organizations for exhibits, such as the American Medical Ass'n., the Mayo Foundation, the American Society for the Control of Cancer, the Pacific Roentgen Club. Several large exhibits from commercial firms but most of them are under negotiation. The exhibits from commercial firms will be given favorable space equal to that of any of

the educational exhibits. The Committee will as far as possible try to place the commercial exhibits adjacent to such educational exhibits as they may desire.

The Committee will inform you immediately concerning both educational and commercial exhibits actually contracted as soon as these agreements are made.

Very truly yours,

LYELL C. KINNEY

(Copy of letter taken from Box File 10 Folder 48, California-Pacific International Exposition, kept by San Diego Public Library.)

San Diego Union, December 24, 1935, 2:4. Federal funds will be sought for exhibit.

San Diego Union, December 25, 1935, 10:8. Dr. E. L. Hardy appointed director of San Diego Museum of Science.

Letter, December 26, 1935, Lyell C. Kinney, 1831 Fourth St., San Diego, Calif., to Philip Gildred, Managing Director, California-Pacific International Exposition, San Diego, Calif.

Dear Mr. Gildred:

The San Diego County Medical Society has appointed a Committee to represent them in the Exposition. This committee includes the three that you have chosen and in addition, Drs. Churchill, Burger and Crawford, with Dr. Eager and Dr. Winston Crabtree as ex-officio members. The Society has appointed me as the Chairman of that Committee. Would it not be well for the Exposition to officially designate these men as the committee for the Exposition as well as for the County Medical Society.

The Committee for the California Medical Ass'n. consists of Drs. Toland, Palette, Robles, Ruddock and Tanner, with Drs. Peers and Wernshuis as ex-officio members. You requested to have the letter from Dr. Wernshuis, naming this committee and that letter is enclosed.

The Committee for the County Society met last Friday night and has gone into action very enthusiastically. Because of the immense amount of work in correspondence and the necessity of constant supervision during the Exposition, the Committee has designated Dr. William H. Geistweit, Jr., the President of the County Medical Society, as Director of the Medical Science Exhibit. The Committee feels that because of the large amount of time that this may entail that Dr. Geistweit should be granted a small honorarium in recognition of his work in addition to his actual clerical expense. The Committee has no desire to sidestep any of its responsibility in relation to this exhibit, and will take its full share of the work in promoting and conducting the exhibit. Will you kindly confirm the action of the Committee in appointing Dr. Geistweit, if you approve. Dr. Geistweit is asking to whom he is responsible as his details as they arise. In answer to the first question, I would suggest that because of the appointment of the Committee, his responsibility should be to the Committee.

It is understood that in the case of commercial exhibits the Committee thru Dr. Geistweit will make contact with the proposed exhibitors and invite them to send exhibits in the name of the California Medical Ass'n. and the San Diego County Medical Society. Therefore, the names of these exhibitors will be turned over to your sales Department for final arrangements and all financial transaction.

Your representative, Mr. Bryant, called on us the day that he left for New York. I am enclosing a copy of the memorandum handed him at that time.

I would appreciate your writing a letter to Dr. Geistweit approving his appointment. The Committee from the C. W. A. approved this on the day of their visit to San Diego.

Very truly yours,

LYELL C. KINNEY

(Copy of letter in Box File 10 Folder 48, California-Pacific International Exposition, kept by San Diego Public Library.)

San Diego Union, December 27, 1935, 1:8. Kidnappers slug, rob man; left bound in **Powder House Canyon**, just north of **Pershing Drive**.

San Diego Union, December 27, 1935, II, 1:2. Ancient Indian display in **Palace of Science** for 1936 Exposition to show Southland before white man; old dwellings contrast with model homes of **FHA** exhibit; Maya replicas featured; Malcolm Rogers, director.

San Diego Union, December 28, 1935, 5:1-3. **Zoo** president, herpetologist to start voyage for far places for rare animals.

San Diego Union, December 29, 1935, 9:5-6. **Fun zone** space sold out; exhibit places filling fast.

San Diego Union, December 29, 1935, II, 1:1, 2:1. Exposition will add \$6 million permanent value in Balboa Park.

San Diego Union, December 31, 1935, II, 1:2. Exposition announces February 26 as date of 1936 opening.

CALIFORNIA-PACIFIC INTERNATIONAL EXPOSITION, 1935

EXPOSITION PLANS: FILE 23, SERRA HISTORICAL RESEARCH LIBRARY

SUGGESTIONS AND RECOMMENDATIONS FOR THE IMPROVEMENT OF THE BUILDINGS AND GROUNDS IN THE EXPOSITION AREA OF BALBOA PARK, SAN DIEGO, CALIFORNIA FOR THE 1936 EXPOSITION

submitted by **Richard Requa, Consulting Architect for the Exposition**

During the period of the 1935 Exposition I was almost daily in attendance and devoted a great deal of my time and attention to the study of the general plan and arrangement of the buildings and landscaping, studying in detail the elements and features, observing the movements and attitude of the throngs of visitors and noting their comments and criticisms. The purpose of these studies and observations was to formulate ideas and suggestions for additions and changes that I could recommend for the general improvement of the buildings and grounds, in the event it was decided to continue the Exposition during the following year, 1936.

At the request of the management have, from my notes made during the past six months, compiled a list of definite recommendations which I am herewith submitting for consideration. These I have classified under sub-headings more or less in the order of desirability or importance as follows:

1. Main East Entrance
2. West Entrance
3. Plaza del Futuro
4. California or West Plaza
5. Street to the **Midway** and Amusement Area
6. **Botanical Building**
7. **Court of Honor**
8. Main avenue between Organ and **Water and Transportation Building**
9. **Palisades** area
10. General Improvements, Painting and Repairs
11. General Landscaping Suggestions
12. Lighting

Main East Entrance

This entrance at the east end of the Avenida de los Palacios proved to be the important entrance to the Exposition during 1935. It is far from being well planned or as impressive as such an important entrance to an Exposition should be. My original plan for a large and impressive Plaza at the east entrance was abandoned on account of expense. Of course, it would be out of the question to attempt to develop it now, due to expense and lack of time. However, very material improvements can be made here with very little expense and without removing or materially changing any of the work now in place.

The group of three banner poles immediately in front of the Arcade leading to the street cars can be improved in appearance, first by a more interesting and profuse planting arrangement at the base, adding an additional line of planting boxes below and extending beyond the present boxes. The mirror reflector suspended from the top of the poles was never properly worked out to produce the effect intended. This could easily be made an interesting feature and throw reflections over the area of the Plaza from the spotlight located in the base.

Formal trees in boxes, with flowers at the base, could be provided at all arch supports on the street car arcade on the side facing the Plaza.

It is extremely important that the plain wire fence on the west side of the thoroughfare north and south through this Plaza should be made more interesting, and a part of the entrance architectural scheme. In fact, it would be a good plan also to give an architectural treatment to the wire fence on the opposite side of the thoroughfare.

I would suggest removing the high banner poles which are now installed on either side of the Avenida de los Palacios between this east entrance and the street leading to the **Midway** and re-erect these poles along the iron fence on either side of the thoroughfare. I would suggest that on top of the wire fence there should be a shelter or roof and at the base there should be benches separated with planting boxes between, the boxes to contain quick-growing flowering vines to train up over the wire fence with a line of bright flowers of uniform color in front of the boxes. The banners on the triple banner poles and the poles along the fence should be made much longer and more impressive and properly lighted at night.

I recommend that the north set of turnstiles on the line north of the entrance gates be removed and the opening closed with a lattice similar to that used along the entrance treatment. I also recommend that the north set of turnstiles be removed on the line south of the entrance gates and that the set of exit turnstiles at the south end of this line near the pass booth be moved to this location. The reason for this, first --- that there are more turnstiles at this entrance than are required. Second --- that the exit turnstiles moved up near the center will be much more convenient and used to a greater extent than as at present arranged. The south exit turnstiles were very seldom used during the last Exposition. Another important reason for this change is that it provides a space at the north and south end of the entrance for a fine massing of trees, shrubs and flower. This is particularly necessary on the north side so there will be a tall and interesting mass to break the view of the east wing of the **Natural History Museum** which is painfully obtrusive.

The floodlights for the entrance Plaza should, if possible, be treated more decoratively or made less obtrusive.. This particularly applies to the group of floodlights erected on the corner of the **Natural History Museum**, which are particularly crude and distracting.

The space immediately inside the entrance gate is entirely too constricted and lacking in character. This was a subject of considerable criticism during the 1935 Fair. I recommend that the iron fence inside the grounds, directly in front of the turnstiles, be removed; also, the grass plots and group of six trees on either side of the Avenida de los Palacios directly in front of the gates and the main entrance to the **Natural History Museum** on the north side and the roadway which formerly led to the **Gold Gulch**, and this whole space be incorporated in a open plaza treatment. In the center of these two plots, now occupied by trees, there could be interesting, bubbling fountains or, if this is not feasible on account of expense, two very fine beds of palms, ferns and tropical plants. It is highly important that some extremely interesting feature be provided in these locations.

It might be advisable to redecorate and change the color scheme of the entire entrance, including the canvas roof over the turnstiles. The present canvas could be painted if it is in good condition. I feel it is of utmost importance that changes be made in this entrance as a first impression made upon visitors has a great influence on their attitude and reception of an Exposition. I also believe that changes here, as suggested, would do more than any other feature to give a new and improved character to the Fair.

West Entrance

Very little change or improvement can be suggested for this entrance. It is highly important, because of the fine and unusual vista of the bridge, California tower and surrounding landscape that this entrance be kept simple and unostentatious, with must enough color and landscape treatment to give it the proper effect of a main entrance to an Exposition. A group of tall palms with a base planting of flowering plants on either side of this entrance at the corners where the road turns into the entrance would add much to the beauty and effectiveness. Two tall banner poles might rise from the center of this group, all adequately floodlighted at night. Additional and better planting in boxes might also be provided on both sides of the line of turnstiles, also plants on the roof, showing above the parapets of the two buildings flanking the central gates.

The CPIE letters on these gates will necessarily have to be changed, if the name of the Exposition is changed.

Plaza del Futuro

When first proposed, I was not very enthusiastic about erecting an arch and providing pools for this Plaza. I was later convinced that they are a desirable feature. However, while at night the illumination of the Tower and the reflection of surrounding buildings in the pools were wonderfully effective, the general aspect of the group was disappointing in the daytime, and lacking in interest. The lines of the Tower are straight and hard, made purposely so in order not to conflict with the beauty of surrounding buildings. It is very necessary to provide in the pools plant life and features to attract attention during the daylight hours.

In order to give the Tower more pleasing proportions and a more friendly tie with the adjoining pools, I suggest that on the north and south sides of the Tower a curb wall be installed to a height a little above the water line and extending in graceful lines and curbs out into the pools to a distance in the center of at least twenty or twenty-five feet. The space enclosed to be made watertight, filled with earth which would slope up to a height approximately five feet against the Towers. This area to be planted with palms and other semitropical plants and bright colored flowers. Within the planting area and near the curb wall between the plants and the water to provide a small fountain, with its own basin. The water from the fountains to be conducted into and to supply the large pools with the fresh water required. These fine planting areas extending out into the pools would give much the effect of floating gardens as have been so much admired at Xochimilco near the City of Mexico.

The planting might also be brought around onto the sides and flank the great arch on either side with high palms or formal trees that would reach well upward toward the opening provided for the loudspeakers.

I would recommend that the two loudspeaker openings at the ends of each side of the arch be closed. That is, the ornamental border removed and the opening stuccoed over to match the wall. I suggest that planting boxes with flowers be provided in the large openings in the top of the Tower.

There is a very great need for some interesting treatment at the two end corners of both pools. I suggest that first, a proper raised base be provided in the corners and a tall slender vase be placed on these pedestals. These vases to be approximately eight feet high and to be filled with flowering plants and trailing vines. In the pools in front of these vases, curb walls to be installed projecting into the pool to provide planting spaces and the floating garden effect similar to the treatment against the arch tower. These additions would not seriously interfere with the reflection surfaces which it is so very important to retain for night effects. If possible, swans or other interesting water fowl should be provided for additional life and interest in the pools during the daytime. I suggest that the planting against the present curb walls of the pools be made much heavier and that additional planting spaces be provided for in front for low-growing flowering plants. This space to be broken occasionally along the sides for the introduction of benches.

I wish to suggest that planting boxes or some interesting display of flower and vines be tried in the two towers that face on this Plaza.

I recommend that all concessions and refreshment booths be eliminated from the Plaza and also the small booths leading down toward the organ and, perhaps, even the group of booths on the curving road facing the organ. This, of course, also includes the checking stand. The spaces between the palm trees might be filled with bright beds of flowers or flowering shrubs.

For consideration I would like to suggest eliminating the planting in the long central area between the balustrade behind the horse and the organ for the following reasons:

The flag pole where the flag-lowering ceremonies took place every evening was not well located in front of the Fine Arts Building as there was not sufficient room around the pool for onlookers to congregate. I suggest moving this pole to the south end of the area formerly occupied by the petunias. I believe it would be much more effective in that location, with the organ as a background, and the people could congregate in the large area to the north. This free space would also provide room for spectators when important entertainments or functions are being held on the organ platform. It would further supply an open Plaza, which is frequently needed in the center of an Exposition group, and which was formerly supplied in the 1915 Exposition by the Plaza de Panama.

I believe that on this cross-axis from the Fine Arts Building on the north to the organ on the south should be provided the great spectacular lighting feature of the Exposition. It is needless to suggest that the old-style lighting should be changed in the building housing the organ. I believe that a moving and changing lighting effect would be wonderfully impressive in the area, starting, perhaps, with the broad facade of the Fine Arts Gallery, traveling along the walls of the flanking buildings, then the towers and trees, the arch and the planting in the pools, and on down to the organ, perhaps culminating in a high shaft projecting from the center of the turntable on which the arc lights are placed. For a startling theatrical effect this shaft could be covered with small sections of mirrors, spotlighted in such a way as to reflect interesting and kaleidoscopic color effects. Another idea would be to have light-colored smoke issue from an outlet in the center of the turntable, on which colored lights could play.

California or West Plaza

Undoubtedly some serious attention should be given to this Plaza for the coming Exposition as it was more than uninviting, it was positively dreary. As this Plaza will have very little use, I suggest that colorful flower beds be provided in the area south of the main avenue, passing through. Additional planting could also be done on the north side on either side of the steps leading from the former **California Building**. The border around the tree boxes should be repainted, panels re-varnished, and better appearing formal trees planted in the boxes to replace the poor specimens of orange trees. Some effort should be made to attract visitors down to this end of the grounds. I hope that something more in the nature of Exposition exhibits can be installed in these buildings surrounding the California Plaza.

Street to the **Midway** and Amusement Area

The present banner poles along this street, I believe, should be maintained, with, perhaps, a change in banners which could be made longer. The lighting arms should be changed so as to throw the light on the banners and shield it from the eyes of people passing along the street.

I feel it is very important than some great arch or similar feature be provided at the north end of the street near the entrance to the **Spanish Village**. The view up this street toward the **Midway** was never interesting or inviting. It might even be well to consider pennants or something of similar nature hung across the street and attached to the banner poles along the entire avenue from the Avenida de los Palacios to the Amusement Zone.

Regarding the creation of a typical Mexican village as the main feature of the **Midway**, I am greatly interested in the idea. I feel it can be made a feature attraction of our Fair next year. However, I trust it can be worked out as a truly typical village such as can be found in Mexico and southern Spain, instead of the fantastic creation which was built last year and called the **Spanish Village**. I have traveled through hundreds of villages in Spain, Mexico, Cuba and Panama and other sections of Spanish America and I realize that if this feature is to be a real attraction, it must be honest and typical in all its details. The exhibitors and artisans must be real Mexicans, making and selling real Mexican wares. I would suggest some radical changes in the present **Spanish Village** so it can tie in and harmonize with the Mexican Village which, I understand, it is proposed to build adjoining.

Botanical Building and Surrounding Area

Undoubtedly the finest single feature on the Exposition grounds was the **Botanical Building** and the Lily Ponds. These should be preserved substantially the same as during the past year with possible improvements in the planting against the **Botanical Building** and facing the upper Lily Pond. Planting for more tropical effect and of a richer green, I believe, would be an improvement.

For proper architectural effect and to add still more interest, planting boxes should be provided on the ledge over the stucco walls on the south side of the two wings of the Horticultural Building. The space between the top of the arches and the present parapet wall is not sufficient for a good architectural effect and the addition of colored flowers and vines would be an improvement.

I feel that the great expanse of dark brown wood in the lattice work of the superstructure of this building is rather monotonous and heavy for the light stucco base. I would suggest the introduction of a foliage-green stain on certain parts of this work. This would be particularly effective on a portion of the vertical lattice face of the central portion of the building, facing the pool, and also on the raised bands spaced along the arched dome over the east and west wings.

The terrace and loggia opening from the Food and Beverage Building onto the garden of the Horticultural group should be treated in some interesting manner. It was painfully bare and uninteresting during the Exposition just passed. I suggest that the flower beds and, perhaps, hanging fern baskets in the arches as proposed before the opening of the Exposition just passed, be reconsidered for the treatment of this area.

Court of Honor

I was not satisfied with the location of the **Court of Honor**. Its use for special functions where the general public was not admitted was subject to considerable criticism. Its location, tucked in behind the Café **of the World**, did not give enough distinction to this very important Court, where the distinguished visitors of the Fair were honored and entertained. The visitors to the Fair, particularly if they had only a short time to visit the grounds, resented the closing off of the area for the use of these special functions. It was also necessary at each reception to erect an awning between the two lily ponds, and also the pavilions in the Court.

I would like to suggest for consideration the moving of the **Court of Honor** to the large grassed area surrounded by tall trees and on the point where splendid vistas could be had over interesting sections of the Park and the Fair grounds. This area is directly south of the Alcazar Gardens and was seldom visited and little used during the Exposition. The entrance to this Court would be through the beautiful Alcazar Gardens. The ground slopes naturally away toward the south where the present pergola could be readily converted into a place for the reception line. Directly in front of the pergola, I would suggest a large pool which would be fed by the overflow from the fountains in the Alcazar Gardens; this water is now wasted down the hillside. Instead of temporary canvas pavilions, several suitable pavilions should be erected of more permanent material, which could be left in place during the Exposition. This area is so cut away from the rest of the Exposition that in would in no way interfere with the general sightseeing of the grounds.

Main Avenue Between Organ and **Water and Transportation Building**

The areas bordering this roadway should be given a great deal of careful consideration as it is the connecting link between the old Exposition buildings and the new, and was, perhaps, the busiest thoroughfare on the grounds. The California Gardens on one side were far from being interesting and were inspected by very few people. The treatment on the other side was hardly even noticed. I wish to suggest that in the center of the former California Gardens one of the floral features of the new Exposition be developed. I first had in mind a huge basket of gigantic proportions, such as I saw in the public park in Valencia, Spain. The basket was entirely covered with roses in bloom and created a never-to-be forgotten impression. However, after investigation I feel it would take entirely too long to develop the plants in such a creation and suggest in its place a huge wide-spreading vase at least twelve-feet high. It could be built of frame work and stuccoed with a shallow receptacle on the top made of wood and covered with composition roofing to hold the necessary

soil for the plants. This soil would be raised in the center for effect and provided with automatic sprinklers. This vase is to be kept full of plants with large flowers in scale with the size of the vase, such as hydrangeas when in season, with long-trailing vines hanging over the edges of the vase. Other garden accessories should be provided if possible, including some choice pieces of statuary, if they can be secured. The rest of the area divided into spaces for masses of flowering plants.

I suggest that between the banner poles along this avenue, Italian Cypresses be planted approximately five or six feet apart. Such cypress-bordered avenues are frequently seen in Spain and Italy and are an important feature of their landscaped gardens.

On the west side of the avenue could be other tropical gardens in which a background of fruiting bananas could be featured. In that location, protected from the wind by the tall trees in the background they could be made to grow and develop as luxuriantly as in the tropics and would be a most interesting feature for our visitors from other sections of the country. I trust that fortune-telling concessions will be prohibited the use of this street and I also recommend that at least one group of refreshment stands be removed. The banners for the triple flag poles at both entrances should be redesigned and made larger and mirror pendants should also be redesigned to give the effect originally intended.

Palisades Area

I have no changes of importance to suggest for the treatment of this area. I sincerely trust that the building occupied by the **Hollywood Hall of Fame** can be put to more strictly Exposition uses and that the offending signs can be removed. Minor improvements should be made in the architectural effect of the **Palisades** restaurant and the Neon sign removed from the entrance. The decorations at the entrances to the exhibit buildings may have to be modified and changed if the buildings are used for other purposes than originally planned for. It would be possible to make the ornamentation on such buildings as the **Water and Transportation Building**, **State Building**, and **Palace of Electricity and Varied Industries** a little more pronounced and attractive by darkening and adding a slight polychrome effect.

The boxes on the parapets of the **Palace of Electricity and Varied Industries** and **State Building** should be replanted immediately to flowering plants and vines better suited to the purpose than were used this past year. My original plans were to produce definite color effect in the planting of these buildings which because of lack of time and scarcity of plants were not carried out. The boxes on one building should be filled with flowering plants of one definite and pronounced color which would contrast with another color scheme at the base of the building. The building on the opposite side of the Plaza would have its color scheme carried out in the same way but using other colors. The Plaza immediately south of the **Standard Oil Building** could well be retained as a flower garden. The plants should be better massed and cared for than during the past year and the plot given more of the real character of landscape architecture. The suggestion is made that there could be a massing of suitable trees and shrubs at the corners and particularly around the date palm which now forms the center feature.

Improvement should be made in the mass planting at the bases of the buildings in this area, particularly the Federal Building. The planting of the side hills and around the pool in the canyon across the roadway east of the **Standard Oil Building** should be augmented and improved. Some architectural garden features could well be added in this area and this could be supplied with large vases of modern character filled with flowering plants and vines. These could be located on the corners of each plot occupied by buildings, on the sides facing the Plaza.

General Improvements - Painting and Repairs

All banners, window awnings, etc. should be redesigned and changed in character. All superfluous booths and concessions should be removed. This particularly applies to the roadways leading down to the organ and the **Palisades** and the group between the **State Building** and the **Ford Building**. I sincerely hope that the **Nudist Colony** can be done away with and the beautiful canyon opened up to the public. It will be a marvelous feature right at our main entrance and worth much more to the Exposition as a general Exposition feature than as a concession for any purpose.

There should be a great deal of general painting throughout the grounds. Much of the ornamental work on the old Exposition buildings and particularly the run moldings require repainting. The window sash forming a part of the ornamental treatment in the upper part of these buildings, and the main entrance doors should be painted in a more agreeable color than the present brown. The tops of all parapets and cornice projections should be carefully inspected to see that they are waterproof so as not to permit water to enter the stucco and ornamental work.

The imitation tile on all the towers will have to be repainted and varnished. When this is done, I would like to give some consideration to changing some of the color effects.

Painted pots and vases throughout the grounds should be repainted. Consideration should be given to changing the colors of some of these pots.

General Landscaping Suggestions

While the landscaping features of our 1935 Exposition attracted much favorable attention, the real success of the landscaping was due to the splendid mass planting which had developed from the 1915 Exposition. While it might be stated that the floral display was good, it did not begin to demonstrate the floral possibilities in Southern California nor produce the effects that can be easily obtained.

The public demands theatrical effects in an Exposition, spectacular effects in landscaping as well as in buildings. Flower gardens of specimen plants and flowers interest only the professional and expert in floriculture. Much more attention should be given to massed floral effects in the coming Exposition.

The bed of flowers along each side of the Avenida de los Palacios should be widened and, perhaps, planted with a double row of flowering plants in contrasting colors. The flowers next to the curb to be lower with higher flowers to form the background. Massed effects of flowering plants or flowering shrubs could be introduced between the palm trees bordering the roads between the main Plaza and the organ. Where possible, the low wire fences which now serve as guards for grass plots should be replaced with low hedges or shrubs as the wire fences are unsightly and visitors are rather resentful of the use of such guards.

The barren hillsides which are too much in evidence from the **Palisades** section looking toward the east should receive considerable attention. A sprinkling system should be installed so that these hills and canyons between the **Palisades** and the east Exposition fence could be kept green throughout the period of the Fair. On these hills magnificent flower displays would be easy to produce and would be tremendously effective during the blooming season of the Spring. I would particularly suggest that the point between the **C.C.C.** Camp and running far to the south or the point behind the Federal Building be planted to California poppies. Perhaps nothing so impresses our eastern visitors than the great fields of California poppies to be seen in certain sections of Southern California.

More prominence should be given to paths leading to the bridges across Palm Canyon. I suggest that a rustic fence be erected along the off-hill side on the paths on both sides of the bridge and that some sort of suitable rustic entrance be provided at the entrance to these paths from each end. There is a gap in the planting on the east side of the Palm Canyon which should be filled in if possible, so as to cut off the view of the organ and thoroughfare that borders the canyon on the east side.

The landscaping in the area between the present headquarters and the **House of Hospitality** with its path leading down to what is known as the Persian rug fountain can be greatly improved and made more colorful. The ornamental jars which border this path should be filled with plants and flowers that will contrast with the general landscaping effect.

Lighting

No other single feature attracted so many people or called forth so much favorable comment as the night illumination. I have no criticisms or changes to suggest in the general lighting idea. However, I feel that

some of the features might be improved, and that it is highly important that changes be made so as to produce something different for our new Exposition. In addition to general increased illumination or extended illumination, I feel that the matter of more concentrated illumination on the general entrances to the Exposition palaces should be considered, particularly along the Avenida de los Palacios. I suggest that a method of illumination be used on the main entrances that will give more character and relief to the ornament. This might be accomplished by a double lighting scheme, using the color from the lower end of the spectrum on the other side of each entrance, so as to produce the lights and shadows in harmonious colors.

Mobile lighting should be used somewhere on the grounds and preferably near the center of the Exposition. This idea I have previously noted in the suggestions for treatment of the Plaza del Futuro.

If possible, the street lighting should be subdued or provided with reflectors inside the **Globes** that will throw the strong concentrated light down on the pavement and not interfere with the color treatment on the buildings and trees.

I feel that it is quite important that the main entrances to the Exposition palaces, under the arcades, should be locally lighted so as to attract the eye to them. This could be accomplished by concealed lighting behind the arcades forming the building entrances, and between these arches and the entrance doors, directing the light down and into the entrance, thereby not interfering with the soft subdued lighting of the arcades.

I feel that more illumination should be provided for the **Casa del Rey Moro** Garden, particularly into the background of trees and I recommend a concealed underwater illumination for the lily pond. Wiring was provided for this purpose when the pool was built. I also suggest that the lighting of the Alcazar Garden should receive more consideration, particularly the surrounding trees. I trust some other means of lighting the gardens can be developed to take the place of the Mission Bells which are very objectionable in the daytime.

The Mission Bell illumination might be considered for more attractively lighting the paths leading to the Palm Canyon bridge.

Other lighting suggestions have been given in preceding sections.

CALIFORNIA-PACIFIC INTERNATIONAL EXPOSITION

1935

REPORT ON CONTINUANCE OF DISCONTINUANCE OF EXPOSITION (San Diego Historical Society Research Library)

This report covers assignment to Messrs. Frank Drugan and Wayne W. Dailard for Survey of Possibility of Continuance of Exposition and submission of Plans for Continuance of Discontinuance. This report is divided into five sections as follows:

1. Examination of Reasons for Continuance
2. Examination of Reasons for Discontinuance
3. List of Recommended Immediate Agenda
4. List of Recommended Later Agenda
5. Summary and Recommendations

It is respectfully suggested that this report be judged in its entirety, rather than discounted in terms of any one of a few of its items. The report aims to be a comprehensive examination of all phases of the problem.

Gail Carr Feldman

2920 Vista Grande NW
Albuquerque, N. M. 87120

ATTITUDE OF CONCESSIONAIRES TOWARD CONTINUANCE

Following is a list of Midway Concessions which, according to our Survey, would remain during winter. Our monthly average percentage from these concessions is indicated.

Crime		395.81
Monsters		228.51
Two-headed Baby		85.83
Life		319.71
Zoro Gardens		3,643.20
Miss America		581.63
Glass Blowers		94.99
Loop-O-Plane		199.19
Sensations		89.90
Lion Farm		233.78
Boulder Dam		431.78
Swooper		285.01
Stella*		
Log Rollers		373.35
Arco Plane		102.72
Streets of Paris		1,537.72
Pony Track and Rides		366.05
Singapore		123.37
Auto Scooter		444.98
McClay's Dancing		92.21
Auto Speedway		108.70
Merry Mixup		81.76
Miniature Palace		111.28
Bail Out		
Madill Stands (Will Stay on a New Deal)	1,535.78	
Ice Cream Stands	ditto	1,137.46
Check Stands	ditto	243.51
L. B. Utter	ditto	6,178.01
W. Breazeale (Doughnuts)	139.66	
Cane Wheels (Dufour and Rogers)		108.79
Acme Concessions		534.45
Bamboo Inn		435.53
Nate Barnett		201.43
Mrs. Herman Rudick		81.78
Sam Kress		<u>1,372.56</u>
		21,900.44

*Percentage on this concession starts
when receipts pass \$6,250 gross.

Following is a list of Midway Concessions which, according to our Survey, will not remain during winter. Our monthly average percentage from these concessions is indicated.

Midget Farm	1,917.87
Ripley's Believe It Or Not	581.49
Globe of Death	86.34
Days of Saladin	285.37

End of the Trail	217.11
Globe Theater	891.10
Eckert's Bavaria	1,387.76
Reg Stalmer (Golf)	20.50

Our Survey indicates that if we close until May 29th, 50 percent of present concessionaires can be resold and balance of space can be sold to other concessionaires.

The Spanish Village has many undesirables, but this space can readily be filled on a new deal. This will give us an opportunity to get rid of the undesirables and keep those that have caused us no trouble.

REASONS FOR DISCONTINUANCE (AND REOPENING)

Christmas season notoriously bad for all shows. Many close down.

Competition with football and races formidable.

Rain will ruin bunting and prevent attendance.

Cold evenings will put bowl and organ pavilion out of business.

Early darkness will short day attendance.

Buildings will always be cold. Cellophane and Comp-Board ceilings satisfactory insulators, but heating plant installation would be extremely costly.

Ford, pivotal exhibitor, will not go on. (Going to Dallas.) Kaw model would require new installation.

Other exhibitors following Ford to Dallas.

Mr. Cross, acting in absence of Federal Commissioner Hiscox, unofficially states, first, that Federal Building will be maintained if show goes on, and, second, that financing will be available for the interval between closing and reopening.

To go on would require multiple, simultaneous operations involving countless details. Job too big.

Continuation fund of approximately \$250,000 inadequate to provide improvements and absorb gate shrinkage.

Gap to May 29th safe. (Temporary discontinuance.)

Gap to May 29th practical.

Use of our established date, May 29th, recommended.

Exposition to be permanent, annual event, 100 days, May 29th to Labor Day.

Gap to be carefully, deliberately, efficiently used to standardize and build second session --- 1936 --- of annual event.

Exposition to be an institution, with fixed features, and not a series of variety shows.

Present, 1935, Exposition to be a perfect accomplishment, rather than anti-climax.

Announcement of certainty of definite closing on November 11th will be a fair deal for exhibitors, will build up their receipts and establish the Exposition, in their estimation, as a dependable enterprise.

To continue would be a gamble. To shut down and reopen on May 29th involves no gamble.

The 1936 session of the Exposition will be planned and operated from tested blueprints.

Anticipation of the 1936 session will provide effective promotion.

Four million satisfied patrons of the 1935 session will send another four million to the 1936 session.

Oberamergau, model for all community attractions, is an institution, repeats itself periodically, never over extends its season, varies only by improvement, develops specialists, is a pattern of economical operation.

Let the Exposition take Oberamergau as its example.

Since many Exposition contracts closed "at the end of the Exposition," a suspension will be convenient.

Local donors will be more likely to contribute to a practical plan than to a hysterical over-extension.

Dallas show will send visitors to Texas onward to the coast. The railroads will promote that.

There is no comparison between urgent allowance of free space to present exhibitors to hold them and sales of space during the gap to selected exhibitors.

The Ford Building can be used during 1936 for an automobile show.

The Globe Players are already booked to work in Oakland and San Francisco during November and December.

1936 will be a year of many political programs. Some of these programs are good shows that draw throngs. Our Exposition can capitalize many political programs by not only staging them but by getting publicity out of their broadcasts. Los Angeles or San Francisco could be induced by us to bid for the two conventions on the grounds of being able to offer delegates the nearby San Diego Exposition. Our political staff, during 1936, might be a valuable part of our Special Events Department.

Yearly, our successive sessions of the Exposition can be adjusted to and capitalize current events.

San Diegans can KEEP their Exposition by SAVING it. To drag it out to nothing will WASTE it. Wasting it by dragging it out with dead programs will deprive San Diego of a future continuing asset.

SUMMARY AND RECOMMENDATIONS

Perpetuate the Exposition as an institution holding annual "100-day" Summer Sessions. Thereby insure San Diego's future and prestige.

Remembering what Oberamergau, Monte Carlo, Caliente, and the Riviera have accomplished, let us use our Exposition structure to advertise to the world, through our patrons as well as through out publicity, that San Diego is "America's Playground," providing incomparable recreational outlets, plus cultural values unequalled elsewhere.

Using the experience that we have acquired, let us close our current session of the Exposition on November 11th, and, between that date and May 29th, carefully plan an efficiently directed, adequately financed, economical, similar but superior session for next year.

Let us honestly call our Exposition what it actually is, namely, "San Diego's Exposition," and let us frankly feature its finest asset, which is its beauty.

The undersigned, who were assigned the responsibility of submitting this Survey and plans, appreciate the confidence reposed in them. They can be counted upon loyally to devote themselves to the accomplishment of whatever plans may be selected. But, out of their years of experience, they venture to express the hope that the particular plans which they have emphasized as practical will be the plans to which they may be allowed to apply their experience.

Respectfully,

FRANK DRUGAN

Letter, January 8, 1936, H. H. Barter to Committee on Plaza Tower and Pools; SUBJECT: Suggested Removal of Plaza Tower & Pools.

Gentlemen:

At your request I am giving you herewith a report on the suggested removal of the Plaza Tower and Pools.

The Plaza Tower and Pools accomplish three things which I have listed below, but not necessarily in the order of their importance:

- (1) Fills in with pleasing reflecting surfaces the center of the Plaza which would be impossible to light adequately with any method without producing glare from the light sources.
- (2) Provides an adequate central location for the public address system loud speakers.
- (3) Provides the most, and possibly the only, practical way of lighting the buildings and a 30 or 40 foot strip around the perimeter of the Plaza.

In planning lighting of the Plaza as it was one year ago, the experience of 1915 was borne in mind. At the last Exposition this Plaza was lighted with 500 Watt standards around the curb line of the Plaza, and was inadequate even for general illumination except close to the curb and for a very limited height on the buildings. The center of the Plaza was poorly illuminated, cold, and foreboding. This was because the intensity of the beam of light on the ground becomes smaller. Increasing the intensity of this unit merely

emphasizes the contrast between the unit and the intensity at the center of the Plaza. Floodlighting would provide more intensity in the center of the Plaza but would require extremely high structures to keep them out of the eyes of the observer.

The Langevin Company, who installed the public address system on the Grounds, refused to accept, as inadequate, any other location than a point about 30 feet above the ground at the center of the Plaza for the distribution of sound east and west and north and south from that point. At one time locations in towers on the House of Hospitality and on the Café of the World were offered them, which they refused.

A tower in the center of the Plaza then provides a location for the loudspeakers and also provides a location for lights to light the fronts of the buildings facing the Plaza and Pools, provides a means of reflecting the spill light from the buildings, reflect the lighted front of the buildings in its surface, and occupy space in the Plaza which is impossible to light adequately except by towers or poles higher than the Plaza Tower itself.

In a measure the Tower and Pools are an expedient and their cost was relatively small. More elaborate structures would undoubtedly have been more impressive and pleasing but funds were not available.

PRESENT EXPOSITION

The cost of moving the Plaza Tower and Pools is not in itself an expensive job, allowing salvage for the lumber either by contract with the wrecker or crediting ourselves with the lumber, it would run anywhere from a credit of \$250.00 to a cost of \$500.00. The removal of the concrete and hauling it away might run \$500.00. The re-paving is not a serious job.

However the delay caused by time of demolition of the tower and pools; the devising of a complete new illumination scheme involving changes in the manufacture of dimmer equipment now or order and being built in the east; the installation of a new system; would make a complete picture by February 12th out of the question.

If a new illumination scheme were devised it might mean cancellation of the use of equipment and dimmers provided under the Olesen contract, and which has already been procured or manufactured. It would also mean the abandonment of certain work which we have already done in the way of running circuits. Certainly new structures of some type would have to be provided in some location to accomplish the same general purpose. The structures as they exist at present was the cheapest combination and probably cost, ready for service, \$12,000.00. It is reasonable to assume that with the changes involved in the contract, the demolition of the Tower, the installation of a new system with the attendant structures might cost anywhere from \$15,000.00 to \$25,000.00 and it would be very highly improbable that the work could be completed by the opening February 12th.

Letter, January 16, 1936, Gertrude Whitson, Sole Owner, GEFROG STUDIO, 1911 South Harvard Blvd., Los Angeles, Calif. to F. M. Sandusky, Department of Exhibits, California-Pacific International Exposition, San Diego, Calif.

Dear Mr. Sandusky:

Mr. Whitson and I have just returned to Los Angeles, where we find your letter and enclosures waiting reply.

We certainly appreciate your sending us the letter of inquiry, and hope we shall secure some business thru it. Many thanks.

Regarding the application blanks: We had considered the Better Housing Building for our booth, having been told that there would be no available space in the Spanish Village, where we had our most important booth last year, because we understood that a Cuban Village was to occupy all the space in the Village, and a gate charge would be asked. Recently we had space in the Village offered to us again, and learned that the idea of a gate charge had been abandoned. We understand that many changes are being made there, and feel that it is advisable for use to return to the Spanish Village, rather than return to the Better Housing.

We thank you very much for your many kindnesses, and would have cooperated with you better if we had been able to get some definite information regarding the Village at an earlier date. We are now returning your blanks, and within the next few days will be in San Diego to attend to removing our property from the booth now in the Better Housing Building.

Thanking you for your interest in our behalf, and with best regards, we are

Sincerely

Gefrog Studio

(Sgd.) Gertrude Whitson

Gefrog Studio: Importers and dealers in tropical butterflies & makes of jewelry, pictures, plaques, table tops, trays, lamp shades, book ends, etc. with natural, uncolored butterfly wings.

(Letter taken from Box 9 Folder 27, California-Pacific International Exposition, kept by San Diego Public Library.)

San Diego Union, January 17, 1936, 1:5, 3:4. Thousands turn out for big parade to hail February 12 advent of 1936 Exposition.

San Diego Union, January 18, 1936, 3:2-3. Replica of railroad being built for transportation exhibit.

Letter, January 19, 1936, Victor M. Clark to Frank Belcher; cc to Larrinaga, Settlemier; SUBJECT: Proposed scheme of treatment "March of Transportation"

For the next few days at least we will go on the assumption that Davidson will be successful in obtaining the first locomotive to run into Washington (built 1832), the Atlantic. This is a wonderful and picturesque thing and has attached a most colorful Inlay Coach attached [sic]. This is now in the Smithsonian Institute but is to be released in the next few days. If we get this it would be an ideal thing for a most striking centerpiece for the Rotunda.

I am enclosing herewith prints of photos Mr. Black had made for me the other day in Dearborn. Also, I enclose a floor plan of the suggested layout.

I recommend that Paul Whiting be immediately called in to work with Larrinaga and give him the benefit of the research work he has done particularly in regard to the 12 or 15 highlite stages we will want to depict. These will be fitted in more or less with the material we have available. Start the history with TUT's Chariot and work around to the most modern and even ultra-modern modes of transportation of the future. Juan is the baby who can imagine more fantastic vehicles than we will have wall space for. Give Druggan his rockets by all means.

Don't attempt to sketch any general "all over" view till I get there but Juan can get started on rough idea sketches for the wall murals. Bear in mind we can have the two murals ford [sic] has which were on the two, shall I say pilasters, which flank the entrance to the patio. Personally, I think we need this space to complete our historical picture in murals. This is the thing Whiting should work with Juan.

Oh, Baby, if we get, and I am sure we will, the B & O engine and Inlay coach referred to above, it will make a most spectacular centerpiece . . . I'm all steamed on this thing and believe me I am getting back ASAP.

I hope I have made this clear unuf [sic] for Juan. At any rate I will be in Chicago Tuesday; Wednesday go to Omaha (Union Pacific). Leave Thursday for SD . . . (Chicago is for Airline exhibit.)

Feeling fine even with 12 inches of snow here today. My only worry is will these damn airlines ever get in the air again. Had to come to NY by rail.

Tomorrow, Monday, I have Pan-American and Pratt-Whitney and then I'm on my way . . . to Chicago.

Personal regards . . .

(Transcription made from letter in Box Files of California-Pacific International Exposition kept by San Diego Public Library.)

San Diego Union, January 19, 1936, 1:3, 2:2. Tickets to Exposition ready tomorrow; grounds will be closed to public; children to be admitted for nickel Saturday; books over 40 percent savings; Zoo to remain open; final 23 days of preparation; **Zoo** and **Palace of Natural History** remain open to public; Harry P. Harrison, director of admissions; season ticket \$10 for adults and \$5 dollars for children under 12, will carry photograph and signature of holder; tickets with 25 admissions will be \$5 to adults and \$2.50 for children; 5 general admissions and admission to 5 concessions \$2.50: Strange As It Seems, the 3 Fanchon and Marco shows, Danse Folliies, Hollywood Circus, the Midget Circus and the Old Globe Theater; general admission 50 cents for adults and 25 cents for children; On Saturday youngsters can get in for a nickel.

San Diego Union, January 19, 1936, 18:1. Exposition leaders promise Fair surpassing 1935.

Letter, January 20, 1936, Weston Settlemier to Belcher, Gildred, Dailard, Executive Committee.

After checking with all salesman, the exhibit situation is:

By February 12, which you set for opening, the Foods Palace and the Housing Palace will be ready if attached recommendations are followed.

By March 12 the Medical Building, General Exhibits Building, Charm Building, and an Electrical Building can be ready if attached recommendations are followed.

By April 12 the Transportation Building should be in good shape.

I see no way in which more speed can be made.

We have mustered all the buying pressure in the Businessmen's Committee we organized.

You gave us 10 salesman and 3 months as against last year's Fair, with 30 salesmen and 9 months. You asked the same space price for the second Fair although Chicago gave away space the second year to hold outstanding exhibits. Five major exhibits, including Ford, Libby, Kraft, Standard Brands, and Coca Cola, committed themselves to Dallas before you decided to reopen.

A good Fair can be delivered to us on above schedule if attached recommendations are followed, but no sooner.

WESTON SETTLEMIER

RECOMMENDATIONS

1. Fill the near wing of the Foods Building by:
 - a. Offering space free to M.O.D. as a Farmers Cooperative, as we did for the California Walnut Growers Association branding machine - if they decide against us - to fill the old Libby space with a fine exhibit.
 - b. Put Dailard's indoor ice cream rink in the old Kraft space, or a Hage exhibit, if possible.
 - c. Put a concessionaire back Hormel exhibit in the old Standard Brands space.
 - d. Put a concessionaire back floor exhibit, using the old Fisher scone baker to fill the side wall.
 - e. Put the so-called Seagram Tavern in another side wall space, using the old Transamerica Theater (purchasable for \$250) for part of the Tavern construction, if needed.
 - f. Balance or 3/4th of the building is in good shape under contract with only one important reservation still stalling and that is Coca Cola, which will come in thru the local bottler when the cash lay down is right.
 - g. Put potted palms in the few remaining vacant space.
 - h. Consider closing the far end of the Foods Building, i.e., spaces 4-A, 5-A, 6-A, 7-A, 7-B, 20-A, moving the Spreckels exhibit in 7-B to the old Kraft space, putting Seagram's Tavern in the closed end. This will still leave a large wall-filled building.
2. Fill the unsold wing of Housing Building at low or little floor rental for taking this over as a separate palace, such as the Water Palace is, by a deal with Portland Cement Association or Redwood Association, who can't pay much but can fill it with legitimate and interesting building exhibits that the U.S. Government insisted be in this building this year as a condition of their investing \$25,000 in the new Talking Towers. Four-fifths of the main building is sold to legitimate exhibitors with the gas

industry, including utilities and appliances, paying us \$7,000 for an exhibit that is 4 times the size of last year's exhibit. The whole building includes this year no fake merchandising or gyp religious booths.

3. Help San Diego Consolidated Gas & Electric Company to swing the Electrical Building by itself, if necessary.

\$15,000 was the minimum estimate needed to the free floor space you gave. S.D. Consolidated Gas and Electric agreed to spend \$6,000 themselves in last Thursday's meeting in Los Angeles. Clark Chamberlain, Secretary of S.D. Electrical Appliances Association, might find some money from his budget.

Kelvinator - R.C.A. - Norge - Horn - Westinghouse, and others --- have guaranteed to move in on the space and, man if the above sponsorship cost is arranged. Their joint investment would total \$75,000.

Southern California Edison declined to come in. We have Mr. Pontius, President of Pacific Electric, as a large customer; still trying to convince Bauer, their President. He has already phoned Frost and Lewis, their two Vice Presidents.

Bureau of Power & Light considered paying 2/3rd by itself, but on a basis unacceptable to S.D. Consolidated Gas & Electric, as municipal ownership would have overshadowed San Diego's share and would have ruined the usefulness of the original plan, which was to feature appliances whose sales help the sale of power.

I need help from Mr. Belcher to convince Messrs. Raber and Holloway, who are most cooperative, that if the L.A. Power Company does not come in, they can still have a building that will do a good job that is sponsored by themselves alone and sponsored with the Exposition's entire cooperation.

Bureau of Power & Light and Southern California Edison officials pointed out they were promised last year an Electrical Building equal to Chicago if they would spend \$45,000 to finance the G.E. House of Magic. They spent the money but the Fair sold only two electrical exhibits and the rest were jewelry and novelties, potato peelers and oil companies. Some way to restore their confidence in our pledges and program must be found.

4. Charm Building negotiations have lagged as exhibitors received circular offers in early November for \$1.50 per sq. ft. and were later asked \$16,000 to \$25,000 for a 6,000 net sq. ft. building. The building is in the main a concession, and if rental is set right it should be ready no later than March 12.
5. Medical Building is devoted to ethical medicine. Except for G.E. X-Ray, commercial exhibitors have so far not given Bryant in New York, who is concentrating on this building, much encouragement. It contains outstanding institutional exhibits and should be ready by March 12, but no sooner.
6. Varied Industries last year had little salable space. It had 3 big things which took most of the space --- the Post Office - the House of Magic - the Television Show. If these are used for similar purposes this year, and I understand this is Dailard's plan, there is little need to worry over this building. It should be a catch-all and called General Exhibits, or used for transient shows, like dog shows, flower shows, style shows, home craft shows, etc. It should be ready by March 12.
7. Hollywood Hall of Fame could be used by the name bands of the Music Corp. of America, which could put in famous bands that are in supply for any reasonable deal for the summer months to draw the younger set of Southern California, on free space with a percent of their gate to the Fair; or it could be an indoor auditorium in case any mid-winter special events are rained out. An indoor auditorium with chairs for the visiting organizations is badly needed. The head of one organization asked to arrange for a special event in March told me he declined because he was not satisfied with the outdoor facilities if it should rain while his visitors were holding their outdoor speaking contest. I understand the Special Events Dept. has not yet been provided with an indoor auditorium with seats and this building might

work for this purpose. If other arrangements are made for an indoor auditorium, there is a long-shot possibility that we might investigate. The L.A. Assembly Plant Manager and the local dealers might take over this small building if the deal on space is nominal to exhibit their new models and possibly a steel model of their new assembly plant and call this a General Motors Salon, which arrangement would give the Fair the prestige of a small General Motors exhibit and in no way interfere with the dance band planned for this building in case that can be arranged.

8. I recommend that you immediately publicize the February 12th opening as a "MIDWINTER PREVUE" of 1936 Exposition - "OR INFORMAL OPENING"

If you open with exhibit buildings not ready as they obviously cannot be by February 12th, public reaction will be so bad that the attendance will be ruined - especially if you make it an official opening, as the public expect everything in readiness at official openings.

By publicizing the above title, you will, in fairness, reconcile the public by expecting most from the grounds and concessions and prepare them for facing things in an unfinished state (except for Foods and Housing Buildings.)

Publicizing the above title will also reconcile somewhat concessionaires discouraged by necessarily slow business in midwinter to the fact that the opening is early and the best is yet to come --- in the summer months.

It will frankly admit facts we all have to face and take the curse off the rush and unfinished condition an arbitrary opening date creates.

By April 12th we should be able to drop the "PREVUE" publicity and bill a full steam ahead 1936 Exposition or "FORMAL OPENING".

WESTON SETTLEMIER

San Diego Union, January 29, 1936, 4:3-5. Councilmen refuse to ban **nudist colony**; leave it up to police; hold that the war on the colony is good publicity.

Letter, January 31, 1936, F. M. Sandusky to Mr. C. S. Harper; SUBJECT: House of Charm

It will be necessary for the Exposition to cut a doorway through the East Wall of the House of Charm at the Arch farthest [sic] South in said wall. Doors are to be of glass and the same type as used on the other opening.

Also, it will be necessary to carry the Drug Store walls up to the roof line so as to shut out all cooking odors.

The floor should be sanded and given a coat of oil. Work should be started on this as soon as possible as the Gazvini's are hoping to start their installation of the first of next week.

San Diego Sun, February 3, 1936, 8:6. Drugan says flow of exposition passes has been curbed.

Letter, February 4, 1936, C. E. Lohman, Assistant Director of Exhibits, to Mr. C. A. Young, 1555 South Hill St., Los Angeles, Calif.

Dear Mr. Young:

Replying to yours of the 2nd, will state that we have several desirable spaces in the General Exhibits Building, that are suitable for demonstrating and selling Lavender Sachets.

The General Exhibits Building is strategically located in the beautiful Palisades area, adjoining the Ford Music Bowl on the south and the Federal Building on the north. Also, in the immediate vicinity will be

found such outstanding exhibit buildings as the Transportation, State of California, Palace of Education, Electrical Appliances and the Standard Oil.

Five million people visited America's Exposition - 1935 and the results were most gratifying to ore than 400 Exhibitors and Concessionaires who participated. We are confident that this year's show will be much finer and more successful than the last which closed November 11th.

All indications point to more travel and a greater attendance this year over last. This is substantiated by the All Year Club releases, railroad and steamship companies' announcements of advanced bookings and the high percentage of increases in hotel reservations throughout California.

We would not care to consider a percentage deal. However, we will lease you space at \$2.00 per sq. ft. and make an additional charge of \$50.00 for a sales privilege. This is for the life of the Exposition, 211 days.

A visit to San Diego will justify your confidence in our forthcoming show as a means of providing an outlet for your product.

The enclosed floor plan will assist you in the selection of space. Time is short and space is limited, so get in touch with us at your earliest convenience.

Very truly yours,

C. E. Lohman
Asst. Director of Exhibits

San Diego Sun, March 8, 1936, 1:4-5, A-8:4. Cute baby contest opens Exposition's fourth week; escape artist plans 3,500 ft. handcuff drop from plane; Masaryk honored.

San Diego Sun, March 8, 1936, A-2:6. "Darto" jammed with people; police balked.

San Diego Sun, March 8, 1936, A-5:4. Texans deny Aimee McPherson special Exposition Day.

San Diego Sun, March 8, 1936, B-3:4-7. San Diego Art and Artists: displays at Exposition, by Donal Hord.

San Diego Union, March 8, 1936, 1:1, 1:7. Police Chief George Sears restrained in Exposition game blockade; judge sets hearing on injunction; Chief to refrain from interference with "Darto" pending ruling May 16 in Superior Court.

San Diego Union, March 8, 1936, 12:5-6. Deadline fixed for Exposition nudist queen selection.

San Diego Union, March 8, 1936, II, 1:8, 5:2. General Exhibits Building, Hall of Medical Science opened with elaborate ceremonies.

San Diego Union, March 8, 1936, II, 1:7-8, 5:1. Transportation firms placing exhibits; ready March 15.

San Diego Union, March 8, 1936, II, 3:6-7. Baby contest heads program today; bail-out scheduled above Speer Field across from Marine Base.

San Diego Union, March 8, 1936, Society-Club, 3:1. Girl Scouts to have gala day at Exposition.

San Diego Sun, March 9, 1936, 3:2. Court okays Exposition gaming arrest raids; judge interprets "Darto" blockade restraining order.

San Diego Sun, March 9, 1936, 5:2. Ford museum exhibits due Wednesday; 7,500 watch escape artist's leap in parachute.

San Diego Union, March 9, 1936, 1:6. Diane and Joanne Golden, twins, capture Exposition Golden Trophy.

San Diego Union, March 9, 1936, 5:4. Mardoni, stunt man, opens handcuffs in parachute jump.

San Diego Union, March 9, 1936, 5:7-8. Tanya Cubitt, nudist, making plane trip to win Exposition queen title.

March 10, 1936. Program -

San Diego Sun, March 10, 1936, 1:2. Wayne Dailard, executive manager of the Exposition, announced that Oscar Kantner, advertising director of the Fox-West Coast Theaters, was appointed Director of Exploitation today for San Diego's 1936 Exposition.

San Diego Union, March 10, 1936, 11:4. There has been no court order issued to stop Police Chief George Sears from making an arrest at the Exposition "Darto" game; As the case stands, the courts must decide whether the police shall be permanently enjoined from maintaining a blockade or picket in front of the building housing the "borderline" game.

March 11, 1936. Program -

San Diego Sun, March 11, 1936, 1:3, 2:5. Glider plunge due at Exposition; actor James Dunn aids Safety Show; Officials announced yesterday a contest to break the world's altitude and loop-the-loop records for gliders and an exhibition to select "Miss Exposition of 1936" from scores of beach-clad beauties.

San Diego Sun, March 11, 1936, 3:5-6. City draws up new pact for Exposition to restore park; Declaration of Trust whereby the Exposition Company will set up \$25,000 in cash and approximately \$75,000 in property and equipment to guarantee "rehabilitation" of Balboa Park at the close of the 1936 season was ready today for signing.

At City Hall it was revealed that the original trust, under which the Exposition was to set up \$75,000 in cash, was never executed, although it was supposed to be several months ago. The new declaration includes the amendment agreed upon by the City Council, February 18, which allows the Fair to replace \$50,000 of its pledged cash with the personal property.

San Diego Sun, March 11, 1936, 10:7. The Sunny Side: L. E. Clayhool wants a planetarium in the Ford Building after the Exposition.

March 12, 1936. Program – Bungalow Literary Hostess Society Day.

San Diego Herald, March 12, 1936, 2:3. The Exposition.

San Diego Sun, March 12, 1936, 1:6, 5:7. Exposition signs up beauty troupe; 25 blonde entertainers to arrive Sunday; the Ingenues, each of whom plays seven musical instruments will add beauty and talent to the Exposition's Palace of Transportation Sunday and for a week thereafter.

San Diego Union, March 12, 1936, 3:2. "The March of Transportation" mural to be unveiled Sunday; mayors of outlying cities invited.

San Diego Union, March 12, 1936, 6:5. Exposition contrasts first telephone with television.

March 13, 1936. Program -

San Diego Sun, March 13, 1936, 1:2, 2:2. Exposition's biggest weekend since opening; Palace of International Arts and Palace of Transportation open Sunday.

San Diego Union, March 13, 1936, II, 1:4. FHA will reopen exhibit at Exposition.

March 14, 1936. Program – Girl Scout Day, Conservation Day, Kids' Roller Skating Day.

San Diego Sun, March 14, 1936, 1:4, 2:8. Exposition features Wyoming Day; General Pershing's niece on big Sunday program.

San Diego Union, March 14, 1936, 5:1. Ceremonies at Exposition to open Palace of Transportation, Palace of Electricity, Palace of International Art tomorrow.

Bulletin No. 6, March 15, 1936; CALIFORNIA PACIFIC INTERNATIONAL EXPOSITION,
San Diego

EXHIBIT BUILDINGS OPEN:

11:00 am to 9:00 PM Fri, Sat & Sun

12:00 noon to 8:00 PM Tues, Wed & Thurs

ADMISSION GATES OPEN:

10:30 am Weekdays

10:00 am Sat & Sun

We take pleasure in presenting a summary of some of the highlights of Exposition news since the issuance of the previous Bulletin.

EXPOSITION IN FULL SWING. The California Pacific International Exposition of 1936 is one hundred percent complete, and every building is now open to the public.

The great March of Transportation Building (the Ford Building of the 1935 Exposition), the Palace of Electricity, and the Palace of International Art were opened last week, and are crowded daily with appreciative visitors.

FEDERAL HOUSING DAY. April 4 is Federal Housing Day at the Exposition. Out of town guests who will participate in the program are:

Stewart McDonald, Administrator
Arthur Walsh, Assistant Administrator
We. D. Flanders, Deputy Administrator
L. R. Gignilliat, Jr., Deputy Administrator
Florence Jones Vining, Chief of Women's Division
Alfred B. Swinerton, Regional Director
Fred W. Marlow, Director Southern California
Austin L. Black, Director Western Exhibit Section
W. G. Bingham, Associate Director Southern California
Bruce A. Wilson, Special Assistant to the Administrator
Clifford Anglim, Director Northern California
Jay Keegan, Associate Director Northern California
David J. Witmer, Architectural Supervisor
H. R. Thompson, Chief Underwriter
Thos. J. Elliott, Director, State of Arizona
Jamieson Parker, Director, State of Oregon
Clark Jackson, Director, State of Washington
H. A. Whittier, Director, State of Idaho
Geo. W. Friedhoff, Director, State of Nevada

Modeltown, Modernization Magic, the Federal Housing Building, and the Palace of Electricity, present the largest, most colorful and educational panorama of home progress ever staged in the United States.

MODERNIZATION MAGIC. Opening of the Modernization Magic Exhibit in Modeltown at the Exposition is scheduled for this week, according to Stuart A. Ripley, manger of the Federal Housing Exhibit.

Modernization Magic shows the transformation that can be effected under the FHA insured mortgage plan. The exhibit is mounted on a base, three feet from the ground, and upon a reversible surface. One side shows a group of typical, run down buildings similar to those found in any community. At intervals, by a mechanical device, the panel turns over and shows, upon the other side, the effect a modernization program has upon the structures. The cost of each improvement and the terms upon which the money may be obtained, is contained in a panel opposite the structure. Modernization Magic again will be in charge of Edwin M. Rahm, mechanical engineer of Los Angeles, who supervised it last year.

MODEL TOWN UNVEILED. The Federal Housing Administration exhibit of "Modeltown," completed repainted and renovated, was recently unveiled for the 1936 season. The miniature houses on miniature landscaped lots, occupy a three and one-half acre area, which last year drew 1,481,424 visitors. Modeltown is part of the government's \$150,000 display, the remainder of which is in the Federal Housing Building, and which includes the 12 famous "singing towers."

GENERAL EXHIBITS BUILDING. Among the many interesting exhibits in this building are included the following:

The Gem Stone Chapel, whose displays contain every gem, mineral and stone mentioned in the Bible. These gems and stones were gathered from 22 nations and 21 states of the Union.

The Last Supper of Christ, depicted in life-size wax figures.

The American Legion display, showing guns, grenades and other articles of modern warfare, side by side with Civil War relics for comparison.

The sword which General Grant wore through the Civil War.

A model of the historic Milan Cathedral, composed of more than 100,000 tiny pieces.

"Gadget Town," appealing to the housewife who demands convenience in her kitchen.

Handcraft and character-building exhibits by Boy Scouts, Girl Scouts and Campfire Girls.

W.C.T.U. exhibit on the evils of drink

Alaska exhibit, featuring furs and clothing and historic northern relics.

A revolving hobby display. For the first six weeks it will contain a collection of historic firearms of the West.

Death Ray exhibit, prepared by Professor Harry May.

PALACE OF MEDICAL SCIENCE. This display is centered around a 26-unit exhibit of the American Medical Association, covering 1500 sq. ft. of floor space and embracing treatment of sickness and injury from the broadest scientific viewpoints. A 16-unit exhibit of the California Medical Association, of equal importance but of entirely different character, visualizes specific lessons and facts which have been learned in years of medical study, experiment and practice. The smallest and largest X-Ray tubes in the world for practical use are exhibited by the General Electric X-Ray Corporation.

PALACE OF TRANSPORTATION. One of the outstanding features of this truly marvelous exhibit is the world's largest transportation mural. Occupying 20,000 sq. ft. of wall space, this mural marks the successful culmination of the most ambitious mural painting undertaking in history. Executed by Juan B. Larrinaga, noted artist, and a corps of assistants, the murals depict in a steady march of events the history of man's conquest of distance, from the time of

primitive men down to the present. A bold glimpse into the future forms the final panel of the great mural, with rocket planes, automobiles of the future, and ultra-streamlined trains depicted as they speed across tomorrow's travel scene.

UNION PACIFIC EXHIBIT IN "MARCH OF TRANSPORTATION." The Union Pacific Railroad exhibit features two trains in miniature, one a conventional model, and the other a streamlined model. The streamlined model represents the "City of Los Angeles," an 11-car train operating on regular rail schedules in the exhibit. In addition to the miniature trains, the Union Pacific will have six dioramas in its 100-ft. section. These dioramas will show the northern rim of the Grand Canyon, Boulder Dam, Zion Canyon, Bryce Canyon, and other scenic spots, covering an area of 2,000 sq. ft.

FORD RELICS FEATURE OF MARCH OF TRANSPORTATION. A feature of this great building is the collection of relics from the Ford Museum at Dearborn. They include five "horse-drawn" vehicles and seven automobiles, exhibited in the rotunda of the building. The "horse-drawn" vehicles include a buckboard, 2-wheel chaise, phaeton, landau and brougham. The automobiles begin with a Locomobile of 1899, a Stoddard-Dayton of 1911, a Stanley Steamer of 1923, Ford models A and T, a Ford V-8 and a Lincoln Zephyr, the last two being 1936 models.

LINDBERGH GLIDER. In the rotunda of the March of Transportation building is the battered old glider used by Charles and Ann Lindbergh in their soaring flights over San Diego in 1931. Lindbergh flew the glider an hour and a half over Point Loma, while Anne Lindbergh had it aloft for nearly an hour over Mount Soledad.

REDWOOD EMPIRE EXHIBIT IN CALIFORNIA STATE BUILDING. One of the most interesting displays in this building is the Redwood Empire, embracing the eight counties comprising this empire: San Francisco, Marin, Mendocino, Humboldt, Sonoma, Napa, Lake and Del Norte. In this area, 97 percent of all redwood growing in the world is to be found. Dioramas depicting the wine industry, general farming, and outdoor sports, as well as a model of one of the towers of the Golden Gate Bridge, are included in this exhibit.

MODEL OF PALOMAR TELESCOPE. A model of the world's largest telescope, panned for 6,150 ft. Palomar mountain in San Diego County, is on display at the Palace of Education. Correct in every detail, the model of the Palomar telescope is being exhibited by the California Institute of Technology, to whom the Rockefeller Foundation assigned the responsibility of selecting a telescope site.

SAFETY EXHIBIT IN STATE BUILDING. A comprehensive exhibit in the California State Building, designed by the Industrial Accident Commission of the state of California to show the main causes of accidents and the measures taken to prevent them, is proving to be one of the most interesting and educational displays at the Exposition. It comprises one of the largest collections of modern safety appliances ever assembled in the West. It includes the very latest equipment in eye protection, respiratory appliances, safety clothing and first-aid kits.

WATER PALACE ATTRACTS CROWDS. Southern California's never-ceasing conquest of water, as shown in the world's largest talking diorama, is attracting thousands of visitors every day. The facade of the Water Palace is one of the most striking on the grounds and gives the prospective visitor an inkling of what is to be found inside. Water, cascading over the basins in a shimmering flood and, at night, forming beautifully colored lighting effects for the entrance and forecourt, is indicative of the amazing story of water development in Southern California, as told by the exhibits on the inside. Once inside, the principal feature of this exhibit is a gigantic diorama or relief map. By means of an electrically illuminated lecture, this great map graphically shows three of the world's greatest water supply systems, all serving a group of 13 cities in the Los Angeles area. The three systems are the Mono basin, the Metropolitan Water District Aqueduct, the world's greatest construction job, now in progress; and the All-American Canal, now being constructed by the Federal government to serve Imperial and Coachella valleys with irrigation water.

PALACE OF INTERNATIONAL ART. This exhibit building, located on the Plaza del Pacifico, and which was known as the House of Charm during the 1935 Exposition, contains many unusual and diversified displays. Among them are a Chinese pagoda, an Irish linen shop, a replica of the Taj Mahal, housing a famous collection of gems, and an exhibit of Oriental rugs, including the famous "Wishing Rug." Other features include a Mexican patio, an Indian pueblo, and a Turkish coffee lounge.

GARNER CURRAN. Garner Curran, world traveler and renowned lecturer on Oriental and American subjects, is receiving numerous letters and cards of praise for his very interesting illustrated travelogs and lectures at the House of Hospitality. In fact, one admirer recently sent him a verse of appreciation, containing the following lines:

"Now one can travel to a tropic land
And at the same time hold an easy chair;
What marvels reach one's vision, close at hand,

Conveyed by cameras from most everywhere.”

ENTHUSIASTIC VISITORS. Judge Peter H. Schwaba of the Cook County Superior Court in Chicago was a recent Exposition visitor. Before leaving, he said: “The beauty of the Exposition is incomparable, and in that respect it far surpasses the Chicago Century of Progress.”

At the San Diego Breakfast Club, another visitor, Col. W. Langmuir Watt, C.M.G., chief of the X-Ray division of the famous Guy’s hospital of London, England, was lavish in his praises of the Exposition’s beauty, adding that “I believe that the view of Palm Canyon under the glow of the many colored lights is one of the most beautiful in the world.”

PARKING FACILITIES AND SERVICE. Rapid parking service is assured for motorists visiting the Exposition. A large staff of uniformed attendants has been organized to handle the parking of automobiles with the great efficiency, courtesy and speed. Pickup service for automobiles is maintained at both the east and west entrances. Visitors may drive up to the gates, where an experienced licensed driver will take the automobile to the auto park. Upon leaving, the exposition visitor may phone for the car to be delivered at the desired exit gate.

NATIONAL ROMANCE WEEK. National Romance Week has been proclaimed by the Federal government for the week from June 1 to June 7, and Dan Cupid has been signed up at the Exposition for that week. There will be a gala public wedding and many other appropriate events.

CALIFORNIA HOTEL DAY. “California Hotel Day” will be celebrated at the Exposition on Sunday, April 26, and all hotel people in the state are urged to attend. Great interest is being shown by the Hotel Association and the Greeters, and this will unquestionably be a most enjoyable and memorable day for all visitors connected with the hotel business.

A committee has been appointed from membership of the San Diego Hotel Association to arrange a program and act as host group to the out-of-town hotel men who will attend.

SAN DIEGO HOTEL RATES LOWERED. With accommodations for about 100,000 guests per day, San Diego hotels have reversed the usual procedure and lowered their rates this year coincident with the opening of the 1936 Exposition. A general reduction of about 10 percent has been made in all hotels, according to Al Flowers, secretary of the San Diego Hotel Association.

OLD GLOBE THEATER. The Globe Theater Players, presenting abridged versions of Shakespeare’s comedies and tragedies, are again receiving popular acclaim for their outstanding performances. As a special treat, a full-length production of “Hamlet” was recently given in the evenings. Free English fold dancing precedes each performance on the Village Green. Adjoining the theater is the “Old Curiosity Shop”, immortalized by Charles Dickens, and the Falstaff Tavern specializing in the best English cookery.

CONTESTS. Life at the Exposition is just one contest after another --- all adding to the fun and entertainment of the visitor, whether young or old. Recent contests included a bathing beauty contest, an “Air Queen” contest, a spelling contest, a pistol marksmanship contest; baby contest; and, on Kids’ Days (Saturdays) a pie-eating contest, a peanut-rolling contest, a whittling contest, a doll contest, and a buried-treasure hunt.

WHO WILL BE THE NEXT LUCKY WINNER? On Wednesday night, March 25, another Ford car will be given away to the holder of the lucky number at the drawing on the Midway Fun Zone Plaza. The first drawing was held on March 5, and the Ford was won by a sailor; on March 15 a school teacher was the lucky winner. Special tickets to participate in the drawing are being given to all visitors paying admission to the Exposition grounds.

EVERY NIGHT A FEATURE NIGHT. Some special form of feature entertainment is provided at the Exposition from Tuesdays to Sundays. (The Exposition is closed on Mondays during the winter and early spring period.)

Below are the evening schedules:

Tuesdays . . .	Old Fashioned Dance Night
Wednesdays . . .	Navy & Marine Night
Thursdays . . .	Motion Picture Night & Spanish Fiesta Night
Fridays . . .	Amateur Vaudeville Night & Collegiate Night
Saturdays . . .	Special Programs (to be announced)
Sundays . . .	Musical Programs

RETREAT CONCERTS AND RETREAT CEREMONIES. Every Tuesday and Friday afternoon the United States Naval Training Station gives a Retreat Concert at the Organ Amphitheater and then performs the impressive Retreat ceremony at the flagpole in the Plaza del Pacifico. On Wednesdays and Thursdays, the Retreat Concert and Retreat ceremony are given by the United States Marine Base Corps, and on Sundays by the San Diego Army and Navy Academy.

CHILEAN CADETS ENTERTAINED. Adding to the festive spirit of the Exposition, officers of the Chilean training ship "Maipo" were recently feted at the Cafe of the World by Frank Drugan, executive secretary of the Exposition, and Howard F. Worth, Chairman of the Army and Navy committee of the San Diego Chamber of Commerce.

ALL STATES DAY. One of the most outstanding of the many Special Days that are being planned for the summer season is All States Day, set for August 1. This day will honor Mr. C. H. Parsons, President of the Federation of State Societies in Los Angeles. Mr. Parsons has the enviable record of having been Secretary of the Federation for 41 years. Governor Merriam has promised to attend if he can possibly do so.

SPORT FISHING. Sport fishing is an additional attraction that draws thousands of visitors to San Diego, and, of course, to the Exposition. Last year more than 40,000 persons embarked from the foot of Broadway on sport fishing cruises, and it is estimated that about 30,000 were from outside the city. More than 100,000 yellowtail were caught off the San Diego coast last year, besides thousands of swordfish, tuna, barracuda and other game fish.

FIRE LOOKOUT TOWER. A new fire lookout tower has been erected at Camp San Diego, the CCC Camp on the Exposition grounds. It is an exact duplicate of those in the national and state parks, being 12 feet square at the bottom and 18 feet tall. The tower houses all the equipment employed by park rangers for locating and detecting forest fires. A guide is on hand at the new tower to show visitors the intricate workings of fire survey and protection.

DAILY WALK-TALK AT PALACE OF SCIENCE. The daily walk-talk that is given at the Palace of Science every day from 3 to 3:30 p.m. is proving very popular.

Dr. E. L. Hardy, director of the great collections of anthropology and archeology, sponsored by the San Diego Museum, and Dr. Malcolm Rogers, curator, have initiated this feature of the 1936 Exposition in response to the demand of thousands of visitors who wish to see the magnificent exhibits and be informed as to their significance by trained lecturers.

Every day, except Monday, the people interested in the walk-talks will meet at the main entrance of the California building, on the north side of the quadrangle, at 3 o'clock. After the half hour's official tour of the main exhibit displays, the Exposition visitors interested in some special display will be permitted to return to study it in greater detail in company of a trained guide.

BARNES CIRCUS TO BE HIGHLIGHT OF WEEK. The giant Al G. Barnes Circus, which will set up its huge tents and equipment on the lot east of the fun zone at the Exposition, is the highlight of the Exposition program this week.

The complete Barnes Circus has been signed for a gala three-day show, with hundreds of trained wild animals, more than 1,000 performers, including clowns, aerialists, magicians, and other acts, and every other attraction that goes to make a great circus greater, included on the program Friday, Saturday and Sunday, March 27, 28 and 29.

Paid admission to the circus will entitle patrons to free admission to the Exposition grounds.

FRONTIER DAYS AND INTERNATIONAL RODEO. A great Frontier Days and International Rodeo will be presented at the Exposition over the weekend of April 3, 4 and 5. Hugh Strickland, famous rodeo authority, is the arena director of the big show.

OPENING AND CLOSING TIME OF EXHIBIT PALACES. Owing to increased attendance at the Exposition over the weekends, all exhibit palaces will open an hour earlier and close an hour later, beginning on Friday and continuing through Sunday.

Instead of opening at noon, the buildings will open at 11 am, and instead of closing at 8, they will close at 9 p.m., for these three days of the week.

These hours will not affect the Amusement area and the cafes and restaurants, which will continue to be open until midnight on weekdays, except Saturday when they remain open two hours later. Gates will open at 10:30 am on Tuesday, Wednesday and Thursday, and at 10 on Friday, Saturday and Sunday.

The entire Exposition will be closed on Mondays until the opening of the summer season.

MIDWAY FUN ZONE. Activity and crowds on the beautiful new Fun Zone of the 1936 Exposition are increasing considerably as the balmy spring days lure visitors to the Exposition grounds.

BEECH-NUT CIRCUS AMUSES CROWDS. The "Big Top: of the Beech-Nut exhibit in the Palace of Foods and Beverages is attracting thousands of visitors daily. The miniature circus is housed in a glass-enclosed display, 30 feet long by 10 feet wide, and the models of more than 300 animals and human figures form an endless mechanical parade as they put on their performances around the four rings of the show. Free samples of Beech-Nut products are distributed from the booth.

A DAILY BEAUTY CONTEST. Where is the most beautiful spot on the grounds? Opinions vary, but there is one location that has definitely forged to the front, and, according to present indications, bids fare to wear the figurative crown of beauty leadership. It is Palm Canyon bridge by night. The beauty of the rainbow lighting effects on the palms and the tall eucalyptus trees, with the twinkly of the myriad of tiny lights in the "Vale of Fireflies," presents such a picture of enchantment that it leaves the average visitor spellbound and speechless. "Words fail me," is an exclamation often heard from persons standing on the bridge. "It's so beautiful that it hurts," is another expression that has been heard, and this remark will indicate how deeply the emotions of the beholder are stirred by this spectacle of sheer delight.

(Box 31, California-Pacific International Exposition, San Diego Public Library.)

March 15, 1936, Sunday. Wyoming Day, Transportation Day, Gamma Eta Kappa Day, San Diego City and County Day, San Diego Beneficial Society Day, Business and Professional Women's Day.

San Diego Sun, March 15, 1936, 1:2-3, A-5:1-2. Exposition signs world-famous attractions; Al G. Barnes Circus first on big list; Dailard announces novel arrangement will enable guests to see outstanding shows and Fair all on one ticket.

San Diego Sun, March 15, 1936, B-4:5-6. John A. Willard will again be seen as Hamlet at the Globe Theater.

San Diego Sun, March 15, 1936, B-8:3. Mayor Benbough lauds Dailard "deal".

San Diego Union, March 15, 1936, 1:6, 6:3. Exposition hits fast pace today; city, county to be honored; glider pilot to seek new record over Fair.

San Diego Union, March 15, 1936, 1:1, 2:1. Our Own Exposition, by Forrest Warren.

San Diego Sun, March 30, 1936, II, 9:2. Exposition "Round-up" lures western rodeo champs; Escondido residents honored by special program.

SAN DIEGO UNION EXPOSITION EDITION

March 29, 1936

Section I

3:1-7. San Diego's 1936 Exposition is wonderland of new exhibits.

3:7-8. Exposition amusement show replete with thrilling shows, by Ruth Taunton – one-half mile of modernistic buildings surrounding a wide plaza of flowers; a bar and dining and dancing hall at "Days of '49" at north end; list and description of other attractions.

3:7-8. Santa Fe officials predict heavy travel to Exposition – James B. Duffy, assistant traffic manager, expressed satisfaction with the Santa Fe exhibit, an operating model of the entire system from Chicago to the coast with four trains in operation on the miniature tracks..

3:8. Exposition provides enlarged automobile parking areas – more space has been added along Park Boulevard; auto parks are operated by the Exposition this year under the management of Al Archard..

4:1. United States has big role to play at new Exposition – Congress has voted an appropriation of \$75,000 to continue the government's exhibits at the San Diego Fair; Federal Building; \$150,000 FHA home show in the Palace of Better Housing; 160th Infantry of the United States at Camp Derby; Camp San Diego, a CCC camp on the grounds; CCC exhibit in the Palace of Natural History.

4:1-2. San Diego Legionnaires plan days at Exposition – more than 30,000 Legionnaires are expected to throng the grounds on July 18 and 19.

4:3. National Housing Day at the Exposition set April 4.

4:4-5. Consolidated Aircraft Day set June 7.

5:3-4. Palace of International Art contains rare gems – a new door has been cut into the east arcade leading to the Plaza del Pacifico; entire building, except corner occupied by the International Drug Co, is devoted to art exhibits.

5:8. Churches have major role in new Exposition – Christian Science Monitor Building, Church of the Latter Day Saints Building..

6:1-2. Wild animal life well represented at San Diego's famous zoo, by Belle J. Benchley – animals are happy; new flying cage built.

6:8. New reptile house built at 1936 Fair – built in the form of a hollow square surrounded by an arcade along which the public walks and views the reptiles by looking through plate glass windows..

8:4. Lifelike replica of "Last Supper" new Exposition item – setting is 25 feet long, 25 feet wide and 10 feet high; conceived and executed by John Michael Schliesser; figures fashioned out of a special waxlike substance that can withstand heat of 180 degrees..

9:1. Southern Pacific Locomotive Number 1 is seen at Exposition – the "C. F. Huntington", made its first trip in April, 1864; on exhibition in the Palace of Transportation..

10:8. CCC exhibits attract many to 1936 Exposition.

10:8. Exposition visitors show interest in TVA exhibit.

Section II

1:1. Exposition becomes fairyland as lights go on.

1:1. Exposition Model Town is open daily.

1:8. Exhibits show great assets of California.

2:1-2. Many splendid collections offered at new Palace of Natural History, by Clinton G. Abbott – realism stressed; wild flowers shown, CCC featured; redwood tree section displayed.

4:1-2. Works of world-famed artists displayed in Palace of Fine Arts, by Reginald Poland – collections of American paintings and new children's room are features.

9:1-2. San Diego Museum at Exposition replete with items showing cultural development of the human race – the walls on the main floor carry great paintings of the rediscovered cities of Uxmal, Chichen Itza, Copan, Quirigua, Tikal and Palenque while the floors bear the replicas of towering monumental stelae.

9:3-4. Progress of man is depicted in San Diego Museum collections – Although the San Diego Museum has specialized in American archaeology and anthropology, and done this particularly in the southwestern, Mexican, Central American, and Pacific fields, a certain amount of variety and relief, and some opportunity for comparative studies have been achieved through exhibits showing phases of cultures of Japan, Ethiopia and Egypt. These include characteristic costumes, utensils and personal ornaments..

10:2-3. Christian Science exhibits shown in restful building.

10:5. Famous "strato" gondola shown in Palace of Transportation.

11:1. Dignified beauty marks exhibit by Mormon church.

11:2-4. Frank Dragan tells why man has signaled his progress by holding huge expositions.

11:5. Society women decorate Exposition's striking salons.

A rare example of the decorator's art is exemplified in the House of Hospitality which opened its doors on the opening day of the Exposition, February 12. This house, which does not belie its gracious name, again is the center of society gaiety under the direction of the Women's Executive Committee. Those who were received there last year find new arrangements of furniture and color harmonies to admire and truly a treat is in store for those who visit this ideal setting for semi-tropical entertaining for the first time.

Alice Klauber, art patron and artist in her own right, has designed the most striking of the new rooms, the Flamingo, a tete-a-tete lounge for women. Two wall hangings of _____ birds, executed by Esther Barney, give the room its name and color scheme. The hangings depict in a stylized pattern, a group of blood-pink flamingoes standing in an ochre sunshine with a background of sky blue.

Has Gold Motif

There are few changes in the spacious gold room, Sala de Oro. The decorative motif in this room is taken from a screen across which runs a luxurious vine and its blossom, the cup of gold.

Another screen by the same artist, Esther Barney, with its formalized pattern of the banana palm, catches the interest in the upstairs loggia, the ideal rendezvous for tea. The loggia is done in greens that are warmed with delicious touches of brown and accented with wine color, the same shade as the flower of the banana plant. The glassed-in loggia opens on a balcony that commands a secluded view of the park canyons to the south. Vivid bougainvillea clambering over the rail of the porch give immediate color.

Because the women of San Diego expect to inherit the House of Hospitality after Exposition days are over, the Women's Executive Committee was permitted to approve the decorating of the main dining room of Café del Rey Moro in the building proper.

Designs Enticing

Here Mrs. Barney and her crew of artist helpers, Malcolm McDowell, Christopher Hobbs and Daniel Dickey, have finished window panels which are treasures of tropical beauty. Again, the broad leaves of the banana palm are used for background against which are patterned colorful semi-tropical fruits. There is also a palm stencil which takes care of a niche in the west wall, and between the glass doors on the south stand three golden apple trees --- most enticing.

The gay patio which captures the sunshine and flowers _____ with a rare work of art, a fountain, "Aztec Woman with Olla," by Donal Hord, famous sculptor.

There is also a library, so attractive as to draw sightseers of a world's fair, and a kitchen that is as modern as electricity, but which in decoration actually achieves a patina.

Truly, no feminine visitor to the Exposition will want to miss the House of Hospitality.

12:1. Exposition presents only authentic nudist colony – scores of people in the nude are engaged in outdoor activity; Mayan temple to the right contains showers, baths and "dressing rooms" for the nudists; smaller temple on the hill within the grounds contains kitchen and dining rooms..

12:2-3. Exhibits in Palace of Better Housing tug at heart strings – In addition to the displays of the FHA, there are 19 other exhibits of private industry in the building; Marvelaire exhibit of air conditioning now being used in government office buildings in Washington, DC; Dixram shows pressure cookers; San Diego Consolidated Gas & Electric Co. shows the latest in conveniences; San Diego Fire Equipment Co. displays fire extinguishers; Pacific Clay Products shows pottery; lighting in the building by Otto K. Olesen..

12:2-3. Gigantic murals depict history of man's conquest of distance – occupying 17,000 sq. ft. of wall space in the Palace of Transportation; executed by Juan Larrinaga and a corps of assistants..

12:4. Café of the World popular place for Epicureans – investment of approximately \$100,000 on the part of its operators, J. S. Madill and Charles Davis; new appointments and entertainment plans for this year; lounge areas added; 14-piece orchestra of Paul Termine; Neely Edwards, master-of-ceremonies; floor shows; coffee shop in the west wing bordering on the Avenida de Palacios and the Plaza del Pacifico..

12:5. Federal Building at Exposition offers unique service – representatives of the department of commerce and representatives of other branches of the national government are on hand daily to assist those who wish to avail themselves of the services of these departments through direct contact here in San Diego..

Section III

1:1-2. Romantic glamour of new Exposition casts spell over visitors – 180,000 vari-colored pansies, 140,000 marigolds and 40,000 blue and red nemesias growing along walks, beneath small trees and surrounding pools; 550 plants in the cactus garden in back of the Palace of Education; 11,000 colored globes for outside display that cost \$100 an hour to operate or about \$500 each night; 10 men needed to operate the machinery; beacon with seven lights atop the Spreckels organ; rainbow fountain in the Palisades

1:2. Roads of Pacific to open June 1 – Ford V-8 cars will be available to take guests over reproductions of historic highways and trails without charge..

1:3-4. Exposition Water Palace presents spectacular talking diorama showing three of the world's greatest water supply systems, all serving a group of 13 cities in the Los Angeles area..

1:5-6. Hobby shows and Legion displays are featured in General Exhibits Building: life-size figures of Jesus with his 12 disciples at the "Last Supper"; scores of guns, each having a colorful history; Girl Scouts, Boy Scouts and Campfire Girls displays; Goodwill Industries exhibit; chapel sponsored by the Federated Church Brotherhood; American Legion display of war relics sponsored by Post No. 6; Gadget Town; Death Ray show.

1:7-8. March of Transportation vividly depicted at Exposition, varied exhibits tell how man first brought wheels to aid him in carrying his burdens, by Ruth Taunton – vintage autos displayed; carved wagon made in Spain in 1640; bicycles from four-seaters to the modern version; two ancient railroad engines..

2:1. Scientific items shown in strato flight on view.

2:3-5. New "streamlined" Shakespeare delights audiences at Old Globe Theater.

4:1-5. 1936 Exposition arranges many interesting public events.

4:7-8. Exposition cafes offer gay entertainment with widely varied programs.

5:1-3. Spanish Village enticingly new and beautiful.

6:3-4. Social history in making at House of Hospitality.

The House of Hospitality is the gathering place for cosmopolitan society at the Exposition. Social history is in the making there this season, as it was last.

It is fitting that functions honoring the elite of the world are set within its walls as the architecture, the furnishings and those in charge --- 23 of San Diego's most gracious hostesses --- exemplify the spirit of entertainment in the Southland.

The building originally was designed by Bertram Goodhue for the 1915-16 Exposition. At that time it was used for the Foreign Arts Exhibit. Mr. and Mrs. J. E. Gazvini of this city, who have charge of the International Arts Building, were awarded a gold medal at the close of the Exposition in 1916 for their magnificent display of foreign arts.

Women in Charge

When it was decided to restore the buildings in Balboa Park two years ago, the women of San Diego asked for one where they might have official parties for visiting celebrities.

It was with this in mind that Richard Requa remodeled the Foreign Arts Building. It was renamed the House of Hospitality and turned over to the Women's Executive Committee which, with the Exposition management, is in charge of activities there.

The building is to be turned over to the women of the city when the Fair closes.

The exterior of the House of Hospitality was patterned after a castle in Salamanca, Spain. Its Plateresque tower, which reflects a soft mauve tint when the lights are turned on each evening, is a fine example of Spanish-Renaissance architecture.

It was only the interior which came in for remodeling. Requa had the roof cut away in the center of the patio, which he designed after the one in the museum of Guadalajara, a real Spanish-Colonial feature. The statue of the Aztec Woman with Olla by the San Diego sculptor Donal Hord is an original touch, although the Mexican museum patio has a pool and also a well, hidden among the banana plants, as they are in the House of Hospitality.

Gold Room Spacious

The main rooms of the House of Hospitality are the spacious Sala de Oro, or gold room, where receptions are staged, the upstairs loggia, where tea is served, and the striking Flamingo Room, which takes its name from stylized panels of the birds, done by Esther Stevens Barney.

This artist has done two decorative screens, one of which features the banana palm with its magenta blossoms for the loggia, and another with the cup de oro vine and blossoms, which stand in the gold room. Mrs. Barney also did the window panels, the palm stencil and the orange trees, which decorate the Café del Rey Moro. This café is really a part of the House of Hospitality and will revert to the women after the Exposition closes.

Other features in this house of the gracious name, are the tea-time balcony with its gay tables and sunshades overlooking the busy Plaza on one side and a wooded park canyon on the other, the library, a cool retreat, and an auditorium where programs are staged daily.

6:3-4. Baby bank at Exposition is welcomed by mothers: It is the building occupied by the Pacific Pottery exhibit last year on Avenida de Espana, across from the Spanish Village. . . . A corps of nurses and teachers are in charge. . . . Children from two months up are accepted.

7:5. Palisades Café is chummy spot.

8:1. Music activities of second Exposition have wide scope.

10:1-2. Interesting scientific exhibit in Palace of Education sponsored by Cal Tech.

10:1. Exposition has new Palace of Entertainment.

10:2. Falstaff Tavern provides many English dishes.

10:3-4. The Future of the House of Pacific Relations, by Frank Drugan.

10:8. New playground for children is built at Exposition.

11:4. Various foods on display in Food and Beverage Building.

.
San Diego Union, March 29, 1936. Social History in Making at House of Hospitality

The House of Hospitality is the gathering place for cosmopolitan society at the Exposition. Social history is in the making there this season, as it was last.

It is fitting that functions honoring the elite of the world are set within its walls, as the architecture,, the furnishings and those in charge --- 25 of San Diego's most gracious hostesses --- exemplify the spirit of entertainment in the Southland.

The building originally was designed by Bertram Goodhue for the 1915-16 Exposition. At that time it was used for the Foreign Arts exhibit. Mr. and Mrs. J. E. Gazvini of this city, who have charge of the International Arts Building, were awarded a gold medal at the close of the Exposition in 1916 for their magnificent display of foreign arts.

Women in Charge

When it was decided to restore the buildings in Balboa Park two years ago, the women of San Diego asked for one where they might have official parties for visiting celebrities.

San Diego Sun, April 1, 1936, 1:3, 2:4. Rodeo clown here for Exposition; Homer Holcomb performs this week.

San Diego Union, April 1, 1936, 5:5. Russian display at Exposition attracts curious.

April 2, 1936. Program: Spanish Fiesta Night.

San Diego Sun, April 2, 1936, 1:3, 2:5. Range riders arriving for Exposition roundup; rodeo opens tomorrow with Broadway parade; 125 cowboys due.

April 3, 1936. Program: Frontier Day, Poultry Exhibition Day, International Rodeo Day.

San Diego Sun, April 3, 1936, 1:3, 11:1. Rodeo artists “let her buck!” at Exposition show; cowboy, cowgirl costume party fetes western riding experts.

San Diego Union, April 3, 1936, 1:3, 5:1. Stars of saddle to shine today at Exposition rodeo.

San Diego Union, April 3, 1936. City Attorney Thomas Whelan refuses action against “Darto” operator .

. . “The game is operated by the Exposition as a means of amusement and as a source of revenue to the Exposition. It is somewhat similar to games found at Amusement Centers throughout California.”

April 4, 1936. Program: Kids’ Rodeo Day, Poultry Exhibition Day, International Rodeo Day.

San Diego Sun, April 4, 1936, 1:3. Exposition lariat riding events renew today; whoops of opening day resound; youngsters stage shoot.

San Diego Union, April 4, 1936, 5:1. Exposition crowds thrill as cowboys show skill at rodeo.

April 5, 1936, Sunday. Program: Alaska-Yukon Day, Poultry Exhibition Day, International Rodeo Day, State Physical Education Day, Pacific Arts Association Day.

San Diego Sun, April 5, 1936, 1:2, A-2:6. Rodeo climax at Exposition today; Sally Rand to stage dances April 11.

San Diego Sun, April 5, 1936, B-6:5-6. Actress Irene Tedrow claims Globe players “one big family”..

San Diego Sun, April 5, 1936, C-8:6. A great photographic mural depicting highlights in the industrial drama of the Ford Rouge plant will form the central decorative display in the new Ford rotunda building at Dearborn, Michigan; rotunda is the central section of the Ford exposition building in Chicago in 1934.

San Diego Union, April 5, 1936, 1:6, 4:1. Our Own Exposition, by Forrest Warren.

San Diego Union, April 5, 1936, 13:2. Excellent library found in House of Hospitality, by Edna Woodhaus Snook.

Why a library in the receptions rooms of the House of Hospitality?

In compliance with the three-fold purpose of the Exposition, to emphasize beauty, education and culture, the Women’s Executive Committee, the official hostess, has arranged a suite of lovely rooms in which to welcome guests of the Exposition, the Sala de Oro (room of gold), and on the west balcony, the charming Mexican loggia, where tea is served Friday afternoons and on special occasions when honor guests are entertained.

Adjoining this are the lovely Flamingo Lounge, the library in restful green, and the pleasant open-air decks overlooking the gardened Plaza del Pacifico.

No one can cross Cabrillo bridge, drink in the beauty of Balboa Park, and linger amid the exquisite Spanish-Colonial architecture of the Exposition, without feeling “Cabrillo’s thanks that California first began to be,” and without longing to trace its varied story since that September day in 1542, when he and his scurvy-stricken crew found a safe shelter within “Loma’s protecting arm,” a story full of changing flags, tradition, romance and poetry, and the beginning of all the west.

It has ever been a magnet of writers, who are giving us a delightful and ever-increasing literature all our own.

It is this literature that is being assembled in the little library, truly inviting with its easy chairs and Reiffel landscapes, Baldaugh sunflowers, and Shoven zinnias adorning the walls.

The writer of this article, chairman of the library committee, is indebted to Miss Marjorie Kobler, efficient San Diego County librarian, for assembling the major portion of the collection, and for preparing a reference list of outstanding books on California, including history, romance, flora, and a wide range of interests. Copies are available to all interested. Miss Kobler and Miss Cornelia Plaister, city librarian, are also arranging an interesting Exposition day program for the Convention of the State Library Association to be held in San Diego the last week in April.

Many local writers also have contributed of their books, brochures and poems on San Diego and California themes.

Winifred Davidson, our own historian, has sent her "*Where California Began*" and scrapbooks of her "*Firsts*" and "*Place Names of California*" by her husband, John Davidson, director of the Serra Museum.

San Diego Sun, April 6, 1936, 1:4, 2:7. Rodeo return set for June; Sally Rand next on list of Exposition features.

San Diego Union, April 6, 1936, 5:1. 8,000 fans view closing program of Exposition's rodeo.

San Diego Union, April 6, 1936, 5:2-3. Fan dancers' grievances to be aired at Exposition.

San Diego Union, April 6, 1936, 5:3. Sally Rand due here Wednesday for Exposition shows.

San Diego Union, April 6, 1936, 5:8. Special Easter concert is set for Ford Bowl.

April 7, 1936. Program: Pacific Arts Association Day, Hemphill School of the Dance Day.

"Sally Rand to Appear on Glass Stage at Expo," Radio Talk, 7 April 1936, box 31, CPIE, 35-36, SDPL

San Diego Sun, April 7, 1936, 1:1, 2:4. No fans for Sally Rand's dance; Hammer Club turns down Harry L. Foster's proposal to present Miss Rand.

San Diego Sun, April 7, 1936, 1:3-5, 2:1-2. George Horace Lorimer, editor of Saturday Evening Post, lauds San Diego Exposition.

April 8, 1936. Program: Pacific Arts Association Day, Poultry Exhibition Day, Navy and Marine Day.

San Diego Union, April 8, 1936, 1:1-2. Police raid "Darto" game at Exposition; District Attorney Thomas Whelan says, "it's city matter".

San Diego Union, April 8, 1936, 3:3-4. Editorial in Saturday Evening Post praises beauties of San Diego's Exposition city.

San Diego Union, April 8, 1936, 5:1-3. Permanent park statue to mark Exposition's CCC camp.

"Sally Trained by Nation's Best," Radio Talk, 9 April 1936, box 31, CPIE, 35-36, Collection, SDPL

April 9, 1936. Program: "Exposition Bank Night," Bungalow Literary Society Day, Motion Picture Day, Spanish Fiesta Day, Poultry Exhibition Day, Kids' Week .

San Diego Herald, April 9, 1936, 1:4. Exposition conditions better; Sally Rand and other attractions prove Dailard's ability.

San Diego Herald, April 9, 1936, 2:2. The Exposition.

San Diego Herald, April 9, 1936, 2:4. Exposition plans Easter ceremonies.

San Diego Sun, April 9, 1936, 1:5, 2:6. Sally Rand frosts nudist queen; defies Police Chief Sears; dancer unafraid of police halting her show.

San Diego Union, April 9, 1936, 1:4-5, 2:8. Sally Rand due by plane at 10 a.m.; "Leda and the Swan" dance will be Exposition vehicle.

April 10, 1936. Program: Poultry Exhibition Day, Collegiate Day, Kids' Week.

San Diego Sun, April 10, 1936, 1:2-3, 2:4. Calles flies to San Diego after forced exile on Cardenas' orders.

San Diego Sun, April 10, 1936, 1:5, 2:7. Exposition awaits Sally Rand's dance; will she wear bubble?

San Diego Union, April 10, 1936, 1:6, 2:8. Sally Rand greeted at airport; "creations" to open at Palace of Entertainment tomorrow at 2 p.m.

San Diego Union, April 10, 1936, 6:1. Exposition will mark Better Housing Day tomorrow with a radio broadcast scheduled to originate at Model Town at 2:30 p.m.

April 11, 1936. Program: Poultry Exhibition Day, Federal Housing Day, Sally Rand Day, Karlsruhe Day, Oceanside Day, De Molay Day, Kids' Day.

San Diego Sun, April 11, 1936, 1:3-4, 2:5. Exiled Calles due here tonight on flight from Mexico..

San Diego Sun, April 11, 1936, 1:5. Visitors await Sally Rand's debut; fan dancer undecided about "costume"; track stars compete.

San Diego Sun, April 12, 1936, C-8:1. Veterans have been granted additional bedspace in the San Diego Naval Hospital effective April 1; heretofore there were available 10 beds for strictly emergency cases; 25 beds are now available.

San Diego Union, April 12, 1936, 1:3, 2:1. City seal 22 years old this week; insignia conceived by Carleton Winslow in contest set by Council; 1914 designer tells significance.

San Diego Union, April 12, 1936, 3:4. Sisters of Mercy Offer Tribute to Spreckels Memory

The Sisters of Mercy have placed in Mercy hospital a bronze tablet as a tribute to the late John D. Spreckels bearing a likeness of the benefactor with the inscription:

“In memory of John D. Spreckels whose magnanimous generosity made possible the erection of the south wing of Mercy hospital as a memorial to his wife Lillie Sieben Spreckels, 1928.”

The tablet was made by James Tank Porter, 8470 El Cajon ave., La Mesa. Critics say it has artistic merit. It is in the main corridor opposite the entrance.

The benefaction of Mr. Spreckels made possible the building of the south wing in 1928. The sisters say they feel a deep and lasting gratitude to Mr. Spreckels and that placing the tablet has afforded them genuine pleasure.

San Diego Union, April 12, 1936, 4:1. Dance glamour draws throngs to Sally Rand.

San Diego Union, April 12, 1936, 12:5. Model Town wins praises of FHA visitor.

San Diego Union, April 12, 1936, II, 4:1. Edison models displayed at Ford exhibit in Palace of Electricity.

“Extra Show Necessary for Sally at Expo,” Radio Talk, 13 April 1936, box 31, CPIE, Collection, SDPL

San Diego Sun, April 13, 1936, 1:5, 2:6. Calles turns to peaceful life in San Diego; relaxes in daughter’s home; wants to play golf.

San Diego Sun, April 13, 1936, 3:5. Bartenders in fete at Exposition.

San Diego Union, April 13, 1936, 5:4. Beauty contest, floor show to mark Exposition dance in Café of the World tonight.

San Diego Union, April 13, 1936, 5:4. Festive Easter spirit seen in Exposition programs.

San Diego Union, April 13, 1936, 5:6. Sally Rand gives double show as crowd overflows Palace of Entertainment.

San Diego Union, April 13, 1936, II, 1:2. Provisional company of the 30th Infantry has arrived at Camp Derby; beginning Friday snappy drills and band concerts will be regular parts of the Exposition programs.

April 14, 1936. Program: Safe Driving School Day.

San Diego Sun, April 14, 1936, 1:1, 2:4. 500,000 Exposition visitor awaited; attendance is soaring.

San Diego Sun, April 14, 1936, 1:7, 2:3. Agents from Mexico spy on Calles.

San Diego Union, April 14, 1936, 5:1.2. Gold Gulch is no more; ghost town in canyon is closed and tumbling to ruin.

April 15, 1936. Program: Navy and Marine Night, “California Hour” Contest.

San Diego Sun, April 15, 1936, 1:3. 500 Rotarians and wives on way to Exposition; Navy, Marines honored at dance tonight; Sally Rand lures crowds

San Diego Union, April 15, 1936, 5:3-4. Sally Rand show goes on despite Exposition cut plan: While the dancer was visiting her mother in Glendora Monday, the management decided that there would be only two fan and bubble dance performances daily instead of the announced four. To make a long story short, Miss Rand gave the four shows as had been announced in the press.

Letter, April 16, 1936, Don Thomas, Managing Director, The All-Year Club of Southern California, Ltd., Headquarters Bankers Building, 619 South Hill Street, Los Angeles, Calif. to Frank Belcher, President,

California-Pacific International Exposition, San Diego, Calif.; cc: G. Aubrey Davidson, Chairman of the Board.

Dear Mr. Belcher:

We have found from experience that a well-intentioned criticism of constructive nature is worth ten compliments. I always hesitate, however, to pass along any criticism, but appreciating your caliber, I know you would want it.

We encourage our people to visit places in this area unannounced, so that their reactions will be the typical reactions of the tourist. It is solely in a helpful spirit, therefore, that I am sending you a copy of a memorandum from our information Department.

(Sgd.) Don Thomas,
Managing Director.

MEMO, April 6, 1936, Ruthe A. Keene, Information Desk, to Don Thomas, Managing Director; Re: Visit to 1936 California-Pacific International Exposition, April 5th.

Since almost all the visitors who call at the office inquire in some detail about the 1936 Exposition, what they may expect to see there, etc., I thought it advisable to take a look for myself. I wanted particularly to see the lighting effects this year, as I understood they were the most important feature of the Fair.

We were unable to reach San Diego before 9:30 PM, owing to unpleasant weather conditions and some difficulty with our car. Upon checking in at the U. S. Grant we asked how late the lights were kept on and were informed that since it was Saturday night they would undoubtedly be left lighted until midnight. We drove out to the Fair, arriving about 10:30. We immediately took one of the sightseeing buses which is supposed to make a circle of the grounds, but before we got more than a few hundred feet the lights began to go out. The bus conductor told us it was the custom when there were very few visitors to turn the lights out shortly after the buildings closed, at 9:00 PM. We were naturally very much disappointed at not being able to see the grounds illuminated, and somewhat put out that they did not inform us at the gate, when we paid our 50 cents admission, that we would be unable to see anything when we got inside. (The midway, of course, was still lighted, and if there were any people on the grounds, they were apparently "taking in" the side shows, etc., there.

The bus conductor, who was very much upset about our disappointment, did his best to "sell" us on the Fair in general, and pointed out the many attractions which we might enjoy on Sunday, and implored us to stay until dark on Sunday so we could see the beautiful lighting. In leaving the grounds I talked for a few minutes to the young man taking tickets at the gate, suggesting that in the future they avert disappointment for visitors by advising them when it was too late to see anything. His enthusiasm was as great as that of the bus conductor, as he outlined the many things which we would see the next day, and the pleasure in store for us if we would remain for the evening.

Sunday morning, we returned to the Fair, and since the weather was much nicer than on the previous day, and a rodeo was scheduled for the afternoon, there were quite a number of visitors. We visited the Palace of Transportation (formerly the Ford Building) and found it contained some very interesting exhibits. We looked in at several of the other buildings, but there were very few changes from last year. None of the buildings were completely filled.

The flowers this year are even more luxuriant than last year, so that the grounds really are beautiful. My Aunt and Uncle, who had visited the Chicago Fair both in 1933 and 1934, commented on the beauty of the grounds, the attractiveness of the buildings and the general atmosphere of cleanliness and the lack of "commercialism." They found the prices for food and refreshment very much lower than in Chicago.

One thing we were particularly impressed with was the wholehearted enthusiasm of every employee of the Exposition with whom we came in contact --- they were all pleasant and courteous, and very much sold on the Fair.

The former midway has been cleaned up and presents a much improved appearance. Flowers have been planted along the walks, and the whole atmosphere of the amusement zone "toned up".

Everyone in San Diego with whom we talked about the Exposition, seemed to feel that it was a mistake to have opened it before May 1st. The weather has been unfavorable, and presumably the Palm Springs season has cut into whatever California travel might naturally be expected to have drifted that way.

For the first time in many months, the Tanner Company had no Saturday tour to San Diego, the unpleasant weather apparently having discouraged everyone.

(Transcript taken from Letter in Box Files on California-Pacific International Exposition kept by San Diego Public Library.)

April 16, 1936. Program – Rotary Day, Recorders' Night, Motion Picture Night.

San Diego Herald, April 16, 1936, 1:2-3. Sally Rand and fans make fans for Exposition's charms.

Readers of the Herald and citizens in general know that the 1936 Exposition has been strangled and suffocated almost to the point of death by Mayor Benbough and the City council.
The Herald announces in this issue the opening of Tin Pan Alley.

A jury in Judge Terry’s court declared “Darto” to be a game of skill.

Exposition management negotiating to bring to San Diego an English version of the Passion Play.

One of the greatest arrays of talent, spectacle and entertainment ever gathered has been recruited of this celebration which will last for one week.

Marissa Flores, beautiful Spanish dancer, has been named queen of the fiesta, and a score or more of outstanding entertainers will come to the Exposition as a supporting cast for Miss Flores.

One of the spectacular features will be Olsen & Johnson, kings of comedy, in their elaborate musical revue, “Anything Goes,” with 36 of the most beautiful girls in the west, a grand variety of specialty acts, gags, laughs, chatter and other mirth-provoking entertainment which will also present 50 supreme comic stars in the royal court of hilarity and song.

Announcement has been made by Wayne W. Dailard, executive manager of the Exposition, that the great Ken Maynard Diamond K Ranch Wild West Circus and Indian Congress will be brought to the San Diego’s world’s fair on June 5, 6 and 7 for a world premiere on the Exposition grounds.

Special invitations to attend anniversary week have been sent to scores of the nation’s outstanding celebrities.

Beginning Monday, June 1, the Exposition will begin operation on a seven-day-per-week basis.

San Diego Sun, May 29, 1936, II, 10:2. EDITORIAL: One Year Old. – Last year's Exposition was a success as a theatrical presentation. This year's phase of the Exposition is a success in every artistic sense and should prove to be far from a failure financially before it ends.

San Diego Union, May 29, 1936, 4:1. EDITORIAL: One Year's Profit.

Yesterday the Exposition completed 12 month's experience in publicizing the attraction of San Diego for tourists. That experience constitutes the most direct and permanent profit the community as a whole can draw from the undertaking. We have tried innumerable means of entertaining the millions of visitors that the Exposition has attracted. Some of the attractions were completely successful, some have failed. In this record --- if it is kept intact, without any forgetting of mistakes --- San Diego has all the materials for forming a practical and intelligent publicity policy. The decision recorded by hundreds of impartial judges is written plainly in the records of daily attendance. In addition to the statistical data, every San Diegan can quote the verdict of many individuals who came, saw the park and expressed their opinion. We would guess, for example, that 999 out of every thousand visitors have agreed that the Exposition was staged in a setting of unparalleled beauty.

This experience is worth more than the total cost of the Exposition --- if San Diego will take it as a guide for shaping future policy.

May 30, 1936. Program – Anniversary Week, Memorial Day, Kids' Day, Orange County Schools' Day, Sweetwater Union High School Day.

San Diego Sun, May 30, 1936, 1:2, 2:7. Hope is that holiday crowd will beat record; famed comedians headline weekend attractions.

300. Where did I see the four major causes of fatal accidents? (Hall of Medical Science)

(Copy of Questionnaire taken from Box 15 Folder 1, California-Pacific International Exposition, San Diego Public Library.)

June 1, 1936, Monday. Program – Anniversary Week, Lefors Boy Scouts.

Organ Amphitheater, 7:00 and 9:00 p.m. Olsen, Johnson and Company

House of Hospitality Auditorium, 8:15 p.m. Lefors, Tex., Boy Scouts program.

San Diego Sun, June 1, 1936, 3:2-3. Ken Maynard's "Wild West" invades Exposition grounds.

San Diego Union, June 1, 1936. Olsen, Johnson entertain Helping Hand youngsters; visitors at the Exposition today will include several hundred boys from Lefors, Texas.

San Diego Union, June 1, 1936. "Britain Old and Britain New" will be the subject of an illustrated lecture at the House of Hospitality tomorrow afternoon at 4:00.

June 2, 1936. Program – Anniversary Week, Lefors Boy Scouts Day.

San Diego Union, June 2, 1936, 2:1. The City Council announced yesterday that there will be no reduction in fire and police protection on the Exposition grounds in the near future.

June 3, 1936. Program – Anniversary Week, Sweetwater "Homemakers Day, Sweetwater Union Evening High School, "Modern Varieties".

San Diego Sun, June 3, 1936, 3:2-3. 2,500 Southland CCC boys to squelch "fire" at Exposition.

June 4, 1936. Program – Motion pictures, "Modern Varieties"

San Diego Herald, June 4, 1936, 1:4, 2:2. At The Exposition

Marked by increased attendance and with a great lineup of future attractions under contract, the California Pacific International Exposition this week opened its summer season, which promises to eclipse records set by the world's fair last year.

Coincident with its first anniversary on Friday, May 29, the Exposition opened on a seven-day basis. During the winter season, the world's fair was closed on Mondays. In the future exhibit palaces will be open from 10 a.m. until 10 p.m.

Olsen and Johnson, famous funsters of stage, radio and screen, supported by a cast of 50 people, just closed a five-day engagement in "Anything Happens." This production was given as a free attraction three times daily from May 28 to June 2.

Next big show scheduled is the Ken Maynard Wild West Circus and Indian Congress, the first old time wild west show to be seen in America in 23 years, which will be launched with a gala world premiere on the night of June 5. The Maynard show will be presented also on the following days, June 6 and 7, with Ken Maynard, film idol, appearing in person at every performance.

Cheyenne and Arapahoe Indians, cowboys and cowgirls, Russian Cossack daredevil horsemen, Mexican vaqueros, buffalo, camels, elephants, elk and other human and animal performers will mingle in a thrilling pageant of the last frontier. Highlights of the show include an Indian attack on a covered wagon train, burning of a frontier settlement, the Battle of the Wounded Knee and other spine-tingling episodes based on historical truth.

Numerous sensational outdoor acts will be presented to Exposition visitors simultaneously in different sections of the world's fair grounds during the week beginning June 8. These will include Tommy and his Wonder Pony; Frank Evers and Dolores, tight-wire walkers; South Sea Samoans; a bevy of luscious dancers and instrumentalists; and the famous Piccianni Troupe, whose latest engagement was with Ringling Brothers as headliners.

Rodeo stars from all over the United States, Canada and Mexico again will congregate at the world's fair here on June 26, 27 and 28 when the annual Lakeside Rodeo will be staged. Earlier in the season the Exposition sponsored the Frontier Days and International Rodeo, declared by veterans to be one of the finest rodeos ever presented at any time.

Most of the stars who took part in that successful show will return in June to participate in the Lakeside Rodeo, which is expected to pass the splendid record set by the first rodeo.

The policy of the Exposition management is to present a variety of attractions of all types, designed to appeal to varied preferences of all visitors.

As announced exclusively in the Herald last week, Tin Pan Alley --- a place where a gazabo can go and enjoy himself --- is now going full blast on the Midway, adjoining the Days of '49. Tin Pan Alley offers amusement and entertainment entirely different from anything else on the Midway. It is more like the notorious "Gold Gulch," where everybody went last year when in quest of a real good time. Visit the Den of Iniquity, see Flaming Fanny, Frisco Nell, Little Egypt and all the other Red Hot attractions. Listen to the Barkers --- then pay your dime and go inside --- you won't be disappointed.

San Diego Herald, June 4, 1936, 1:3. The Herald is pleased to announce that the Exposition management has decided to keep in force its policy of admitting all servicemen in uniform free to the Exposition. . . . However, the boys in blue, the visitors from out of town and our own local citizens would appreciate San Diego's 1936 Exposition a thousand-fold more, if the Exposition management would remove the flower beds from the Midway and put in their place some real live amusement games.

San Diego Union, June 4, 1936, 1:2, 2:5. Exposition attendance record forecast with Ken Maynard Wild West Show; the circus, designed to recreate the traditional Buffalo Bill type of show, is en route in 60 coaches from winter training quarters in Los Angeles.

June 5, 1936. Program -- Ken Maynard Circus Day, Congregational Churches Day, Civilian Conservation Corps Day.

San Diego Sun, June 5, , 1936:6-7, 2:5-6. Wild West show makes Exposition premiere tonight; Ken Maynard's riders cavort in buckskin finery at 8:30; Olsen and Johnson to return.

San Diego Union, June 5, 1936, 1:2, 17:1. 62 warships will enter port tomorrow; 40 planes will mass over Exposition; returning vessels due at dawn; to remain until June 29; commands to change; maneuvers over.

June 6, 1936. Program -- Ken Maynard Circus Day, Mutual Orange Distributors Association Day, Fleet Week, Kids' Day.

San Diego Sun, June 6, 1936, 1:8. San Diego fleet home; 15,000 men welcomed back; warships anchored; 400 planes thrill welcoming crowd.

San Diego Sun, June 6, 1936, 1:2, 2:7. 2,000 orphans Exposition's guests; Wild West show tops Exposition program.

San Diego Sun, June 6, 1936, II, 9:2. Texas opens its big Centennial show; expects 10 million guests.

San Diego Union, June 6, 1936, 2:2. Maynard Circus, Wild West acts win Exposition crowd.

San Diego Union, June 6, 1936, 10:1. 1,500 CCC youths stage anti-fire exhibit at Exposition.

June 7, 1936, Sunday. Program -- Norway Day, Fleet Week, Wisconsin Day, Ken Maynard Circus Day, San Diego Beneficial Society Day, San Diego Union Model Yacht Regatta Day.

San Diego Sun, June 7, 1936, A-2:1. Thousands throng Exposition at Dallas as Texas celebrates 100th birthday.

San Diego Sun, June 7, 1936, 1:3, A-2:4. Navy Week set at Exposition; Wild West to give final San Diego appearance.

San Diego Union, June 7, 1936, 11:1-4. Fiesta proceeds will aid in restoring Adobe Chapel at Old Town.

San Diego Union, June 7, 1936, II, 1:1-2, 2:3-4. Exposition girls find public more inquisitive this year, by Forrest Warren.

San Diego Union, June 7, 1936, II, 6:1. CCC men set up forest fire camp for 1,500 within an hour at Exposition.

June 8, 1936. Program – Fleet Week.

San Diego Sun, June 8, 1936, 1:4, 7:3. Exposition visitors total 967,598; Olsen and Johnson return to Exposition in new show.

San Diego Sun, June 8, 1936, 3:1-3. Queen Tanya thinks “it’s a picnic to be nudist”; approves of New York night clubs.

June 9, 1936. Program – Fleet Week, Spanish Fiesta Night, Old-Fashion Dance Night.

San Diego Sun, June 9, 1936, 1:1. “Dove dancer” Rosita Royce and troupe due at Exposition Monday.

San Diego Union, June 9, 1936, 5:1-3. Rosita Royce, new dove dancer, coming to Exposition.

San Diego Union, June 9, 1936, 5:4-5. If “Anything Happens” at Exposition tomorrow, its’ two comedians; Jose Arias and his Exposition troubadours will appear during the Spanish Fiesta with members of the Hemphill School of the Dance; Café of the World will open tomorrow night with dance maestro Philip Lopez..

San Diego Union, June 9, 1936, II, 2:4-5. The Chamber of Commerce in a letter to the City Council yesterday asked that steps be taken to place under U.S. Navy control 15 acres of park land between the Naval Hospital and the street car tracts through Balboa Park.

The Naval Hospital asked for use of the land some time ago as a recreation area for hospital convalescents. Since then the matter bogged down in legal difficulties surrounding the leasing or granting of park acreage to anyone for a long period of time.

June 10, 1936. Program – Fleet Week, Shut-in’s Day.

San Diego Sun, June 10, 1936, 3:1. Exposition attendance rising; cost of operating slashed 49 percent; Belcher optimistic in summary of 1936 season.

June 11, 1936. Program – Olsen and Johnson (return engagement), Herbert Hoover High School Commencement, Bungalow Literary Hostess Society Day, Motion Picture Day, Fleet Week.

San Diego Herald, June 11, 1936, 1:3-4. Exposition
Belcher’s remarks [that the San Diego Exposition is San Diego’s greatest asset for the next three months] were unusually timely and also unusually pertinent in that they came when we were being informed that the attendance at the Dallas Exposition is running some 35,000 or 40,000 a day, and this with the thermometer around 110. San Diego’s Fair is running far below these attendance figures and one of the reasons is an apathy which has descended upon residents here and from which they should arouse themselves.

San Diego Sun, June 11, 1936, 1:1, 2:8. Heavy trek to Exposition forecast; millionth visitor due today or tomorrow.

June 12, 1936. Program – Fleet Week, San Diego High School Commencement Day.

San Diego Sun, June 12, 1936, 1:7, 2:2. Graduation of Hoover High School seniors in Ford Bowl tonight; Olsen and Johnson lure 5,000 spectators.

San Diego Union, June 12, 1936, 2:1-2. New Englanders to meet at Exposition; program will be stage in the House of Hospitality auditorium at 4:00 p.m.

San Diego Union, June 12, 1936, 2:1-3. Rosita Royce due at Exposition; musical wedding at Organ Amphitheater tomorrow.

June 13, 1936. Program - Glendale Day, National Sojourners' Day.

San Diego Evening Tribune, June 13, 1936. Rosita Royce, dancer, tops Fiesta Week at Exposition; will appear three times daily today through Sunday June 21 in Palace of Entertainment and on the stage in the south lagoon of the Plaza del Pacifico.

San Diego Sun, June 13, 1936, 1:7, 2:5. Landon asked to visit Exposition; "Kansas Day" event planned; millionth guest feted.

San Diego Sun, June 13, 1936, II, 8:1. EDITORIAL: The Life of a Nudist.

June 14, 1936, Sunday. Program - Flag Day, Daughters of the American Revolution Day, Missouri Day, Spanish Fiesta Week, Ratliff Dancing Academy Day.

San Diego Sun, June 14, 1936, 1:1-2. Exposition to offer Ford symphony during summer; Bowl concerts to resume beginning July 10; dance pageant, highlight of Spanish Fiesta, starts today.

San Diego Sun, June 14, 1936, B-2:1. EDITORIAL: We Must Carry On After Exposition Ends; new booster club started by Joseph Dryer.

San Diego Union, June 14, 1936, 1:3, 2:1. Ford symphonies under stars to begin July 10; Exposition's "Spanish Fiesta Week" will open today; music, speakers on program for Missouri's fete; Flag Day Vespers, special retreat ceremonies, Herbert Hoover student dancers will entertain..

San Diego Union, June 14, 1936, II, 1:1. Edison phonograph on exhibit in Palace of Electricity.

San Diego Union, June 14, 1936, II, 1:8, 2:8. City to observe 86th birthday Wednesday.

June 15, 1936. Program - Spanish Fiesta Week, Kids' Day, Kids' Spanish Dance Contest, Rosita Royce.

San Diego Sun, June 15, 1936, 1:4, 2:3. Spanish Fiesta Week opens at Exposition; Rosita Royce, "dove dancer," headlines Exposition's entertainment.

June 16, 1936. Program - Spanish Fiesta Week, U. S. Camera Salon, Rosita Royce, Old-Fashioned Dance.

San Diego Sun, June 16, 1936, 1:7, 2:6. Record crowd at Exposition; 70,000 visit Exposition in week; "Dove Dancer" scores in premiere; Mardi Gras set for servicemen.

San Diego Sun, June 16, 1936, 4:4-6. Rosita Royce says Sally Rand filched Balloon Dance.

San Diego Union, June 16, 1936, 5:1-2. 200 photographs Agfa Ansco show at the Exposition for two weeks during tour of United States.

San Diego Union, June 16, 1936, 5:3-4. Dove dancer, Fiesta Week features on Exposition program.

San Diego Union, June 16, 1936, 5:3-4. Exposition may be hit if Council adopts proposed public place drinking ban.

June 17, 1936. Program - Spanish Fiesta Week, New England States Day, U. S. Camera Salon, Rosita Royce, Dana College A Cappella Choir, Navy and Marine Night.

San Diego Sun, June 17, 1936, 5:2. New England folk gather at Exposition; Dana College Choir offers program in House of Hospitality.

Letter, June 18, 1936, Mr. Sandusky to Mr. Bailey; SUBJECT: Negro Day.

I have personally checked with the following owners and operators of restaurants and bars on the grounds:

Charles Davis, of Madill & Davis, speaking for the Café of the World, Coffee Shop, Spanish Kitchen, and Casa del Rey Moro Café:

He will serve them where necessary without roping off, but will not solicit their business in any way and suggests that the middle of the week might be better, if it is necessary to have a Negro Day. He feels, as a result of last year, that the loss in white trade might not be offset by Colored trade. He has the figures on the special Negro bar that was built in the Gulch, which he says was not profitable.

Ted Allen, Barnyard Café:

He does not feel that it is worthwhile but will serve them and cooperate by abiding by the decision of the Management.

Willi Strobel, Bavarian Beer Garden:

He does not care and will take care of Negroes both in the bar and beer garden, but will endeavor to segregate them as far as possible without roping off of signs.

Les Steinberg, International Drug Store and Granada Café:

He is agreeable to abide by the decision of the Management and will serve them, but feels that it would be worthwhile only if a sufficient number of Negroes are brought in to offset the loss of White trade.

John Krutzler, Palisades Café:

He has nothing against Negroes and will serve them in the regular Café or provide a special room if advisable.

Mr. Quackenbush, '49 Camp:

Mrs. Murray, Globe, Ben Hur, and Cudahy, Foods Bldg.:

(Copy of letter in Box File 10 Folder 84, California-Pacific International Exposition, kept by San Diego Public Library.)

June 18, 1936. Program – Spanish Fiesta Week. U. S. Camera Salon, 30th Infantry U.S. Band, Rosita Royce.

San Diego Herald, June 18, 1936, 1:4, 3:3. The Exposition.

Air rifles and side arms are barred from the Exposition grounds during Rosita Royce's daring dance. The American Legion veterans are not coming for a Sunday school picnic, so let's give them what they want and see to it that they have such a grand and glorious time that San Diego will linger in their memory as the one bright spot in California.

San Diego Sun, June 18, 1936, 1:2, 2:3-4. San Francisco Symphony billed; "Gold Medal" orchestra schedules 14 concerts; North Dakota Day slated.

San Diego Union, June 18, 1936, 2:5. Fords to bring San Francisco Symphony for 14 concerts beginning August 11.

June 19, 1936. Program – Spanish Fiesta Week, U. S. Camera Salon, CCC Day, Rosita Royce.
San Diego Sun, June 19, 1936, 4:1. San Diego Symphony to open music series; 1,500 CCC boys storm Exposition; Spanish Fiesta Week ends tomorrow.

San Diego Sun, June 19, 1936, 6:1. Junior Chamber of Commerce to form Exposition booster staff; plan Speakers' Bureau to publicize San Diego's advantages.

San Diego Union, June 19, 1936, 4:1. EDITORIAL: San Diego in Person . . . regarding Spanish Fiesta.

San Diego Union, June 19, 1936, 5:4. New park roads designed to speed traffic; oiling of 11th Avenue canyon road will be completed next week; new road under construction from Upas Street west to a junction with Powder House Canyon Road.

San Diego Union, June 19, 1936, II, 1:1. San Diego Symphony to begin Exposition series July 10.

June 20, 1936. Program – Spanish Fiesta Week, Navy Mothers' Day, U. S. Camera Salon, North Dakota Day, Bell Telephone Employees' Day, Home for the Aged Day.

San Diego Sun, June 20, 1936, 2:2-3. German fighter Max Schmeling invited to be Exposition guest.

July 2, 1936. Program: Piccianni Troupe, South Sea Maidens, Eleanor Root.

San Diego Herald, July 2, 1936, 1:4, 3:3. Closed Town Injures Exposition.

San Diego's 1936 Exposition to date has proved a complete financial failure. From a standpoint of beauty it is more than a success, but beauty does not pay the bills. From the very start on Feb. 12, the Exposition has lacked the lure and attraction necessary to make it the success all loyal San Diegans had hoped it would be.

It is difficult to say just who is to blame for the conditions as they exist today. There can be no doubt but that the Exposition officials themselves are at least partly responsible. The executives fell down hard on the securing of the right kind of exhibits and their failure to make the **Midway** a real place of amusement should be charged at least partially to their lack of ability to visualize what the public want and expect in the way of amusements.

The Exposition officials first mistake was the hiring of advisor Davis at a salary of \$1,000 a month, payable in advance. Davis was in reality the one responsible for the changes in the **Midway** --- changes which killed it as a real amusement zone. Davis' whole thought was culture and flowers --- amusements meant nothing to him --- yet the amusement zone is the backbone of every exposition. Without a real amusement center,

which creates a carnival spirit, no exposition can be a financial success. Every exposition has to depend largely on its local people for its attendance, and these people will not go day after day, week after week, without there is provided for them the kind of amusements they desire.

Another and vital reason that the Exposition has been a financial failure has been the continual opposition of Mayor Benbough and his Civic Affairs Council toward the Exposition officials. The city administration has done everything possible to prevent the Exposition officials from making the Midway and the Exposition a real place of amusement. Every other Exposition ever held anywhere had what is termed by many as borderline games. These games provide a form of amusement which the vast majority of people enjoy and if allowed to operate on the Exposition grounds would attract thousands of people every week who do not now attend. Such games provide harmless amusement, but have been taboo by Mayor Benbough and his so-called Civic Affairs Council group. Due to the fact, it is alleged, that some of Mayor Benbough's political enemies are interested in certain concessions at the Exposition --- Hizzonor the Percy has prevented these games from operating, not only at the Exposition, but also at the beaches, where for many years past they always operated through the summer months.

. . . . Because of Benbough's opposition to these games, City Manager Flack has ordered all borderline games kept closed in San Diego.

San Diego is a seaport city, a tourist city, and again this year an Exposition city. That it has been made the tightest closed city on the Pacific coast is causing much comment. . . . Can it be that our city administration is keeping the lid clamped down tight so that the gambling ship Monte Carlo will get the benefit?

. . . . Tourists will not come in large numbers to a resort city that is known as a tightly closed city.

Not only is the Exposition operating at a loss of approximately \$2,000 a day, but the concessionaires have been taking huge losses ever since opening day and cannot continue to operate unless conditions change at once.

The fact was clearly demonstrated at a breakfast Wednesday morning at the **Casa del Rey Moro Café**. This breakfast was attended by about 250 concessionaires and Expo employees and as the breakfast was concluded, a letter was presented demanding a change in management and in conditions at the Expo and stating that unless these changes were immediately forthcoming many of the concessionaires would leave the Exposition.

San Diego Evening Tribune, July 2, 1936. Leis, nuts free at Exposition tomorrow when the Spirit of Hawaii will rule.

San Diego Sun, July 2, 1936, 1:3, 2:6. Spiritualists due at Exposition; South Sea maidens leave; Yugoslav Day set Sunday.

July 30, 1936. Program: Henry Ford Appreciation Day, San Diego Symphony Orchestra, Eastman Motion Picture Night, Wanda Allen and Ballet.

San Diego Herald, July 30, 1936, 1:4, 5:2. Exposition.

According to attendance figures issued by the San Diego Exposition for last week it proved the banner week of the Fair for the entire 1936 period. More than 100,000 persons passed through the gates.

These figures, however, are a little misleading in that they include employees, concessionaires and attendants, but the fact still remains that the increase in the Fair has been actual and gratifying.

The reasons for this high total of admissions are patent. There were the Philharmonic Orchestra, the Mexican Government's Tipica Band, the Coronado Horse Show and the giving away of a Ford automobile. The fact of the value of these attractions having been established by the best meter of all --- the turnstiles --- the thing that the Exposition must do from now on, as the Herald sees it and as common sense dictates, is to keep this kind of entertainment going in Balboa Park. Entertainment and amusement are what visitors to the Fair, either local or foreign, look for, and if they do not find them, they will not go back.

As every reader of the Herald knows, this paper has stood consistently for the success of the Fair. It has pleaded for support for the Exposition from San Diegans, it has supported the officials of the Fair in every effort they made to better the big show in the park. It has never ceased in its commendation of their attitude toward the important job they are running and it has preached the doctrine of cooperation between them and the people as a whole.

At the same time we have not forgotten that a great many of the difficulties came from His Honor the Percy, the mayor and the city hall majority --- the inglorious quartet composed of Wansley, Wurfel, Stannard and Siebert. In all this the Herald believes it has taken and held the right position for the good of the town as well as the good of the Fair.

One or two disturbing things, however, have come to the attention of the Herald recently. One is a series of persistent rumors of petty grafting and chiseling by certain Exposition officials --- the whole making a loss of some very appreciable amount. There is only one time to eliminate an ulcer of this kind from any enterprise --- and that time is right now and the means must be drastic.

The second disturbing factor is that the amusement and entertainment features of the Fair have been conducted on the same lines as the Fox West Coast Theaters trot their stuff. But what is good for a theater may not be good for an Exposition --- no matter how intriguing it may seem to Fox officials who have been transplanted to the Expo. This factor of inadequate and unattractive entertainment has been made worse, too, by reports of tie-ups between certain Exposition officials and the Fanchon-Marco producing company and of the double-crossing of certain concessionaires by these same officials. These reports and rumors are exactly like Abraham Lincoln's rat-hole --- they will bear looking into and the quicker the better.

With the exception of the Al G. Barnes circus, all the numerous attractions which have been brought to the Exposition have proved failures from the financial standpoint. Every one has been a losing venture. The reason for this has again been two-fold --- the first being that the attractions were not attractive and the second that they cost too much.

The Herald is positive that in some cases at least the price paid by the Exposition for attractions had been double their worth, and this mulcting of the Exposition has been made possible because of bookings made through the Fanchon & Marco company,

If this is the case, then the connection between the West Coast Theaters and Fanchon-Marco is properly a matter of investigation by those who as citizens are responsible for the right conduct of our biggest enterprise. Why are so many West Coast Theater employees on the payroll as coordinators and such? Why does the Expo give the impression of drifting again into the hands of some favored clique?

Last year the Herald opened a fight against the Farmer-Larsen-Tupper combination and finally ousted them -- and it will be remembered that from the day of their departure the Exposition started to thrive. The present clique appears now to be even worse than the combination of last year. The Farmer-Larsen-Tupper crowd at least had ability and the knack of getting results. Now we are of the opinion that our previous estimates of Wayne Dailard, West Coast Theater manager, who is holding the post of executive manager, have been too high, or, if this is erroneous, that he is taking devious ways to advance himself personally at the expense not only of the local Exposition, but of his own standing here. This paradox is explained by the word that Dailard is looking forward to becoming director general of San Francisco's 1938 Exposition --- and then the explanation is knocked into a cocked hat by the thought that Dailard is crazy if he believes that San Francisco will take him on the kind of record he is making in San Diego.

If Dailard wants to go to San Francisco, his best passport will be a successful wind-up of San Diego's Exposition --- AND HE CAN'T DENY THAT!

The important thing for the Exposition now and until the end is increased attendance. Without this concessionaires must fade out --- they have held on as long as it was humanly possible for them to do so.

The answer seems to be Special Days, such as the City Employees' Day scheduled for Saturday. This day will start a parade of 100 units, a quartet of military bands, floats and a display of old and new equipment used by various city departments. The parade will start from the foot of Broadway at 1:30 o'clock in the afternoon and will go on Broadway east to Sixth Avenue, thence north to Laurel Street and into the Exposition by way of the west gate.

A horse-shoe pitching contest and a pistol shoot for police will be features of the day. City employees will gather at 6 o'clock in the evening in the **House of Hospitality** for dinner, which will be followed by entertainment at the organ amphitheater from 7:30 to 9:30 o'clock. Dancing will follow in the **Palace of Entertainment**.

San Diego Sun, July 30, 1936, 1:3, 2:3. Dixie melodies to honor Henry Ford; program tonight celebrates his 73rd birthday.

San Diego Sun, July 30, 1936, 3:1. City blamed for delay in Mission Bay park project.

August 18, 1936, Minutes of Regular Meeting of Directors of California-Pacific International Co., 3:30 p.m.,
House of Hospitality, Balboa Park, San Diego, California

The regular meeting of the Directors of California-Pacific International Exposition Company, a non-profit California corporation, was held in the House of Hospitality in Balboa Park, in the City of San Diego, California, on Tuesday, the 18th day of August, 1936, at three-thirty o'clock p.m. There were present and acting at said meeting the following, constituting a quorum:

F. L. Annable	Roy E. Hegg
Elwood T. Bailey	Hal G. Hotchkiss
Frank G. Belcher	Emil Klicka
Harry Callaway	T. C. Macaulay
Armistead B. Carter	P. F. O'Rourke
G. Aubrey Davidson	George F. Otto
Frank Drugan	Sam Porter
Joseph E. Dryer	W. F. Raber
John Lawrence Fox	Jerry Sullivan, Jr.
Samuel I. Fox	A. K. Whyte
W. B. Frisbie	Walter C. Wurfel
Edgar F. Hastings	

The Chairman, Mr. G. Aubrey Davidson, presided.

The minutes of the previous meeting were read and approved.

The President, Mr. Belcher, reported on meetings of the Executive Committee held since the last meeting of the Board of Directors, as follows:

August 4, 1936. --- It was unanimously voted to approve revisions made in resolution concerning W. P. A. project proposal. Sponsor's Proposal Number 93, and resolution concerning W. P. A. project proposal, Sponsor's Proposal Number 92, originally approved at the meeting of the Executive Committee on July 21 and later revised at special meeting of the Executive Committee under date of August 3. A motion made at the Executive Committee meeting under date of July 30 concerning transfer of small "Modeltown" houses was amended to indicate that the property had no salvage value. The Executive Manager submitted budget for the month of August in the amount of \$72,872.44. Following discussion about appropriating approximately \$7,500.00 for a two-week's ice-skating feature, followed also by inquiries concerning accounts receivable and subscriptions receivable, the budget was unanimously approved. The treasurer read a list of subscriptions unpaid. It was unanimously voted to invite Mr. C. D. Collom, of the Merchants Central Credit Association, to confer with the Treasurer concerning efforts to collect exhibit and concession amounts. It was unanimously voted that a letter from the Executive Committee, signed by the President, be sent to the Clearing House Association concerning unpaid subscriptions. Following discussion concerning Gazvini's proposal to settle his \$8,000.00 indebtedness by payments of \$100.00 a week for six weeks, it was unanimously voted to take legal action to obtain a more satisfactory settlement. The Executive Manager submitted proposal for "Democratic Day: and it was unanimously voted to authorize the Management to enter into a satisfactory arrangement for the celebration of "Democratic Day." It was the sentiment of the Executive Committee that in the event of a successful experience with "Democratic Day," there might also be a "Republican Day," on a similar basis. It was unanimously voted that the Exposition close on September 9, 1936. The President submitted a report from the Executive Manager concerning suggestions to be offered to the City Management regarding demolition and re-landscaping, which was unanimously approved.

Upon motion duly made by Mr. Klicka, seconded by Mr. Callaway and unanimously carried, the following resolution was adopted: RESOLVED that the acts and proceedings of the Executive Committee as reported by the President, and the acts of the officers of the corporation in furtherance thereof, be and the same hereby are fully approves, ratified and confirmed.

The Treasurer, Mr. Klicka, submitted his report, as follows:

Upon motion duly made by Mr. Callaway, seconded by Mr. Annable, and unanimously carried, the report of the Treasurer was approved.

*This includes \$5,000 which should come from U.S. Army and \$4,000 settlement with Madill and Davis.

**Figures unreadable in source document.

Mr. O'Rourke arose to offer the opinion that the Exposition Corporation has not been legally justified in impounding with the City funds in which subscribers owned an interest. Mr. O'Rourke suggested requesting legal opinions from the Corporation's attorney and the City Attorney on this point. Mr. Hotchkiss explained to Mr. O'Rourke that the funds had been impounded not by the Corporation, but by the City in accordance with conditions of the ordinance. The President, Mr. Belcher, explained the conditions of the ordinance in detail, and informed Mr. O'Rourke concerning efforts being made for the approval of the W. P. A. project applicable to Park rehabilitation, although the City Manager had expressed some doubt about the availability of W. P. A. labor.

The President submitted and asked approval of the Board for the following operating and demolition procedure:

1. That the Exposition maintain full control of gates and grounds until September 15th. That during this period, office and small equipment be assembled in the Better Housing Building. That valuable salvage, tools, supplies and rolling equipment be assembled in the service yard. That this equipment be re-inventoried and placed under guard.
2. That on September 15th the grounds and maintenance be turned over to the City for its cooperation with the Exposition Management in the control and protection of property. That this procedure should continue until October 9th to provide a 30-day period to concessionaires and exhibitors for demolition. That as fast as buildings are stripped of exhibits, they be turned over to the City.
3. That gates be closed to the public until October 9th.
4. That the Exposition immediately salvage all buildings not to be retained as permanent Park improvements. That the Exposition immediately salvage such equipment whose sale is necessary to raise adequate funds to pay outstanding bills.
5. That all employees be notified concerning the termination of their services on September 9th.
6. That a skeleton staff be provided to carry on and complete demolition after September 9th at an expense not in excess of \$10,000.00, between September 9th and October 1st.

Mr. Fred Annable arose to request on behalf of the Zoo that the Fire Gate and the barrier on Alameda Street be removed as quickly as possible. The President, Mr. Belcher, explained that these barriers were needed to prevent debtor exhibitors from moving out their assets.

Upon motion duly made by Mr. Sam Fox, seconded by Mr. Roy Hegg, it was unanimously voted to ratify the proposed general plan of operation procedure and demolition procedure between this date and October 9th, as submitted by the Management.

Mr. George F. Otto arose to express the opinion that although the Park Board functioned in an advisory capacity to the City Management concerning the Park, the City Management had established an additional advisory committee for the same purpose. The President, Mr. Belcher, explained that the Exposition was not responsible for the appointment of the advisory committee referred to by Mr. Otto and further explained that the Exposition was able only to make suggestions.

The Chairman of the Board, Mr. Davidson, expressed the opinion that the City Management would confer with the Park Board in respect to Park rehabilitation. Mr. O'Rourke added that if the Park Board were not to function in an advisory capacity it might most fairly be discharged and its substitute Board of Committee formally ratified.

Major Macaulay submitted a letter from the Whittier Chamber of Commerce concerning ticket redemptions and the letter was referred to the Executive Committee.

Mr. Hastings commented upon the possibility of rowdyism on the last day of the Exposition and urged extra protection of the grounds for that time.

There being no further business, the meeting adjourned.

Frank Drugan, Executive Secretary

August 18, 1936. Program: Training Station Band, Ice Skating Carnival, San Francisco Symphony.

San Diego Sun, August 18, 1936, 1:6, 2:8. Exposition crowds smash records; free attractions lure throngs today.

San Diego Union, August 18, 1936, 10:6. \$130,000 needed to restore park: WPA help sought.

San Diego Sun, August 26, 1936, 1:5, 2:8. Exposition prepares for air week; starts last fortnight with loaded calendar.

San Diego Union, August 26, 1936, 5:1. Admiral William D. Leahy predicts expansion of San Diego's naval facilities; pays tribute to city at Exposition.

San Diego Union, August 26, 1936, 8:1-5. **Court of Honor** reception for Admiral Leahy.

August 27, 1936. Program: Motion Picture.

San Diego Herald, August 27, 1936, 1:2-4. Exposition mismanagement faces Exposition with \$30,000 deficit.

The story of our 1936 Exposition is one of gross mismanagement, lies, deceit and double-crossing. . . . When the gates were opened to the public, the Exposition was not completed --- many of the exhibits were not in place and several of the buildings were not open. . . . Weeks passed and still the Exposition did not develop into what the public expected of it. . . . Among Wayne Dailard's first acts was the discharge of employees, many of whom were San Diego citizens, and replacing them with outside men who had been in the employ of Fox West Coast Theaters. . . . He [Dailard] would book special attractions for the Exposition through Fanchon-Marco, who were directly connected with Fox West Coast Theaters as booking agents. . . . One of the outstanding fizzles as an attraction to the Exposition was the wrestling matches held at the Athletic Field. . . . With the closing date less than two weeks away the Exposition is in the red in the neighborhood of \$30,000.

San Diego Sun, August 27, 1936, 1:7, 2:1. **Nudist colony** closes; manager in row with Exposition over funds.

San Diego Union, August 27, 1936, 2:2. Dr. J. S. Smetanka, Czech delegate, says goodwill aided by Exposition.

August 28, 1936. Program: Navy Massed Plane Flight, Motion Picture, Appreciation Surprise Party.

San Diego Sun, August 28, 1936, 1:3. Aviation Week opens at Exposition; 2-day flower show starts tomorrow.

San Diego Sun, August 28, 1936, 3:5. City to speed clean-up of Exposition grounds.

San Diego Union, August 28, 1936, 1:1-2, 2:7. 326 Navy planes will fly in two reviews over city today.

San Diego Union, August 28, 1936, 1:3, 2:5-6. Park revamping program of thirteen points asked; City Manager Flack in accord with advisory group; will adopt some of the plans at once.

August 29, 1936. Program: Kiwanis Day, American Red Cross Day, Hemphill School of the Dance Day, San Francisco and Redwood Empire Day, Hollywood Baby Orchestra, Motion Pictures, Old Tipica Pueblo Orchestra.

San Diego Sun, August 29, 1936, 1:5-6, 2:4-5. Music headlines Exposition; Red Cross feted; Rabbi Magnin to speak; Mayor Rossi, San Francisco Fair chiefs head visiting northern delegation.

San Diego Sun, August 29, 1936, 1:4, 2:8. Exposition workers will remain; "double check" due for rehabilitation work; 22 units at Exposition doomed to construction.

San Diego Union, August 29, 1936, 1:1-4, 2:5-6. Auditorium planned in park; **Federal Building** is proposed for civic use; to seat 3,000; auto space around the **Ford Bowl** in tentative idea; architect Louis

Bodmer's conception of converted U.S. structure; possibility of connecting the Palisades area with the Eleventh Avenue canyon road being studied.

San Diego Union, August 29, 1936, 1:5, 2:3. Service planes roar salute in flight over Exposition; 325 Navy, Marine craft take part in maneuvers opening Aviation Week, by Ed Swanson.

San Diego Union, August 29, 1936, 1:7-8, 3:2.. Leaders plan to retain **House of Pacific Relations**.

San Diego Union, August 29, 1936. Peace meeting at **House of Pacific Relations** yesterday ended by war planes.

San Diego Union, August 29, 1936, 1:1-4, 2:5-6. Auditorium planned in park; **Federal Building** is proposed for civic use; to seat 3,000; auto space around the **Ford Bowl** in tentative idea; architect Louis Bodmer's conception of converted U.S. structure; possibility of connecting the Palisades area with the Eleventh Avenue canyon road studied.

San Diego Union, August 29, 1936. Long Beach Women's Symphony Orchestra to play two Exposition concerts at fans' demand.

August 30, 1936, Sunday.. Program: Padres Day, Illinois Day, Sigma Phi Gamma Day, San Diego Beneficial Society Day, Long Beach Women's Symphony Orchestra, Old Pueblo Tipica Orchestra, Motion Pictures.

San Diego Sun, August 30, 1936, 1:1. A-2:5. Exposition rushes toward close; Tucson Orchestra returns; 10 days remain.

San Diego Sun, August 30, 1936, B-2:1. EDITORIAL: Keep It Cultural.

San Diego Sun, August 30, 1936, B-10:1. J. H. Kershaw, structural engineer, Harbor Department, says turn **Ford Building** into an auditorium.

San Diego Union, August 30, 1936, 1:5, 15:4. Eleven more days left for visits; seven millionth person expected to enter Exposition this week; many gala events lead to show's climax.

San Diego Union, August 30, 1936, 1:7, 2:2. Restoring park to begin September 11; to take 30 days.

August 31, 1936. Program: Kids' Day, Kids' Glider Contest, San Diego Waiters and Bartenders Day, Meglin Kiddies Dance Revue, Old Pueblo Tipica Orchestra, National Aviation Week.

San Diego Sun, August 31, 1936, 1:6, 2:6. Tray carriers frolic; waiters, bartenders play; Tipica band slated.

San Diego Union, August 31, 1936, 1:3-4, 5:1. 200 True Vow couples attended mass wedding at the **Organ Amphitheater** yesterday.

San Diego Union, August 31, 1936, 4:1. EDITORIAL: 20 Years After.

San Diego Union, August 31, 1936, 5:6-7. Puddles, baby hippo arrived at **Zoo** Saturday.

San Diego Union, August 31, 1936, 6:6. Exposition **Model Town** seen as impetus to United States building.

September 1, 1936, Tuesday. Program: Training Station Band, Old Pueblo Tipica Orchestra.

San Diego Sun, September 1, 1936, 1:1, 2:6. Exposition awaits 7 millionth visitor Independent Merchants set party tomorrow; old Mexico reflected on grounds today as the Pueblo Tipica Orchestra; Chiquita, Exposition songbird, featured soloist supported by 16 señoritas in a Spanish ballet; barbecue in old "Gold Gulch" at 7 p.m. for local merchants; surprise party on athletic field at 10 p.m.

San Diego Sun, September 1, 1936, 2:1. Late last week the **nudists** dressed and walked out following a tiff with Exposition officials; fire department put out rubbish fire in Zoro Gardens today.

San Diego Union, September 1, 1936, 1:3, 2:8. \$100,000 exhibit plan of **American Legion** in park building; General Grant's sword included in relics to be displayed as **War Memorial** opens; **Legion** operated structure from 1923 until start of Exposition; veterans group had spent more than \$38,000 for structural repairs and improvements to building; war relics now housed in **General Exhibits Building**.

San Diego Union, September 1, 1936, 1:6, 2:5. Two women officials here from Washington, DC to inspect CCC Exposition display.

San Diego Union, September 1, 1936, 3:4. Merchants' Day planned tomorrow; Tucson's Old Pueblo Tipica Orchestra headlines program today and tomorrow; Naval Training Station band will play retreat concert at Organ Amphitheater today followed by retreat ceremony in Plaza del Pacifico.

September 2, 1936. Program: California County Assessors' Day, City and County Independent Merchants' Day, National Aviation Week, Army, Navy and Marine Day, Marine Band, Old Pueblo Tipica Orchestra.

San Diego Sun, September 2, 1936, 2:2-4. San Diego home for "Puddles" now; giant Hippo bored with early morning interview.

San Diego Sun, September 2, 1936, 3:1. Exposition prepares welcome for Ruth Chatterton, All-Derby Flyers; San Diego merchants feted; actress paces contestants winging toward coast; surprise party scheduled for visitors this evening.

San Diego Union, September 2, 1936, 1:1-2, 2:3. Only week left to see Exposition; charming farewell fete at Exposition tomorrow.

San Diego Union, September 2, 1936, II, 1:1. Plan calls for conversion of **Ford Building** into a civic auditorium; Manager calls meeting Friday to discuss move; Ralph O. Haywood, member of local theatrical family, says **Federal Building** is inadequate; Haywood was one of the engineers involved in construction of **Ford Building**; exterior of building would be changed; silo effect of present abbreviated tower would be softened; roof over patio-auditorium could be developed into a dome to harmonize with **California Building**; "with the stage on the basement level of the Ford Building, there is ample room for dressing rooms and storage as well as a place to drive trucks in to unload scenery and equipment."

San Diego Union, September 2, 1936, II, 1:4.. 48 State flags here for Exposition's closing pageant; celebration sponsored by Native Sons of Golden West.

San Diego Union, September 2, 1936, II, 1:5. Violet Mossberg, 18, millionth guest visits CCC camp, museum at Exposition.

San Diego Union, September 2, 1936. Story of Redwood will be Exposition feature in **House of Hospitality**.

San Diego Union, September 6, 1936, Building, 2:1. Flower borders at Exposition leave lasting memory, by Senorita Jarinera.

September 7, 1936. Program: Kids' Day, Art Mart Day, Meglin Kiddies' Day.

San Diego Sun, September 7, 1936, 1:4-6, 2:1-2. All-day Farewell Party slated for Exposition.

San Diego Sun, September 7, 1936, 1:5, 2:2-3. Youngsters reign over Exposition today; parade slated; dance revue scheduled; dolls given away.

San Diego Sun, September 7, 1936, II, 9:3-4. Colorful rose exhibits entered in Balboa Park annual rose show.

San Diego Union, September 7, 1936, 1:2-4, 3:8. Record crowd expected at Exposition today; elaborate plans mapped for closing; six-mile parade to enter grounds Wednesday; farewell party at **Ford Bowl**.

San Diego Union, September 7, 1936, 1:7, 2:4. Holiday throng visits San Diego; crowd at Exposition.

San Diego Union, September 7, 1936, II, 1:4-5. Admission Day background found in San Diego history, by E. T. Austin.

September 8, 1936. Program: Merkley's Musical Maids' Day, Alpha Sigma Lambda Fraternity Day, Daughters of American Revolution Day.

San Diego Sun, September 8, 1936, 1:6-7, 2:5-6. Exposition to die tomorrow in pomp and pageantry; sound of taps to dim lights, hide Father Time at midnight; closing exercises in plaza, by Richard Pourade.

San Diego Union, September 8, 1936, 1:6, 2:7-8. Exposition lights will fade tomorrow night as bugler plays Taps from high perch; leaves of huge book will close in symbolic pageant; parade, concerts, talks.

San Diego Union, September 8, 1936, II, 1:2-3. Final appearance of "International Revue" starring Chiquita at **Organ Amphitheater** tonight.

History of San Diego County, ed. Carl H. Heilbron, San Diego: San Diego Press Club, 1936, 412-419.

THE CALIFORNIA PACIFIC INTERNATIONAL EXPOSITION
BY FRANK B. BELCHER, PRESIDENT

The Panama-California Exposition held in 1915 and 1916 was San Diego's first endeavor to make itself known to the world; and indeed it was an effort well rewarded. The growth of the community in the twenty years which followed this activity, and particularly during the immediate post-war period, is sufficient proof of this statement. The growing interest on the part of the United States Navy in the development of San Diego's splendid natural harbor, and the increase in ships and naval forces stationed here, also date from the earlier Exposition period.

Some fishing, packing, and other industrial activities augmented the major assets of San Diego --- climate, hospitality, and comfort --- until the collapse of real estate values took place in 1926. From that point on the Navy was the savior of San Diego. Property values disappeared and the moderate incomes, which a large portion of the population drew from the mortgages and rents on mid-western farm properties from whence they had originally come dwindled to the vanishing point. It wasn't long until the "Navy Payroll" became the backbone of the town.

Then, late in 1933, Frank Drugan, former associate of the Scripps-Howard newspaper group, having recently visited the great Century of Progress Exposition in Chicago, proposed to San Diego that it take advantage of the glorious natural beauties of Balboa Park and hold a new Exposition. The civiv move for the

renovation of many of the old buildings left from the 1915 Fair had gained much popular favor, and the Century of Progress was making people Exposition conscious. But the idea at first drew little interest or support. San Diegans were too concerned with their own personal problems to consider or even to listen to such a proposal. But Drugan was persistent and, after becoming acquainted with the rare beauties of Balboa Park, adamant.

Eventually he gained the ear and interest of the Board of Directors of the Chamber of Commerce. Committees were appointed --- one to study possibilities, ways and means; another, later, to study finances. Records of the Expositions of 1915 and 1916 were resurrected and studied. Various business leaders of the city were approached on the matter of subscribing funds toward the financing of the undertaking. In April, 1934, at an informal meeting of some twenty or twenty-five business leaders, pledges were sought toward an initial underwriting, predicated upon that underwriting reaching a minimum of \$500,000, and further predicated upon the ability of the organization to obtain the most competent management available for the enterprise. Zack J. Farmer, the Managing Director of the Olympic Games in Los Angeles in 1932, had been invited to San Diego to look over Balboa Park and its buildings and to advise upon the matter. At the meeting here referred to, Mr. Farmer reported his conviction that the plan was feasible, but that it would require a tremendous amount of work and a highly efficient selling organization in order to get the job done in a creditable fashion. Upon the basis of his report nearly \$200,000 of the amount to be raised was tentatively pledged.

Shortly after the meeting the Ways and Means Committee and the Finance Committee, previously appointed by the Chamber of Commerce, were welded into one and became the Organization Committee for the Exposition. This committee met regularly each week, then moved toward not only the setting up of a fund raising campaign but also toward a permanent corporate entity for the Exposition.

On July 20 the first real "trial balloon" of the Organization Committee was set free to determine the feeling of the community toward the enterprise, and at a dinner held at the U. S. Grant Hotel on that date, attended by approximately 300 representative business men of San Diego city and county, signed pledges were received in the amount of \$300,000 toward the \$500,000 underwriting, and furthermore every man in attendance pledged himself to work personally in the fund raising campaign.

O. W. Cotton was chosen by the Organization Committee to direct this fund raising campaign and with sixty days his workers had put the fund over the top by more than a \$200,000 margin, with a total of pledges of nearly \$710,000.

A Board of Directors was named and proceeded to elect an Executive Committee consisting of seven members of the Board. The Executive Committee employed Mr. Farmer as Advisory Counsel and J. David Larson as Executive Manager, and proceeded with the actual organization of the Exposition management.

On September 20, just sixty days after the launching of our Exposition ship, we set out on our maiden voyage with all sails set. During the eight hectic months following it was felt more than once by many that we had undertaken a task far over our heads. In January it appeared that our promotional and selling efforts would have to be redoubled, and at the same time Mr. Farmer was induced to take full command of the management of the enterprise, and to direct it. As the time grew closer to the planned opening date of the Exposition, the very audacity of the undertaking made itself more and more apparent.

The Exposition expended, exclusive of all Federal or State funds, approximately \$1,233,000. The money was spent in the building of the Exposition, and represented revenue from the sale of space to exhibitors and concessionaires, from the advance sale of tickets, and from the funds originally subscribed. We were highly fortunate, of course, in being able to obtain money from the State Emergency Relief Administration for many permanent improvements in Balboa Park, which have enhanced the beauty as well as the practical use of the park for the Exposition and for the future. A considerable sum of relief money had already been expended prior to the actual taking over of this area of the park by the Exposition company, and it is safe to say that a sum in excess of one million dollars was distributed to people on the relief rolls of this community through these agencies and projects.

The total investment by exhibitors was approximately \$5,670,000; and the investment of concessionaires was approximately \$3,637,300. Other investments brought the grand total to \$10,540,000, which is surely imposing when one considers what we started with.

The opening ceremonies of the California Pacific International Exposition on the night of May 29, 1935, will never be forgotten by anyone who attended. The dedication of its significance by President Franklin D. Roosevelt, whose voice came from the White House and was broadcast throughout the grounds, will always be remembered for the simplicity and the poignancy of the ideal which he expressed. He said that the Exposition did not look backward to commemoration of the Past, but, on the contrary, was in celebration of the beginning of a new era and a great future for the West and the Pacific. The President called upon two children, representing future generations, to act for him in throwing the great switches for the illumination of the buildings and grounds of America's Exposition. This was the climaxing thrill to the thousands who stood in all parts of the Exposition in silent attention to the impressive ceremony.

During the one hundred and thirty-seven days that followed and until the closing of the Exposition on Armistice Night, November 11, over five million visitors entered the gates.

San Diego had advertised herself to the world, and, indeed, she became must that.

At the opening of the Exposition there were present, as personal representatives of the President of the United States, the Secretary of Commerce, the Hon. Daniel C. Roper, and the Under Secretary of State, the Hon. William L. Phillips. The Governor of California, the Hon. Frank F. Merriam, likewise attended, as did numerous other dignitaries and high officials. This was but a beginning in the important and fascinating official and social life of the Exposition. From that day on, through both seasons, we were privileged to welcome and to entertain literally hundreds of men and women of national and international fame --- ambassadors, cabinet members, senators, and congressmen, diplomats, captains of industry and finance, from far and near, high military and naval officers of many nations, journalists, artists and musicians, motion picture stars, and famed representatives of many professions.

Twice during the 1935 season we were favored with visits from former President Herbert Hoover. Twice the entire Pacific Fleet of the Navy came to our port. But the outstanding event was on October 2, 1935, when the President of the United States, Franklin D. Roosevelt and Mrs. Roosevelt, First Lady of the Land, together with a large party of cabinet and other administrative officials came here as guests of the city and the Exposition. The party visited the various military and naval stations in San Diego, and was welcomed to the Exposition by thousands of civilians and service men in ranks, and by hundreds of young girls, representative of the thirty-three foreign nations participating in the Exposition, all in native costumes. Later the President received a thundering ovation from more than 50,000 people who early packed the Municipal Stadium to await the stirring address of the nation's administrative leader.

When the short life for the Exposition drew to a close, merchants and civic organizations of all other cities in the state, begged San Diego to "carry on for another year." It had been a highly strenuous season. The management, which, under the terrific stress and strain of the activity, had been changed about more than once, looked back upon their experience and, with natural inclination, said "No!" The Executive Committee and officers felt much the same way. But others situated farther from the immediate picture, and whose counsel was considered highly important, said, "Yes, you must carry on!"

The majority vote was not to be denied, and therefore, between November 11, 1935 and February 12, 1936, a herculean task was accomplished --- renovating, changing, rebuilding, and making, in fact, an entirely new Exposition.

However we were able to retain the fine Federal building with its splendid exhibits, the California State building, the Standard Oil building, and others, intact. The great Ford exhibit palace became the March of Transportation building. The Travel and Transportation building was converted to General Exhibits. A Hall of Medical Science was created, and many new exhibitors were eventually found to take the place vacated by those who did not return.

Never to be forgotten by visitors of either year were the glorious and colorful flower beds, the planting and landscaping of the grounds, which by day invariably impressed one with their Eden-like beauty. At night under the most remarkable system of colored and indirect illumination ever created, the entire grounds were transformed into a fairyland of enchantment and beauty. Tall eucalyptus trees were painted with soft and ever changing colors. Lights from hidden sources bathed the shrubs, buildings, portals, and towers with much the same glowing effect that Maxfield Parrish achieves in his paintings. The natural beauties of Balboa Park, of course, had much to do with this feature. And the careful cultivations of its trees and shrubbery, its general landscaping during the twenty year period following the first successful Expositions of 1915 and 1916 provided the real foundation and background for the ingenious artistry of modern lighting methods. There is little doubt that this feature of both the 1935 and 1936 Expositions was the most talked of by our visitors, and that it will go down in history as the most outstanding.

On February 12, 1936, our new Exposition was opened. Up to this date the weather had been very favorable, and on the morning of the 12th all was in readiness for the elaborate opening ceremonies which it had been planned. At the very hour when the program was to begin the heavy clouds which had swiftly gathered overhead during the afternoon loosed a torrent of rain, sending thousands in hurried search for shelter, and literally ruining our well laid plans for a triumphant reopening. For the ensuing ninety days frequent rains and cold weather became our major problem and worry.

Early in March, 1936, Philip Gildred, who had been Executive Manager of the Exposition since August of the previous years, asked to be retired, and Wayne W. Dailiard was appointed in his place. At that time important changes were made in the policy of the Exposition management, and it was planned to give our visitors not only an unusual type of Exposition but to supplement the exhibits, amusement, and concessions already in operation with free entertainment of such a character as would be bound to draw to the grounds the largest number of people. Accordingly, circuses, rodeos, vaudeville entertainment, ballets, and other types of shows were booked and presented at different points on the grounds almost continuously until the closing day of September 9. The wisdom of adopting such a policy immediately made itself evident in the increase of our gross receipts.

At midnight, September 9, 1936, the California Pacific International Exposition was officially closed. The last Retreat Formation of our own Provisional Company of the 30th Infantry was held on the Plaza, and the Stars and Stripes were slowly lowered to the accompaniment of our national anthem for the last times on these grounds.

The ultimate benefits and results of our Exposition may not be greatly appreciated by San Diegans for some years to come, but even at the present time we definitely know that in certain respects the enterprise was not only justified but highly successful.

The attendance of more than seven million people at the Exposition in 1935 and 1936 was in itself a most noteworthy accomplishment, especially when such factors as the size of our community, its geographical location, its housing and hotel facilities, and other such factors are thoroughly taken into consideration. The almost immediate increase in business activity in San Diego at the opening of the Exposition construction period was sustained to the very end of the second season.

The January 1, 1936 issue of "San Diego Business" reported that during 1935 the value of building permits increased more than 125% over 1934. Bond debits were 35% higher than in 1934; our foreign commerce went up 17%; our freight carloadings 10%. It is estimated that the city and county population increased during the year by 5%. New telephone, gas meter, and electric meter installations showed an increase of over 10%, while water meters, school enrollment and postal receipts showed substantial increases. Automobile sales in San Diego increased 71% during 1935 while factory employment, manufactured products, and manufacturing payrolls increased 47%, 80%, and 94% respectively.

There certainly can be no question that America's Exposition in 1935 very definitely accomplished this particular part of its purpose, for, although in no way can it claim entire credit for all of the increase in

business activity here indicated, nevertheless, a certain large proportion of this increase must be attributed to the Exposition enterprise.

OFFICERS AND DIRECTORS OF THE CALIFORNIA PACIFIC INTERNATIONAL EXPOSITION 1935-1936

G. Aubrey Davidson	Chairman of the Board
Frank G. Belcher	President
George Burnham	Vice-President
Joseph E. Dryer	Vice-President
John F. Forward, Jr.	Vice-President
John Lawrence Fox	Vice-President
Samuel I. Fox	Vice-President
Hal G. Hotchkiss	Vice-President
Julius Wangenheim	Vice-President
G. H. Whitney	Vice-President
Elwood T. Bailey	Executive Vice-President
Roy E. Hegg	Secretary
Frank Drugan	Assistant Secretary
Emil Klicka	Treasurer
P. B. Eckhart	Assistant Treasurer
Wayne W. Daillard	Executive Manager

DIRECTORS

Walter Ames	P. J. Benbough	Harry E. Callaway
Fred L. Annable	Edward Bernard	Armistead B. Carter
Elwood T. Bailey	Donald C. Burnham	Walter M. Casey
Frank G. Belcher	George Burnham	Oscar W. Cotton
G. Aubrey Davidson	Arthur E. Holloway	Sam S. Porter
Frank Drugan	John T. Holt	W. F. Raber
Joseph E. Dryer	Hal G. Hotchkiss	Albert E. Scott
R. W. Flack	Ralph E. Jenney	J. W. Sefton, jr.
Ed Fletcher	Emil Klicka	R. I. Scollin
Frank G. Forward	Allen H. Houser	Jerry Sullivan, Jr.
John F. Forward, Jr.	Fred M. Lockwood	W. L. Van Schaick
John Lawrence Fox	Baron Long	Julius Wangenheim
Samuel I. Fox	T. C. Macauley	Lane D. Webber
W. B. Frisbie	S. E. Mason	Harry M. Wegeforth
W. B. George	Albert V. Mayhofer	G. H. Whitney
Philip L. Gildred	David M. Millan	A. K. Whyte
Edgar F. Hastings	P. F. O'Rourke	Walter C. Wurfel
Roy E. Hegg	George F. Otto	Douglas Young

San Diego Sun, September 10, 1936, C-2:1. EDITORIAL (from *Los Angeles Times*, September 9): Well Done, San Diego!

San Diego Union, September 10, 1936, 1:8, 3:2. Big parade feature of final day; throng silent as notes of Taps echo over grounds; retreat climaxes events; two new Fairs planned.

San Diego Union, September 10, 1936, 2:5-6. Wild celebration climaxes last day of Exposition; bargain prices rule.

Carnival reigned carefree on the Midway and through the thronged Exposition streets last night where today is sprawled the wreckage of flimsy buildings and cascaded piles of refuse.

Thousands of persons were packed so close as to move as a slowly flowing human river, the last of the millions to see the beauties of the Exposition at night, the rainbow of light bathing cold stone with pulsing color.

Three hours before midnight when the lights were to fade for the last time, the debacle started. Its first sign was a player piano, used for the last year in a **Midway** burlesque show, pushed outside near the stage and close to the crowd with the sign, "For Sale, Cheap."

Sweep Shelves Clean

The scale of prices slid swiftly downward as the shopholders and concessionaires sought to sweep their shelves clean.

Hands eagerly slapped coins on the counter for the postcards, the advertisements and the letter openings bearing the Exposition seal.

In the afternoon, parents took their children for a last happy round of all the ferris wheels, rides for life, merry-go-rounds, miniature automobile and train rides and the loop-the-loop plane.

Without stint, the youngsters gorged on hot dogs, popcorn and pop, the things that taste so good and go with the fun.

Observers noted in the evening the parents returning to the Exposition grounds, the children safely at home. By 2 p.m. the booths and concessions in the palaces of food and beverages and other educational displays had been reduced by 20 percent.

At nearly the buyer's own price and without much haggling, at 10 p.m. one might obtain pottery, jewelry, linens and souvenirs, many carrying the guarantee, "Good for Life."

Shysters attempted to deceive the weighing experts. One man was caught with a horseshoe in his pocket. Others loaded themselves with fishing weights and lead to put the odds in their favor.

Buses Cut Time

Two mounted patrolmen were forced to move their horses with extreme care through the park, avoiding trampling down the careless and the merry-makers.

Buses running at frequent intervals previously adopted slower schedules. The drivers could not win with a quick passage through the dense crowd of pedestrians.

Forty-five minutes was the average time required to purchase the plebeian hot dog at open-air stands. Seats were at a premium and were abandoned for standing room, one and all, at the carnival side shows.

Fortunate was the seatholder. Most were forced to be content to watch and to walk until the closing ceremonies at the **Organ Amphitheater**. Then everyone knew San Diego's Exposition was part of the city's history.

San Diego Union, September 10, 1936, 2:7-8. Bust is unveiled honoring Frank Drugan Exposition leadership; plans being pushed to perpetuate **House of Pacific Relations**.

San Diego Union, September 10, 1936, 9:3-4. 301 couples sign True Vow Keepers' Gold Book; Exposition enrollment ends.

San Diego Union, September 10, 1936, 10:2-3. Exposition brought \$30 million to City; Tourists from 32 nations booked; 377 days of operation; 2 million visitors estimated to have seen exhibits in **Palace of Education** and in **Standard Oil National Parks Tower**; 2,331,974 visitors to **California State Building**; more than 1 million visitors at **Palace of Natural History**; 850,000 at **Palace of Fine Arts**; approximately 500,000 rode over **Roads of Pacific**; 184,000 during 46 concerts in the **Ford Bowl**; 520,000 at **San Diego Zoo**; more than 7 million attended Exposition. .

San Diego Union, September 10, 1936. Exposition objectives attained; gains huge, says Belcher.

Frank G. Belcher, Exposition president, yesterday issued the following statement:

All good times must end.

So tonight at midnight eve we will write finis to the California Pacific International Exposition, which has for two seasons transformed Balboa Park into a fairyland of beauty. We invited the world to visit San Diego when we opened these gates on May 29, 1935. Since that time more than 7,000,000 persons from all over the world have eagerly accepted our invitation. They have roamed these grounds and perhaps learned a little more about man's progress during the four centuries since Cabrillo sailed his high-sterned galleons into San Diego Bay.

Almost two years ago, a group of courageous San Diego men and women with vision and foresight overwhelmingly subscribed the money to launch this ambitious project. They did this at a time when our nation was in the throes of the most serious depression of its 158 years

At that time we has two main objectives:

To share with the world the unequaled beauty of San Diego and a vow to leave a lasting memorial in this park for the generations to come.

That we have accomplished the first objective is proved by our records which disclose that in addition to many of the world's celebrities, tourists have flocked here from the four corners of the world to view and enjoy this spectacle. One register shows that people have come from every state and territory and 32 foreign nations.

The benefit of this Exposition to the city will become increasingly evident as time passes. That was the case with the 1915-16 Fair. People who have seen this beauty spot with its jewel-like setting beside the blue Pacific, will close out their accounts elsewhere and move here to live permanently.

The second objective also has been attained. The permanent improvements made by this Exposition will be worth millions to the city of San Diego, and would have required generations to build.

Then the Exposition has accomplished a third important thing, which is as great as the other two noted. This is the spirit of civic cooperation which has been brought about through the staging of this great enterprise. Factions have put aside differences and all have become friends in the mutual accomplishment of this task.

It would be ungrateful, indeed, if I did not pay tribute to three unselfish groups who have done much to make this international fair a success. I refer to the loyal subscribers who gave willingly at a time when caution and fear were national by-words; the splendid board of directors and the various committees who gave of their time, and the group of workers who toiled seven days a week without a single murmur of complaint. To these people I pay special tribute.

Last, but not least, it is my desire to thank the thousands of San Diegans who have so loyally supported the Exposition and helped to make it the outstanding success that it has been.

New York Times, September 11, 1936, 28:5. San Diego's biggest show drew 7,220,000 persons. . . . The farewell party last night was attended by 62,000.

San Diego Union, September 11, 1936, 1:7-8, 2:8. City to get control of park September 15, sightseers barred.

San Diego Union, September 11, 1936, II, 1:1. City is expected to get park **Federal Building**; grounds at Exposition cleared rapidly after ceremony.

San Diego Union, September 11, 1936, III, 3:7. Police praised for Exposition work.

SAN DIEGO EXPOSITIONS

by

H. K. Raymenton

Date unknown.

In 1909, it became evident that the Panama Canal would be completed in six years. This ditch connecting the oceans could not fail to benefit the ports of the American Pacific Coast, and two California cities conceived the idea of celebrating the opening of the Canal and attracting visitors and potential citizens to them by holding expositions. One was San Francisco, with the most important port. The other was San Diego, the port of first call.

It required much courage on the part of San Diego to consider such a venture at that time. San Francisco had a population of over half a million and was prosperous. San Diego's population was less than 35,000, and it was not a prosperous city. However, it hoped to increase its population and to become prosperous. An exposition seemed to be the best means to accomplish these ends.

There had been many expositions prior to these, both in Europe and America, and a sort of standard existed for them. Their buildings, in general, represented architects' dreams of what buildings should be or could be, as, as they were evanescent, of lath and plaster construction, the architects could exercise their imaginations to the limit. San Francisco's exposition, the Panama-Pacific, conformed to the standard, and was grandiose and magnificent.

San Diego's exposition, the Panama-California, could have conformed but its sponsors wisely decided to depart from the standard and to stress the Hispanic background of the region by its buildings. The designing of them was entrusted to one architect, rather than a group, Bertram G. Goodhue, of New York. His plan was to represent, as far as possible, an idealized city of Latin America, incorporating architectural styles prevalent there during the period from the 16th to the 18th century. These styles, variously called Churrigueresque, Plateresque, Baroque, and known generically as Spanish-Colonial, are characterized by plain walls, with elaborate decoration largely concentrated on the portals and window frames.

The site chosen for the projected exposition was City Park, a vast area of 1400 acres of mesas and canyons, in the heart of San Diego. As a park it had existed for forty years but was only partially developed. For an exposition its topography presented many difficulties, but the largest level space, a mesa bounded by canyons, was selected and intensive work of landscaping was begun. Thousands of trees and bushes were planted, many of them in soil so hard that it had to be blasted with dynamite. An intricate system of irrigation has to be installed to assure the life of the vegetation in this semi-arid region. The name of the park was then changed to Balboa Park, to honor the discoverer of the Pacific.

The most formidable obstacle to the mesa's access was a deep canyon to the west of it. Nothing daunted, the exposition's builders threw a bridge across it, a majestic structure of seven arches, 137 feet high and a quarter of a mile in length. It is still there --- the Cabrillo Bridge. Laurel Street was continued to the entrance gate of the exposition, and across the mesa to Park Boulevard. This was the main thoroughfare, then and now called El Prado. On it faced the principal buildings, on it an on the Plaza de Panama, which crossed it at its mid-point.

The Panama-California Exposition was not a great world's fair, as was the Panama-Pacific Exposition in San Francisco. Few foreign countries participated, their places being taken by states and by California counties. It was a regional and cultural exposition, designed to extol the beauty, romantic history and superior qualities

of California, especially Southern California, and, specifically San Diego. Its purpose, as already stated, was to promote the city as an important port and to attract new citizens and new industries. Its first goal was never fully realized, but its second was. Many who came as visitors were so charmed that they made their homes here. Two visitors were Josephus Daniels, Secretary of the Navy, and his assistant, Franklin Delano Roosevelt. They were so impressed with the natural advantages of San Diego's harbor that they determined to make it a major naval base, thus giving rise to one of the city's chief industries.

The one that set the tone for the rest of the Exposition's buildings was the California Building, a large domed structure, flanked by a lofty tower. This has become San Diego's "trademark", as the Eiffel Tower is that of Paris, itself the relic of an exposition. Unlike most of the other state buildings, this was not filled with examples of California's agricultural and industrial products. Instead it was given over to exhibits of archaeology, anthropology and ethnology. Under the direction of Dr. Ales Hrdlicka of the Smithsonian Institution, scientists searched the world for material. An expedition went to Central America and made casts of some of the great stelae and monuments of Guatemala. These, and other things, were combined to produce the first display depicting the Mayan culture ever attempted, and still remains the best.

The California Building was designed to suggest a large church in the Spanish-Colonial style. Facing it, the City of San Diego erected a building in the Mexican style. In it was housed a noteworthy collection of the works of contemporary American artists, and later, a collection of paintings lent by the French Government. It was San Diego's first art gallery. The two buildings were of solid construction and were the only ones intended to be permanent. They are now the Museum of Man.

Another feature of the Exposition was a small menagerie. After the close of the Exposition a group of interested citizens arranged to retain the specimens, add to them, and acquire a portion of the Park to display them. Over the years this small collection of animals expanded, and is now the world-famous San Diego Zoo.

Having visited both Expositions, it is natural that I should be tempted to compare them. Actually they were so different that they cannot be compared, nor did they compete. One complemented the other. San Francisco's exposition was magnificent and impressive. San Diego's exposition was exquisite and intimate. It was not so large as to be overpowering, and a visitor did not have to exhaust himself trying to see it all. For those who were easily exhausted, there were electrically propelled beach chairs. Its buildings had a homogeneity and beauty not found in other expositions.

Much was made of the natural features of the site, and, as it was destined to become a permanent park, great attention was given to the landscaping. The Exposition developed the central portion and produced the beauty of that area as we know it today. Then, of course, the trees were smaller and did not mask the buildings, as some of them now do.

The chief charm of the Exposition lay in its airiness and the appearance of solidity of its buildings. Even then it was planned to make use of them for future museums and to make of Balboa park a cultural and recreational center. Most delightful of all were the gardens, tucked away in unexpected corners, and the visitor was constantly discovering some new spot of enchantment. Costumed musicians strolled about, playing. In the Plaza de Panama were hundreds of pigeons, bred on the grounds, reminiscent of the Piazza di San Marco of Venice. From the Plaza there stretched away the Esplanada, at the end of which was the newly-installed outdoor organ. The blue waters of the Pacific, seen through the colonnade which formed the wings of its pavilion, was an entrancing picture, a picture now blocked off by that architectural disaster, the Ford Building.

Not all the gardens were small. There was a model farm of five acres, so attractive that it made even the most confirmed of city dwellers long for the land. There was a plantation where an attempt was made to grow tea, not very successfully.

As I have said, the general tone of the Exposition was more cultural than that of most expositions. Days were set apart for the honoring of California artists and writers. There were lectures, notably by George

Wharton James, on the history of the region. There were concerts, both instrumental and choral, and, of course, many organ recitals.

Even the amusement zone, known as the Isthmus, was educational. There was the Painted Desert, an exhibit illustrating the life of the Indians of the Southwest, with accurate reproductions of pueblos, estufas, hogans and cliff-dwellings, all occupied by real Zunis, Hopis, Apaches and Navajos.

There was the '49 Camp, complete with gamblers and dance-hall girls. These were not actors and actresses playing the parts. They were authentic. I visited the '49 Camp with an old sourdough who had known some of them in the Yukon in the Gold Rush days.

Another Isthmus attraction was the War of the Worlds, a spectacular performance depicting the destruction of New York in the year 2000 by super-bombs. The destroyers were men from China, become a great world power, allied with Negroes from African republics. In 1915 that seemed fantastic. It would seem less fantastic today.

The original intention was to hold the Exposition for only the year of 1915, but it proved so successful that it was continued for a second year. After its close the question arose as to the disposition of the buildings. Following the usual procedure they would have been razed, but the San Diegans were so proud of them, especially those lining El Prado, that they opposed their removal. For a brief period, after America's entry into World War I, they were used as a temporary Naval Training Station until a permanent station was constructed, thus anticipating by twenty-four years a much longer occupancy by the Navy in World War II. During the ensuing years heroic efforts were made to preserve them. Termite-infested beams were replaced and crumbling stucco was repaired. Some buildings were demolished, some put to other uses, and some were replaced with permanent structures, the handsome Sacramento Building, for example, by the present Art Gallery.

In 1935 a second exposition was held, known as the California-Pacific Exposition. Again this required courage as the country was just emerging from the depth of the Depression, but again it was hoped that such a venture would aid the community. The Century of Progress in Chicago had closed, and it was thought that some of its exhibits could be moved to San Diego.

The buildings left over from the first exposition were utilized and, thanks to their restoration, were adequate for the purpose, although beginning to show their age. New buildings were erected, but they, especially those to the south of the Organ Pavilion, in the Palisades Area, were of undistinguished design, quite different from those of the Panama-California Exposition. The only new ones that harmonized were those of the Spanish Village group. The designers of the second exposition, however, had one advantage not enjoyed by those of the first. During the intervening two decades electrical technology had advanced, and striking effects could be obtained by skillful floodlighting.

The tone of the second exposition was different also. It did not have the intimacy of the first. Except for an orchestra subsidized by an automobile manufacturer and a stock company presenting mangled Shakespeare, most of the former cultural features were lacking. The tree museums and the Zoo, of course, were there, but they would have offered the same attractions without an exposition.

Every exposition should leave behind at least one permanent buildings. The first one left the magnificent California Building, now a museum. The heritage of the second exposition was the Federal Building, in a pseudo-Mayan style, for which no use has ever been found except as an annex to the Municipal Gymnasium. It also left the Balboa Park Bowl, often inaccurately called the Ford Bowl, which has proved to be a valuable asset.

After the close of the exposition, many of the temporary buildings were removed, but those of the Palisades Area, those of the Spanish Village, the Globe Theater and those of the House of Pacific Relations were retained. These supposedly temporary buildings are still standing after more than twenty-five years, as the supposedly temporary buildings of the first exposition are still standing after nearly fifty years. This speaks volumes for the mildness of the climate of Southern California.

Possibly I have been unfair to the Exposition of 1935 and 1936, but to many of us who knew the Exposition of 1915 and 1916, the second one was like warmed-over toast or a re-lit cigar. But the in 1935 we were all twenty years older.

San Diego Sun, September 12, 1936, 1:1. Exposition winds up “in black”; may pay “dividends”; repayment to 3,700 backers contingent on City’s need for park rehabilitation.

San Diego Union, September 12, 1936, 2:5. Hollywood gets 1500-units mobile lighting effects utilized at Exposition; owned by Otto K. Olesen; 28,000 kilowatts used in floodlighting the park with 40 2000-watt sunspots in the California Tower alone.

San Diego Union, September 12, 1936, 4:3-4. Waiting for the park to reopen? Plenty to see meanwhile, by E. T. Austin.

San Diego Sun, September 13, 1936, A-3:1. Wrecking crews speed Exposition cleanup work; **Midway**, once gay, now strewn with debris.

San Diego Union, September 13, 1936, 1:7-8, 10:1. Salvage rushed at Exposition; may open before October 9.

So rapidly is reconstruction work going on in Balboa Park that there seems little doubt that the public again will be enjoying the beautiful grounds well before October 9, the last day set for all exhibitors to have their property off the grounds.

At present, however, one has to show cause and be passed on by the supreme powers in charge of clearing the park of Exposition materials, before gaining admission through the closely guarded gates. To leave the park is almost as difficult. It is like crossing an international border. One declares that his name is what he say it is and his car is searched. Like a city that is temporarily closed to business, the ex-Exposition is being protected against vandalism and theft.

Inside the park there is a sense of exciting change taking place, making ready for the gala day when once more San Diegans may walk boldly into their magnificent recreation center without either first paying toll or pulling strings. With all due homage to the Exposition – that is going to be a great day.

Gardens to Remain

Walking through the grounds yesterday, a representative of *The Union*, whose beat was the park in pre-Exposition days, was impressed by the increased loveliness of the gardens.

Wherever made necessary by the removal of temporary fair structures, landscaping is going on apace. The Palisades area, uninteresting before there was the incentive of the Exposition, is now a thing of joy. Some of the buildings in that area are to come out, but not the beautiful gardens.

The new permanent buildings that we are going to enjoy when the park is again our own include the **Federal Building**, erected at a cost to the national government of \$97,000, and probably to go to the city for \$100. J. W. Hiscox, U.S. commissioner, said yesterday that the 12 carloads of federal exhibits will be out of the building by the end of the week and on their way back to Washington, DC

San Diego city’s bid of \$100 for the building is being considered by the controller-general in Washington.

The 50 CCC enrollees at Camp San Diego in the park will leave this week for the various Southern California camps from which they were selected when the February 1936 season opened. Eight of the men will remain at the camp with the administrative head, Captain Arthur Davidson, to clear the site of temporary buildings. A statue, “**Spirit of the CCC**,” erected by the men in the camp under Captain Davidson is to remain in the park.

Many of the exhibits and Exposition properties are being salvaged and you are likely to meet them again at many points in the county. The ticket booths that stood at the main gates, for instance, were loaded on trucks last week and taken to State College; and from them sport fans will buy tickets to the college bowl. **Enchanted Land**, children's playground, goes to Mission Beach.

City gets \$25,000

The Exposition not only closed with enough money to pay all the bills, as was announced in *The Union*, Thursday, but has been able to turn over to the city \$25,000 in cash, placed in a trust fund, for any necessary reconstruction work in the park. The Exposition also turned over all its expensive furniture and supplies, now being stored in the **Transportation Building**.

Subscribers put up \$767,000 to start the Exposition. Whether any part of this is returned will depend upon how much the city uses of the reconstruction fund, Exposition officials said.

"I do not know how much it will cost for rehabilitation work in the park," Frank Drugan, executive secretary of the Exposition, said yesterday. "No one knows just yet. But I do feel that the Fair has done considerable damage in Balboa Park."

Open to the public during the reconstruction period is the **San Diego Zoo**. Visitors may enter without formalities at the Upas Street gate of the Zoological Gardens.

San Diego Sun, September 14, 1936, 1:3. Veterans, girl campers seek Exposition buildings.

San Diego Sun, September 14, 1936, II, 9:5. Infantry moves out of Exposition for Presidio base; Belcher honors Company with new colors on departure.

San Diego Union, September 14, 1936, 8:4. Camp Fire Girls may take over park CCC site.

Digest of Executive Committee Meetings as Reported to Directors at Meeting of September 15, 1936.

September 8, 1936 --- A letter from Dr. Lyell C. Kinney was submitted. It was decided to approve the payment of items for \$251.42 and \$203.44, leaving the third item of \$400.00 to be referred to Mr. Gildred for comment. It was decided to authorize Mr. Wangenheim to negotiate with the City the deal recommended by the Board of Directors, entailing acceptance of approximately \$15,700 from the \$25,000 trust fund and the release of all of the personal property of the Exposition, or the best deal possible, and to report back to the Executive Committee for confirmation. It was the sentiment of the Committee that there should be excluded from the personal property the Enchanted Land, the horse show track and the box offices. It was decided, in regard to difficulty in settlement of contract with the Coronado Riding Club, involving a difference of \$1,000 against the Exposition, that the Management, the Treasure and the President be authorized to settle the difficulty in the best way possible. A letter from C. D. Collom, Secretary Manager of the Merchants Association of San Diego, Inc., regarding liquidation of the physical assets of the Exposition was read and ordered filed. The action of the Treasurer, Mr. Klicka, was approved. The Treasurer was authorized to settle with Mr. Utter in return for his payment of \$2,000, or promptly to file suit.

Frank Drugan, Executive Secretary

San Diego Union, September 15, 1936, 9:1. Veterans of Foreign Wars seek home in Balboa Park.

San Diego Sun, September 16, 1936, 1:2. Exposition razing left to Fair; city sees no need to take over task.

San Diego Union, September 28, 1936, 1:5, 5:1. Gates at park expected to open Thursday.

San Diego Union, September 29, 1936, 1:6-7, 3:2-3. San Diego women get possession of **House of Hospitality**, by Eileen Jackson.

The women's building of San Diego, which first was visioned 20 years ago by civic-minded groups, became the property of the women of San Diego late yesterday when the Balboa Park Auditorium Association took over legal possession of that imposing building on the southeast corner of Plaza del Pacifico. The building will keep the name Hospitality House, which San Diegans learned to love in the last two Exposition years.

When Exposition officials turned the keys of the patio-centered building, overlooking the Moro gardens on the south, over to the Balboa Park Auditorium Board yesterday, San Diego was assured that this charming social center, with its Casa del Rey Moro Café and gardens, Sala de Oro, Mexican loggia, auditorium, and many other rooms, would be one building in the park which would play the same part it had in the Exposition years. The acquisition of the furnishings of the building from the Exposition yesterday saw a dream fulfilled.

To recall the history of the building one must go back to the close of the 1915-16 Exposition, when the Women's Civic Center, assisted by clubs and individuals, began through personal and united efforts to give benefits for the building of the Civic Auditorium out of the old Southern California Counties Building. The Women's Civic Center reconditioned and furnished the great auditorium only to see its efforts literally go up in smoke more than a decade ago when the building was burned to the ground. To solve a legal problem, the Women's Civic Center requested that the Balboa Park Auditorium Association, an incorporated group, be formed.

Before the 1935 Exposition opened, the Board took the fire insurance money from the Civic Auditorium and began the rehabilitation of the Foreign Arts Building of the old Exposition into what is now called Hospitality House. Federal funds augmented the insurance money and made the reconditioning possible.

The Balboa Park Auditorium Association Board, which has worked consistently on the project, includes Miss Alice Lee, who has been president since the Board was formed, Miss Gertrude Gilbert, first vice president; Mrs. J. E. Jennison, executive vice president; Allen H. Wright, secretary; Orton E. Darnall, treasurer; Julius Wangenheim, advisor, and the following directors: Mrs. Fred M. Gazlay, Mrs. M. A. Greer, G. Aubrey Davidson, Sam Porter, Mrs. William E. Pate, Mrs. Della Hamon Johnson, W. Templeton Johnson, George Mayne, Dr. Howard Bard, Mrs. Lorenze Barney, Mrs. John M. Ward, Mrs. Karl Thompson, representing the Federated Clubs, and Judge William Paxton Cary.

Richard Requa was the architect who transformed the building into the beautiful structure it is now. By the time it was ready for occupancy, the 1935 Exposition was a reality. Its officials undertook the furnishing of the palace and spared no effort to make its appointments irreproachably smart and entirely in keeping with the architecture. All these furnishings, including those in the colorful Mexican loggia, in the rich Sala de Oro, in the delightful retreat called the Flamingo Room, have been acquired by the Balboa Park Auditorium Board from the Exposition at a fair price and with the assurance of cooperation and well wishes of the Exposition officials.

Opening Set October 19

The women of the city inherit, too, the delightful sun-filled court and its masterpiece, the Tehuantepec girl fountain carved by Donal Hord from Indiana limestone. This work of art is said by many critics to be one of the outstanding features of the last Exposition.

The building will be opened officially October 19 and October 20. Mrs. Frank Von Tesmar, chairman of the Women's Philharmonic Committee, announces that her committee is taking advantage of the October 19 opening by given the first luncheon at the Hospitality House Café. This luncheon will honor Aline Barrett Greenwood, who we be presented that morning in her first lecture of the season. The public opening is set for October 20.

The café and tea room will be operated, with a reasonable commission to Hospitality House or Auditorium Board, by Mrs. Paul Valle, who now has a tea room at 535 Date Street. All rooms and auditorium in the building will be open to San Diego women's groups at small rentals. The Sala de Oro, or good room, the siesta and rest rooms, however, are open to all visitors without rental. The loggia and the large auditorium downstairs, seating 600, and the small one upstairs, the Exposition Board of Directors' room, seating 60, and other small rooms and offices can be rented. Colorful pottery is available for simple affairs and for "state occasions" the imported linens, samovars and handsome service can be used.

Board to Make Decisions

The Hospitality Board, which is the same as the original Balboa Park Auditorium Association Board, with Mrs. J. E. Jennison as executive vice president, will make all important decisions concerning the house. Mrs. Jennison had had an important part in the final plans for this House of Hospitality, which is designed not only for the women of San Diego, but for the welcoming of new residents, tourists and park visitors. In that way, it will carry on the tradition of the inimitable hospitality extended there by the Women's Executive Committee in the last two years.

A caretaker and his wife will reside in the building and Mrs. Florence Wetzel will serve as part-time secretary-hostess. The Hospitality Board, however, wishes to emphasize the fact that it will need the same volunteer service offered by San Diego women to the Exposition so that a flower committee and a hostess committee can function daily. Many other problems remain unsolved too. The auditorium on the second floor must be furnished, the downstairs auditorium needs reconditioning, the overhead expense of lighting and heating must be met, and several smaller rooms must be appointed.

These minor details should offer, however, no real obstacle to a group at once so visionary and capable, which has seen a 20-year old dream fulfilled.

San Diego Union, September 30, 1936, 1:4, 2:3. City takes over **Federal Building** as auditorium; contract signed conveying property to San Diego for \$100; will seat 5,000 persons.

San Diego Union, September 30, 1936, 5:1. Jubilee Singers will present folk songs and spirituals as a feature of the mass meeting climaxing Religious Education Week at Balboa Park organ amphitheater Sunday at 3 p.m.; this will be the first public service held in the park since the close of the Exposition.

San Diego Union, September 30, 1936, 10:4. "Heaven-on-Earth" Club boosts for 1942 Exposition to commemorate 400th anniversary of landing of Juan Rodriguez Cabrillo; Joseph Dryer, president, wants to use surplus from 1936 Exposition.

San Diego Union, October 8, 1936, II, 2:4-5. Many attend brilliant opening of Pan-American League, by Irene M. Clark.

San Diego Sun, October 9, 1936, 16:2, EDITORIAL The Collier Memorial

Those citizens of San Diego who appreciate what our pioneers have done for us will have an opportunity to show it Sunday when a plaque is dedicated to the late Col. D. C. Collier in Balboa Park.

It is difficult to estimate adequately what Col. Collier did for San Diego. It was essentially a spiritual contribution. But it was so tangible that every citizen is today reaping its benefits. Not the least of his good works was his sponsoring of the 1915 Exposition. It was that Exposition that gave the city its greatest impetus to growth.

In countless other ways Col. Collier endeared himself to the people of San Diego. The least we could do is memorialize him with a plaque. This is a modest way and in keeping with his nature.

It is gratifying that civic leaders including Mr. George W. Marston and Mayor P. J. Benbough are taking a prominent part in extending this recognition. IT is also fitting that Carl Heilbron, who worked with Col. Collier so extensively, is directing the ceremonies.

San Diego Sun, October 10, 1936, 3:2-4. Mayor P. J. Benbough Signals Colonel Collier Tribute.

Tomorrow afternoon at 3:30 o'clock, in the California Quadrangle, Balboa Park, San Diego County will pay tribute to the memory of that man of vision, that dynamic . . . , developer and builder, Col. David Charles Collier.

The occasion will be the dedication of the "Charlie" Collier Memorial. John B. Osborn will pronounce the invocation. Brief talks by Geo. W. Marston, Congressman Geo. Burnham, Sen. Ed Fletcher, Rufus Choate, G. Aurbrey Davidson and other San Diegans will highlight the program in honor of the creative genius of the Panama-California Exposition of 1915. It is to be sincerely regretted that Mrs. Collier will not be able to be in the city for the program, but Washington, D.C. is a long way from Balboa Park. I know that San Diego will be with Mrs. Collier in mind, as she will be in thought with her host of friends throughout the country.

All San Diegans are urged to attend the memorial dedication. If unable to attend, citizens are requested to participate in the one-minute tribute at 3:30 p.m. when throughout the county San Diegans wherever they are will bow their heads in respect to that great and lovable character, that inspiration to the citizenry of today, Col. David Charles Collier.

San Diego Sun, October 10, 1936, II, 7:8. Rose show in Balboa Park opens today.

San Diego Union, October 10, 1936, 6:2-3. Mayor urges San Diegans to join in dedication of Collier memorial.

San Diego Sun, October 11, 1936, A-3:1-2. Leaders gather to unveil Colonel Collier memorial plaque.

San Diego Sun, October 11, 1936, A-8:1-2. Mayor studies plan for bike park patrol.

San Diego Sun, October 11, 1936, B-1:2-7. Proposed planetarium where sky's glories may be captured for San Diego; drawings by Frank Hope, Jr.

San Diego Union, October 11, 1936, 6:6. Variety marks program announced by Royal A. Brown for Organ Pavilion at 2:30 p.m. today.

San Diego Union, October 11, 1936, 14:6. Federal Band plans concert today at 2:30 p.m. at 6th Avenue and Palm Street in Balboa Park.

San Diego Union, October 11, 1936, 15:1. Roses from afar grace National Rose Show in Balboa Park; 5,000 see opening.

San Diego Union, October 11, 1936, II, 1:1. Left-over Exposition coins to be sold.

San Diego Union, October 12, 1936, 5:1. PLAQUE UNVEILED WITH EULOGY FOR LATE COL. COLLIER

Nearly 1000 persons attended the unveiling in California Quadrangle, yesterday afternoon of a plaque erected in memory of David Charles Collier, who was responsible for the founding of the 1915 Exposition and for the development of Balboa park.

George W. Marston reviewed Collier's life from the time when as a boy Collier began as bank messenger in the same institution in which Marston was cashier. It was Collier and not Marston, he said, who was responsible for the Spanish motif that has been carried out in all the Exposition buildings, and used in development of Balboa park. Collier appointed Marston chairman of the building committee of the 1915 Exposition to see that his own ideas were carried out, Marston said.

Mayor P. J. Benbough told of the civic affairs of the city, in which Collier led for many years.

Edgar F. Hastings, county supervisor, told of Collier's work in improving the county generally, and of his donation of land for parks at Ramona and La Mesa.

Sen. Ed Fletcher, who was out of the city, sent to Carl H. Heilbron, chairman of the unveiling ceremonies, a message to be read on Collier's activities in state politics. Rep. George Burnham reviewed Collier's activities in national politics, and his outstanding achievement in speaking before most of the state legislatures in behalf of the 1915 Exposition.

Rufus Choate, chairman of the Harbor Commission, was unable to attend, and sent to the chairman a message to be read. His message recounted Collier's efforts in having the state legislature deed tidelands in the San Diego area to the city, making possible the waterfront development of today.

G. Aubrey Davidson, who took over the presidency of the 1915 Exposition from Collier, just prior to the opening of the gates, told of the untiring efforts of Collier in building the Exposition and in making it a success.

The bronze plaque is the work of Frederick W. Schweigardt, San Diego sculptor.

October 13, 1936. Letter, Julius Wangenheim, Chairman of Park Rehabilitation Committee, to R. W. Flack, City Manager, San Diego, California

My dear Mr. Flack:

The Committee appointed by you to advise on the rehabilitation of the Park herewith begs to tender this, its first preliminary report:

At our initial meeting we laid down certain general principles, chief among them being the followings:

That the buildings in the Park be used only for cultural activities and such as are natural to a Park. A few exceptions will have to be made to this rule due to previous allotment, and also possibly to the exigencies of the situation in individual instances.

That operations by lessees shall be under the control of the City Manager at all times.

That all leases shall be considered as indeterminate and revocable with the principle established that public right shall at all times have precedence over private or institutional right.

That all expense of maintenance of every kind shall be borne by the lessees and that no expense be entailed on the city, and it shall be the duty of the City Manager to see that all premises are properly maintained.

Based on these principles we have tentatively allocated the Exposition buildings as follows:

MAIN AVENUE

GLOBE THEATER:

There is a group interested in a play to rehabilitate this structure and operate it as a Community Theater. If this should eventuate, we would be glad to make the lease to such group. Otherwise, the buildings are to be demolished and the grounds re-turfed, making it, as before, an attractive integral part of the Park.

THE MEDICAL BUILDING, EAST OF THE TOWER:

The part previously occupied by the Robot is to be given to the San Diego Museum, together with a small addition of about 40 feet to the east. The middle portion of the building is to be let to the State Societies for

exhibition and meeting place; and the east end, facing the Plaza, is to be leased to the DeVol School of Art, who occupied it before.

THE HOUSE OF CHARM:

The corner is to be leased as a novelty shop at a reasonable monthly rental for the purpose of dispensing counter lunches and selling such articles as are applicable to Park use, such as films, popcorn, etc. The rest of the building is to be given over to the City Visual Education Bureau who, we are sure, can use it to good advantage and supply an attractive exhibit at the same time. We hope there will be room in this building to house the similar County Bureau.

CAFÉ OF THE WORLD:

This building is to revert to the American Legion, who will give house room to several other collateral agencies and who will display a creditable exhibit to compensate in part for our breaking the rule of "Park and cultural purposes."

THE HOUSE OF HOSPITALITY:

This is to be turned over to the Balboa Auditorium Association to be composed of the women of the city. They are to rent their rooms and their facilities to various clubs, charging such reasonable prices as will insure maintenance. They will rent out the auditorium for lecture purposes at reasonable rates, and will conduct a high class restaurant in the dining room and particularly on the terraces in the summer.

THE BETTER HOUSING BUREAU:

The offices occupied by the Exposition Administration will revert to the Red Cross, who had occupied them before and who will equip them at their own expense. The rest of the building will be used for occasional exhibits of various kinds, the Rose Show already having spoken for it; likewise, the Electric Exhibit, and other activities of like nature. The building is to be closed during times when there are no exhibits.

THE FOOD BUILDING:

There has been persistent demand for this building for housing some of the projects of the WPA now scattered throughout the town. These are in the nature of divers handicraft work and will employ about 400 men and women. This is in no wise a Park Activity and should by right not be allowed in the Park, but, on the other hand, we realize that it may be that Civic and humanitarian considerations should be given precedence over aesthetic or recreative ones. We are conscious, however, of certain inadequacies of the building for the purpose requested, such as its relative inaccessibility of location, its lack of heating facilities, and its large open space, not conducive to peaceful occupation. Our judgment is against this grant, but our sympathies are in favor of it, and we have as yet come to no definite conclusions.

THE BANK BUILDING:

This is to be held for use of the City Administration or possible of the Park Board.

NUDIST COLONY:

The fences have been taken down and the rock theater has been left and may be used for small outdoor performances or pageants to be let as occasion demands. To be under control of the Park Department.

UNALLOCATED:

There are a number of individual rooms in the second story of the various buildings, and we are using these to allot to various minor institutions who have made application, but we have not had time to go exhaustively into the matter.

MIDWAY

THE SPANISH VILLAGE:

This is to be let as a whole to a group of Art Associations and artists who will operate it in a colorful way and who may rent out studios, handicraft shops, and activities of that nature, making sufficient charge to insure the maintenance of the property. It is to be wholly a non-profit institution and defray its own expenses.

NURSERY BUILDING;

This is to revert to the Zoo, being on Zoo property. It is wanted by the nursery who operated it before, but this matter is left to the Zoo to determine.

TENNIS COURTS;

These are to be reestablished where they were before at the expense of the Exposition who removed them. They are to be operated by the Park Department and charges are to be made which will make them self-supporting.

THE REST OF THE MIDWAY:

This is to be entirely cleaned up and left for the present for such development as the future may indicate.

PALISADES

WATER BUILDING:

This building is to be removed and the cement floor left if it proves practical to use for parking purposes. Otherwise, it too is to be demolished and graded.

THE HOUSE OF PACIFIC RELATIONS:

This splendid little group is to be maintained under some such organization as Mr. Drugan suggests, but at no expense to the City. We hope it will be as attractive in the future as it has been in the past.

THE FEDERAL BUILDING:

This structure, having been purchased by the City, is to be left standing, to be used in due course as a city auditorium. This may take some time and if in the meanwhile some organization can temporarily use it for recreative purposes that will not give them a possessive right, it might be advisable to at least consider such a plan.

FORD BOWL:

This is to be under the control of the Park Department and used primarily in the summer time by the San Diego Symphony Orchestra and for such other cultural or other attractions as will adapt themselves to the Bowl.

FORD BUILDING:

This should be used for exhibits of the larger type, such as a yearly industrial fair, an automobile show, flower show, and exhibitions of that nature. It should be closed for the rest of the time, but during the period of its occupancy it might be a splendid experiment to have the patio made into a restaurant with an orchestra and tables, serving light refreshments. We think it would not only pay, but be quite a card for San Diego in its summer time.

The present use recommended for this building will not interfere with the adoption in the future of any other and better plan that may be then decided on

PALACE OF ENTERTAINMENT;

The small theater in this building is to be used by that organization now known as the Barn Players, who will use it as the center of a little theater movement. They are to arrange with the "Troupers" to allow its occasional use by this group. The rest of the building is to be used jointly for a meeting place of various associations, primarily that group now consisting of the Medical Association, the Dental Association, and the Nurses. Arrangements can doubtless be made whereby other similar groups can likewise use this very attractive hall, conspicuously such as the Municipal Employees' Association and similar organizations.

EDUCATIONAL BUILDING:

It is hoped that this may be maintained for the same purposes as utilized during the Exposition in behalf of the Teachers, the Parent-Teachers Association, and such like institutions.

THE PRESS BUILDING:

This is to be given back to the San Diego Floral Association, who occupied it before.

THE CHRISTIAN SCIENCE BUILDING:

This splendid little building, a contribution of the Christian Science people, is wonderfully adapted for a meeting and exhibition place and we are proposing giving it to the Camera Club who are, however, to allow use and exhibitions by other institutions, such as the Stamp Club, the Numismatic Club, etc.

THE CACTUS GARDEN BACK OF THE EDUCATION BUILDING:

This is to be replanted so that it ceases to be a sore spot on the landscape. As a cactus garden, it is attractive, but it needs planting with more green, and the top white sand, which too flagrantly strikes the eye from a distance, is to be replaced by brown soil.

THE CCC CAMP:

If this is to be turned over to the City, it will provide splendid quarters for the Campfire Girls. One of the smaller buildings has been asked for by the Natural History Society for a work room and we favor granting this request.

STATE BUILDING AND GENERAL EXHIBITS BUILDING:

These buildings are as yet unallocated. We have not yet been able to make up our minds as to who should have prior right to them, as there has been such a general demand for them, each applicant given splendid reasons for his request. It is wanted as an Armory for the National Guard; as quarters for the Veterans of Foreign Wars; as a Federal Music Project; as housing for playground and recreative activities by the Playground Commission, and as a dance hall under proper supervision by the Social Service section of the School Board. We have not as yet been able to decide their respective merits, particularly as to their appropriateness as park institutions.

GENERAL ITEMS

LIGHTING:

This will be one of the permanent assets arising out of the Exposition, and we recommend that considerable lighting be maintained. The entire main avenue from the West Gate to the East Gate should be lighted, both

as to open lights and in the arcades. We recommend that flood lighting be maintained for the Tower and other keynotes on the avenue and that these be used every evening for a few hours. We recommend that lighting in Palm Canyon, in certain small groves, and all the avenues of the Palisades be maintained and used occasionally. That the facilities for flood lighting the Ford Building be likewise maintained but used only during the time of exhibitions.

PARKING SPACES:

This is an important matter as much space may be needed for automobile parking. We therefore recommend that the section south of the organ, consisting of the present rose garden, the entire space of the Water Palace and the CCC Camp be converted into a parking area, this particularly for use at the organ. We also recommend that the area south of the Ford Bowl and east of the Ford Building be converted into a parking area for use of the Bowl and the Ford Building. Access to this section can readily be had through the Eleventh Street entrance, although this road may require widening.

PARKING:

We recommend that in the interest of safety and sightliness alike, the experiment be tried of allowing no parking on the already narrow main avenue. Cars to park in the Central Plaza and on the broad avenues.

NAMES:

We recommend that we go back to the very romantic names that were used at the time of the first Exposition and which have endeared themselves to the people of San Diego. These included such names as the Prado for the main street, the Plaza de Panama for the large plaza, and Plaza de California for the smaller plaza, and so forth.

THE GROUNDS:

We recommend that the realignment of the grounds be given considerable thought and left entirely to the Park Department. We would suggest that wherever possible access to the grounds behind the buildings be opened up and emphasized, so that the Park would not be wholly a matter of a street.

There is no question but that some of the most delightful spots in the Park are behind these buildings, which few people ever see.

RIDING ACADEMY:

We recommend that arrangements be entered into for moving the Riding School to some less conspicuous site in the Park, either where they were before, or preferably to some other location mutually satisfactory.

CHILDREN'S PARK:

There is a wonderful section south of the Montezuma Gardens that can be used for children's rendezvous, got nurses with children, etc. We hope that this can be utilized more fully for the purpose.

THE REVISION OF ALL LESSEES:

All the above are to be indeterminate leases even where we have used the words grant, give, revert, let, or any similar expression, and a written lease is to be entered into in each case setting forth the conditions along the lines of the general policy.

We have made no commitments as to the above leases, having no authority to do so. Wherever we have given our sanction to any occupancy, it has been with the direct understanding that the matter is entirely in your hands. We tender you this, our report.

Yours,

(signed) PARK REHABILITATION COMMITTEE

October 17, 1936. Letter, City Manager R. W. Flack to the City Council in re: Park Rehabilitation

In order to expedite and to receive the advantage more or less of the composite opinion of local citizens, the undersigned exercised the privilege granted in the Charter of formulating an advisory committee upon the above subject. This committee is composed of the following gentlemen: Mr. Julius Wangenheim, Chairman; Mr. George W. Marston; Mr. Fred Kunzel; Mr. W. C. Crandall; and Mr. John Morley.

The attached preliminary report is the result of a great amount of study upon the part of the Committee. It is forwarded as an advice to the City Council only. This office and the Advisory Committee are fully cognizant of the fact that all matters pertaining to the rehabilitation of the park were finally to be determined by the City Council.

Respectfully yours,

(Signed) R. W. Flack, City Manager.

October 19, 1936, Letter, John H. Sherman, Colonel, 251st Coast Artillery, California National Guard, Commanding, to City Council, City of San Diego, California.

Regarding an armory for the 251st Coast Artillery, California National Guard.

After a careful study of the several buildings in the Palisades area, we wish to suggest for your consideration the following plans for allocation of space for a National Guard Armory in Balboa Park.

First: The Ford Building, we find would make a suitable armory if taken over in its entirety. There are numerous offices on the main and mezzanine floors and a very large basement that would take care of our trucks and locker rooms. We find that we would not have to make any structural changes on the main floor.

We would be glad to cooperate with the city of San Diego in the use of the building for "Exhibits of the larger type, such as a yearly Industrial Fair, an Auto Show, Flower Show and exhibitions of that nature", as recommended by Mr. Flack's report to the city council. With this in mind we would call your attention to the fact that we would at all times maintain caretakers to take care for and maintain the building, and that it would be much easier under these conditions to install and maintain exhibitions as suggested.

There would be nothing in our set-up in the building which would interfere in any way with its use for exhibitions, and in fact we would be glad to cooperate. If we were allowed to maintain the Ford Building at not cost to the city of San Diego we feel there would be a considerable saving to the city when exhibitions are to be put on, due to the fact that under the present plan there would be considerable expense to opening and closing the building for exhibition purposes, whereas if allocated to our use the building would be maintained at all times and ready for use. This proposition for an armory we feel would fulfill our needs to the best advantage.

Second: Our second proposition is to allow us the use of the basement of the Ford Building for a garage and storage purposes and the State Building for a drill floor, offices, and such locker rooms as may be necessary. In this set up we would likewise be glad to cooperate with the city if the state building was needed for exhibitions of any kind.

Third: Our third proposition, which would be of the least advantage to us on account of the cost of necessary installations would be the use of the State Building and the Varied Industries Building. In this set-up we would have to use at least a portion of the State Building for a garage. We call your attention to the fact that we are heartily behind the proposition of a building for armory purposes alone in the Civic Center. In a recent letter, however, the governor states there is no hope for any state funds within the next two years and we are sure that you are all aware of the fact that temporary quarters in Balboa Park seem to be the only possibility by which the city of San Diego can solve a very unsatisfactory armory set-up at the present time.

In most cities throughout the United States the armories are social centers, open to and used frequently by all the citizens for exhibitions, shows and gatherings of all types.

With our equipment, ceremonies and band concerts we feel that the activities of the guard itself would be of interest to all citizens of San Diego, and we are of the opinion that our organization should be able to make use of the Ford Building in such a way that it would be of the greatest possible benefit to the citizens of San Diego.

Signed: John H. Sherman, Colonel, 251st Coast Artillery, California National Guard, Commanding.

November 2, 1936. Letter, R. W. Flack, City Manager, to City Council:

Enclosed fine supplementary report on the use of public buildings located in the Park:

Dear Mr. Flack:

The Park Rehabilitation Committee herewith begs to make the Supplementary Report.

We adhere, without change, to the allocations advised by us in our letter of October 13th. There were, however, in that letter three buildings on which we had made no definite allotments, and we now beg to make our recommendations on these:

FOOD AND BEVERAGE BUILDING

In our last report we were undecided regarding the use of this building. However, after mature deliberations, we suggest that this building be used for divers approved institutions that may hereafter apply for space.

At the present time we advise the allotment of a reasonable portion of the north end of the building for the use of the Veterans of Foreign Wars.

STATE BUILDING

We recommend that this building be assigned for an Armory of the National Guard, together with such space in the basement of the **Ford Building** as can be spared from civic use.

GENERAL EXHIBITION BUILDING

We recommend that this building be allotted jointly to the Social Service Department of the Board of Education for use as a supervised dance hall to be used about one night a week and for the rest of the time for the use of the Playground and Recreation Department of the City.

This report, together with our previous one, makes recommendations for all the buildings, and in general for the purposes that have been requested wherever such purposes seemed in our opinion to be proper for occupancy in the Park.

We hope our report will meet with your approval.

Signed: Julius Wangenheim, Chairman.

January 20, 1937, San Diego Union, II, 5:4. Park directors F. B. Naylor and George F. Otto differ on the type of change they would like in charter sections governing park control; problem up to City Manager Flack.

When F. B. Naylor and George F. Otto, park commissioners, disagreed verbally yesterday on the type of change they would like in charter sections governing park control, the council referred the matter to the city manager to confer with commissioners.

Previously Naylor, Otto and Don Yale, the third commissioner, had signed a letter asking the council to submit to the people a charter amendment giving the park board full control of the park operation as it had before the new charter conferred park power on the city manager.

Naylor told the council yesterday there was no "row" but the park board merely wished to "rectify" the situation which makes the park commission advisory to the park director. He said conditions are "perfect" today, but with a director other than John Morley this might not be so.

Naylor added belief that he would be satisfied by a charter amendment making the commission advisory to the manager instead of the park director.

Otto said he was standing by his views as expressed in the letter. Yale was not present.

Manager Flack said he knew of no reason why the present commission could not advise the manager, but Naylor said it was not provided in the charter. Several councilmen questioned the value of setting up another separate organization in the park, viewing the move as a departure from the city manager form of government and a step toward the commission form.

Councilman Wansey {sic} hinted that if he were manager, he would think it anomalous to have an advisory commission whose members had been appointed by two previous managers, thus opening the door for resignations of the three present commissioners.

"Maybe we'd be better off without a park commission," suggested Councilman Siebert.

"If the manager doesn't appoint his own commission, then that's so," agreed Wansley.

January 25, 1937, Letter from George F. Otto, chairman Park Commission, to Honorable City Council, San Diego, California.

In justice to myself, as Chairman of the Park Commission, I feel it is my duty to make this statement to your honorable body. Should the newspapers wish to publish it, which would please me, I reserve the right to have it either published in full or not at all.

The first thing which confronted the Park Commission when I became a member, was what to do with the Exposition buildings of 1915-1916. A good many were badly in need of repairs and some had to be removed entirely. An appeal made through the newspapers brought a general response for saving the buildings. Other organizations assisted with funds, and later, with the assistance of the Federal Government, larger sums made it possible to restore the buildings so that they were useful for the Exposition of 1935-1936.

All matters pertaining to the needs of the park were brought before the Commission. Different concessions which had been made, as well as the returns they gave to the city government, making up the budget and the like, were all brought to our attention until our present city manager took office. Then very few matters were brought to our attention and most of them of trivial importance. Although I called up the Park Office on the days scheduled for our regular meetings, in most cases I was told there was nothing on the docket.

Recommendations made to the Park Director to plant some plants to hide some unsightly spots were left unheeded. Along Sixth Avenue in the Park I wanted some Cocos Plumosa palms along the side which had died out, replaced. In fact, I offered the palms free of charge out of my nursery, but no use was made of my offer.

In getting the grounds ready for the 1936 fair the request was made by the Exposition people to remove all the acacia trees along the Prado (Laurel Street) to make a better lighting effect. The Park Commission decided against it, except to move a few unsightly ones and thin out the others. This was later done, but strange to say our city manager appointed another commission to go over the same work, not even taking one member from the Park Commission for the new commission. The only conclusion which I could come to was that the manager considered the Park Commission incompetent and if that was his opinion he should have discharged the Park Commission and given his reasons. I so expressed myself in a letter sent to him and I got his answer to the effect that he would take it up at some future time. I waited patiently until I finally appealed to two of our councilman, and then Mr. Flack, as well as Mr. Lockwood, appeared at one of our meetings. I tried my best to lay the matter before him, but it was impossible to make any headway; everything was too trifling to him and it was useless to go further. I called Mr. Flack by telephone for a personal interview, but he claimed he was overburdened with work and indicated that he thought I wasn't feeling well and that apparently my feelings had been hurt, and advised me to take it easy and everything would come out all right. This was far from what I expected of a \$15,000.00 a year man who I hoped would give fair consideration to everyone and especially to a commission or a commissioner who serves the city without any compensation.

In September at the close of the Exposition and the beginning of the rehabilitation of the Park, Mr. Flack again appointed another commission without any representative from the Park Commission. I looked over the Charter to see if there was provision made for a dual Park Commission but could not and cannot find anything referring to a dual or substitute Park Commission. So Mr. Flack must have made the additional change to the charter. One member of the new commission informed me that as soon as his commission got through with their part we, the Park Commission, could have everything back again. Whatever was meant by this I have never been able to fully convince myself, but I have my opinion.

The taxpayers and voters of San Diego have been generous in voting bonds for the Exposition of 1915-1916, for the stadium golf links, Torrey Pines Lodge, and the park in general. The park is a real asset to the city of San Diego, but the stadium, golf links and other investments should have given better returns to the city than they have. From my observation, during the forty-eight years I have called San Diego my home, I find that we have had and have yet too many in our city administration who see nothing great about San Diego, and have interest expect their paychecks, and as soon as those stop they leave the city.

(Signed) George F. Otto,
Chairman Park Commission.

July 21, 1937, San Diego Union, 1:8. Councilman Wesley C. Crandall yesterday recommended new road to Palisades part of Balboa Park entering near Ford Bowl.

July 22, 1937, San Diego Herald, 1:3-4. PARK COMMISSION

City Manager Flack has suddenly stepped out, in a burst of administrative energy, and put on the park commission three gentlemen in the interest of public harmony.

The announcement of Flack's is almost too funny to admit refutation.

Let us look at Mr. Flack's new appointments on the Park Board.

The first is Nicholas Martin, chairman of the Civic Affairs Conference and directly a little tin god to Flack because he made Flack's \$15,000-a-year salary possible.

In other words, Flack simply paid back Nicholas Martin the debt he owes Martin for the sweetest job in the United States for a man who won't work.

Then he appointed Fred Kunzel, who happens to be not only a member of the Civic Affairs Conference, but the attorney for the San Diego Gas Company. His third appointee was Tom Hamilton, who is manager of the George W. Marston interests in the city and who undoubtedly was made a member of the Park Board through the good efforts of Mr. Addington Housh, who for many years was manager of the furniture department in Marston's store, and who feels no compunction in helping his master, Mr. George W. Marston.

In other words, the San Diego City Council is playing back its debt to the Civic Affairs Conference by throwing out great gobs of patronage to its friends.

It is a marvel to **The Herald** that Hamilton, who is a close associate of George Marston, and Fred Kunzel, who is the Gas Company's lawyer, would have the guts to talk to Flack in his own back yard. And Nicholas Martin, chief aider and abettor of the lousy City Charter which has given us a \$15,000-a-year City Manager in the person of Robert W. Flack --- these are the three kind of people that remind us immensely of a certain Walter Casey, who, because of his effect in electing a Civic Affairs Conference majority got as his reward the valuable parking concession at the San Diego Exposition.

City Manager Flack said, when he fired the old Park Commission and appointed these three Civic Affairs Conference eggs, that he was acting in the best interests of the San Diego city public.

Flack is a liar. What he is doing was putting the control of the Park Board into the hands of the Civic Affairs Conference Committee and taking it out of the hands of experienced citizens who have served the city well and faithfully. One of these men, Geo. Otto, being a man who has devoted his entire life to the growing of flowers, trees and shrubs and to the development of things beautiful. Mr. Otto is an able, experienced landscape engineer and probably the best qualified man in the city to fill the position of park commissioner. San Diego will suffer through losing his services. Flack's action in removing him without even showing him the courtesy of notifying him in advance of the contemplated action, smacks of Hitlerism, and clearly demonstrates that Flack was acting under orders of the Civic Affairs Conference or was under the influence of too many highballs.

CONSOLIDATION

Patrick Francis O'Rourke, originator of the idea of consolidation as it concerns the amalgamation of the city and county government around the shores of San Diego bay, won a major victory Tuesday when the City Council voted to refer the matter to the political science division of the University of California for investigation.

And it is significant that the Council totally forget City Manager Flack in rendering his judgment, and went ahead on its own judgment on the most important political move ever conceived for the benefit of a citizen of this area of southern California.

In other words, the City Manager to whom we given \$15,000 a year to advise us on our most important public policies has failed absolutely to function in this most important problem.

Flack should know that no citizen can or will vote against the proposition that will knock \$3,000,000 off his tax bill, or, as O'Rourke has said:

One dollar and fifty cents on every hundred dollars of valuation is placed on the Gas Company or the home of the lowliest workingman in the city.

The Herald does not know what the result of the consolidation investigation will be, but it is as plain as the nose on one's face that a decision on such a problem by the City Council without reference to the City Manager practically destroys that City Charter under which we presumably operate.

City Manager Flack does not want an consolidation of the City and County of San Diego within the limits of San Diego because he knows that such a consolidation will send him back to North Carolina with a one-way railroad ticket in one hand and his shoes in the other. He does not want consolidation of the City-County government, to change the ideas of this sentence, anymore than the President of the San Diego Consolidated Gas and Electric Company would admire a change in that company's set-up which would take him out of his hard wood offices and send him to digging ditches.

The difference, of course, is that if these two things were done at once, the President of the Gas Company would NOT dig ditches, but Robert W. Flack WOULD undoubtedly have to leave for the east coast on the first train.

While O'Rourke did not get what he went after in his appeal to the city council Tuesday, he won a recognition there that has not been his in the past, and the decision of the council to ask a committee to test the soundness of the O'Rourke consolidation plan shows that consolidation has at last attained the proportion of a major subject in San Diego.

Of the validity and feasibility of consolidation no citizen of San Diego now has any doubt. The details, many as they are, will be up to the board of freeholders, who will draft the new city-county charter. Whatever the problems they face, will be solved, for none of these problems is unsolvable.

Credit must go, of course, to O'Rourke for the persistence with which he has drive home the truth about City-County consolidation for the past two years. If the city ever gets consolidation and the lowered taxes which consolidation will bring about, the entire credit must go to O'Rourke -- and it probably will unless something happens as did after the building of El Capitan dam, when, on the commemorative plaque telling who were responsible for the dam. ALL THE NAMES OF THOSE WHO HAD FOUGHT EL CAPITAN AND TRIED TO WRECK THE VERY IDEA OF A DAM THERE ARE INSCRIBED IN LASTING BRASS, BUT THE NAME OF O'ROURKE, WHO FOUGHT FOR EL CAPITAN FOR 10 YEARS AND WHO SPENT A FORTUNE IN GETTING IT FINALLY BUILT, IS CONSPICUOUS BY ITS ABSENCE.

July 24, 1937, San Diego Union, 4:1. Branson de Cou, world traveler and commentator, tells Hi Hatters Balboa Park is prettiest of parks.

July 25, 1937, San Diego Union, 15:1. San Diego cast to sing "Gay Grenadiers" in Bowl at San Diego Zoo.

September 15, 1937, San Diego Union, II, 1:6 and September 16, 1937, 8:2-3. Program tonight at Organ Pavilion to open Mexican Independence Fiesta; consul to speak.

September 16, 1937, San Diego Herald, 1:3-4. ART AND THE POLITICIAN

For many years Mrs. Maude O'Rourke, wife of Patrick Francis O'Rourke, has been distinguished in San Diego by her unselfish devotion to cultural advancement in the city. Her work along this line has been marked particularly by her unselfishness and by the intelligence and knowledge which she has brought to the furtherance of those activities which are concerned wholly with the mind and with the soul.

Among those organizations to which Mrs. O'Rourke has contributed most of her thought has been the San Diego Academy of Fine Arts, which has been operating in Balboa Park. During all the years of the depression the Academy continued its work --- and by continuing this work **The Herald** means that it has kept up its obligation, it maintained its agreements with students and it continued the training of young artists despite all the difficulties of the times.

When the San Diego Exposition started the Academy was removed to the Municipal Pier building where it continued its work. Now those in control of the Academy have brought it back to Balboa Park, which is its natural home.

When the Academy moved from the park, the building which it occupied was taken over for Exposition purposes, and the partitions which divided it into sections were taken out and stored by the city.

Now, when the Academy is looking forward to the resumption of its winter's work the partitions, which are necessary to divide the Academy into its school rooms, are found to be lacking in part. In other words, the Academy finds itself without a portion of the property which it turned over to the city of San Diego for storage. It has asked the city of San Diego either to provide the missing partitions or to pay for them. The answer from the city of San Diego has taken the form of "passing the buck" from one city department to another until those interested in the Academy are almost frantic in the idea that their fall opening will be delayed.

The worth of the San Diego Academy of Fine Arts lies wholly in the help that it is giving to young San Diego artists. Its success in the training of young artists in past years has been phenomenal, and this success has not cost the students anything.

It should be apparent to the City Council and to the Park Board and to the City Manager that such an institution as the Academy of Fine Arts is an asset to the city. It is apparent that in the development of young creative talent it should have much more than the passive interest of the powers that be. In any other community it would have their active support. More than this, it would be a matter of community pride. But San Diego, with all it has to offer to the advancement of the cultural life, cannot see beyond its communal nose. It is rather absurd that a newspaper should have to take up a question of common justice in a matter like this against the city government. And **The Herald** thinks that it is absurd because the matter of these partitions has dragged on now for several weeks.

September 19, 1937, San Diego Union, 13:3. Dance at Café of the World, Balboa Park, evening of October 23, to aid American Legion "Iron Lung" fund.

September 19, 1937, San Diego Union, 15:1. Spanish Village opens new show.

September 1, 1938, San Diego Union, B-12:1. One thousand attend **San Diego Union** picnic in Balboa Park.

San Diego Union, September 11, 1938, C-4:1-2. Gertrude Gilbert Tells Anecdotes of Famous Artists Who Came Here, by S.B.M. (illus.)

Miss Gertrude Gilbert has a priceless collection of photographs of noted persons, most of whom have appeared under auspices of the Amphion Club since 1909.

She has been president of the club for some years and her efficient board of directors would be among the first to admit that it has been her fine leadership that has been the noteworthy factor in the success of the organization, celebrating its 45th birthday anniversary this year.

The collection includes a program bearing pictures of Mme. Modjeska, Ignace Paderewski, and Fritz Kreisler, Gamut club of Los Angeles. Miss Gilbert said, entertained the artists at dinner. She said Gertrude Ross, composer, were at the guest-of-honor table.

Under Modjeska's picture were the following lines, "We live in deeds, not years. In thoughts, not breaths.. In feelings, not in figures on a dial. We should count time by heart throbs. He most lives who thinks most, feels the noblest acts the best."

ELOQUENT SPEECH

Miss Gilbert said she would always remember the eloquent speech Paderewski made. It was one of the finest she ever heard.

After dinner the Gamut Club took them all to the theater. Much to her horror the _____ when they arrived was a man playing the piano while standing on his head!

She noticed Paderewski, world-famous pianist, leaning out of the box, watching closely.

In answer to her remark that he was no doubt quite disgusted, he replied, "Oh, no! I am very much interested. I wish that I could do it!"

When Chaliapin, great Russian basso, who died recently came here as an Amphion artist, Miss Gilbert met him at the train and inquired his preference as to a drive.

He asked to be taken to the zoo to see the snakes; he was much interested in them. He became fascinated by the snakes and monkeys and Miss Gilbert became perturbed about getting him back in time to prepare for his concert.

ENTERTAINS PAVLOWA

A group picture of Pavlowa, great dancer, Meriska Aldrich, soprano, Pavlowa's musical director, and Miss Gilbert is notable. The Gilberts asked Pavlowa if she would enjoy a tea and reception at their home.

She expressed pleasure at the hospitality of a private home in contrast to the publicity during her tours.

Percy Granger, Australian pianist, insisted that he must spend the afternoon practicing before the concert. Miss Gilbert took him to her home and placed her grand piano at his disposal.

But he spied a record for Gershwin's "Rhapsody in Blue," and has such a good time playing it over and over and in discussing it that he didn't practice at all.

"A BEAUTIFUL SLEEP"

Harold Bauer, pianist, also enjoyed the Gilbert hospitality. He assured Miss Gilbert the he would enjoy a drive covering "all points of interest," but when he was on the way back to his hotel, he said he wanted more than anything else in the world a cup of home-made coffee.

At the Gilbert residence Bauer stretched himself comfortably on a window-seat while the coffee was being made. When it was brought in to him --- he was asleep!

They let him nap as long as possible and years after in New York when introducing Miss Gilbert he said, "I shall never forget the Amphion club. The president takes you for a lovely drive, makes you a fine cup of coffee and lets you have a wonderful sleep."

While several others preceded Miss Gilbert as president of the Amphion club, the pictures kept in the archives of the organization became her legacy.

Of these, Katherine Gordon, the distinguished English pianist, was the first artist brought by the club from out of the city, this was in 1909. Previously the members, then a rather small group of talented musicians had presented the programs themselves.

The picture of Johannes Brahms and Ernestine Schumann-Heink is a treasure. Miss Gilbert was visiting the beloved diva in her Chicago home when she told of how it came to be taken and gave the only copy to Miss Gilbert.

It was during the years that the famed contralto lived in Hamburg, Germany. One evening at a concert the singer gave three Brahms songs for her concluding group. Brahms was not well known then, and was so delighted that he went on the stage to speak to Schumann-Heink.

DIVA MEETS BRAHMS

She had taken several recalls, then gone to her dressing room. But the applause continued until someone rushed back stage to her and said, "Come quickly! Brahms wishes to speak to you."

When she appeared, Brahms threw his arms around her and kissed her. The great singer told Miss Gilbert the audience went wild, the songs had to be repeated, and it was such an ovation she never forgot it. The next day, by appointment, Brahms and Schumann-Heink met and had their pictures taken together.

DETAINED AT BORDER

Miss Gilbert had an exciting experience with L'Argentina, who was presented in a dance recital. The world-famous dancer and her two maids had remained over night and expressed a desire to cross the border the next morning. Miss Beatrice Edmonds took L'Argentina to Tijuana in her car and Miss Gilbert took the two maids.

They had lots of fun, but there was no time to spare on the return trip to catch the train to Los Angeles. Miss Edmonds and L'Argentina passed through the gates and drove on, but the guards detained the two maids with Miss Gilbert, as their passports had elapsed the day before.

The immigration officer finally relented when the situation was explained. Miss Gilbert was driving an electric coupe in those days --- there wasn't much she could do about speeding so they arrived at the station five minutes before the train left. L'Argentina was pacing up and down the platform wringing her hands and crying. It was a great reunion, and they boarded the train in great haste.

We noticed an especially fine picture of Walter Damrosch. Miss Gilbert had charge of the special music for the 1915-16 Exposition and she was eager to bring him and the New York orchestra here for two performances.

MANY FAMOUS ARTISTS

The famous people brought here by the Amphion club practically covers the list of artists who have highlighted the last 45 years.

San Diego is proud of the achievements of the Amphion club. Walter Damrosch has written on the back of his program, "To Miss Gertrude Gilbert, the musical good angel of San Diego." We are certain that if a vote were taken, all the presiding officer would have to do would be to ask, "Do you agree with Mr. Damrosch regarding Miss Gilbert and the Amphion club?"

Then there would be a resounding bang of the gavel, and he would say, "The ayes have it! Adjourned."

September 11, 1938, San Diego Union, C-4:6. Throngs enjoy Spanish Village Art Fiesta, by Sherman Trease.

More than 6,000 persons paid the small admission to the village, and judging from the many who came every one of the five days and lingered into the night, they felt well satisfied with the entertainment offered.

All funds received are used for operating, maintaining and improving the buildings.

March 29, 1939, San Diego Union, A-1:1. Spanish war ends as Madrid falls; Franco's forces take over city, leaders flee.

March 29, 1939, San Diego Union, A-6:4. County Democrats would ban Hitler's pictures in Balboa Park.

March 31, 1939, San Diego Union, B-4:7. City Attorney Ault says U. S. Navy will get only 37 acres of Balboa Park.

Fear expressed by North Park civic leaders that electors Tuesday had voted "all of Balboa Park" to the Navy for expansion of its hospital were set aside yesterday by Dayton Ault, city attorney, and H. B. Daniel, assistant.

When the Navy first presented its request for additional land, said Daniel, it marked the area it wanted on a map. This area then was surveyed and is described in meters and bounds in an ordinance referred to in the proposition transferring the land.

Daniel says 37 acres and a fraction are involved, and that much of the land is in a ravine adjacent to the hospital. The proposition, as it appeared on the ballot, read in part: "Said lands to be abandoned and discontinued as a public park, being more particularly described in Ordinance No. 1519 (new series) of the ordinances of said city."

April 2, 1939, San Diego Union, A-8:1. Easter service set; concert by Bonham Brothers Boys' Band with Royal A. Brown at organ console.

September 20, 1939, San Diego Union, A-4:4. City Council yesterday voted to lease to the government for \$1.00 a year 40 acres of Balboa Park land to be used for construction of temporary 60-bed ward buildings.

September 24, 1939, San Diego Union, A-1. San Diego Zoo placed in role of "classroom."

San Diego Zoological Gardens have a new function this year. Only last week they began their career, to the delight of San Diego city and county children, as a regular classroom of the public, private and parochial schools, with Mrs. Lena P. Crouse as instructor.

It is one thing for a class to be studying forests, for instance, as its special school project, but having only classroom facilities to work with. It is another thing for the class to be transported in a bus to the zoo, where pupils are shown the animals of the forest and hear from Mrs. Crouse a factual, but sympathetic story.

No effort is made to show a given class the whole zoo. The children merely continue their study of the school project, whatever it is. The trip is not a picnic. It has no connection with the familiar "reward" trips to places of interest.

One of the first classes to use the "zoo" classroom was a group of students from Horace Mann Junior High School who wanted to sketch the animals. The young artists from all the schools are allowed to sketch the animal in which each is specially interested but they have to work. At the end of the regular class period they must produce black-and-white results of their study.

Mrs. Crouse, head of education work at the zoo, meets the children when the buss arrives, invites them into the Education Building (old O'Rourke Building) and lectures on what the pupils are to see in the zoo. She expects to take science laboratory classes to visit the zoo hospital, and next year --- a big dream --- she hopes there will be a barnyard at the zoo.

"City children," she said, "have almost no opportunity to get acquainted with barnyard animals. Some of us wish that we might have ready at the zoo by next fall a real barn with a real cow, hogs, pigs, chickens, old Dobbin and all. We'd like a rail fence around the barnyard so that the boys and girls could climb up and sit on it while they study a barnyard face to face."

The zoo as a schoolroom is an idea which originated with the San Diego Zoological Society, in so far as Mrs. Crouse knows.

Many communications have been received from other cities, asking for information. It was started here as an experimental program on a small scale last spring. But by the end of school, 3,000 pupils had studied at the zoo. This year, each class is to have at least one chance to participate in the zoo's educational program.

Getting into the realm of international goodwill, the society also will invite Tijuana schools to send classes of Mexican children who wish to study a special project in which the Zoological Gardens can be of aid, Mrs. Crouse said.

September 24, 1939, San Diego Union, A-8:4. WPA approves \$69,211 project to improve San Diego Zoo.

Continuation of extensive zoo improvements was assured yesterday when Fred Rhodes, city manager, was notified by C. Walter Heinecke, area projects manager, Works Projects Administration, that a \$69,211 project has been approved for the work.

All of the \$9,848 sponsor's share, said the manager, has been put up by the Zoological Society of San Diego, and the program will be carried out at no cost to taxpayers.

Informed of Heinecke's letter to Rhodes, Dr. H. M. Wegeforth, society president, said the work will include building rehabilitation, improvement to pens and cages, painting, and development of drainage facilities, roads, walks and paths.

The manager was warm in his expressed praise of the work being done by Dr. Wegeforth and his colleagues, and said that for three years they have been sponsoring similar WPA projects at no cost to taxpayers.

Coincidental with receipt by Rhodes of the WPA executive's letter, he received communications from Robert Wayne Burns, San Francisco national youth administrator, announcing approval by that agency of the following projects:

Repair and reset flagstones, Spanish Village, Balboa Park; construction and operation of pottery kiln, erection of adobe wall for arts and crafts center, construction of cement flower pots, total cost \$1,948 of which \$1,478 will be federal funds and \$470 will be provided by the park department.

Mounting of specimens, laboratory and other work at zoological hospital, total cost \$9,600 of which \$7,626 will be in federal funds, project to operate 12 months.

Development of park areas, propagation of seeds, trimming and pruning and improvement of park storm drains, basins, spillways and other drainage devices, total cost \$8,847 of which \$6,705 will be federal funds, six-month project sponsored by park department.

Clerical assistance in compiling data pertaining to rainfall variance by years throughout the county and related work in water development department, total cost \$8,400, of which \$3,840 will be provided by the government; water development department sponsor; 12-month project.

Cataloging and clerical work for San Diego Museum, Natural History Museum and Spanish Village Art Center, including construction of facsimile pottery and reconstruction of Indian pottery from fragments, 12-month project with \$8,816 in federal funds and \$2,160 provided by sponsors.

Switching back to WPA, Rhodes said it has approved a project for construction of a gauging station on Dulzura Creek, at the upper end of Lower Otay. The federal agency is to provide \$4,141 and the city will put up \$2,019.

In each instance, the documents signed by the manage included the signed contracts under which the projects are operating and in several instances it was explained that the work is a continuation of jobs started under previous allotments.

September 25, 1939, San Diego Union, B-1:6-8. William Templeton Johnson to be made a fellow in American Institute of Architects today in Washington, D. C.

September 30, 1939, San Diego Union, B-1. Natural History Museum gets new exhibits.

October 1, 1939, San Diego Union, B-1:1. B-2:3. Walter W. Cooper, Oakland, San Diego's utility consultant, brands as "unreasonable" the present basis of charging for Balboa Park lighting; has recommended to City Manager Rhodes that meter installations be surveyed to determine whether any may be eliminated or consolidated.

October 1, 1939, San Diego Union, B-1:5. Inadequate parking at Presidio Park; W. A. Perry, park superintendent, thinks a lot could be put in near Serra cross.

October 29, 1939, San Diego Union, A-12:3. Music of nations at House of Pacific Relations next Saturday.

October 29, 1939, San Diego Union, B-1:8. WPA approval for building program expected in 6 weeks; repairs to House of Hospitality included.

An \$83,278 city building rehabilitation program, calling for improvements to virtually all Balboa Park structures and provision for new quarters for Veterans of Foreign Wars in the Exposition

Medical Science Building, is contemplated under an application being prepared by B. D. Phelps, assistant city engineer, for submission to the Works Projects Administration.

Cost of materials, he said, will be put up by the city and benefiting agencies, and he expressed belief that the application would be approved by the WPA within six weeks, and that work will be completed within six months thereafter.

Also included in the project is demolition of the old Fifth Avenue and G Street City Hall, as ordered recently by the City Council. Described as unsafe, this building has been vacant since city offices were moved into Civic Center last December. Fred Rhodes, city manager, has announced his intention of using materials salvaged from the hall to build a warehouse adjacent to city shops.

Provision of V. F. W. quarters in the Medical Science Building would settle amicably a long-standing three-way controversy involving the veterans, the city and the Zoological Society over occupancy of the park building commonly known as O'Rourke Institute. The Zoological Society has asked the veterans to vacate this building on the ground it is needed for classroom expansion. Under the rehabilitation program, said Phelps, the veterans and the zoo will pay for materials to be used at the Medical Science Building.

Another high spot in the program, said Phelps, will be the construction of a new clubhouse at Sixth Avenue and Redwood Street. At present, there is a small clubhouse there, but it is unable to accommodate the ever-increasing crowds using shuffleboard and other recreational facilities.

Park buildings and improvements included in the project, as listed by Phelps, are:

Foods and Beverages, Federal Housing, House of Hospitality, American Legion, Fine Arts, Organ Pavilion, Medical Science, House of Charm, Old California Building; Administration Building, Museum, Palace of Education, Palace of Entertainment, Ford Building and Bowl, Stadium, Park Comfort Stations, Indian Village and miscellaneous small buildings, tool houses and substations.

In general, the work will consist of removing dangerous parts of buildings which are a menace to health and safety from earthquake forces, termites, fire hazards or sanitation. In this category are cornices, old walls, partitions and old plaster and concrete. Rehabilitation will include carpentry, painting, plumbing, roofing, lathing, plastering, pipe fitting and electrical and concrete work.

Work also is to be done on seven fire stations and the Balboa Park Central Fire-Alarm Station. The branch city hall at University and Van Dyke Avenues is to have its walls re-plastered and Normal Heights and University Heights Libraries are to be improved.

New comfort stations are to be erected on Saratoga Street and in New Town Park, and the Plaza comfort station is to be reconstructed, said Phelps. Work also is planned at La Jolla playground and Golden Hill Park and University Heights comfort stations.

October 29, 1939, San Diego Union, B-3:1. Russ to honor "Class of 1892" Friday.

November 4, 1939, San Diego Union, A-4:6. San Diego High School's 7th homecoming.

A ceremony opened the Girl Scout day camp, Camp Wildwood, on the site of Gold Gulch in Balboa Park yesterday, when presentation of a flag pole, its base and a flag and halyard featured in dedication exercises.

San Diego chapter, Daughters of the American Revolution, represented by Mrs. Melnard S. Schur, regent, presented the flag pole; Major Hugh G. Gwynn, chapter, United Daughters of the Confederacy, gave the concrete base, with Mrs. J. E. Boldrick making the presentation; Mrs. Joseph M. Swinnarion presented the flag and halyard, gift of herself and Capt. Swinnerton, in the name of the San Diego Woman's Post 451, American Legion, of which she is a member. Mrs. John Sheafe Douglas, commissioner, and Mrs. J. M. Schelling, camp chairman, accepted the gifts.

Senior Girl Scouts, directed by Mrs. Alice P. Shellenberger, local director, were in charge of the color ceremony. Reading of James Whitcomb Riley's "Old Glory" and singing of "Hail to the Scouts: and "O Beautiful Banner" completed the program. Mrs. H. R. Wilson presided.

Fred Morrison, Community Chest executive, and Girl Scout council members were among those attending.

Registration began yesterday at 9:45 a.m. Scouts will "camp" Tuesday and Thursday, 10 a.m. to 4 p.m., and Brownies Wednesday, 10 a.m. to 3 p.m. Mrs. Earl H. Peterson is in charge of this new phase of scouting in San Diego.

San Diego Chapter, D. A. R., has given camperships as have several individuals and these will provide camping experience for underprivileged girls.

June 24, 1940, San Diego Union, A-4:8. Symphony group seeks backers for summer concerts.

June 25, 1940, San Diego Union, B-2:2. EDITORIAL: John Morley.

He was not in the headlines very often; comparatively few persons knew much about him. But for 27 years prior to his retirement in 1939, John Morley was an important, vital figure in the task of building a great city and in making it attractive. As park superintendent for those years he did more to beautify San Diego; make it a city long remembered by tourists and residents, than any other single individual.

On Sunday he died, leaving as his monument hundreds of acres of beauty; trees that will live for centuries; garden plots that will burst forth in bloom each year; shaded walks and neatly bordered pathways that wind through the scenic settings he helped to create.

John Morley will need no marble shaft or bronze tablet to honor his memory. For every time San Diegans look upon the splendor of their parks, and see this beauty reflected in thousands of well-tended yards, they can recall the career of one of their greatest benefactors, even though they may never have known him. Few men leave behind them a greater heritage or a more enduring monument.

June 27, 1940, San Diego Union, A-3:1. Great floral tribute marks John Morley rites.

June 28, 1940, San Diego Union, B-1:6. Chamber of Commerce Directors unanimously back remodeling of Federal Building for use as a Civic Auditorium; ask City to put up \$50,000 in the 1940-41 budget as sponsor's share of the project cost; estimated cost of the work, including installation of heating, ventilation, stage and seating equipment will be \$156,000; Milton Sessions chairman of Park Board, told directors the park body is in favor of project; Richard S. Requa, architect and member of the Chamber's Civic Committee, said Federal Building was constructed in such a way "that it readily lends itself for remodeling into an auditorium:" says structure as it now stands could not be replaced for less than \$100,000..

September 13, 1940, San Diego Union, A-14:2. Naval Station band plays concert at the Rosecrans Street bandstand tonight.

September 14, 1940, Letter from Gertrude Gilbert, et al to Honorable Mayor and City Councilmen, Civic Center, San Diego, California.

Gentlemen:

We wish to call to your attention the unsightly and serious exterior condition of many of the world famous exposition buildings in Balboa Park.

We are reliably informed that this condition has resulted because of neglect to annually inspect the exterior of these buildings and to renew the waterproofing and painting where and when required to prevent moisture penetrating the surfaces and disintegrating the stucco and staff ornamentation.

We are further informed that the exterior condition of these buildings is now so serious that, unless repairs are made immediately, before the beginning of the winter rains, the further damage will be so extensive as to make necessary the renewal of large areas of the stucco and ornamental staff work.

The value of these beautiful buildings, considered only from the standpoint of a tourist attraction is incalculable, and therefore they must not be allowed to be destroyed.

We urge therefore that arresting of further damage before the coming of the rainy season be considered an emergency and that funds be provided to immediately do the necessary waterproofing and repairs.

We further urge that in next year's budget, as estimated to be required, a sum should be allocated to complete the necessary patching, repairing and refinishing, and that each year thereafter an adequate sum be provided for the maintenance of the exteriors of these buildings.

We have been advised by Mr. Richard Requa, the architect for the last rehabilitation work, that the immediate repairs required consist of the following: the waterproofing of domes, towers, tops of parapets and projecting cornices; treatment with waterproof paint of the finials and other staff ornamentation directly exposed to the rains; temporarily fasten in place or temporarily remove ornamentation that is in danger of falling; filling cracks and patching holes in wall surfaces. It has been estimated that these repairs will cost approximately \$5,000.00.

We trust your honorable body will realized the urgency of this matter, and provide the funds and have the repairs made before the start of the winter rains.

Very sincerely yours,

(Signed) Gertrude Gilbert, President Amphion club; Mrs. Meinard A. Schur, Regent, San Diego Chapter, D. A. R; Elizabeth H. Frazer, Secty. Astrologians' Guild of San Diego; Marion M. Roberts, Pres. Pan-American League; Mrs. Frank Von Tesmar, Chairman S. D. Woman's Phil. Com; Mrs. Maurice F. Herschel, Past President Pan American League; Mrs. Lester G. Bradley, Sec'y of the S. D. Branch - English Speakers Union; Marguerite N. Barron; Mary Vivian Conway, President Stonewall Jackson Chapter, U. D. C., Past President Alliance Francaise; Mary V. Jones, President of University Women's Club.

October 14, 1940, San Diego Union, B-7:1. Scout-O-Rama draws crowd at Ford Bowl.

October 16, 1940, Letter, From: The Chief of the Bureau of Medicine and Surgery; To: The Chief of the Bureau of Yards and Dock, A1-1/ND(031); Subject: Naval Hospital, San Diego, California, facilities for patients, National Archives, Pacific Southwest Region.

1. Naval expansion in the Eleventh Naval District has raised the level of daily hospital patient census above the minimum estimated by this bureau when recommending recent temporary construction at the San Diego Naval Hospital. The present census of 1,000 is approximately 250,300 more than the anticipated load at this time of the year. The plan to make additional housing available in the District in order to step up recruiting and other factors, indicates an expected daily census of 1450 patients in the near future.
2. There are 1273 beds available and 216 now being made available by temporary construction - a total of 1489 beds available by December, 1940. 479 beds are assigned to hospital corpsmen, the marine guard and other personnel that must be housed at the hospital. 1010 beds will be available for patients by December.
3. In view of the above this Bureau recommends the immediate construction of three 2-story H-type, B-1 buildings to house hospital corpsmen and others releasing approximately 450 beds for patients.

R. T. McINTIRE

CC: Comdt. Eleventh Naval District
Nav. Hosp. San Diego, Cal.

October 16, 1940, San Diego Union, B-8:1-2. Painting of Indians at San Diego Museum marked by historian's faithfulness, by Ruth Taunton.

October 17, 1940, San Diego Union, B-1:1. Natural History Museum claims tooth whale beached on Pacific Beach strand.

October 23, 1940, San Diego Union, A-3:1. Councilman Harley Knox expressed opposition to granting a use and occupancy permit to the School Board to conduct vocational training classes for aircraft workers in the Federal Building.

A controversy of years' standing over occupancy of the O'Rourke Building, Balboa Park, was settled at a conference attended by the mayor, councilmen and representatives of the Veterans of Foreign Wars and San Diego Zoological Society.

The building long has been occupied by the V. F. W. and also long has been sought by the Zoological Society to house some of its expanding facilities.

As proposed, the Medical Science Building on the northwest corner of the park plaza is to be made available to the veterans, who are to vacate the O'Rourke Building within 90 days. It was estimated it will cost \$4,000 to rehabilitate the Medical Building and the V. F. W., the city and the Zoological Society each is to pay one-third of this cost, it was agreed.

October 23, 1940, San Diego Union, A-4:5. City Council okays lease of 1,000 acres on Torrey Pines mesa for a coast artillery replacement camp.

November 24, 1940, San Diego Union, F-10:7. Christmas party set December 15 in Balboa Stadium.

November 17, 1940, San Diego Union, A-5:1. Council rejects plans to grade 28th Street between Beech and Ivy Streets, 4 to 3.

A large group of property owners expressed fear that the improvement would be an opening wedge to development of 28th Street as a major north-south cross-city artery.

November 27, 1940, San Diego Union, A-5:2-3. Seven San Diego artists win awards at Art Guild reception in the Fine Arts Gallery, by Ruth Taunton.

November 28, 1940, San Diego Union, A-9:5. The Recreational Commission wants the Federal Building for night badminton, basketball and volleyball games and for general recreational gatherings.

City Manager Cooper said the school board eventually plans to use the structure for vocational training classes. The city has approved this plan and any other use would be permitted only until the school board needs the building.

December 1, 1940, San Diego Union, B-1. Tiny trains do big things in Model Railroad Club.

Most of the gear has been stored in Bostonia, efforts to get a permanent location in the park have been without success. Now the members take their trains with them, and "railroad" for an evening at a time on the tracks of the various members.

December 1, 1940, San Diego Union, B-1. Park highway plans revived by the request of the government for more land for Naval Hospital; until the line of the proposed bore under Park Boulevard and south of Laurel Street has been determined the Park Commission has deferred action on Uncle Sam's application.

With an estimated 20 to 30 acres on the flats south of Laurel Street and north of the hospital, the Park Board, according to Irving Friedman, board member, is in favor of making all of this available to the government.

Need for a cross-city highway long has been apparent, said Glenn Rick, city planning engineer, who reported that John Nolen in 1926, provided for such an arterial.

To carry this out, said Rick, the tunnel and two bridges would have to be constructed. Beginning at Pacific Highway, the cross-city artery would lead east on Date Street to Ninth Avenue. This would require opening of the one block between Pacific Highway and California Street.

From Ninth Avenue east a bridge would be constructed across the Eleventh Avenue, or Cabrillo Canyon, after which the road would wind up Gold Gulch of exposition fame to a point west of Park Boulevard, and about 1,000 feet south of Laurel Street, where it would tunnel under Park Boulevard and the street car tracks.

Emerging on the east of the tracks, the highway then would dive down a canyon, cross Florida Street over a proposed bridge, and continue northwesterly up a canyon and west of, almost parallel to Pershing Drive, until it joined that thoroughfare near Redwood Street.

At present, he emphasized there is only one east-west road through the park. This is over the Laurel Street bridge to Park Boulevard, then down a park road north of the Canadian Legion Building to Pershing Drive. This, he said, is inadequate because of narrowness of the road and grade conditions.

He made it clear that the two-bridges-and-a-tunnel route would be expensive to build and is only a proposal, but pointed out that as it probably will be constructed someday, it is essential that the city retain the land necessary for the tunnel.

This land would be the north boundary of the site requested by the government.

December 1, 1940, San Diego Union, B-4:1-3. Obedience tests to be feature of Silver Bay Kennel Club's 9th annual Dog Show next Saturday and Sunday in Balboa Park.

December 1, 1940, San Diego Union, C-7:6-8. County-wide Art Guild Show at Fine Arts Gallery wins interest, by Julia G. Andrews.

December 20, 1940, San Diego Union, A-6:1-4. Braille Club holds Christmas party in the House of Hospitality.

December 20, 1940, San Diego Union, A-11:1-4. Artists open Spanish Village Yule display.

December 21, 1940, San Diego Union, A-7:1. Scenes shot of Orson Welle's production of "Citizen Kane" in Balboa Park.

December 21, 1940, San Diego Union, A-9:1. Federal funds possible for park road.

Proposed establishment of federally financed vocational training classes for aircraft workers in Balboa Park may be made possible to obtain national defense funds for construction of a new road from 11th avenue canyon to the park Palisades area. According to Fred Rhodes, city public parks director.

At present, said Rhodes, a steep and narrow road leads from the 11th canyon road up the hill and comes out just north of the Federal Building on E. Palisades drive. This could not be improved, he said, without ruining a beautiful section of the park.

December 22, 1940, San Diego Union, C-7:6-8. Spirit of Yule dominates Fine Arts Gallery; Reginald Poland to give talk today on Christmas room; school exhibit offers treat in craftsmanship, by Reginald Poland.

December 22, 1940, San Diego Union, B-11:4. Spanish Village artists hold "open house."

December 23, 1940, San Diego Union, A-1:2-3, A-7:6. Around-world Christmas parties held at House of Pacific Relations yesterday.

December 25, 1940, San Diego Union, B-1:4. Bonham Brothers Boys Band sponsors gave Christmas party for members of the Bonham Brothers Boys Band yesterday in the American Legion Building, Balboa Park.

December 27, 1940, San Diego Union, B-12:5. Tentative plans formed for rerouting road at a Civic Center conference yesterday attended by state and city officials.

The agreement provides that:

1. The State will acquire on behalf of the city, the necessary rights of way within the city limits, but outside of Balboa Park, and
2. The voters will be asked to take the Eleventh Avenue canyon roadway out of the park system and place it in the city's street system.

December 29, 1940, San Diego Union, A-9:1. Fine Zurburans acquired by Fine Arts Gallery, by Reginald Poland.

The acquisition of the Zurburan "Still Life" by the San Diego Fine Arts Gallery this year, together with the lovely portrait of the artist's daughter, now makes the study of the four important phases of this master possible in our gallery.

December 29, 1940, San Diego Union, B-1:7, B-2:1. Page from rare Gutenberg Bible on display at Fine Arts Gallery; exhibit marks anniversary of printing trade, by Ruth Taunton.

December 29, 1940, San Diego Union, B-3:1. Torrey Pines fight for life on bleak bluff; the Army is moving in on one of America's rarest spots.

December 29, 1940, San Diego Union, C-7:6-8. Fine Arts Gallery plans unusual exhibition; paintings from 79 countries will be shown here in January, by Julia Gethmann Andrews.

December 29, 1940, San Diego Union, C-10:1-4. De Wetter, Requa collection of prints widely commended in local exhibitions, by Dr. Scott E. Watson.

December 29, 1940, San Diego Union, J-7:4. Boy Scouting aids building of character ,by Merle J. Krulish, field scout executive.

December 29, 1940, San Diego Union, J-7:8. San Diego Roque Club in park offers rare diversion.

December 29, 1940, San Diego Union, Annual Review. Natural History Museum offers rare displays.

December 29, 1940, San Diego Union, Annual Review. Story of Man is depicted in the San Diego Museum.

December 29, 1940, San Diego Union, Annual Review. San Diego friendliness well expressed by its House of Hospitality.

December 29, 1940, San Diego Union, Annual Review. San Diego Zoo internationally known; valued specimens exhibited in replicas of own habitats.

San Diego's world famous zoo draws an average of 1,083 visitors every day, and indications are that the figure will be exceeded in 1941. The zoo population is growing and during the year several rare specimens have been added.

San Diego Zoo's expansion program includes two new buildings, which are expected to be completed by June. These are an educational building with an auditorium and display rooms for the \$75,000 collection of African trophies given to the zoo by Fred Lewis, Pomona; and a building for small mammals, such as the nocturnal animals.

Noted scientists have done research work at San Diego Zoo and Mrs. Belle Benchley, zoo director, said she believed visiting scientists would accept the invitation of the San Diego Zoological Society to lecture to its members and friends and that the auditorium would be used for such purposes.

Many of the 391,780 persons who have visited the San Diego Zoo in the last year have included out-of-town visitors who have praised the zoo here as one of the finest in the world, not only because of its rare exhibits, but also because of the outdoor grottos and living conditions that are as nearly like the animals native state as possible.

In San Diego Zoo's gigantic outdoor bird cage, tallest in the world, are many rare birds from distant lands. A pair of Manchurian cranes, prized as sacred birds in their native country, is a recent gift to San Diego Zoo by Marquez Hachiskua, Japanese scientist and nobleman. He visited the local zoo last year.

When transportation can be arranged, three young Indian elephants will be brought here from Calcutta.

Among the zoo's "only in captivity" residents are four Lesser Pandas from China, which are doing well in their new homes, and three spectacle bears from the Andes mountains. Two pink hippopotami and a pair of Malay tapirs are among the animal newcomers brought her by Dr. Harry M. Wegeforth, president of the San Diego Zoological Society, when he returned last summer from an expedition to the Orient.

Mrs. Benchley and Dr. Wegeforth see themselves in the "only" class. Mrs. Benchley is the only woman zoo director in the world. Dr. Wegeforth probably is the only backyard circus boy who made his dreams come true by founding a zoo now praised as one of the world's finest.

Wegeforth Bowl, the zoo's outdoor amphitheater, is named in honor of Dr. Wegeforth. There at 2 and 4 p.m. daily, except Monday, the zoo presents a trained sea lion act. Some of these clever performers appear occasionally in movies.

The bear comedians that perform impromptu style in their grottos for the reward of peanuts from amused spectators rival the denizens of Monkey Mesa as laugh-getters.

Ten baby bears frisking in a grotto are one of the zoo's entertaining sights now.

December 29, 1940, San Diego Union, Annual Review. Mbongo, Ngagi, mountain gorillas, widely known.

December 29, 1940, San Diego Union, Annual Review. Reticulated giraffe aristocratic specimen from British East Africa.

December 29, 1940, San Diego Union, Annual Review. Spectacle bears featured at San Diego Zoo.

December 29, 1940, San Diego Union, Annual Review. Brown rock wallabies interesting exhibits.

December 29, 1940, San Diego Union, Annual Review. San Diego National Guard on duty in Hawaii; officers and men mustered into federal service for one year.

December 29, 1940, San Diego Union, Annual Review. Paintings by old masters, moderns attract thousands to Fine Arts Gallery annually; new acquisitions supplement many valuable exhibits, by Reginald Poland.

December 29, 1940, San Diego Union, Annual Review. Famous outdoor organ boon to lovers of music; recitals presented on Wednesdays, Thursdays, Saturdays and Sundays throughout the year; Royal A. Brown, present recitalist.

December 29, 1940, San Diego Union, Annual Review. Stellar music attractions throughout year, by Sally Brown Moody.

December 29, 1940, San Diego Union, Annual Review. San Diego expands rapidly; becomes United States fastest growing city.

1941

Summary of Events in 1941

(Notes: Dates of events are approximate only.)

WPA Modernization Program at Zoo (January 19, 1941)
Competition From Municipal Golf Course (January 19, 1941)
Removal of Model Farm House (January 26, 1941)
Voter Approval of Plans for (Cabrillo) Freeway (March 26, 1941)
Plans to Raze Food and Beverage and Electric Buildings (April 4, 1941)
25th Anniversary of San Diego Museum (April 6, 1941)
Ceding of Land to Naval Hospital (April 22, 1941)
Death of Richard S. Requa (June 11, 1941)
Death of Harry M. Wegeforth (June 26, 1941)
Symphony Programs for Ford Bowl (June 29, 1941)
New Traffic Control System for Ford Bowl (July 16, 1941)
Death of Patrick P. O'Rourke (July 17, 1941)
Death of Sherman Trease (July 27, 1941)
Dog Show in Federal Building (August 4, 1941)
Opposition to Putting Radio Station in Park (August 17, 1941)
National Guard Regiment in California State Building (August 19, 1941)
Hobby Show in Federal Building (August 19, 1941)
City Council Authorizes Rental of Ford Bowl
to American First Committee (September 17, 1941)
Balboa Troop Sponsors Horse Show (September 28, 1941)
City Council Okays USO in Food and Beverage Building (October 19, 1941)
Naming of Pan-American Plaza (November 5, 1941)
ROTC Semi-formal Ball in American Legion Building (November 20, 1941)
Electric Show in Palace of Better Housing (November 26, 1941)
DECEMBER 7 - PEARL HARBOR
U. S. Army Takes Over Indian Village (December 9, 1941)
U. S. Navy Takes Over 12 Buildings; Says It Will Take Over
Another 4 (December 24, 1941)

January 11, 1941, San Diego Union, A-4:2-3. New refrigerators at San Diego Zoo to keep food fresh for animals; new entrances planned.

January 19, 1941, San Diego Union, A-14:1-8. San Diego Zoo to rank as one of the best on earth after \$480,000 modernization program sponsored by WPA.

Fine as it already is, San Diego's far-famed zoo is going to be made finer, and work to reach that end will start in just a few days. That announcement was made yesterday and was accompanied by the prediction of zoo authorities that when the current program is carried out to its end and the blueprints are filed away, this city's zoo will be one of the very best on earth.

Completion of the program will be accomplished with the aid of a work projects administration fund of \$480,000, authorized last November.

Much of the money that will be made available will be spent on places to house the rapidly increasing number of animals and birds which come to the zoo; but a lot will be spent on lifting the face of the zoo's home in Balboa Park. All of the old exposition buildings, which have been remodeled by the zoo and made over from time to time, will be torn down and in their places will be three fine structures designed by architects assisting in the big task.

The work of improving the quarters for animals and birds will begin at once. Work on the new buildings will have to wait at last a few months until cantonment and allied construction throughout the country slows down. The big reason for this delay, of course, is that carpenters and other workers on building projects have about all they can do just now getting ready for the nation's new army and its housing problems, also the big airplane and munitions plants which are being rushed to completion.

The zoo authorities have been able to control about all the animals and birds which have been sent to them, but they have not been able to handle the insect problems which face them. In fact, they have not been able to stop the devastating work of termites in the old exposition buildings which the zoo is now using.

As a result, it is declared, most of the buildings are in bad shape and almost beyond successful repair

"When we are through with the new program<" said Dr. Harry M. Wegeforth, the zoo's head, "we shall have three fine new fireproof buildings, they also will be termite-proof, being made mostly of concrete and steel.

"First of the new buildings in importance will be a fine auditorium seating 640 persons. That, of course, we be used mainly by the thousands of city and county school children who are brought here each year to get their natural history lessons first-hand. We shall continue to provide lunches or parts of lunches for these children, but we shall be able to serve the food in a modern café building. Our café is a big feature of the zoo now, as thousands of tourists visit it each year. As a matter of fact, we figure that nearly 70 percent of our adult visitors come from out of town. That shows what an attraction the zoo really is.

"A building for small mammals is also to be built before we complete our big task. That will fill a real want in our zoo.

"We have been planning in past years to provide a zoo layout for a city of 150,000 population. But recently we have lagged behind, the city having grown so fast that we could not keep pace. This WPA project ought to see us in front again.

"We already have one of the finest commissaries in the west, and we hope to keep up that good record. We store immense quantities of meat, vegetables and other food for our animals and birds and by the most modern refrigeration methods we keep all that food ready for use at any time, months ahead, if necessary. And thus we are able to buy stuff when it's cheap ad save a lot of money."

January 19, 1941, San Diego Union, B-1:8, B-2:1. Golf Course row put before City Council; municipal golf course in park is not competing with private golf courses in San Diego County; course grossed \$40,853 in the 1939-40 year for a net profit of \$8,826.97, excluding the use of water, which, if included, would put the course \$791.49 in the red.

January 21, 1941, San Diego Union, A-4:1-4. Proposed inland highway realignment mapped; state and city officials plan park freeway.

January 24, 1941, San Diego Union, B-1:2-3. Water limit on golf courses seen likely at summer peak.

January 26, 1941, San Diego Union, A-4:4-7. Model Farm House "goes to sea" on wheels; house being moved to Navy Field.

When a bark-rigged, five-room house comes to port --- strong men decide that it's time to sign the pledge.

Viewed from the foot of Columbia Street yesterday, it seemed that just such a maritime cataclysm had taken place. For there, in the gray light of early morning, was a five-room house, from above which sprouted three masts, two of them square-rigged.

A closer view, however, showed that it was all in order. The house, on movers' "dollies," merely had paused a moment along the south Embarcadero, just in line with the towering spars of the old bark Star of India.

The house was built at the model farm in the 1915 Exposition. Later it became the home of the late John Morley, park superintendent, and was occupied by him until his death last year. Now in the way of proposed expansion of the zoo, it had to be disposed of.

About that time, along came Joe Brennan, port director, perennially on the lookout for anything which might be of use along the waterfront --- from palm trees to buildings. They needed just such another building to be used as an officers' clubhouse at Navy field, where the enlisted man already have been fitted out in a similar fashion. So two small wings of the house were sawed off to facilitate moving and the rest of the building, cobblestone chimney and all, has been towed to the waterfront to start life anew.

January 26, 1941, San Diego Union, A-6:1-2. San Diego Zoo seals, bears rehearse acts soon to be presented in show.

January 29, 1941, San Diego Union, B-1:1. Special election March 25 for park highway plan; \$1,000,000 ready for work on new city gateway.

January 31, 1941, San Diego Union, A-4:6. Chamber of Commerce endorsed park freeway.

February 2, 1941, San Diego Union, C-3:6-8. House of Pacific Relations group holds spirit of goodwill, by W. B. France.

February 5, 1941, San Diego Union, A-4:8. Federal Government requests 22 acres of Balboa Park land for Naval Hospital expansion; proposition will be voted on April 22.

February 8, 1941, San Diego Union, B-1:3. Resolution to be placed on ballot April 22, general municipal election, to withdraw 21-32 acres from Balboa Park and deed to the government for enlargement of Naval Hospital.

March 8, 1941, San Diego Union, A-3:2-4. Landscaped center area to divide parkway (drawing).

March 8, 1941, San Diego Union, B-2. EDITORIAL: The Park Road

The only proposition on the ballot at the city primary this month will be the one providing for the transfer of sufficient park land to the city to enable the construction of a traffic artery, beginning at Ash Street, following the general lines of Eleventh Avenue, connecting with Sixth Street extension and out over Camp Kearny mesa. No money is involved; no bonds are to be issued.

The proposition should be approved because the city needs the highway now and the need will continue to grow. It follows a park canyon, and, regardless of the volume of traffic that would flow over it, there would be nothing in the construction of the roadway to detract from the beauty, the utility or the safety of the park. In fact, the site is being used as a road now. The proposed new highway would be wider, better surfaced, and much safer.

San Diego lacks sufficient arterial highways, and the congestion on main highways will continue to grow worse until a remedy is provided. The park road is the logical immediate remedy. It can and will be a tremendous benefit. The proposition should, by all means, be approved.

March 12, 1941, Christian Science Monitor. City Reflects Nation's Stern Resolve, by Virgil Wyatt.

SAN DIEGO, Calif. --- This once serene California city of quiet residential streets flanked by the ever-present palm tree, and the quaint Mexican-style patios --- has awakened to find itself one of American's "boom towns."

Heralded far and wide --- in newspapers in Los Angeles, San Francisco and elsewhere, in magazines and news reels as the Pacific Coast's No. 1 "boom town," San Diego today is a study in contrasts.

"Well, it's her. I suppose now's the time to make the most of it," observes the old-timer who has lived here 10 years or more (the native is a pioneer).

Traffic Problem Rises

"Yes, I guess you're right, but somehow I miss the middle-sized city we had before the grown-up small town, where you could meet your friends along Broadway, or on the streetcar or bus, and where you could fake 'time out' for a leisurely chat. Too bad, in a way, that we've become a big city, don't you think?"

For the San Diego of March 1941 is a far cry from even the San Diego of a year ago.

The streets are jammed with out-of-town automobiles. A serious traffic problem has developed overnight, as traffic police strive vainly to untangle the snarl of cars on the main downtown streets. The line of tooting automobiles often extends through two or more traffic signals. As a result, the city is banning left-hand turns in the congested district in order to speed up traffic --- and still automobiles pour into the town hourly.

The city of 1941 is a picture of contrasts because of the clash between the Nation's desire for peace and its determination to prepare to defend that freedom of thought, assembly and worship.

Haven of Quietude Left

No where else in the West is this so forcibly depicted as in San Diego where huge aircraft plants are working day and night to turn out giant bombers, fleet pursuit and observation ships for the armed forces --- yet within a few blocks the representatives of the nations of the world are laughing and singing together in the famous House of Pacific Relations.

This unique institution, established in the peaceful days of the 1935 California Pacific International Exposition, is still bravely carrying on in Balboa Park.

Situated in a group of graceful cottages around the corner from the Spreckels outdoor organ, this organization of Americans with various national heritages still maintains the sentiment that would beat swords into ploughshares and spears into pruning hooks.

Over these peaceful cottages fly the flags of the world --- many of which "over there" are temporarily at half-mast.

Here the nationals of China, Czechoslovakia, Denmark, Finland, Germany, Ireland, Italy, Japan, Yugoslavia, Latin America, Norway, Poland, Russia, Scotland and the United States are displaying to the world that a league of nations is still feasible.

Striking the keynote of the House of Pacific Relations, John Johnson, President, says:

“The general attitude of the House of Pacific Relations and its member groups is that the situation in Europe is not instigated by the people, but by their leaders. We sincerely believe --- and have proved --- that the various people can live together in amity, as we do here.”

The 15 cottages are operated under articles of association which declare, in part, the following purpose, “to bring into closer acquaintance the people of the various nationalities and groups represented in its membership, in order to foster and cultivate a spirit of understanding, tolerance and good will to the end that we will all be better Americans.”

Carrying out this high purpose, these groups hold open house each Sunday from 2 to 5 p.m. and on the first Sunday of each month from April to November, these organizations take turns in giving a public program in keeping with national customs. Actually, the various Houses join in presenting the Fiesta of the Nations.

A Plunge Into Activity

Propagandists and “fifth columnists” are kept out of the groups through a constant check of the various memberships, according to Mr. Johnson. If any problems arise, they are solved at the monthly meeting of the House, attended by the officers of each of the participating groups. Truly, San Diego has a workable “League of Nations,” based on good will and cooperation.

But as soon as one leaves the quiet greensward and rock-bordered ponds of the House of Pacific Relations, he finds ample evidence of the “new San Diego” --- a city that is rapidly outgrowing its winter clothes.

Not only are the streets crowded with 24-hour holiday spirit, but the merchants are wearing broad smiles each day, as defense workers, soldiers, marines, sailors and civilians are spending at the rate of \$155,000,000 annually --- up near 30 percent as compared with a year ago.

Of this payroll, the civilian workers, exclusive of aircraft employees, are spending \$57,500,004, with the 20,000 aircraft men and women pouring \$34,000,000 each year into the trade channels. This amount is up \$24,000,000 since a year ago, and there will be more than 15,000 additional plane craftsmen in San Diego by midsummer.

March 13, 1941, San Diego Union, B-1:1-4. Voters’ approval necessary for park highway.

March 14, 1941, San Diego Union, A-7:1. Tideland site for housing may be altered.

March 14, 1941, San Diego Union, A-7:5. Plans for making Balboa Park the center of picnic conventions for all state societies to be discussed.

March 14, 1941, San Diego Union, A-7:2-3. Amusement Center proposed for foot of Market Street.

March 18, 1941, Minutes of the Board of Park Commissioners.

President Sessions brought up the matter of removal of the Food and Beverage Building and the Federal Housing Building in Balboa Park. He suggested that the Commission recommend to the City Manager a study of the feasibility of such removals, inasmuch as they demand costly maintenance of staff, plaster walls, skylights, etc.; inasmuch as floor arrangement is such that they are not readily adaptable to general use; inasmuch as the fire hazard is of material consequence and that the heating problem in the Food and Beverage Building is such that the expense is considered prohibitive; moved and carried that feasibility study be made.

March 19, 1941, San Diego Union, A-6:5. Parkway seen as \$1,000,000 gift to city.

March 20, 1941, San Diego Union, A-4:1. Two-thirds majority needed on parkway.

March 21, 1941, San Diego Union, B-1:1. Board of Harbor Commissioners voted tideland sites for dormitories.

March 21, 1941, San Diego Union, B-1:3-4. San Diego Rose Society urges park rose garden.

March 23, 1941, San Diego Union. Admiral C. A. Blakely, Naval Commandant, indorsed proposed Cabrillo Parkway; George W. Marston said he considers the Cabrillo Freeway the answer to "the extreme necessity of another broad modern thoroughfare from north to south."

March 23, 1941, San Diego Union, A-1:2. Park Director W. Allen Perry, in letter to City Manager, recommends demolition of Food and Beverage Building, 54,000 sq. ft., and Federal Housing Building (Electric Building), 43,800 sq. ft.; cites maintenance cost and fire hazard.

March 25, 1941, San Diego Union, B-1:6. Hammer Club backs Cabrillo parkway plan.

March 26, 1941, San Diego Union. Park freeway wins in light voting; parcel one equals 37.54 acres, parcel two equals 0.84 acre.

Yes	24,661	No	3,110

March 27, 1941, San Diego Union, A-3:1. Freeway through park via 11th Avenue canyon road won in primary election Tuesday; 8 to 1 vote tallied.

March 30, 1941, San Diego Union, A-14:4. Half-Minute Interviews: G. Aubrey Davidson upset over proposed removal of two buildings in Balboa Park.

March 31, 1941, San Diego Union, B-10:3 Two Kansas communities represented at park picnic yesterday.

April 1, 1941, Minutes of the Board of Park Commissioners

The Director read a copy of a letter addressed to the Executive Committee of the San Diego Chamber of Commerce by Mr. Richard S. Requa, A.I.A., relative to the preservation of the buildings in Balboa Park.

April 4, 1941, San Diego Union, 1:5. Chamber of Commerce directors unanimously opposed to current moves to raze two park buildings; urge City to put sum for repairs in annual budget.

April 6, 1941, San Diego Union, A-6:1. San Diego Museum group to mark 25th anniversary.

April 7, 1941, San Diego Union, 7:6. Park Commission favors razing Food and Beverage and Federal Housing Buildings.

April 19, 1941, San Diego Union, A-3:1-2. Military leaders approval local vocational training

Larry Boeing, in charge of aviation industry training and superintendent at the Ford building, said that only 800 have enrolled, and that all men desiring to take the free vocational work should apply at once.

The school, in which \$200,000 worth of equipment is being installed, was officially opened Monday.

April 23, 1941, ELECTION - Vote for ceding land to Naval Hospital

Yes	9,363	No	2,297	(4 to 1)

May 11, 1941, San Diego Union, B-1:1. Program set for opening of municipal pool; throng expected to view in varied games next Sunday.

May 12, 1941, San Diego Union, 4:7. Permanent committee to stage annual anniversary celebration formed at luncheon yesterday; will consist of chairman of Park Commission, president of Federation of State Societies and the Heaven-on-Earth Club.

May 25, 1941, San Diego Union, A-4:1. Five-hour program to mark park's 73rd birthday; dedication twice attacked in courts.

May 26, 1941, San Diego Union, A-2:1-2. Park founding date marked at a program at 6th Avenue and Laurel Streets; Milton P. Sessions, president of the Board of Park Commissioners, told the story of the park.

June 1, 1941, San Diego Union, C-3:7-8. San Diego's amateur actors, actresses keep traditional "stage show" alive, by W. B. France.

June 7, 1941, San Diego Union, A:1-3. Fine Arts Gallery unveils portrait by Velazquez.

June 7, 1941, San Diego Union, A:2-3. Infanta Margareta favorite subject of old master, by Reginald Poland.

June 10, 1941, San Diego Union. City Council dedicates right-of-way for Cabrillo Freeway.

June 11, 1941, San Diego Union, 10:1. Richard S. Requa succumbs; architect for Civic Center.

June 13, 1941, San Diego Union, 17:2. Chamber of Commerce pays tribute to Richard S. Requa.

June 26, 1941, San Diego Union, A-6:3-4. H. M. Wegeforth, Zoo founder, physician, dies.

Dr. Harry M. Wegeforth, ____, founder and president of the San Diego Zoological Society, died yesterday of a heart attack, in his home, ____ Cypress Way. Services will be held at 1:30 p.m. Saturday, Benbough's mortuary announced.

Dr. Wegeforth as a member of one of San Diego's most prominent families. He was a native of Baltimore, where his childhood interest in circus activities later developed into a tireless effort to develop one of the world's largest zoos.

In 1910 Dr. Wegeforth opened practice in San Diego as a physician and surgeon. His brother, Paul, became associated with him in 1915, and they worked together until the World War, when each was commissioned a captain in the army medical corps.

The zoo had its beginnings in a few animal exhibits used in the 1916 Exposition. Wegeforth Bowl, located in the zoo, was named after Dr. Wegeforth.

In 1936 a plaque was erected in his honor. On it is inscribed: "The San Diego Zoological gardens is a living monument to his ideals, faith and courage." It was dedicated to "Dr. Harry M. Wegeforth, whose wise vision and untiring labor secured this zoological collection and planted this garden for the instruction and enjoyment of the people."

"From earth's far reaches," the plaque is prefaced, "he brought the beasts of the soil, the birds of the air and the fish of the sea, that all might learn the wonders of created life."

In April, 1940, Dr. Wegeforth started a five-month tour of the Near East, India, Indo-China and Saigon in search of new specimens for the zoo. He returned the following August, after collecting 125 animals and 300 birds.

At the age of 9, Dr. Wegeforth started a circus in the yard of his Baltimore “partner’s” home. When 12, he joined a professional troupe of wire-walkers, but an elder brother, Charles, soon had him back home studying medicine. Dr. Wegeforth’s father and give of his 11 brothers were physicians.

He used few animals in his childhood circus, Dr. Wegeforth said in an interview several years ago, but “I had loved animals ever since I could remember and studied natural history.”

One rainy December day in 1916 Dr. Wegeforth came to the editor of **The Union** asking that an article be inserted in the paper requesting persons interested in forming a zoological society to meet with him the following day. Five men responded; all except one were doctors.

Despite his tireless efforts, Dr. Wegeforth never took credit for the tremendous development of the zoo. He attributed it to the teamwork of his associates in the Zoological society, the ability of Mrs. Belle Benchley, zoo executive secretary, the cooperation of San Diego newspapers, and the generosity of persons who donated funds and exhibits.

Survivors include his wife, Mrs. Harry M. Wegeforth; two sons, Lester and Milton Wegeforth; and a sister, Mrs. Emma Tyler.

June 26, 1941, San Diego Union, A-6:5. Services for Carl Heilbron, ___, civic leader, held in Bradley-Woolman, St. Cecilia Chapel yesterday.

June 29, 1941, A-18:1. Funeral rites for Dr. Harry M. Wegeforth held yesterday.

June 29, 1941, San Diego Union, C-4:3-4. Business men indorse San Diego’s Summer Symphonies in Ford Bowl, by Sally Brown Moody.

July 3, 1941, San Diego Union, B-1:2-3. Griffing Bancroft gives 30,000 birds’ eggs to Natural History Museum.

July 3, 1941, San Diego Union, B-1:5-6. Fred Lockwood, city purchasing agent, seeks bids of cereal for San Diego Zoo; 200 tons of mixed rations needed for beasts.

July 3, 1941, San Diego Union, B-1:6. Flag ceremonies tonight at Organ Pavilion; Billy Collier, Boy Scout, will lead Pledge of Allegiance.

July 13, 1947, San Diego Union, A-9:2-3. San Diego Zoo will be converted in to a laboratory for more than 100 San Diego children for the next six weeks, Mrs. Lena P. Crouse, head of the Zoological society educational department, said yesterday.

July 16, 1941, San Diego Union, A-4:1-4. Autos, pedestrians separated by new 11th Avenue branch; drawing showing Pan-American Plaza and area south of Organ Pavilion turned into parking lots and branch road leading to 11th Avenue thoroughfare.

July 17, 1941, San Diego Union, B-14:3. Patrick F. O’Rourke, San Diego attorney, dies at Hospital..

July 18, 1941, San Diego Union, B-1:5. Four penguins can’t fly so are flown in to join San Diego Zoo.

September 18, 1941, San Diego Union, A-1:2-4, A:5. Gorillas join San Diego Zoo; chimps in dither; Mbongo, Ngagi interested.

Kenya and Kivu, the Brenda and Cobina of gorilladom, established residence in the San Diego Zoo yesterday, two doors from Mbongo and Ngagi, whose acquaintance they are expected to cultivate at some future date. They were slightly shy in their new surroundings, but expressed relief over the end of their arduous journey from French Equatorial Africa.

Kenya (pronounced Keen-ya) is the elder of the two. She is 9, and weighs 63-1/2 pounds. Kivu is 5 and weighs 40-1/2 pounds. They are lightweights compared to Mbongo and Ngagi, who weight 618 and 587 pounds respectively, according to Belle Benchley, zoo executive secretary.

The gorillas arrived in crates aboard the streamline train from Los Angeles, after crossing the continent by rail from New York. They spent the last three months in the crates, and took advantage of their new "freedom" to stretch and take a few swings on the bars of the cage.

Kivu was released first into the small house within the cage. Kenya was released directly into the large cage, and received a warm welcome from several hundred spectators who witnessed the arrival of the newcomers.

Neighboring simians received the gorillas with mixed feelings. George Washington, notorious scamp in the chimpanzee cage which separates Kenya and Kivu from Mbongo and Ngagi, was resentful of the attention being showered on the newcomers, and momentarily stole the spotlight by reaching out and snatching off a piece of a photographer's camera.

Kenya thrilled the spectators when she playfully scampered after two other photographers who became venturesome and entered the cage to take pictures. Keepers slammed the door shut just in time to prevent Kenya from playfully grabbing Fred Masters, chamber of commerce photographer, and tossing him over the bars.

Mbongo and Ngagi crowded close against the side of their cage and watched with mute interest. Ngagi shook his head deprecatingly as if to say, "The girls look rather young, don't you think?"

Kivu appeared particularly shy and a little frightened. When she first emerged from the house, Kenya swung down from the bars above, and put her arm around the smaller gorilla in a protective gesture, which brought expressions of sympathy from the spectators.

The names Kenya and Kivu were chosen from more than 300 suggestions made by San Diegans. Mrs. Lena P. Crouse of the zoo education committee, who was chairman of the naming contest, announced that the name Kenya was submitted by Mrs. Frances Kenking of the Pt. Loma High School faculty. Kivu, name of an African lake, was suggested by Mrs. May Yount of Lemon Grove. Both will receive honorary membership in the Zoological society.

The two gorillas were purchased for the zoo by anonymous benefactor, from Henry Trefflich of New York. They were captured by Trefflich's partner, Philip Carroll during an expedition which lasted one year and 12 days, and which netted more than 20 gorillas, eight of which were shipped to the United States aboard the *Otto*, West African liner, which remained at sea 37 days.

Carroll's catch is recognized as a record. He discovered a large gorilla colony in territory controlled by the Free French forces of General Charles DeGaulle, according to Trefflich, who accompanied the two gorillas to San Diego..

Of the other six gorillas brought to the United States, four were sent to the St. Louis zoo and two to the Bronx zoo in New York. If the eight, three were males, and five females.

September 25, 1941, San Diego Herald, 1:1. Talk by Senator Wheeler at Ford Bowl

(Excerpt)

Senator Wheeler, non-interventionist, will speak, maybe, at the Ford Bowl on the evening of October 3 in furtherance of the anti-administration policies which are the conception of himself and Charles Lindbergh, husband to Anne Morrow.

Wheeler will speak because the San Diego city council has rented the Bowl to him --- or, rather, because some of the council have rented the Bowl to him. Two of the council voted against the deal

{Messrs. Flowers and Simpson} --- and strange as it seems, the two that voted against Wheeler were as wrong as the four that voted for him.

Because the important thing in this matter so far as San Diegans are concerned is not whether Wheeler speaks against the administration in the Ford Bowl, but whether the San Diego city council can prove itself intelligent enough to run a push card --- and the noes seem to have it!

The renting of the Bowl to Wheeler, or to the America First Committee for Wheeler's use, was an unfortunate thing to bring before the council, anyhow. The America First Committee should have the grace to leave the city administration out of their controversy, but, as long as the committee has thrown the matter into the council's lap, the council should have used a little brains --- its or somebody else's --- to avoid the trap into which it has fallen.

In other words, the council should simply have notified the America First Committee, as it was notified in Seattle and other cities where there is a modicum of intelligence in city government, that San Diego cannot take part, one way or another, in any controversial subject, or at least in one fraught with the dynamite as this non-intervention thing is --- and then the American First Committee should have taken a meeting place not publicly owned.

October 8, 1941, San Diego Union, A-3:2-3. City Council shouts down plan to sell Balboa Park areas.

October 9, 1941, San Diego Herald, 1:2-3. Selling Park Land

Councilman I-Forget-His-First-Name Simpson may have only been joking in a clumsy way when he proposed a couple of days ago that we should sell part of Balboa Park in order to get money to improve the rest.

If so, it was a silly joke.

And a joke that came with bad grace, because it is just a little while ago that the city council refused to give radio station KGB a lease in the north end of the park because it was afraid that the erection of a radio station would "commercialize" the park.

If Councilman Simpson and his five compadres on the worst city council that we have ever had, would devote as much time to the problem of making San Diego a fit town to live in as they do to such idiocies as selling part of the park they would justify their existence. As it is, they simple are a part of a city government that nobody wants and nobody cares about.

If the city council, for instance, wants to do something about the park and its improvement, why doesn't it consider the advisability of selling the civic center building to the federal government and moving the headquarters of the city and county government into the park, where they belong?

Everybody realizes now that the worst possible site for a civic center is the waterfront --- a site which is surrounded on four sides now by lumber piles and while will always be centered among the unsightly, because no matter what we think about it, a waterfront will always be an industrial district, and an industrial district can never be a rose garden.

Right now, and forever, the federal government needs that civic center building for its own business. It is ideally situated for the navy, for instance, and every square foot of it can be used to advance the needs of the present war emergency.

And so, **The Herald** suggests that Councilman Simpson sit down with some high school boy and let the boy figure out for him some way to get the government to buy the civic center, and then we won't have to go into the real estate business with reference to Balboa Park, but we can move our city and county governments into the park and then they can improve it to their heart's content.

October 19, 1941, San Diego Union, B-1:1-8, B-2:1. San Diego Zoo becomes one of world's largest in two decades.

October 19, 1941, San Diego Union, B-1:5. Dr. Wegeforth's dream realized; Society celebrates 25th anniversary, by Ruth Taunton.

The San Diego Zoological Society is celebrating its 25th anniversary this week.

In those 25 years the society has grown from the desire of a few San Diegans to give better care to a few miserable animals in Balboa Park into the custodianship of one of the world's most famous zoological gardens, with 3,000 fine exhibits housed in a \$4,000,000 plant.

Because it was his idea from the beginning, the late Dr. Harry Wegeforth was the "head and heart" of the San Diego zoo from the October day in 1916 when he first discussed the project with a handful of friends until his death last summer.

Single-handedly, Dr. Wegeforth raised thousands of dollars in the early days, and after he retired from general medical practice because of ill health, he generously squandered the strength left to him by traveling to remote corners of the earth in search of many of the rare animals which one finds in the zoo today.

But the zoo was not built on magic, Dr. Wegeforth often reminded visitors.

When the thought was merely to see what could be done to relieve the unhappiness of some improperly fed, scraggly-looking deer, buffalo and bears that had been left stranded in the park after the 1915 [sic] exposition, it was a fight to get enough to de-louse and feed them.

By 1917, however, Dr. Wegeforth wanted to branch out. A few owners of "animal acts" were looking for good winter quarters for their lions and other cats, and were only to glad to lend them as exhibits in exchange for room and board.

So the physician managed to persuade public-spirited citizens to help him finance suitable wire for cages, which he strung along Park Boulevard, across the street from the Indian Village Boy Scout headquarters.

Sometimes not knowing where tomorrow's hay for the elephants or meat for the lions was coming from, but always holding to a vision that was growing beyond recognition, Dr. Wegeforth's enthusiasm did not abate.

The Union, which in 1916 had carried the story of a physician's concern for neglected animals, began to publish the details of the same physician's rather odd ambition to start a zoo.

The response to **The Union's** stories was so gratifying, Dr. Wegeforth commented on the results in a carefully kept diary which the society hopes to publish. It was the first newspaper publicity that brought to the physician's aid such kindred spirits as Dr. Fred Baker, San Diego pioneer, and Dr. J. C. Thompson, U.S.N., now retired.

Wanting nothing but the best, the new-born board of directors met 25 years ago this month in Dr. Baker's Point Loma home, modeled its by-laws after those of the New York Zoological society, and called itself the San Diego Zoological society.

The organization had been incorporated when the park commission in 1921 set aside the grounds in Balboa Park which the zoo now occupies. The city council confirmed the commissioner's move, and entered into an agreement with the society that it was to have jurisdiction over the zoo so long as it tried to maintain it in a manner that wouldn't bring too much discredit on the city.

In 1922, the society's collection moved into the new quarters. If the list of animals was pathetically small and in many ways a little weird, it was a collection, and Dr. Wegeforth had his zoo --- and his vision of what it must in one day be.

One of his dreams was to purchase some elephants and other fine animals from Frank Buck. They arrived at the zoo along with a bill for \$6,355. Dr. Wegeforth admired the exhibits first, and worried about the money later. When something had to be done, he went to see the late John D. Spreckels, and gave a moving depiction of his financial problems and their causes.

Mr. Spreckels wasn't interested in the zoo, but he was the kind who joke at their own troubles. His financial worries that day concerned some "white elephants" of his own, but he laughingly assured Dr. Wegeforth that if he could show him "elephants whiter than mine, I'll help you."

Arriving back at the zoo with three kegs of white powder and some large bales of cotton, Dr. Wegeforth and his assistants set to work. In time they had two Snow Whites that made up in whiteness for all they lacked in daintiness.

On a fancy pretext, Mr. Spreckels was induced to go to the park at once. When he saw the elephants he first declined to believe it and finally roared with laughter. Next day Mr. Wegeforth received a check for \$7,500. He could not only keep his elephants, but built a pen to keep them in.

The plans of the zoological garden were completed in 1922 when the society took over and have been developed strictly according to this plan. This included the hope of Dr. Wegeforth that he could bring back from his world jaunts rare trees, shrubs, flowers and seeds, which now make the grounds so beautiful.

Belle J. Benchley, only woman zoo curator in the world, went to the zoo as a bookkeeper in October, 1925. Soon after her arrival there were two major events in the history of the zoo. The late Miss Ellen Scripps gave the society its first generous donation and followed it by others totaling \$350,000. The zoo was fenced with her money, the bear grottos were built, and many animals were purchased, including the two famous gorillas.

There was an inventory of 875 animals in the gardens when Mrs. Benchley first arrived, and already Dr. Wegeforth had a few rare animals among these exhibits.

The zoo hospital was built in 1926 and opened in 1927. Many of those on board had long been interested in the relation of human and animal diseases, and the purpose of the zoo hospital was and is not only to make the animals in Balboa Park a healthy, happy lot, but to offer an opportunity for research.

October 19, 1941, San Diego Union, B-1:8, B-2:2-3. Funds totaling \$141,500 available for recreation according to Wayne Neal, federal security agency field recreation representative.

In Balboa Park, it is proposed to rehabilitate and furnish the Food and Beverage Building as a USO at a cost of \$45,000.

The city council Tuesday frowned on a use-and-occupy permit on the ground that the building was too far out of the path of servicemen who gather downtown.

Neal, however, voiced the belief that the park itself is a major attraction to servicemen, and said he will renew his plea for permission to use the building.

Other Balboa Park projects are:

Installation of 14 sets of bleachers with a capacity of 1,540 persons in the Federal Building, and the placing there of a boxing ring and portable basketball goals.

Installation of miscellaneous playground equipment on an undeveloped Balboa Park site south of the tennis courts, near the Indian Village.

Grading, surfacing and illuminating of the softball field south of the North Park swimming pool

October 28, 1941, San Diego Union, A-5:1. Natural History Museum plans all-day trip.

October 30, 1941, San Diego Herald, 3:4. San Diego Zoo

The San Diego Zoo is on the air.

On Saturday, October 25th, at 5:30 p.m., the Southern Title and Trust company started a series of weekly programs over radio station KGB featuring Belle Benchley, world-famous executive secretary of the San Diego Zoological Society in "Zoo Tours."

"We are particularly grateful to our sponsors for starting these interesting and educational broadcasts," Mrs. Benchley declared.

The San Diego Zoo, now one of the largest and most famous in the world, was started by the late Dr. Harry Wegeforth, and four associates in October, 1916. Starting with a handful of poorly fed and odd assorted animals left over from the 1916 Exposition, Dr. Wegeforth, with the help of civic-minded San Diegans, built the Zoological Gardens into the far-flung home of 3,000 animals, many of then the only ones in captivity. Mayor Benbough has issued a proclamation urging all San Diegans to become better acquainted with their world-famous zoo.

During the "Zoo Tours" programs, which will be presented each Saturday at 5:30 p.m. by the Southern Title and Trust Company, Mrs. Benchley will escort a little girl on a personally conducted tour of the zoo, and will tell some of the interesting stories about the various animals and birds. It will be a treat you can't afford to miss, according to sponsors of the program. Mrs. Benchley, author of the best seller, "My Life In a Man-Made Jungle," was featured over a Mutual network last year, scoring a tremendous hit.

December 10, 1941, Letter from Byron McCandless, Captain, U. S. Acting Commandant, 11th Naval District to W. W. Cooper, City Manager.

Dear Sir:

In accordance with previous agreements between the Commandant's Office and the City of San Diego, you are advised that I have this date authorized the Commanding Office of the U. S. Naval Hospital, San Diego, to take over the following buildings in Balboa Park to provide for urgent additional hospital facilities.

Nos. 11 & 12, 13, 15, 16, 19, 20 & 60. This is to be effective from noon, December 10, 1941.

In addition to the above buildings, you are advised that the following additional buildings will probably also be required for Naval purposes, and, accordingly, you should make no commitments on turning over any of these to the Commanding General of the U. S. Army, whose headquarters are now located in Balboa Park: Nos. 20, 34, 37 & 41.

Very truly yours,

(Signed) Byron McCandless
Captain, U. S.

December 10, 1941. Balboa Park taken over by U. S. Navy for Training Center; named Camp Kidd.

December 10, 1941, San Diego Union, A-1:7-8. President Franklin Delano Roosevelt brands Germany, Italy foes; United States planes blast Japanese transports.

December 10, 1941, San Diego Union, A-1:3, B:2. San Diego blackout law adopted.

December 12, 1941, San Diego Union, A-1:2. Balboa Park goes military.

Balboa Park, San Diego's great 1400-acre cultural and recreational asset has gone to war along with the nation, but occupation of some facilities by the military establishment will not deny people the use of other parts of their prized park.

The statement came from government sources yesterday as the military relaxed rules which had halted traffic on Laurel Street through the park since Tuesday night.

Ironically, the famed House of Pacific Relations, is one of the park facilities that “has gone to war” and is being used in the defense effort.

“The government asks the public’s cooperation to carry out any emergency regulations that may be effective from time to time,” a spokesman for the military establishment said last night.

Institutions such as the Fine Arts Gallery, the San Diego Museum of Natural History and a number of other cultural agencies will continue to offer their facilities to the public. Recreational facilities, with some important exceptions, also will continue to be available, subject, of course, to any emergency rules that may have to be promulgated.

The park went to war as part of the government’s program to strengthen America’s seacoast lines of defense.

Thus today, as in 1917, Balboa Park has again donned a uniform for national defense.

December 14, 1941, San Diego Union, B-2:2. San Diego Zoo ready for emergency.

The 3,000 “citizens” of the San Diego Zoo are ready for any emergency, officials of the Zoological Society said yesterday.

“The shelters for most of our animals were originally designed and built to be practically earthquake proof,” said Belle Benchley, executive secretary. “That was considered to be our greatest danger. However, with the advent of war, these shelters are sturdy enough to resist anything short of a direct hit. Actually, they are excellent air raid shelters and hence the animals are well-protected.”

A comprehensive plan for protection of the public against an animal stampede in case of a bombing has been put into effect, according to Mrs. Benchley.

“We have worked out a plan whereby each of the 35 men on the zoo staff will report immediately to the grounds in case of need,” she said. “Each man will go to his post in order to supervise the animals in case of an attack. Each man is equipped with a high-powered gun, which he will use if it becomes necessary to prevent danger to the public through possible escape of dangerous animals.” During a recent blackout, 26 men got through to their posts.

The repair and servicemen are under orders to “stand by” at the zoo warehouses in case of bomb damage. The huge glass windows of the snake house are protected by shutters at night as an additional protection.

“The zoo is remaining open, and doing business as usual, and I know that people will continue to get relaxation here at a time when they need it so much,” Mrs. Benchley said.

December 14, 1941, San Diego Union, C-7:6-8. Reginald Poland to discuss Fries exhibition; Fine Arts Gallery installs Christmas gifts.

December 14, 1941, San Diego Union, D-7:1-3. “Refugees” of park seeking quarters, by Irene M. Clark.

“Now we know how it feels to be a refugee.”

Tired club women thus sighed yesterday as they returned home from removing furniture and possessions from clubrooms in Hospitality House (House of Hospitality), which, since the fall of 1936, has housed so many women’s organizations of the city. Suddenly ousted by demands of civilian defense, the clubs now are scurrying about seeking new quarters. Some already have found haven, but now that the House of Hospitality is no longer theirs, its exquisite beauty and fitness for their purposes and memory of the happy hours spent in this unique women’s building, claimed to be the only one of its kind, are adding to the general nostalgia of a wartime regime.

One of the first to move, as it was the first to occupy one of the clubrooms, was San Diego Chapter, Daughters of American Revolution. This chapter now will meet in the Wednesday clubhouse and is "farming out" or storing its possessions, furniture, dishes, antiques, pictures and historical records, which made their room so homelike and useful. The chapter, according to Mrs. Cecil W. Neff, who then was regent, moved into the lovely Spanish structure soon after the last exposition closed in the fall of 1936 from its then quarters in the O'Rourke Institute and added to its furnishings with much enthusiasm.

San Diego branch American Association of University Women, which has occupied a suite of rooms on the second floor of the loggia for more than five years, yesterday sadly puts its beautiful homey furniture, its grand piano and its pride in them away in storage "for the duration," and threw in its lot with the San Diego Women's Club, at least so far as use of its building is concerned.

Pan-American League, another organization which had been "living" at the House of Hospitality now is casting about for a place large enough and central enough to hold its monthly luncheons.

A meeting place at the Young Women's Christian Association has been obtained by the Delphian Club, which has been growing in number and importance and needs a good-sized auditorium.

Other organizations which have been meeting at the House of Hospitality and had not yet fully decided on homes yesterday are the Stonewall Jackson and Hugh Gwyn chapters; United Daughters of the Confederacy; Native Daughters of the Golden West, Parlor 206; University Heights Mothers' Club; Druggist Auxiliary; Entre Nous Club; San Diego Women's Post 451, American Legion; Eight and Forty; the Order of the Purple Heart, San Diego Teacher's Association; 13 state college fraternities and sororities as well as several men's organizations.

Probably no one has a better right to feel like a refugee than Mrs. John Ward, whose business acumen, tactful management and social aplomb has made this building fulfill its function as the heart of San Diego's charming hospitality.

"To be a hostess in the Gold Room," said Mrs. Ward, "is service taken over by volunteers from various clubs of the city, one being there every day." . . . Hardly a week has gone by that did not see at least 1500 persons in the building during the week, at meetings of some sort and thousands have dropped down to rest on the comfortable lounges in the beautifully appointed Gold Room or over the tables in the Café del Rey Moro.

It was not easy to "sell" the idea of the building as a meeting place at first, Mrs. Ward recalled, and paid tribute to the valiant work done during the first six months by Mrs. J. W. Jennison who first undertook to run the establishment. Because of the illness of Dr. Jennison, she later gave up the work.

December 18, 1941, San Diego Union, A-1:1. United States requested to build 3,000 more San Diego homes for defense workers.

December 18, 1941, San Diego Union, A-3:7. San Diego Chapter of American Red Cross announced immediate closing of production classes in Balboa Park; surgical dressing units will continue their work temporarily and administrative offices also will be open for home service; Major Charles H. Lyman, U. S. M. C., retired, chairman of the San Diego Chapter added that the Red Cross is seeking other quarters for its activities..

December 19, 1941, Minutes of the Board of Park Commissioners.

On December 9, 1941, under order of the City Manager and General R. E. Mittelstadt, Commander of San Diego Sub-sector, the Playground Department vacated the Gymnasium and Federal Building, the Photographic Arts Society vacated the Photographic Arts Building, and units of the San Diego

Sub-sector were established in the aforementioned buildings as well as portions of the American Legion Building and Hall of Education. On December 10, occupancy by these units was extended to all the House of Pacific Relations, the second floor of the Park Administration Building, the Indian Village, and outlying park areas including the 11th avenue canyon road and the west side lawns.

December 21, 1941, San Diego Union, C-7:6-8. Reginald Poland, director Fine Arts Gallery, declares "We need art more than ever."

December 24, 1941, Letter, From: Walter W. Cooper, City Manager, City of San Diego, to Commandant, Eleventh Naval District, San Diego, Calif.; National Archives, Pacific Southwest Region.

Dear Sir:

By your letter of December 10, 1941, the City of San Diego was advised that the United States, acting through your office, had commandeered for military purposes, certain city owned buildings in Balboa Park, designated from the official plat of park buildings as Buildings Nos. 11, 12, 13, 15, 16, 19, 20 and 60.

By your letter of December 13, 1941, the City was advised that the United States, acting through your office, has commandeered for military purposes additional city owned buildings in Balboa Park, being Buildings Nos. 28, 34, 37 and 41.

By your letter of December 17, 1941, you advised the City of San Diego that it would be necessary for the United States to occupy an unimproved and undeveloped area in Balboa Park located in an east and west direction between Park Boulevard and the Zoo and in a north and south direction between the Museum of Natural History and the Roosevelt High School grounds, for the purpose of temporarily expanding the Naval Hospital facilities, it being understood that only temporary structures would be erected upon this area, and that the same would be removed after the necessity for them ceased.

By your letter dated December 19, 1941, the City of San Diego was further advised that the United States, acting through your office, had commandeered for military purposes additional city owned building sin Balboa Park, being Nos. 29, 30, 35, 36 and 40.

The City has been requested to lease to the Government the buildings as well as the area required for the construction of temporary buildings and facilities.

In a recent conference with Captain Mathews, of your staff, which was attended by the Mayor, the City Attorney, and the writer, it was made clear that the city administration is powerless to lease to the Government either for a definite or an indefinite term any portion of Balboa Park or the buildings therein, since there exists no provision or authority of law to do so except pursuant to an election by the people of the City. Necessarily, therefore, the Government's occupancy of the buildings and portions of Balboa Park required by it must be based upon such war-time powers and authority as the Government may possess.

At the conference we attempted to make clear that, while we have been advised that the City is in no position to resist the taking over by the Government of Balboa Park for military purposes for the duration of the war, the city administration does not to any degree resent the emergency procedure. On the contrary, as I think you will agree, the civil authorities of the city have done, and are doing everything legally within their power to cooperate with the Federal Government and the military authorities thereof to the fullest extent.

Very truly yours,

THE CITY OF SAN DIEGO

Summary of Events in 1942

(Note: Dates of events are approximate only.)

Snyder Continuation School dedicated (January 9, 1942)
Area in Balboa Park allocated to Boy Scouts (January 28, 1942)
USO dedicated in Balboa Park (February 21, 1942)
Julius Wangerheim died (March 11, 1942)
Balboa Park Navy Training Center area named Camp Kidd (March 29, 1942)
Navy gets use of plunge in Balboa Park (April 5, 1942)
Red Cross headquarters opened in Balboa Park (April 8, 1942)
Falstaff Tavern used of recreation for convalescent sailors (May 30, 1942)
Navy recruits sworn in at Organ Pavilion (June 6, 1942)
City organ recitals dropped (June 27, 1942)
Horse show in arena at Balboa Park (August 10, 1942)
Japanese tea garden converted to Red Cross Center (August 23, 1942)
No private air-raid shelters in Balboa Park (September 11, 1942)
Navy organ recital for servicemen (November 8, 1942)
First Aid instruction in Fine Arts Gallery (November 22, 1942)
11th Avenue freeway changed from 6 to 4 lanes (December 6, 1942)

January 4, 1942, San Diego Union, B-1:1, B-2:1. San Diego Museum begins 5-year plan of modernization; go-ahead signal given by United States: "Let's bring it back alive!" slogan for program, by Ruth Taunton.

San Diego Museum Fine Arts Gallery, Natural History Museum and San Diego Zoo are keeping doors open to public this winter; Malcolm J. Rogers, museum curator, plans to eliminate museum fatigue with realistic scenes that are on an eye level; early history of museum recounted; admission has been free since 1925.

January 4, 1942, San Diego Union, B-1:8, B-2:5. Recreation aid given in San Diego; playground and recreation department has completed its 13th year of organized effort; W. A. Kearns, director of recreation and physical education; sports programs help reduce juvenile delinquency.

January 9, 1942, San Diego Union, B-3:1. Snyder Continuation High School new classroom unit just completed and furnished at cost of \$35,000; dedication was yesterday.

January 18, 1942, San Diego Union, B-1:1-7, B-2:1. San Diego offers newcomers advantages undreamed of in 1883; metropolis replaces barren hills, by Ruth Taunton.

January 23, 1942, Letter: The Commandant, Commandant's Office, Eleventh Naval District, San Diego, California; To: The Commanding Officer, Naval Hospital, San Diego, California, NH16/A-1/A16-3 (Serial No. P-5053); Subject: City Property Reserved for Possible Hospital Site in Balboa Park, National Archives, Pacific Southwest Region.

Reference: (a) Com11 ltr NH16/A1-1/A16-3, to W.. W. Cooper, dated Dec. 17, 1941.

Enclosure: (A) Copy of Will C. Crawford's letter to Public Works Officer, dated Jan. 14, 1942.

1. By reference (a), the Commandant requested that City Manager to take no action which would divert to other use, the area located in an east and west direction between Park Boulevard and the Zoo, and in a north and south direction between the Museum of Natural History and the Roosevelt High School grounds.

2. Enclosure (A) is a copy of a letter from the Superintendent of Schools, requesting information as to whether any building plans on the part of the Navy will interfere with the City School development plans, whereby the area between the Indian Village and Spanish Village was to be reserved as automobile parking area.
3. Inasmuch as the extensive program for hospital purposes on this site was not approved by the Department, information is requested as to whether, in your opinion, any part of this area should be retained. Comments are requested.

R. S. HOLMES

(In writing) Comd't.

January 28, 1942, Minutes of the Board of Park Commissioners.

Moved by Mr. Sessions, seconded by Mr. Friedman and unanimously carried that an area in Balboa Park located south of Upas Street and west of Richmond Street . . . shall be officially allocated to the San Diego Area Council of the Boy Scouts of America.

8. "The general public shall not be excluded from the area except at such times as their presence would conflict with the program of scouting."

Inasmuch as the occupancy of Balboa Park by various units of the military has materially effected the park program, it was moved by Mr. Friedman, seconded by Mr. Sessions and unanimously carried that a regular schedule of meetings of the Board of Park Commissioners be discontinued and that meetings be called by the President upon occasions necessitating such meetings.

January 29, 1942, Letter, From R. S. Holmes, Rear Admiral, USN, Commandant, Eleventh Naval District; To; "Dear Sir"; Noy-4412 (PW), National Archives, Pacific Southwest Region.

Dear Sir:

There is enclosed a copy of a letter from the American Legion, dated December 31, 1941, in which request is made that consideration be given to the possibility of reimbursement to the Legion for expenditures made over the past 18 years or so to cover improvements made by the Legion to Building #15 in Balboa Park. An earlier letter claimed cash reimbursement but this was voluntarily withdrawn and this substitute claim states that if the American Legion can secure the use of the Building, after the war is over, in approximately the same condition as when vacated, the use by the Navy of facilities paid for by the Legion is agreeable to the Legion without claim for compensation.

In taking over the building, the Navy also took over considerable furniture owned by the Legion and arrangements for payment therefore are underway. It is understood that the permit from the City to the American Legion covered no rental charges and provided that structural improvements became the property of the City, and, consequently, the City rather than the American Legion, is the owner of the work covered by the attached letter.

The Navy has installed numerous improvements in Building #16 which has greatly increased its intrinsic value. The primary item torn out was the stage and adjacent partitions which were of comparatively little value.

Just what arrangements will be made at the time the structure is returned to the City cannot be foreseen at this time, but the Commandant is inclined to file the claim of the American Legion without action at present and prior to acknowledgment of its receipt, and expressing appreciation of their most cheerful cooperation requests the views of the City on the matter.

Yours very truly,

R. S. HOLMES

February 12, 1942, Letter, From: R. S. Holmes, Rear Admiral, USN, Commandant, Eleventh Naval District, San Diego, California; To: "Dear Sir"; NH16/A1-1/A16-3 (PW), National Archives, Pacific Southwest Region.

Dear Sir:

In reply to your letter of January 14, 1942, in the matter of parking area in Balboa Park, adjacent to the Administration Building which you plan to construct, you are informed that the Navy requested the City of San Diego to reserve the area between Park Boulevard and the Zoo, and between the Natural History Museum north to, and including Indian Village, for future expansion of Naval Hospital facilities.

It is understood that this new Administration Building will be located west of Alameda Street, and not on the area reserved for Hospital expansion, and the only encroachment would be the use of a portion of the area desired by the Navy for parking purposes.

While the construction of new buildings for Hospital expansion in Balboa Park has not yet been authorized, the Navy desires to continue to retain this site in reserve for possible use at a later date.

There is no objection to the temporary use of a portion of this area for parking purposes.

Very truly yours,

R. S. HOLMES

March 14, 1942, Letter, From: R. S. Holmes, Rear Admiral, USN, Commandant, Eleventh Naval District; to Walter D. Cohn, in charge of USO Bldg. #12, Balboa Park, San Diego, California, NH16/A1-1/A16-3 (PW), National Archives, Pacific Southwest Region.

Dear Mr. Cohn:

The enclosed print shows the area in Balboa Park which was taken over last December by the Navy for hospital expansion. This area is under military control of the Medical Officer-in-Command of the Naval Hospital who is responsible for its condition and safety.

All activities formerly located within this area have been removed except for the Red Cross, which is now moving to an outside location, and the United Service Organization Recreation Center now functioning in the west end of Building 12.

Security of the Naval Hospital necessitates military control of all activity within the Hospital area. This area includes the U. S. O. recreation unit and the Commandant has directed the Medical Officer-in-Command of the Naval Hospital to assume the same military control over this unit as is exercised over all other portions of this area.

This will require frequent inspections for sanitation, removal of rubbish, sufficiency of fire protection measures and control through the issue of passes to all persons entering this area for legitimate reasons.

Some alterations in the structure in the interests of better safety and fire protection will be required. There will be some restrictions as to recreational activities, the details of which will be determined by the Medical Officer-in-Command of the Naval Hospital.

The Commandant is writing to Mr. Wayne Neal of the Office of the Federal Security Agency, Civic Center, informing him of the action taken, and stating that the Commandant is writing to the Secretary of the Navy, recommending that this U. S. O. recreational center be transferred to an outside location.

Yours very truly.

R. S. HOLMES

Encl. (1)
Mr. Walter D. Cohn
In charge of U.S.O. Bldg. #12, Balboa Park, San Diego, California.

March 14, 1942, Letter: R. S. Holmes, Rear Admiral, USN, Commandant, Eleventh Naval District, to Wayne Neal, Office of the Federal Security Agency, 602 Civic Center, San Diego, California; NH16/A1-1/A16-3 (PW); National Archives, Pacific Southwest Region.

Dear Mr. Neal:

The enclosed print shows the area in Balboa Park which was taken over last December by the Navy for hospital expansion. This area is under military control of the Medical Officer in Command of the Naval Hospital who is responsible for its condition and safety.

All activities formerly located within this area have been removed except for the Red Cross, which is now moving to an outside location, and the United Service Organization recreation center now functioning in the west end of Building 12.

Securing of the Naval Hospital necessitates military control of all activity within the Hospital area. This area includes the U. S. O. recreation unit and the Commandant has directed the Medical Officer in Command of the Naval Hospital to assume the same military control over this unit as is exercised over all other portions of this area.

This will require frequent inspections for sanitation, removal of rubbish, sufficiency of fire protection measures and control through the issue of passes to all persons entering this area for legitimate reasons.

Some alterations in the structure in the interests of better safety and fire protection will be required. There will be some restrictions as to recreational activities, the details of which will be determined by the Medical Officer in Command of the Naval Hospital.

A similar letter is being written to Mr. Walter D. Cohn in charge of the U. S. O. center in Building 12. Oral information as to this necessity was given to you and to Mr. Cohn on March 10, 1942.

Earlier action has not been taken in the case of the U. S. O. as was done for all other activities within this area for the reason that it was thought for some time that this Recreation Center would be of direct benefit to the Naval Personnel housed within this area. This personnel was primarily composed of hospital corpsmen, naval ambulatory patients and nurses. New plans call for more patients and few hospital corpsmen. Recent inspections developed not only the need for Naval control over fire protection, sanitation and safety, but also the fact that the U. S. O. proposes to hold dances, etc., involving activities and a degree of public access which would affect security and be disturbing to a Naval Hospital. This issue of passes for such purpose would be a difficult matter and would be unsatisfactory not only to the hospital but to those participating in U. S. O. functions.

The Commandant is writing the Secretary of the Navy recommending that this U. S. O. recreation unit be transferred to an outside location where no interference with or from Naval control will be encountered. This recommendation is also necessitated by the need of the Naval Hospital for use of the area occupied by the U. S. O. in Building 12.

Yours very truly,

R. S. HOLMES

(B) Copy of Comdt's ltr. to City Manager, dated March 13, 1942,

(C) Copy of Comdt's ltr. to CO, Naval Hospital, dated March 14, 1942.

1. The Commandant has recommended to the Secretary of the Navy that the U. S. O. Recreational Unit in Building 12, Balboa Park, be moved to a location outside the area used for Naval Hospital expansion and pending such removal has directed the Medical Officer-in-Command at the Naval Hospital, to exercise military control over the activities of the U. S. O. Unit.
2. This action lead to the issuance of information to the City Manager as to public access to the area involved. A copy of the letter to the City Manager is enclosed as enclosure (B). The guards at the west end of Cabrillo Bridge are maintained by the Training Station. These guards control automobile traffic moving east but do not restrict pedestrians. The hospital guard at the gatehouse just east of Building 24 will control passes to pedestrians entering the hospital area. The guards at the east entrance on Laurel Street will control both automobile traffic and pedestrians. The issuance of passes to the Naval Training Station is subject to such regulations as the Commanding Officer of the Training Station may deem

proper.

3. It is requested that any matters concerning coordination of guards to avoid duplication, as well as cooperation in the interests of simplifying the matter of passes to pedestrians entering the hospital area enroute to the Training Station Area be taken up with the Medical Officer-in-Command of the Naval Hospital.

G. M. RAVENSCROFT,
Chief of Staff.

Cc MOinC, Naval Hospital.

SUBJECT: City property in Balboa Park taken by Navy for Hospital and Training Station use.

Reference: (a) A1Nav 142, 7 Dec. 1941,
(b) Comdts. Disp. 110123, Dec 1941 to SecNav.
(c) Comdts. Disp. 201955, Dec 1941 to BuNav.

Enclosure: (A) Print of plan ND11/N1-1 (68), Hospital Expansion.
(B) Print ND11/N1-1 (73), Training Station Expansion.

1. As covered by references and as shown on enclosures, certain buildings in Balboa Park have been taken over by the Navy and converted for hospital and training station use.
2. The following tables enumerate the buildings and give their approximate value. These values are taken from the County Assessors appraisal for insurance purposes.

HOSPITAL		TRAINING STATION	
	Value		
<u>LAND 15 Acres</u>	<u>Unknown</u>	<u>LAND 33 Acres</u>	<u>Value Unknown</u>

Bldg. 11&12	\$ 62,010	Bldg. 28	\$ 28,120
13	54,055 [Elec. Bldg.]	29	11,900
14	37,370	30	3,570
15	48,370 [House Hosp.]	34	17,525
19	29,720	35	40,100
20	27,950	36	20,070
60	<u>14,755</u>	37	29,800
		40	4,255
		41 [Fed. Bldg.]	<u>76,000</u>
	\$274,230		\$231,340
		TOTAL	\$505,570

3. The above values do not represent cash outlay for the structures by the City. There has been some Federal assistance in past work of restoration such as WPA labor. Building 41 was the Federal Building during the last exposition and was probably paid for by Federal appropriation. Certain other buildings were constructed under funds of other agencies. The Navy has now taken over responsibility for maintenance and has done some repair work. Certain improvements have been installed by the Navy which will be of permanent value. No allowance is made in table for land values. There has been some destruction of improvements such as certain sprinkler systems which will have to be restored when buildings are returned to the City and some destruction of landscape improvements. Practically all of these structures were formerly leased without compensation to organizations such as American Legion, Veterans of Foreign Wars, Red Cross, State Guard, Art Classes, Vocational Schools, etc. and most of the lessees assumed responsibility for repair and maintenance. The U. S. O. still has a recreation center in the west end of Building 12. The public is restricted as to access and automobile traffic prohibited in general except that Laurel Street is open for through traffic for a short time to relieve the afternoon rush period.
4. The City has been most cooperative and no representations have been advanced for compensation. The city has, at various times in the past, transferred much valuable real estate to the Navy without cost and this policy has greatly contributed to the city's growth and prosperity. There are some objectionable features from a municipal viewpoint in that such property is removed from tax rolls and the increase in military personnel has increased operating expenses such as schools, traffic control, etc. and lately, with defense workers housing projects added, has involved improvements for sewerage, water supply, better roads, more road repairs, etc. This is offset in some measure by Federal funds for sewer work and Federal aid on some highways, useful WPA projects, etc. Federal control of rents, etc., while necessary and proper, has held down real estate values and while certain classes of citizens have benefited from this expansion, all have had to pay higher taxes including that large majority covering those less able to pay and receiving no benefit from the increased growth and many of whom preferred conditions when they were quieter.
5. The matter of mutual benefit is extremely complicated with much to be considered on each side of the general question of benefits and injury. Inasmuch as property elsewhere used by the Navy is, in general, being paid for at fair market rentals to owners, individuals or organizations who have not voluntarily contributed to the Navy, equities comparable in degree to those given by San Diego, the Commandant is inclined to the view that the City is entitled to compensation for use of this property. Had these buildings not been available, the expenditure of considerable money would have been required to secure equivalent facilities. The City is deprived of so much of the heart of its park as to greatly decrease its value to its citizens. The Commandant believes a rental of about \$1250 a month would be fair and reasonable and constitute a recognition of the City's helpful cooperation. This would amount to \$15,000 per annum or about 3 % on the tabulated values of the buildings with no allowance for land.

6. The City is not empowered to rent these park structures for compensation. Such act would require a vote of the people but it is probable that a proposition to accept this rent would received approval at an election. Rental could be made retroactive to about December 10, 1941, the date possession was first taken.
7. This matter has not been discussed with city officials and no information concerning this recommendation has been given to them. The views and instructions of the Secretary of the Navy on this question are requested.

April 6, 1942, Letter, From: Attorney General; to: Frank Knox, Secretary of the Navy, Washington, D. C.; by Messenger; 33-5-479; National Archives, Pacific Southwest Region.

My dear Mr. Secretary:

An examination has been made of the title date relating to 39.93 acres of land, more or less, in Balboa Park in the City and County of San Diego, California. This land is to be acquired without cost to the United States by authority of an Act of Congress approved April 22, 1940 (54 Stat. 145). Your reference number is KP-102/N1-13 (401211) U, and the file number of this Department is 33-5-479.

This land is briefly described as Parcel 3 under Section 2 of the aforesaid Act, and is particularly described in the copy of the deed from the City of San Diego to the United States of America, set out at page 65 of the abstract.

The abstract, consisting of 79 pages, was last satisfactorily certified on October 17, 1940, by Dayton L. Ault, Acting City Attorney of the City of San Diego.

The abstract and accompanying date disclose the title to be vested in The City of San Diego, a municipal corporation, subject to the rights or claims of persons in possession.

It is to be noted that under the aforesaid deed to the United States the land is conveyed for military purposes and particularly for use by the United States Government, in connection with and as part of the Naval Hospital now being operated and maintained by the United States Government.

It is also to be noted that under the said proposed conveyance the City of San Diego has reserved a perpetual easement for the laying and maintaining of underground public utilities, such as sewers, drains, water mains, gas, electric and power lines across any and all of said land whenever necessary or convenient.

It is to be noted further that the aforesaid Act of Congress expressly authorizes the acquisition of all the right, title and interest of the City of San Diego in and to this land, but the acceptance by your Department of the said transfer or quitclaim by the City shall not be construed as a relinquishment by the United States of its claim of title or interest in said land in any manner arising.

When the above objection has been met, the original deed to the United States, of which the enclosed in a copy, has been recorded, the abstract has been continued and certified to a date subsequent to the recordation of the deed, disclosing that nothing has occurred since the date of the present certificate to affect the title adversely, and showing the vesting of a valid title to the United States of America and this Department has been informed in writing that the above-noted perpetual easement will not interfere with the contemplated use of the land, the title will be approved subject to the aforesaid easement.

The abstract of title and related papers are enclosed.

Respectfully,

Attorney General.

Encl. 312915.

May 9, 1942, Letter, From: R. S Holmes, Commandant, Eleventh Naval District, San Diego California; To: The Judge Advocate General of the Navy, NH16/N1-13 (f) (Serial No. P-6162); National Archives, Pacific Southwest Region.

SUBJECT: Acquisition of 32.93 acres of land, more or less, in Balboa Park for addition to the Naval Hospital, San Diego, California - GIFT FROM THE CITY OF SAN DIEGO TO THE UNITED STATES OF AMERICA.

Reference: (a) JAG ltr. JAG:U:DWA:amn, SO-5093, dates Apr 29 1942 to Com11.
(b) Ltr. from AttyGen to SecNav dated April 6, 1942.

1. Reference (a) deals with the reservation which the City of San Diego has made in the deed transferring 32.93 acres of land, more or less, in Balboa Park to the Federal Government for an addition to the Naval Hospital, San Diego. This reservation retains for the City, a perpetual easement for the laying and maintaining of underground public utilities, such as sewers, drains, water mains, gas, electric and power lines across any and all said lands wherever necessary or convenient.
2. It is noted that the language of this reserved perpetual easement is identical with the language of the reservation written into the deed, dated September 4, 1940, by the Federal Government which conveyed certain lands at the Naval Supply Depot, Naval Training Station, Marine Corps Base and Destroyer Base to the City. The transfer of these lands to the City as well as authorization to accept certain lands from the city was contained in the Act of Congress, approved April 22, 1940 (54 Stat., 145).
3. In response to the specific question in reference (a), the Judge Advocate of the Navy is informed that the easement referred to above in the deed from the City for this land in Balboa Park will not interfere with the contemplated use of the land by the Navy Department.

San Diego Union, June 5, 1942, A-2:5-6. GERTRUDE GILBERT HONORED FOR S.D. CULTURAL SERVICE; Vase, Book Given In Recognition of Benefactions, by Constance Herreshoff (photo).

Gertrude Gilbert's long devoted to the cause of the arts in San Diego and her valued service to many civic enterprises called for recognition in tangible form, in the opinion of 200 of her friends, who yesterday presented her with a beautiful silver vase and an illuminated parchment book, in which was inscribed the names of the donors.

Fred Annable, president of the Fine Arts Society, served as chairman of the Gertrude Gilbert testimonial committee, which included such outstanding citizens as George W. Marston, the late Julius Wangenheim, Reginald Poland, director of the Fine Arts Gallery, Wayne von Schaick, of the San Diego Community theater, Mrs. B. A. Buker, secretary-treasurer of the Amphion club, and Mrs. W. H. Porterfield, honorary president of the San Diego Symphony association.

Wangenheim Sponsor

At the suggestion of Julius Wangenheim, made at a meeting of this committee a few days before his death, a silver flower vase was selected as a token of the grateful and affectionate regard in which Miss Gilbert is held by the community. The vase, standing 20 inches high, is engraved in a leaf and scroll design and bears her name and an inscription.

The parchment manuscript accompanying this gift, was beautifully illuminated in the style of the middle ages, by Florence Chenett Hale of the San Diego Art guild. The dedication and the names of the donors are lettered in black. Initials and small conventional designs are picked out in red, blue, and gold leaf.

Heads Amphion Club

No other citizen has done more to further the artistic development of San Diego than Miss Gilbert, a native daughter. For the last 31 years she has served as the president of the Amphion club, which has brought to the city each year the world's finest concert artists, through the Amphion Artists series. Before 1911, the Amphion club brought only occasional artists here. The Amphion club, founded in 1893 as a club of amateur musicians, meeting in each others' homes, will celebrate its 50th anniversary next fall with suitable ceremonies and an opening concert by Heifetz.

As a member of the board of directors of the Fine Arts society from its incorporation until 1940, when health necessitate some curtailment of her activities, Miss Gilbert's enthusiastic support proved an inspiration to the artists and art interests of the city. She also was for many years a member of the executive board of the San Diego Symphony association and has always been a generous supporter of our summer orchestral concerts. Her benefactions to other cultural enterprises in the city are numerous.

Saved Park Buildings

Largely due to Miss Gilbert and Miss Alice Lee, we owe the saving and rehabilitation of our park buildings after the Exposition of 1915. The city council voted to scrap the buildings, With Miss Lee and others, Miss Gilbert started a campaign to save and restore the buildings, raising \$83,000 for the restoration.

The general attitude toward Miss Gilbert is expressed in the gift dedication of the Gilbert testimonial committee: "In the midst of activities, in a world greatly distressed, we, your friends, pause for a little time to review, to contemplate your devoted and long-sustained labors on behalf of our community. We remind ourselves of your services to the Expositions, to the park buildings, the the Fine Arts gallery, to the Amphion club, and to the many other civic and especially musical enterprises and we know that your contribution toward a more gracious way of life in our San Diego is incalculable.

"And so, we who have benefits so much thereby do ourselves the honor of offering you this expression of our enduring appreciation."

June 10, 1942, Letter, From: R. S Holmes, Rear Admiral, USN, Commandant, Eleventh Naval District; To: Mr. Walter W. Cooper, City Manager, City of San Diego, San Diego California; NH16/N1-1/A16-3 (PW); National Archives; Pacific Southwest Region.

Dear Sir:

The Medical Officer in Command of the Naval Hospital has requested that the wire fence south of Building 13 be moved to include within the Balboa Hospital Extension are, the adjacent lawn.

Building 13 is the building on the south side of Laurel Street at the east end of the Hospital extension and is the building formerly occupied by the Red Cross. The lawn desired is somewhat less than one acre.

The extension is requested to permit from 600 to 800 convalescent patients from Building 13 to use the area for lounging and relaxation in the sun and to keep them off Laurel Street.

Park Superintendent W. Allen Perry desires the extended fence be kept within the surrounding path so that this path will be open to park workmen and to the public.

Your consent to the proposed extension of fence for this purpose is requested.

The Commandant desires to express his appreciation of the City's cooperation and also the assistance of the Park Department in maintaining and preserving these lawns and shrubs.

Yours very truly,

R. S HOLMES

June 15, 1942 (signed), Letter, From: R. S. Holmes, Commandant, Eleventh Naval District; To: Mr. Walter W. Cooper, City Manager, City of San Diego, Civic Center, San Diego, California; NH16/A1-1/A16-3 (PW); National Archives, Pacific Southwest Region.

Subject: Emergency Water Supply, Naval Hospital.

Dear Sir:

The Navy Department has made a study of the water supply requirements at the Naval Hospital, the Naval Hospital Annex and Camp Kidd in Balboa Park.

This study has indicated the necessity for providing an emergency water supply of two 1,000,000 gallon concrete surface tanks. The proposed location of the tanks is indicated on the marked prints enclosed herewith. A representative of the Navy Department conferred with Mr. Perry, Park Superintendent, and the proposed location of the tanks was tentatively approved.

It is requested that a permit be granted for the construction of these two concrete tanks including the necessary pipe lines. The urgency of providing this emergency water supply is of such importance in safeguarding Navy activities in Balboa Park that it is requested this permit be issued at the earliest practicable date.

Yours very truly,

R. S HOLMES

June 27, 1942, San Diego Union, B-10:1. Dropping of city organ recitals draws protests.

Protests against elimination of Royal A. Brown as city organist and cessation of recitals on the outdoor organ in Balboa Park for the duration were made to the city council yesterday.

Protestants included the Rt. Rev. John M. Hagerty, pastor of Our Lady of Angel church; the Musicians' Protective Association of the American Federation of Musicians; and the San Diego chapter, American Guild of Organists.

Walter Cooper, city manager, explained that Brown's contract expires Wednesday and that no funds were allocated in the city's 1943-43 budget for continuation of services.

"It's too difficult for people to get into the park now that the navy has taken over the greater part of the grounds," said Cooper. "Due to the war and other circumstances the organ as a cultural institution is out of the picture. Tourists are no longer with us, and the attendance does not justify continuation of the recitals."

SUBJECT: Entrance to Balboa Park to visit the Art Gallery.

Dear Admiral Holmes:

Since last Sunday there has been a noticeable absence of visitors in our Gallery. In checking, it seems that certain guards have refused the entrance to persons, now and again, who wished to visit this Gallery. I write to inquire whether some way may be effected whereby at least most of the pedestrians who come to the Park entrances, wishing to visit the Gallery, may be allowed to do so.

I have heard from H. S. Walsh, who this afternoon was on duty at the East entrance to the Park, that, effective last Saturday, no pedestrians were supposed to be allowed to come into the Park simply to walk into it and around it, and possibly through it. Also, Mr. Walsh, said, no one under 18 years of age is supposed to enter the Park, unless accompanied by an adult. This guard also said that, if he is supplied with the names of children and/or adults attending the classes in the Gallery, such persons should be allowed to come into the Park for the purpose of going to the Gallery.

Naturally, it is not for me to say what are to be the rules of Balboa Park, or to make any criticism pro and con about any of the rules that have been made by the armed forces. I write to inquire whether some way may be evolved, so that more of the public may have an opportunity to study and enjoy the Gallery and the wonderful permanent and temporary exhibitions which we have here.

It might be that "Mr. and Mrs. John Doe" would decide they would like to visit the Gallery, come to the East entrance of the Park, but not know that they would have to say they were coming to the Gallery in order to be admitted to the Park. They would not have any means of knowing, and would say, "We just wanted to look around." So they would be refused. If, however, the guard were authorized to ask: "What is your purpose in entering?" then they* would probably say, "To visit the Gallery."

As to our Junior membership, of which we have about 200, could they come in (although none of them are over 14 years of age), if they show a Junior membership card of the Fine Arts Society? As far as is possible, we will see that the names of all who are in regular classes are placed at both East and West entrances to Balboa Park. If you feel that it is necessary, we could send a notice to each one of our membership that, in coming to the park to visit the Gallery, he or she should show the Art Society membership card to the guards.

It does seem to bad, when we have such fine things here, and when people need them so terribly these days, that many should be kept away from such an opportunity. I think that we do realize your difficulties and the complications in connection with Balboa Park. I hope that we are reasonable. We have certainly tried to be.

On our part, we have arranged exhibitions especially for the armed forces. (For example, we arranged a big exhibition by members of our Guild, which has been for over a month at Camp Callan, and is now going the rounds of the military centers. This was done specifically for those in the Service). We have had a Poster Competition, with prizes here, and are trying to arrange for craft classes for those in the Service --- partly therapeutic, partly for the general satisfaction of the men. I have organized a Camouflage group, and we are definitely working with those in the regular military service toward solving some of the innumerable problems requiring camouflage. We have let down the bars, and have the Gallery open every day, free. Even on such mornings as the Gallery is closed to the general public, we unlock the doors and always let the Army and Navy men in to see the collections. I am continually giving talks to those in the Service; have just this afternoon arranged for another group to come in. We have special talks for the nurses every month, and next

* i. e. those who had really intended to study the gallery.

Monday are having a big tea as well as an art program for them. This is for all the nurses in the military service in this area. Also, we are trying to arrange at least one superlative concert each month, the finest music by especially good, professional musicians, for men in the service. I merely mention this to suggest that we are sincere in our desire to cooperate.

I must not take more of your time. I write hoping that we may be able to help a situation which seems to have been growing in certain directions.

Appreciating any assistance,

Respectfully,

Reginald Poland
Director, Fine Arts Gallery
of San Diego.

July 12, 1942, San Diego Union, B-1:8, B-2:1. Stay-at-home vacationers have wide recreation choice in San Diego; beaches, parks give opportunities for varied activities, by Ruth Taunton.

July 12, 1942, San Diego Union, C-7:6-8. Monty Lewis, Frank Van Sloun work subject for informal discussion at Fine Arts Gallery today, by Julia G. Andrews.

July 14, 1942, Letter, From: The Medical Officer in Command, U. S. Naval Hospital, San Diego, California;
To: The Commandant, Eleventh Naval District; Via: The Commanding Officer, Naval Training Station, NH16/00; National Archives, Pacific Southwest Region.

Subject: Control of traffic through the hospital area in Balboa Park.

1. There have been no changes in the regulations governing pedestrians and motor traffic through the hospital area in Balboa Park since the civil guard was established there early in March.
2. Shortly after the hospital occupied the park buildings in January, the Director of the Fine Arts Gallery was visited and a general scheme of cooperation was agreed to. No changes have been made in these agreements. On numerous occasions since then, similar conferences either by telephone or by personal visits have been held. Every request made by the Director of the Fine Arts Gallery for the admission of special parties has been complied with, and additional guards have been posted to facilitate these arrangements. The only restriction of visitors to the Fine Arts Gallery via the Hospital reservation are girls under eighteen (18) years of age who are unaccompanied by adults or whose names do not appear on the list of art students furnished by the Gallery. This is not a new restriction, however, and the number is relatively small. It has been necessary in order to prevent young girls who have no intention of inspecting the Arts Gallery from gaining admission to the reservation for other purposes.
3. With respect to the statement contained in the letter of the Director of Fine Arts Gallery to the effect that attendance at that institution has declined recently, it has been noted by hospital personnel that since the Spreckels Organ Concerts were discontinued about July 1, there has been a marked falling off in the number of visitors to the park. It is believed that this factor may account for the decline in the number of visitors to the Art Gallery.
4. In this connection, it may be noted that when the hospital unit was established in Balboa Park, special care was taken to leave open direct access for the public to both the Organ Bowl and the Fine Arts Gallery without the necessity of visitors passing through the hospital reservation. This approach to the Fine Arts Gallery is an eight foot wide, shaded, gravel path, which leads from Alameda Drive adjacent to the Botanical Gardens and near the entrance to the Zoo. This approach may be used by visitors to the Art Gallery without passing through any part of the Naval reservation.

(Signed) W. CHAMBERS.

July 17, 1942, Letter, From: R. S. Holmes, Rear Admiral, U. S. N.; to Mr. Reginald Poland, Fine Arts Gallery, Balboa Park, San Diego, Calif.; ND11/NH16/A1-1, NC A16-3 (A2-Bm); National Archives, Pacific Southwest Region.

Dear Mr. Poland:

With further reference to your letter of July 8, 1942, on the subject of entrance to the Balboa Park Art Gallery, inquiry was made of the Commanding Officer, U. S. Naval Hospital, as to whether any changes had been made in the regulations regarding admittance to the Fine Arts Gallery, Balboa Park, that were in conflict with the Commandant's letter of March 13, 1942 to the City Manager of San Diego, or to the Notice to the Public published in the San Diego Union on March 20, 1942. Copy of the Commanding Officer's reply is enclosed.

The Commanding Officer of the Naval Hospital is responsible for the military security of the area in which the Fine Arts Gallery is located. He will cooperate with you in every way to permit visits to the Fine Arts Gallery that is consistent with the necessary security of naval activities in this area.

It is suggested that any further arrangements you desire to make for entrance to the Fine Arts Gallery be taken up with that officer.

Sincerely yours,

R. S. HOLMES
Rear Admiral, U. S. N.

cc: Capt. Wm. Chambers

July 18, 1942, Letter, From: Reginald Poland, Director, Fine Arts Gallery, Balboa Park; To: R. S. Holmes, Rear Admiral, U. S. Navy, Commandant's Office, Eleventh Naval District, San Diego; A16-3; National Archives, Pacific Southwest Region.

Dear Admiral Holmes,

I greatly appreciate your kind letter of July 17 to my letter, and thank you for this. With all that you have to consider and take care of, it means a very great deal to use that you are interested and are acting in the complicated problem we have.

On various occasions, as Dr. Chambers indicated in his note to you, he has been good enough to give us some time to discuss this same problem. He has always been most considerate, kind and cooperative. This has meant a very great deal to us.

It was simply that, in the instance of certain guards apparently interpreting rulings in perhaps a different way from certain of the other guards, and making for a still more complicated condition, that I have troubled you at all. I hope now that all the guards do understand exactly what the rules are, and that everything may therefore work out still more smoothly and satisfactorily to all concerned.

I have a date to see Dr. Chambers within half an hour, and if anything still needs clarification, certainly we should be able to straighten everything out.

With renewed thanks for your friendly assistance,

Respectfully,

(Signed) Reginald Poland,
Director.

Decision was made several months ago to move the U. S. O. unit from Building No. 12, Balboa Park Hospital Annex in order that the Naval Hospital could utilize this space for its activities. The Medical Officer in Command of the Naval Hospital reports that the situation in regard to providing quarters for bachelor Medical Officers is becoming increasingly serious and desires information as to when this space in Building No. 12 will be made available.

Mr. L. J. Seckels, local representative of the Federal Works Agency, has telephoned that the office of Mr. Wayne Neal, Field Recreation representative, Federal Security Agency in San Diego, has received word from Mr. Grove Sullivan, Area Engineer, to the effect that the work of remodeling a building known as the Parmelee-Dohrmann Building at "C" and Seventh Streets, San Diego, will be handled by the Federal Works Agency. In order that the Naval Hospital may be ahead with its plan for work in Building No. 12, it is requested that the Naval District be informed as to the status of this work and prospects for its early prosecution. Mr. Seckels stated he had no information about the priority preference rating having been established and information on this point is also requested.

Yours very truly,

R. S. HOLMES

September 23, 1942, San Diego Union, B-2:1. EDITORIAL: Keep It in Mind.

The reminder of Allen Perry, city park director, that some attention should be directed toward preservation of the buildings in Balboa Park after the war and that government assistance will be needed, is timely and to the point.

The park buildings constitute one of the most beautiful architectural groups in the nation and on two occasions they have advertised this city to the world through their part in housing international expositions of rare beauty and charm. Their utility also has been demonstrated in the intervening years and the part they are now playing in the national war effort is considerable.

With all the other millions of dollars invested in government structures in San Diego, the park buildings balance the community and afford an idea cultural background which should be preserved.

Subject: U. S. Naval Hospital, San Diego, California - Construction of dispersed storage facilities.

Reference: (a) Contract Authorization Act approved Aug. 6, 1942.

(b) VCNO ltr. to all shore activities and Bureaus and Offices of Navy Department
OP-10-ML S01014 1003 Serial 29610 dated Oct. 15, 1942.

1. It is requested that construction of three temporary storehouses at the U. S. Naval Hospital, San Diego, California be authorized.
2. These buildings are urgently needed to allow the activity to keep a normal stock of medical supplies. This hospital has at present 3,300 patients and the storage facilities available were provided for a hospital of approximately 1,000 beds. This situation makes necessary the use of basements and other spaces which are unsatisfactory for storage and even so the hospital is unable to store the necessary amount of supplies.
3. The buildings will be of the cheapest, one-story, frame construction and their structural stability will be sufficient only to serve the purpose intended for the period of their contemplated war use. The total estimated cost of three buildings is \$45,000 or \$15,000 each. Funds are available now under the reference Act from sums held in reserve for the Bureau of Medicine and Surgery.

4. This Bureau has considered this project in the light of reference (b) and is of the opinion that it is necessary for the war effort and that it has an direct and important bearing thereon.

L. Sheldon, Jr.
Acting.

November 24, 1942, Letter, From: The Medical Officer in Command; To: The Commandant, Eleventh Naval District, NH16/A1-1 (MDW:ml); National Archives, Pacific Southwest Region.

SUBJECT: Acquisition of Camp Kidd for the Naval Hospital, San Diego.

1. It is understood that the Naval Training Station has now no urged need for their overflow "Camp Kidd" in Balboa Park; this due to completion of their main great station and the extension of the training period from 5 to 8 weeks. The Naval Hospital extension into Balboa Park --- along Laurel Street --- is separated from Camp Kidd by a line fence only, in fact the two sites converge, the entrance into Camp Kidd being mainly through the hospital reservation. The patient load at the hospital is now nearing peak capacity, and in view of the war emergency, acquisition of Camp Kidd as a natural extension to the hospital site is urgently requested.
2. Casualties from the war zone in Southwest Pacific are now arriving, and must be expected to continue in mounting numbers. San Diego Naval Hospital maintains the professional personnel and surgical and medical equipment necessary to meet all these demands in a highly efficient manner, providing berthing space for ambulatory patients be available, this to provide large reserve wards to meet emergency demands created by incoming wounded evacuees.
3. The present complement of medical officers, nurses, and hospital corpsmen is considered adequate for covering this expansion. The hospital is prepared to treat and to manage all types of wounded, injured and medical cases. The new large additions to the surgical operating suites have been completed and are now in use. Specially equipped surgical suites for neuro-surgical, eye, ear, nose and throat, thoracic, abdominal, orthopedic, and plastic and reconstruction surgical cases are available. The medical service maintains completely equipped departments for neuro- psychiatry, cardiology, contagious diseases, respiratory diseases, gastro-enterology, arthritis, tuberculosis, and a diagnostic department. An excellent staff of trained specialists, surgeons and internists, nurses and corpsmen, is ready and in numbers sufficient to meet any emergency within reason.
4. The following chart shows the monthly admissions and discharges since January 1st this year:

	Total Admissions	Total Discharges	Average Daily Load	Peak Load
JANUARY	1694	1168	1347.935	1623
FEBRUARY	2032	1602	1945.1785	2125
MARCH	2480	2116	2263.5161	2456
APRIL	2166	2227	2352.0666	2432

MAY	2073	2124	2340.13	2488
JUNE	2018	1860	2370.30	2518
JULY	1704	1705	2503.40	2619
AUGUST	1854	1536	2520.06	2762
SEPTEMBER	1901	1803	2654.46	2930
OCTOBER	2348	2081	3082.13	3265
NOVEMBER (estimated)	2364	1795	3456.	3620

NOTE: - A steady increase in average daily load despite a remarkably high daily discharge of patients will be noted. Today we have a census of 3,620. The hospital has a capacity of 4,332 beds. This leaves 712 unoccupied beds. Recently two ships brought in a total of 600 war casualties. A census of 3,000 to 4,000 patients usually carries at least 25 percent ambulatory patients who may be moved about freely.

5. Camp Kidd's berthing and messing facilities are ample for 2,000 convalescent wounded and probably 1,000 additional medical cases. This vent would allow for substantial reserve main hospital surgical and medical ward spaces for bedridden wounded and seriously ill.
6. Dispersment of the convalescent sick from the seriously ill would permit the streamlining of administrative and professional management so that no additional professional staff would be necessary except a normal increase of attendants should the patient load exceed 5,000.
7. Cost of Conversion. Necessary changes to convert Camp Kidd into additional hospital wards would be practically nil. No alteration, no major structural changes are contemplated. The existing buildings are newer and in much better condition than the Park buildings now occupied on Laurel Street. They are dry, amply heated, and well ventilated. They will serve as comfortable wards without alterations. Messing facilities are ample and would permit food carting as readily as our present system at the main hospital to our outlying wards.
8. Provisions for needed recreational facilities at the hospital have been deferred in keeping with recent material restrictions made necessary for the prosecution of the war. The Camp Kidd site contains recreation rooms, outdoor amphitheater, library, and game spaces that would cover this really serious situation very well.
9. To summarize, -
 - (1) Camp Kidd provides a natural expansion to present cramped hospital facilities.
 - (2) This at no additional Government cost and no delay in occupancy.
 - (3) The present administrative and professional staff is considered ample to take over and maintain this site as additional wards to our present Balboa Park Hospital Annex.
 - (4) Needed recreational facilities for the hospital would be immediately provided.
 - (5) The need for additional hospital beds for the care of incoming wounded is considered urgent, especially as San Diego's proximity to the Southwest Pacific renders it an important debarkation center.

O. 10501; National Archives, Pacific Southwest Region.

Subject: Acquisition of Camp Kidd to augment facilities at the Naval Hospital, San Diego.

References: (a) WPM&S-46.
(b) 11ND-M&S-46.

Enclosure: (A) Communications from BuPers to NTS, SD TWX-11-16-1205/PSt; and from NTS SD to BuPers - TWX 11-16-1155/PST.

1. In March, 1942, a survey was made to determine the maximum number of hospital beds required in the Eleventh Naval District. This estimate showed that 6,250 were required. These were provided by reference (b).
2. During the past eight months the three existing hospitals in this District have been expanded, or are being expanded by current construction, as follows:

<u>BEDS</u>	
Naval Hospital, San Diego	4,300
Naval Hospital, Corona	1,000
Naval Hospital, Long Beach	<u>300</u>
Total	5,600

Expansion of the Naval Hospital, San Diego has been completed. The Naval Hospital, Long Beach, will be commissioned December 15, 1942, but additional ward buildings at the Naval Hospital, Corona will not be completed until March, 1943.

3. From these comparative figures, it will be seen that the total number of hospital beds in sight is 650 less than the plan expansion, exclusive of other factors which have developed since last March.
4. The survey referred to in paragraph 1 above, was based upon 60,000 Naval personnel to be concentrated in the District. Since that time, however, many District Units have been constructed which were not planned in March, 1942. Furthermore, many District Units have been expanded very much beyond their original plans. A recent re-survey of personnel shows that there are now approximately 170,000 persons within the District, either actual or planned.
5. Using the figure of 170,000 as a base, and applying the factors as directed in references (a), (40 beds per thousand for seasoned personnel, and 60 beds per thousand for trainees) shows that 7,700 hospital beds are required, exclusive of the 3,000 beds demanded by reference (a); or a grant total of 10,700 hospital beds which should be provided in the Eleventh Naval District.
6. Since March, 1942 the Naval Hospital at Camp Pendleton has been authorized and is now under construction with a bed capacity of 600. It is scheduled to be completed in March, 1943. These beds, added to the 5,600 mentioned in paragraph 2 above give a total of 6,200 beds in sight in the District, a deficiency of 4,500 beds (10,700 minus 6,200 equals 4,500).
7. In paragraph 5 of basic letter it is stated that facilities at Camp Kidd would provide 3,000 hospital beds in addition to the 4,300 now available in the Naval Hospital, San Diego, provided this Camp were diverted to hospital use. This would make a total of 7,300 beds available in this hospital and reduce the District deficiency, as point out in paragraph 6 above, to 1,500.

8. Experience gained during the past few months shows that there is a constant flow of war casualties from combat areas in the Pacific to West Coast hospitals. The Naval Hospital, San Diego, is rapidly reaching the limit of its capacity. Considering future land operations in the Pacific for which large Marine Units are being organized, it is reasonable to assume that such Amphibious Corps activities will be reflected in large hospital casualties, which will probably be sent direct to San Diego as had been done recently. The Inspector of Medical Department Activities, Pacific Coast, has recently stated that the hospitals in the Twelfth Naval District are about filled to capacity, and that consideration is being given to transferring some 500 patients to the Eleventh or Thirteenth Naval Districts. From this, it may be seen that the hospital situation on the West Coast is critical. It appears that the Bureau's estimate of 3,000 hospital beds for war casualties in the Eleventh Naval District, referred to in paragraph 5 above, is an understatement.
9. The question of the Navy commandeering hotels in this area for the augmentation of hospital facilities has been given careful consideration. The housing situation in San Diego is very acute, and there are not sufficient facilities due to the defense housing situation, to allow for commandeering of any of the hotels without interfering with the war effort. The only hotel which might be considered available for this purpose is the Coronado Hotel. This hotel has an estimated bed capacity of 800. Due to its location on the waterfront and the character of its construction as regards fire hazard, acquisition of this hotel is not recommended. This hotel is already partially leased by the Navy for the purpose of housing bachelor officers on duty in this area. Furthermore it has been determined that the conversion of hotels to hospitals for the Navy is not practical or economical. Additionally, acquisition of hotels for conversions would require separate hospital staffs and additional hospital equipment.
10. The alterations to all of the Exposition Buildings acquired by the Navy in Balboa Park, which include the Hospitals and Training Station Annex, were accomplished under the same appropriation - 17X1489.
11. In connection with the possible transfer of recruit training activities from Balboa Park, attention is invited to communications between the Bureau of Personnel and the Naval Training Station, San Diego, attached as enclosure (A).
12. The buildings in question are the property of the City of San Diego and were assigned by the Commandant to the Naval Training Station to permit the handling of the large number of recruits entering the Navy immediately after the outbreak of the war. Since this has become an established activity, the Commandant does not desire to transfer the use of these facilities without reference to the Secretary of the Navy.
13. In view of the foregoing, the Commandant concurs in the recommendation of the Medical Officer in Command, Naval Hospital, San Diego, as outlined in basic letter, and recommends that Camp Kidd be transferred to the Naval Hospital, San Diego, as additional hospital facilities.

MOinC, Nav.Hosp., SD.

November 27, 1942 (?), Letter, undated except for handwritten "11/27" notation; From: The Commandant; To: The Chief of the Bureau of Yards and Docks; Via: The Chief of the Bureau of Medicine and Surgery; NH16/A1-1/A16-3 (Serial No. P-8618); National Archives, Pacific Southwest Region.

SUBJECT: Alterations to Arcade of Building, Balboa Park Hospital Extension - Request for Funds for.

Reference: (a) ComEleven ltr NH16/A1-1 Serial No. P-8318 to BuDocks via BuMed dated October 30, 1942,
(b) BuMed ltr NH16/L803 (081*41) dated 10 Nov., 1942 to MOinC, NH, SD.

1. By reference (a) the Bureau was requested for funds to make alterations to one of the open arcades of the Panama Pacific [sic] Fair Buildings in Balboa Park, to provide a library and writing room for corpsmen at this activity.

2. By reference (b) the Bureau agreed that these alterations are necessary and requested that the Medical Officer-in-Command of the Hospital consider the possibility of accomplishing this work by maintenance labor.
3. The accomplishment of this work by the maintenance force is not desirable at the present time for the following reasons:
 - (a) This work is not a maintenance item, but one involving additional construction.
 - (b) The priority rating obtainable by the hospital for maintenance work is not sufficiently high to procure the necessary materials for these alterations.
 - (c) The maintenance crew is fully occupied by strictly maintenance items which would have to be neglected if this work were accomplished by the maintenance force.
 - (d) It is believed that the work can be more economically and expeditiously accomplished by the Contractors crew which is presently working in this area.
4. Therefore, it is requested that the Commandant be granted an allotment in the amount of \$5,000 for the accomplishment of this work. It is recommended that this be accomplished by a change order under Contract Noy-4412. All plans to be prepared by the District. No subcontractor required. Approximately two (2) weeks will be required for the accomplishment of this Project.

G. M. RAVENSCROFT,
Chief of Staff.

Subject: Acquisition of Camp Kidd to augment facilities at the Naval Hospital, San Diego, California.

1. Forwarded.
2. In view of the completion of three new Naval Training Stations this Bureau is in the process of removing all recruit training activities from Balboa Park, since these facilities are no longer required for such recruit training.
3. There is, however, a definite need for increased receiving station capacity at San Diego. The present receiving station, San Diego, which is located at the Destroyer Base has a capacity of 2,200 men. The latest report indicates that this receiving station is filled to over-flow, and that additional facilities are immediately required. It has been the intention of the Bureau to utilize Balboa Park for this much needed expansion. In addition to known needs, a sudden influx of personnel from combat theaters must be provided for. It is expected that such would be available at Balboa Park. To utilize Balboa Park as a hospital would necessitate augmenting the receiving station capacity at some other location by the capacity now available at Balboa Park.
4. This Bureau, therefore, recommends against the transfer of existing facilities at Camp Kidd, Balboa Park, to use as an adjunct of the Naval Hospital, San Diego.
5. In view of the prospective increasing need for additional receiving station capacity at San Diego, it is recommended that Balboa Park be established as an activity under the Commanding Officer, Receiving Station, San Diego, with the following official designation:

U. S. Naval Receiving Barracks
Balboa Park , San Diego, California.

6. If this recommendation is approved the Bureaus of Yards and Docks, Supplies and Accounts, and Ships are requested to set up the necessary maintenance allotments.

1943

Summary of events in 1943.

(Note: Dates of events are approximate only.)

Organ concert for servicemen (January 14, 1943)
Storm fells 400 trees in Balboa Park (January 26, 1943)
Naval Hospital graduates class of WAVES
(February 27, 1943)
Navy takes over Museums of Man and Natural History
and Fine Arts Gallery (April 11, 1943)
Houses of Hospitality and Charm used by
Navy nurses (August 22, 1943)
Horse Show (August 29, 1943)

(October 29, 1961, San Diego Union, A-37:1-6. Camp Callan remembered; What would it be like to return once again to your old wartime training camp? Here's what it was like to a recruit who as at Camp Callan, back in 1943, and remembered it well, by Robert S. Lorch.)

January 3, 1943, San Diego Union, A-10:1. The 68th annual meeting of the San Diego Society of Natural History will take place Friday at 4 p.m. in the director's room, Balboa Park.

January 5, 1943, Letter, From: The Commandant; To: The Chief of the Bureau of Yards and Docks; Via: The Chief of the Bureau of Medicine and Surgery; NH16/N19 (Serial No. P-9227); National Archives, Pacific Southwest Region.

Subject: Alterations to Buildings No. 5 and 36 to Increase the Detention Ward Facilities, U. S. Naval Hospital, San Diego, California

1. As a result of the great increase in census at the Hospital, certain facilities are now completely inadequate for the proper care and security of patients.
2. Additional locked space is urgently needed for the proper care and security of psychotic patients, pending their transfer to other institutions. To provide this additional locked space, it is recommended that Building No. 36, Ward 2 be encased with steel casements including necessary grates and locks.
3. With the increased census of the Hospital, a greater number of prisoners must be provided for. Some of these require medical and surgical care while serving sentences. To care for these prisoner patients, additional prison ward facilities are urgently needed. It is recommended that these additional facilities can be obtained by encasing Building No. 5, Ward 1, with wire netting and steel grates.
4. It is therefore requested that the Commandant be granted an allotment in the amount of \$3,000 for the alterations involved which includes fee, overhead and contingencies.
5. It is recommended that work be accomplished as a charge order to Contract Noy-4412; plans to be prepared by the District. Approximately 50% of the work will be subcontracted and four (4) weeks will be required for its completion.
6. It is the opinion of the Commandant that this project complies with the directive of the Secretary of the Navy for war time construction and is essential to the war effort.

G. M. RAVENSCROFT
Assistant Commandant

January 8, 1943, San Diego Union, A-B:2. Selected women, who have shown promise in machine work, are sent to the Ford Building in Balboa Park for advanced training in machine operating.

January 9, 1943, Minutes of the Board of Park Commissioners.

Board of Park Commissioners agreed to transfer of a portion of land lying within Balboa Park south of Upas Street and west of Richmond Street to the Board of Education.

January 10, 1943, San Diego Union, B-1:4, B-12:1. Mrs. Scott, San Diego Zoo worker, recalls start of San Diego Zoo; traces history; first admissions fee collected in 1923, by Ruth Taunton.

It was 20 years ago today that Dr. Harry Wegeforth, in a sudden burst of enthusiasm for the few animals that he insisted on regarding as a zoo, decided to charge the next unsuspecting San Diegan who visited them a 10-cent admission fee.

Last year 501,718 adults each paid 25 cents admission and considered it a bargain; 56,735 service men in invited groups and 9,220 children entered free, and really got a bargain.

With the exhibits now numbering more than 300 and the San Diego Zoological Gardens in Balboa Park ranked among the world's finest, a record total of 567,673 persons when through its gates in 1942, it was announced yesterday by the Zoological Society.

There is only one person still at the zoo who shared with Dr. Wegeforth the earliest beginnings of the now world-famous institution which he founded and headed until his recent death. She is Maude R. Scott.

The zoo area was set aside by the city council for the zoological gardens in 1921, and the few animals which Dr. Harry, as every one at the zoo knew him, acquired from the 1915-1916 exposition were shown free of charge until January 10, 1923.

"You could have bowled me over with a parrot's feather when Dr. Harry rushed up to me about 1 o'clock on a cold gray afternoon and announced: "We are going to start charging admission," Mrs. Scott recalls. "Entrance was through the old reptile house, later the café. I was told to sit in the middle of the doorway, collect a dime from any adult who wanted to pass, but to let children in free.

"It was such a cold day that I had to keep my fur coat on. When I began to cough and shiver, Dr. Harry brought a large rope and bundled in around my knees. I hate to think what I looked like."

As things developed, Dr. Harry couldn't have picked a better day to begin his experiment. There was an unusually large crowd and Mrs. Scott took in \$165, the customers accepting the new rules and regulations without questioning how they came into being.

Dr. Harry's next sudden urge came on the Fourth of July, 1924. Trotting around looking at animals was hungry, thirsty business, he explained to Mrs. Scott and the zoo must have a café.

"So we opened a café, if one could call it that," she said. "We had no equipment. I could hardly cook a meal at home anymore as I had to bring all my pots and pans down to the zoo. The sink had no drain board, the tiny stove no oven, the kitchen no bins. Our tables were boards and sawhorses.

"Dr. Harry had visions of a magnificent zoo, a magnificent restaurant, a magnificent future in general, and simply waved away our hard present. He invited the board in for lunch, asked me to serve fried chicken. I did, but the treasurer, one of our wealthy city fathers, also wanted hot biscuits. When I told him we had no oven, he came in the kitchen to see what we did have, stood there a long time, just looking things over. Soon after that we have a nice stove, tables and bins."

Through the years while the make-shift zoo was being developed in an orange grove and across barren hillsides of the park, Mrs. Scott had remained with what she calls "zoo concessions." She shared with Dr. Harry the excitement over the zoo's first shipment of rare animals from Australia and later shared the thrills of Belle J. Benchley, zoo executive secretary for many years, in watching the San Diego Zoo climb to top place among institutions exhibiting rare animals.

One of Mrs. Scott's last memories of Dr. Harry, who died in 1941, concerns a visit he made to the zoo café kitchen a few days before the end.

"He examined a fine new refrigerator that had been installed," she recalled, "then turned to me and chuckled: 'I wish they could see what you and I started out with --- I only wish they could.'"

January 13, 1943, San Diego Union, A-6:2. The City Council yesterday set up public hearing on proposal to take out of Balboa Park land at Upas and Richmond Streets for use of Board of Education as a site for its new Administration Building for February 16; after the hearing it is the present plan of the Council to place on the ballot at the April 20 city general election a proposal to discontinue use of that part of Balboa Park for park purposes.

January 14, 1943, San Diego Union, A-3:5. An organ concert open to all servicemen and women and their guests, but not to the general public, will be given tomorrow afternoon at 2 at the Organ Pavilion, Balboa Park; D. R. Smith, specialist first class, U. S. N. R., will be the organist.

January 17, 1943, San Diego Union, A-11:2-3. Baby condor born in captivity is on exhibition at the San Diego Zoo.

January 24, 1943, San Diego Union, C-7:6-8. Director reviews year's activities of Fine Arts Gallery, by Reginald Poland.

January 24, 1943, San Diego Union, A-10:1-2. San Diego Zoo gets rare Harpy eagle from Brazil.

January 25, 1943, San Diego Union, A-B:7. Naval Hospital corpsmen train to maintain comrades on firing line.

January 26, 1943, San Diego Union, A-1:3, A-A:2. Eight hundred trees fall victim to storm; about 400 in park.

January 28, 1943, San Diego Union, A-10:1. Park official hits opposition to land grant.

In opposing exchange of land proposed by the park commission and the school board, the city planning commission and its executive Glenn Rick, recently expressed an uninformed opinion, in the belief of Irving E. Friedman, president of the park commission.

January 31, 1943, San Diego Union, B-1:1. W. A. Kearns, recreation director make public yesterday a ten-year recreation program for San Diego.

February 2, 1943, San Diego Union, B-1:5. Public hearing set for February 16 on city school department proposal to exchange 3.53 acres it has in the zoo grounds for six acres at Upas and Richmond Streets.

February 7, 1943, San Diego Union, C-7:6-8. Flower panels, benda masks form new exhibits at Fine Arts Gallery.

February 9, 1943, San Diego Union, A-:1-4. Post-war project urged on Silver Gate Riding Club grounds; drawing of administration building proposed by schools on Balboa Park site.

Glenn A. Rick, city planning engineer, said that he believed the new site would be less objectionable than the Richmond and Upas location, against which the planning commission had registered a protest.

February 12, 1943, San Diego Union, A-7:1. National Recreation Association representative tells of City playground expansion from three playgrounds 20 years ago to 37 playgrounds today.

February 12, 1943, San Diego Union, B-3:1. City ponders ball park site at the foot of Broadway for an auditorium.

February 14, 1943, San Diego Union, A-8:2-3. Museum of Natural History gets buffalo, ibex heads.

February 14, 1943, San Diego Union, B-1:4. Because the Board of Education has withdrawn its requests for park land at Upas and Richmond Streets to be used as a site for a school administration building, there will be no public hearing on that request before the City Council Tuesday; instead the city schools are asking that a proposition to vote out of the park an area now occupied by the Silver Gate Riding Academy be placed on the ballot..

February 14, 1943, San Diego Union, C-7:6-8. Marie DuBarry will give talk at Fine Arts Gallery today on exhibit of animal paintings.

February 14, 1943, San Diego Union, D-6:2. St. Francis Chapel to be scene of marriage ceremony.

February 16, 1943, San Diego Union, A-5:1. City Council studies waves of attacks on San Diego women.

February 18, 1943, San Diego Union, A-6:2-3. Walter S. Lieber opposes park grant to Board of Education.

Editor: I am rather surprised that the board of education is wanting and about to ask the people of the city of San Diego to give them more of the precious acres of Balboa Park, and the worst of it is that they want to place thereon a purely business building. I feel that is the last straw that is about to break the back of a long-suffering public, for already there has been a misappropriation in several such instances.

February 19, 1943, San Diego Union, A-2:5-6. Miss Alice Lee, civic leader, dies on Massachusetts visit.

February 19, 1943, San Diego Union, B-1:5-6. San Diego projects included in \$70,000,000 post-war improvement program proposed yesterday by State Public Works Director.

February 21, 1943, San Diego Union, A-1:2-4. Richard Havemann, 68, San Diego Zoo animal trainer, dies of wounds received while saving San Diego Zoo worker from bear.

February 21, 1943, San Diego Union, A-11:1. Naval Hospital students score nearly perfect.

February 21, 1943, San Diego Union, A-18:5. Protests mount on proposal Board of Education proposal to reduce park.

February 22, 1943, San Diego Union, B-1:6. Dual committee to push plans for War Memorial Auditorium.

G. Aubrey Davidson, Civic Center committee chairman, pointed out that under state law veterans can petition the board of supervisors to levy a tax for construction of a war memorial auditorium.

February 22, 1943, San Diego Union, C-9:6-8. Fine Arts Gallery director will discuss Venice reflected in old paintings.

February 27, 1943, San Diego Union, B-1:2-3. Naval Hospital graduates class of 42 WAVES..

February 28, 1943, San Diego Union, C-3:2-6. Museum of Man holds prehistoric collection.

February 28, 1943, San Diego Union, C-7:6-7. Art of China will be topic of today's talk at Fine Arts Gallery.

March 7, 1943, San Diego Union, B:3-4. Fine Arts Gallery, Natural History Museum and Museum of Man in Balboa Park to be closed.

March 7, 1943, San Diego Union, C-3:2-7. Natural History Museum specimens range from flowers to dinosaurs.

March 7, 1943, San Diego Union, C-7:5-8. Julia G. Andrews will discuss "Masks in Art and Life" in Fine Arts Gallery.

March 12, 1943, San Diego Union, B-1:2-3. Military conversion of Fine Arts Gallery protested.

Walter Cooper, city manager, was instructed by the City Council to inform officials in Washington that the municipality desires to have the Fine Arts Building in Balboa Park maintained as an art gallery and does not want it converted to military use.

March 14, 1943, San Diego Union, A-9:1. Naval Hospital graduates 455 men.

March 14, 1943, San Diego Union, A-18:1. Work started to create a new U. S. O. center at 632 C Street.

March 24, 1943, San Diego Union, A-20:1. Mayor Howard B. Bard okays park building transfers.

March 15, 1943, San Diego Union, B-1:7. House of Pacific Relations group picks George W. Ryan, Jr., president.

March 17, 1943, San Diego Union, A-1:2-4, B:1. San Vicente reservoir added to San Diego system.

March 18, 1943, San Diego Union, B-1:2-3. Consolidated, Vultee aircrafts merge.

March 20, 1943, San Diego Union, A-7:3. Lt. Hugh Enfield, wounded in action, at Naval Hospital.

March 24, 1943, San Diego Union, B-1:4. First indoor playground to open tomorrow at 4352 University Avenue.

April 2, 1943, San Diego Union, A-8:1. Museum of Natural History slates nature outings.

April 2, 1943, San Diego Union, A-8:3. Four hundred and fifty six complete Naval Hospital work.

April 2, 1943, San Diego Union, A-8:7. Naval Hospital band to play at Pacific Square.

April 3, 1943, Memorandum, From: The Commandant; To: The Medical Officer-in-Command, Navy Hospital, San Diego, California; NH16/A1-1/A16-3 (Serial No. P-10210); National Archives, Pacific Southwest Region.

Subject: Hospital Expansion --- Balboa Park --- Buildings Nos. 22 and 24.

Enclosure: (A) Copy of Requisite Commitments from the U. S. Navy Department to the San Diego Museum of Man, preparatory to occupation of the Museum building.

1. Enclosure (A) has been submitted as a stipulation under which the directors of the Museum of Man agree to the use of Buildings Nos. 22 and 24, Balboa Park, for hospital purposes. Items (a), (b), (d), (f) and (g) of Part One appear logical and equitable, as does Item (a) of Part Two.

2. Comments on Items (c) and (e) of Part One and Item (b) of Part Two are requested, with special reference as to what arrangements have been made between the Museum of Man and the Hospital for payment, or taking on of the Museum employees by the Hospital.
3. Your comments on the other items are also requested.

G. M. RAVENSCROFT
Assistant Commandant

Part I: Requisite Commitments from the U. S. Navy Department to the San Diego Museum of Man, preparatory to occupation of the Museum building.

- a. The U. S. Navy Department shall assume and pay all expenses contingent to the packing and storing of Museum exhibits.
- b. The U. S. Navy Department shall assume and pay all expenses contingent to the packing, removal, disposition and storage of other Museum property.
- c. The U. S. Navy Department shall assume and pay the Museum salary, maintenance and supply budgets as they existed as of 3:30 p.m. March 5, 1943, during the period of occupancy by the Navy of the Museum premises.

City Budget Schedule

Position	Annual Salary
Acting Director	3,360
Secretary	2,316
Asst. Curator	2,208
Archaeologist	1,608
Janitor	1,908
Janitress	1,464
Maintenance and Support	Annual Allotment
Telephone and telegraph	160
Stationery and postage	170
Material and supplies	525
Fuel	250

- d. The U. S. Navy Department shall provide employment and at the same salary as his Museum remuneration for any S. D. Museum of Man employee, who is compelled to leave his present position due to curtailment of Museum activities, brought about by the Navy's occupation of the museum.
- e. The U. S. Navy Department agrees to meet the matter of the loss of revenue to the San Diego Museum of Man, arising from the suspension of its business through granting complete usage of its premises to the U. S. Navy Department, on the following basis, namely, an annual payment equal to the average of the five years preceding the date of occupation and that the same total of the revenue shall be made up of the items herein set forth:

Revenue Schedule

Membership Fees	649.00
Charges for Chapel Services	539.00
Publication and Photograph Sales	<u>45.00</u>
	1,233.00

- f. The U. S. Navy Department agrees to allow the Museum storage space in basement rooms 1, 2, 3, 4 and 5 during the period of occupation. It further agrees to permit any accredited San Diego

Museum of Man representative access to the laboratories and stored archaeological collections in the basements set aside in the San Diego Museum of Man, for the purpose of study and preservation of the said collections.

- g. The U. S. Navy Department shall make the herein described repairs in the new offices of the San Diego Museum of Man located on the second floor of the Balboa Park Administration Building, to wit: Seal the walls of two offices and paint the walls of the third office.

PART II: Requisite Commitments from the U. S. Navy to the San Diego Museum of Man for the post-occupation period.

- a. The U. S. Navy Department agrees to provide for the return of the premises and contents of the San Diego Museum of Man in the same location and condition as of March 5, 1943.
- b. The U. S. Navy Department agrees to meet the costs of employing the same number of San Diego Museum of Man employees and of the same degree of technical ability as existed on March 5, 1943 in order to consummate the stipulations set forth in Part II.

(Article ends here in apparently incomplete form.)

April 4, 1943, San Diego Union, B-1:5, B-12:2-3. Natural History Society "carries on" despite war; Navy takes over Natural History Museum as hospital; exhibits stored

April 7, 1943, Letter, From: The Commandant; To: The Medical Officer in Command, U. S. Naval Hospital, San Diego, California.

Subject: Balboa Park - Organ Pavilion Area, jurisdiction of.

1. Rearrangement of fencing in Balboa Park around the Organ Area is being undertaken as follows: The rearrangement will provide a side fence between Buildings 6 and 20 and a side fence between Buildings 12 and 15. The fence separating the Receiving Station Extension from the Organ Pavilion area will remain as at present and will mark the northerly boundary of the Receiving Station Extension. The gate fence between Buildings 15 and 20 will be removed throwing the Organ Pavilion area into the Balboa Park Hospital area.
2. The area above described will become a part of the Hospital grounds under the jurisdiction of the Medical Officer in Command, Naval Hospital. If the space immediately fronting the Organ is to be used for parking automobiles, some allocation of parking space for the Receiving Station Extension should be made. Ready access for Receiving Station personnel to the black-out switching panels for the Receiving Station Extension located in the Organ Pavilion will be provided for. The Medical Officer in Command will insure that the Park Authorities are afforded every facility for the maintenance of the Organ, the Pavilion and the grounds within the above area.
3. Arrangements for public events to be held in the Organ Pavilion will be handled through the District Public Relations Officer, who will arrange the necessary details in consultation with the Medical Officer in Command, Naval Hospital.

May 12, 1943, San Diego Union, B-7:3. City Council, U. S. Army agents set leasing parley.

Two land agents for the army, Charles A. Dickinson and Frank Cavanaugh will be called into conference with the city council Friday to consider leasing of city non-park lands to the army until victory.

The agents, it was said, still desire to lease certain parts of Balboa Park, but the city attorney's office contended yesterday, as it has for several months, that the council is powerless under the city charter to lease lands dedicated for park purposes and held in trust for the people of the city.

Only the people, it was contended, can decide by their vote what to do with park lands.

H. B. Daniel, assistant city attorney, told the council he is preparing two leases for land not within any park, and that he and Jean DuPaul, city attorney, will insist upon insertion of a clause stating that the nominal lease for \$1 shall be deemed to mean that the city is making a gift to the army and a contribution to the war effort.

It will also be specified that the nominal fee shall not be used by the army in any possible condemnation proceedings as the basis for attempting to fix the value of the property involved.

Dickinson yesterday had written the council a letter calling attention to recent passage of S. D. 1116 authorizing cities to lease park lands to the army, and expressing a desire that the city assist the army in its acquisition program.

DuPaul reminded the council that the bill has not been signed by the governor, and that, even if it had, it could not alter the provisions under which the parks of San Diego are held for the public and which forbid their being given away or leased by the council.

May 15, 1943, San Diego Union, C-2:1-2. EDITORIAL: Army Park Leases.

The War Department is reported to be dissatisfied because San Diego will not negotiate leases on park lands to be used by the army. City officials have explained that such leases are illegal; that there is no way by which they can be legalized short of a vote of the people and ratification by the state legislature. They also have pointed out that the city already has granted the army the use of all the park lands it has required without leases, and they properly inquire what all the fuss is about.

It has been the policy of San Diego always to grant any reasonable request by military authorities. There is no disposition on the part of the city council now to change that policy. Therefore, it now appears that the war department's reported dissatisfaction with the city's refusal to negotiate leases for specified terms is distinctly out of place. Why the insistence, particular in face of the fact that such refusal does not and never had deprived the army of needed lands?

These park lands have been specifically set aside for park purposes, and even state law cannot change that until and unless the people voter their approval. It would appear that the War Department might make an effort to understand this and let the matter drop.

May 16, 1943, San Diego Union, B-1:1. Garden workers needed in park.

"The city has an investment in its parks of about \$20,000,000, which should be protected to a certain extent, even though the country is at war," according to Percy C. Broell, assistant park director. "The war is taking many of our younger men from the park department.

“However, in San Diego are many men between 58 and 65 who are retired, or who may not be capable of doing heavy labor. These men might be able and willing to do gardening work, which will help preserve our park system through the war period.”

July 8, 1943, San Diego Herald, 3:5. New Zoo News

Establishment of a special children's gate at the main entrance of the San Diego Zoo, opposite the Spanish Village, was announced by officials of the San Diego Zoological Society.

Effective last Monday, all children under 16 unescorted by their parents or guardians must pass through this gate, which will be under the direction of Mrs. Lena Crouse, Chairman of the Society's Educational Committee. This gate will be open from 9 a.m. until 4 p.m. and all unescorted children must be out of the grounds by 4:30 p.m. daily, according to Mrs. Crouse.

"It is the plan for the protection of these youngsters to have them register with me at this special gate, so that I can know where they live, their parents' names, and their telephones, if any," said Mrs. Crouse. "Therefore, children under 16 years will be on record while they are in the zoo grounds, and we will be able to communicate with their parents should that become necessary. By the same token, the parents will be able to know the whereabouts of their children."

This move is being made in order to place more responsibility on the youngsters during the summer vacation when so many thousands visit the zoo and enjoy the birds and animals, it was announced by zoo authorities.

July 9, 1943, San Diego Union, B-1:3. Balboa Park swimming pool, foot of Texas Street, closed for repairs.

July 16, 1943, Letter, From: F. L. Annable, President, Fine Arts Society of San Diego; To: Rear Admiral D. W. Bagley, U.S.N., Commandant 11th Naval District, San Diego, California, National Archives, Pacific Southwest Region.

Dear Admiral Bagley:

Just prior to your arrival at San Diego Admiral Woods was here and informed the City Manager and the officers of the Fine Arts Society that the Navy wished to occupy the Art Galley in Balboa Park as a hospital for ambulatory cases. The matter was discussed quite fully and after receiving certain assurances from Admiral Woods on behalf of the Navy, we moved out of the building and surrendered it on April 1st to the representatives of the Navy.

That you may be fully cognizant of the understanding I attach a memorandum made after our conferences and submitted through the City Manager to the Navy.

Since we vacated the building we have had no communication from the Department, nor have we been compensated for the expenses of our move or the commitments we have been required to make because of it. I do not think it was the intention of Admiral Woods to promise for the Navy anything which would not be carried out, and it is probably the delay is due to some "red tape," perhaps in Washington.

Enclosed is a memorandum of expense which we have paid from our own funds, anticipating reimbursement from the Navy, and also some items for which we are committed and which are incurred because of the surrender of our building to the Navy. Shall appreciate you action to secure our reimbursement as well as to expedite the contract covering the transaction.

On behalf on the Fine Arts Society of San Diego,

Sincerely yours,

/s/ F. L. Annable,
F. L. Annable, President.

EXPENSES PAID BY FINE ARTS SOCIETY

Labor and material for packing	\$174.17
Repairing articles broken in moving	83.82
Labor and transportation expense (moving)	100.39
Lunches for movers	28.35

August, 1943, California Garden, Vol. 34, No. 2. BALBOA PARK, by W. Allen Perry

May I talk about Balboa Park from my own viewpoint, which is that of a landscape architect and park director. To me, it's the most interesting park in the country. Not that there aren't other parks as beautiful; many have specific elements of beauty that I downright covet. Not that there aren't other parks as functional. The difficult topography of Balboa Park hinders many of its functions. We have no great meadows, we have no expansive water features, we have no completely developed playfield. But we have the domination of a group of buildings architecturally so fine and so subordinately planted that laymen from all over the world immediately appreciate it. These buildings are known throughout the profession of architecture. Students in the larger area of landscape architecture study our layout as keenly as medical students study their anatomy. We have something great and something unique.

Development is only half the story. The original site had a terrific influence on that development. I'd like to quote from a statement made by Mr. Samuel Parsons. Mr. Parsons was a landscape architect brought out here from New York in 1902. We'll be mentioning him again, but in his first report on Balboa Park he said: "The setting of the park between a vast mountain system on one hand and the broad ocean on the other is unique. Harbor, bay, islands, sea, promontories, mountains and miles of open country, each with its own unusual and different character are all incorporated in the park scheme and form an inseparable and vital part of it; hundreds of square miles of land and sea are therefore *added* to the territory of this park." That's what Mr. Parsons said that long ago. Even with the surrounding buildings and developments, the main scheme of planting has kept the park open to many horizons and much of San Diego County seems to continue right on into Balboa park. That's the park as you and I know it today. But let's go back to the beginning, seventy-four years ago.

Today we don't know what San Diego's population is from morning 'til night. With all due respect for the estimates and guesses of the Chamber of Commerce, the Planning Commission, and the Post Office, we still don't know. But seventy-four years ago, in 1868, they knew down to the last individual. The population was 2,301. There were 915 houses. The real property was valued at \$2,282,200 and the personal property was worth another \$141,252.00. That was the size and worth of the community that had the audacity or the foresight or that spark of something that caused it to set aside 1,400 acres for a park.

To me the instrument of dedication will always be one of the most breathtaking things about the park. Lots of people think that Father Horton gave the land to the city. He didn't, but he wanted a park and he got Ephraim W. Morse, as his first assistant, and Joseph Manassee and Thomas Bush to drum up signatures on his petition to the Board of Trustees. A lot of us here today can't remember way back before the county sold out to the lawyers. We're of the school that firmly believes that if a legal document doesn't contain at least six pages of eight and a half by fourteen it couldn't possibly be legal. But evidently the lawyers weren't very well organized in 1868, or they were all out of town attending the State Bar Convention that day --- or something --- because all it took to

remove fourteen hundred acres from the city and set it aside forever as park land is this amazingly simple statement. You can find it in the City Clerk's office in the minutes of May 26, 1868.

Below that date it says, "Board of Trustees, City of San Diego, Present: Jose Guadalupe Estudillo, Marcus Schiller and Joshua Sloan. Votes counted according to the foregoing notice allowing Trustees to sell Pueblo Lands. Yes, thirty-five. Nays, one. (It would be interesting to know whether that was one Republican or one Democrat in those days.) Then comes the dedication of Balboa Park --- and I'm quoting again. "Moved and seconded that Lots (and they did take the trouble to number the Pueblo Lots) be for a park." No record of the motion being carried unanimously or otherwise, no record of the individual votes. That's all the time and paper and legal service it took to protect forever fourteen hundred acres.
